#### CHRONICLE & COMMENT

## " More Service To The Poor "

-Dr. Rajendra Prasad.

#### Civic Receptions To Leaders

P.R. Rajendra Prasad, the first President of the Indian Republic, in reply to the welcome address presented to him sometime ago by the Delhi Municipal Committee reminded the people of the big part Delhi had played in the freedom movement and called upon them as citizens of the capital to build up an ideal of selfless service for the whole country to follow.

The history of Delhi was replete with stormy events, he said. For the past several centuries it had remained the capital city. Delhi had witnessed the war of the Kauravas and Pandavas, and seen kingdoms of Hindu rajas, Mughal emperors and the rise and fall of British rule.

Delhi had seen the regal processions in their full splendour which even God might envy, and bloody massacres too. During the Congress movement it saw Congress processions being broken up by the police and it fell to Delhi's honour to witness the inauguration of the Sovereign Democratic Indian Republic.

Freedom should be used for the benefit of the whole people and not a few, said the President. The ideal before them should be not to make the "rich richer and the poor poorer," but to uplift the masses, fight disease, raise the standard of living of the people and enable them to live free from want and fear.

He appealed to the people to get over their petty squabbles and live in brotherhood and amity and co-operate with each other. Admitting that the people had sacrificed and fought selflessly the freedom's battle, he said that the time had come when they had to sacrifice even more. Only through their efforts could India be made an object of respect for other parts of the world.

Replying to a civic address presented to him by the New Delhi Municipal Committee President Dr. Rajendra Prasad called upon the Municipal bodies to devote more attention to the requirements of the poorer sections of the citizens.

Dr. Prasad said that for the last few years he had become a citizen of Delhi. He could, therefore, claim the same privileges which the other citizens did. An address by the New Delhi Municipal Committee to one of the citizens looked rather out of place, but he realized that the address was being presented not to him personally but to the office to which he had been called. Nevertheless, he proposed to address them not in his capacity as the Head of the State but as one of the citizens.

All municipal bodies, Dr. Prasad said, had to look to the supply of unadulterated food to the people. In places like Delhi even the provision of unadulterated milk was a problem.

Under these circumstances, the President pointed out, he wondered whether the municipalities could pay as much attention as was necessary to the poorer sections of the citizens on whom depended sanitation of the entire city.

had made it a rule to stay amongst the poorest class, riz., the Harijans. "Although I am not familiar with the conditions of the Harijans of Delhi, because I have not seen much of them except when I used to go to the Bhangi Colony to see Gandhiji, I must appeal to you that despite your financial difficulties, you must devote more attention to the requirements of this section of your citizens," Dr. Prasad added.

Deploring the use of unfair tactics in elections to high public offices, Shri Purshotamdas Tandon, the U.P. Congress President, in reply to a civic address presented to him by the Kanpur Municipality said that he would be the first to oppose that kind of Republicanism which hastened demoralization in the civic life. He exhorted the Municipal councillors to elevate the moral level in civic life by service and sacrifice.

Shri Tandon also mooted the idea that Municipalities should establish institutions for providing free shelter to the disabled and unemployed in larger cities with a view to resettling them.

Sheigh Abdullah, the popular national leader of Kashmir and Chief Minister of the State, replying to the address of welcome recently presented by the Madras Corporation said among other things:

# TOWNSHIP NEAR CALCUTTA

For building a township for small investors who could not afford to have building sites in Calcutta a large tract of land in Kanchrapara, originally requisitioned by the Defence Department, was taken over by the West Bengal Government some time ago.

# CHOLERA AND SMALL-POX IN THE CITY

# WEEK ENDED MARCH 18

|           | Attacks | Deaths      |
|-----------|---------|-------------|
| CHOLERA   | 253     | 105         |
| SMALL-POX | 206     | <b>13</b> 8 |

A fatal plague case was reported during the week. The last suspected plague case, which was not fatal, was reported in November.

# WEEK ENDED MARCH 25

|           | Attacks | Deaths |
|-----------|---------|--------|
| CHOLERA   | 312     | 114    |
| SMALL-POX | 319     | 252    |

There were eight deaths from epidemic dropsy in the week ended March 25 against nine in the previous week.

# GET YOURSELF INOCULATED

At the budget session in the West Bengal Assembly held on Tuesday, the 21st March, Dr. B. C. Roy, Chief Minister, West Bengal, stated that the area would be developed, providing all amenities for a town life.

# REASSESSMENT OF CALCUTTA PROPERTIES

Speaking at the same session Dr. Roy referred to the reassessment of Calcutta properties by the Corporation. There was an impression, he said, that the lands and bunildings in the city were under-assessed. The Government directed the Administrative Officer to reassess certain wards of the city. As a result of reassessment of some eight wards it had been estimated that the valuation would be increased by nearly Rs. 21 crores. As the existing rules stood in the way of reassessment in certain wards the Government were awaiting legal opinion on the matter.

"India can be a positive asset in the preservation of world peace and progress only on the basis of her unity and democratic traditions. These traditions had to be fostered in order to bring about the national reconsruction and moral regeneration of our people. This, of course is a huge task requiring unremitting industry and relentless patience."

"We in Kashmir," Sheikh Abdullah said, "have a human philosophy of life and we cherish the simple virtues of human sympathy, brotherlines and honest toil, but unfortunately there are some people and Governments, who put a higher premium on duplicity, disruption and brute force. We have been victims of this tyranny, when two years ago our country was attacked by the raiders. We suffered, we resisted and ultimately with the magnificent help of the people of India, we triumphed."

### CALCUTTA MUNICIPAL ACT AMENDED

The West Bengal Government adopted a Bill in the current session of the Assembly to amend the Calcutta Municipal Act of 1928 further. It

# C. E. O.'S WARNING TO BUSINESSMEN

The Chief Executive Officer, Corporation of Calcutta, wants the public in their own interest to make sure before entering into transactions for the purhease of workshops and factories that the businesses were covered by proper licenses.

Cases have come to notice where unlicensed workshops and factories have apparently been purchased by people, many of them are refugees, in ignorance of the fact that such businesses are unlicensed and their former owners are under prosecution for offences under the Calcutta Municipal Act. The public arc, therefore, advised in their own interest to make sure before entering into such trans= action that the businesses in question are covered by valid licenses required under the Corporation rules. It should be particularly noted that a trade license under Section 175 of the Cal-. cutta Municipal Act is not always sufficient and that many trades and factories require permission under Section 385 or license under Section 386 of the Act. Particular care should be taken to see that the permission or license has been granted by the Corporation.

was called the Calcuttal Municipal (Amendment) Bill, 1950.

According to the statement of objects and reasons, the Bill sought to do away with the system of nomination of councillors, reservation of seats for minority communities and members of the scheduled caste and abolition of special constituencies for trade interests and labour. It also sought to reduce the number of elected councillors from 95 to 75.

Lowering of qualifications for franchise and its extension to persons who have passed the Matriculation Examination or any equivalent examination and have resided in Calcutta during the greater part of the previous year, were among the proposals of the Bill.

# THE BEGGAR PROBLEM

# A CASE FOR INTERVENTION OF THE CENTRAL GOVERNMENT

[By Atul. CHANDRA BANERJEA]

BEGGING, like prostitution, is one of the world's oldest, and possibly one of the most flourishing professions. Modes of plying this craft are as different as they are ingenious. In Lucknow

The Migrant: She does not belong to Calcutta, still Calcutta has to be responsible for her and her children. A fit case for repatriation.

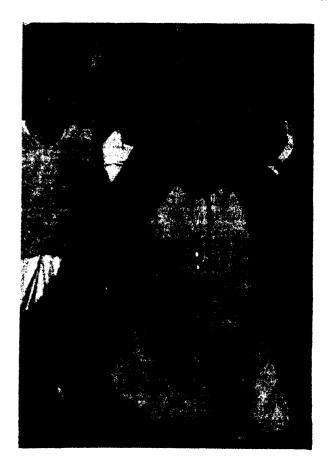

there was a beggar who used to move along the streets and bazars mounted on a stately elephant, who used to say that his daily requirement was Rs. 10 only, five rupees for his mount and the other five for himself and his family. I had seen him in that City of the Nawabs in the pre-war days. I do not know whether he is still there, perched carelessly on his magnificent elephant like an old Nawab of the olden days, though in rags, drawing awe and admiration from all and sundry. In Calcutta itself, police reports have revealed that there are large gangs of beggars, who are employed by influential and well-to-do people, who take away all their earnings; and while the actual persons engaged to ply this nefarious trade wallow in the mud of disease and misery, the employers roll in wealth. There are even miserable looking beggars who maintain large families by their income through begging and live in comfortable mansions.

# THE WORLD OF BEGGARS

The world of beggars is a curious one and a study of their ways and manners is of absorbing interest. To them begging is a regular trade and an independent business. They will scornfully resent and reject any suggestion to work for a living. Any sort of service is derogatory to their prestige, and they are very touchy about it. An able-bodied woman dressed in saffron robes roams from door to door with an earthen bowl in her hand begging for rice and small sums of money giving out that she has taken a wow to walk up to Kashi, or Brindsban or Tarakeswar and offer her puje to the deity there. It hardly needs to be said that she never goes to any of these places.

Then you will come across stout healthy men and women saluting the sun, prostrating and measuring themselves on the roads and begging for alms to enable them to offer puja in some holy place. Again, there is the man standing at street corners who prefends to sell 'pan' and implores you to purchase one even if you are not addicted to it for the sake of his ailing children and wife at home. There is the wandering mendicant who comes to your house when the menfolk are away in the offices, and trades on the gullibility of the religious minded women. When you return home from work, you are presented by your wife with a dozen talismans, roots and herbs which you have been required to hold on every conceivable part of the body and you also find your purse thiner by ten or twenty rupees. These are cheats and beggare combined.

There is no need of multiplying instances. Beggars are a cuming lot and are past masters in understanding the weak points of their victims. They have made an adroit study of human psychology. For the acquisition of these powers, they are given lengthy and painstaking training by their employers, and their troubles seldom go

The Charming Minatrel: Technically she is not a beggar, since she entertains her admirers by songs and dances. But for all practical purposes, she is a beggar and nothing but a beggar.

unrewarded. But, when all is said, they remain pests to the society. It is well-known how they engage persons to entice away children, deform them, send them to out-of-the-way places and employ them for begging purposes. They are clever people and have so far evaded detection and punishment.

# Number Of Beggars In Calcutta

The problem of begging is everyday becoming more and more acute. It has practically become a menace in every big city, where, with scarcity of food and lack of employment in the rural areas, there has been a large influx of people who have been reduced to beggary in the absence of any other honest means of maintaining themselves and their families. Once, however, they learn the art and become habituated to this easy method of earning, they are reluctant to eschew it, even if they are offered honest jobs. A recent report of the Press Trust of India states that in Bombay city alone there are about 10,000 beggars, most of them professionals. In Calcutta, according to recent reports, during the last decade the number of beggars has increased from 4,000 to more than 10,000. The same story is being repeated in all other big towns and cities. This increase in the number of beggars all over the country is, according to official admission, the result of the food scarcity and the post-war economic crisis. They can be classified generally into three categories:—diseased and infirm beggars, child beggars and able-bodied beggars. A well-planned measure to solve the problem will have to take into consideration the amelioration of the conditions of all these categories of beggars and finding gainful occupations for them so that the burden of maintaining them may be removed from the shoulders of the public.

The first step towards the removal of the menace is to enact a central legislation making begging an offence. The Government of West Bengal has a Vagrancy Control Act and maintains five Homes in the suburbs of Calcutta with an accommodation for 2,000 persons. Persons rounded up from the streets by the police and after they are declared as vagrants by the Vagrants Courts are detained and given vocational training in these Homes.

# A RECENT SURVEY

A recent survey of Calcutta's vagrants showed that 65 per cent of those picked up from the city streets are non-Bengalees, five per cent belong to Eastern Pakistan and the remainder 80 per cent are indigenous to West Bengal. The Bombay Beggar's Act came into force from August 1 last year and begging in the city was prohibited. The Bombay Government has also a scheme to rid the city of the beggar menace. The beggars will be rounded up and housed in a detention camp at Worli. The Bombay Government also proposes to repatriate the "outsiders" to their respective provinces. The natives of the province will be rehabilitated and training will be given to the able-bodied ones in some kind of vocational craft. It is also proposed to segregate the lepers and others suffering from infectious diseases.

The Meerut City Board has made bye-laws which prohibit begging within the city, requiring that no person shall beg at any place within the Meerut municipal limits unless he has obtained a license from the Medical Officer of Health of the Municipality. Even if a license is issued to a beggar, that person shall not be allowed to beg on any thoroughfare exhibiting any wound, disfigurement or disability of body. License should be issued only to those who are unfit to earn their livelihood by honest work. Evidently, this measure of the Mearut Municipal Board is a make shift

arrengement, an interim measure before it can finally decide what to do with the beggars in that city.

# STEPS TO CONTROL THE MENACE

Begging has been prohibited at Nagpur by legislation. The Kanpur Municipal Board has recently accepted a scheme for the rehabilitation of heggars and propose to construct a beggar home at a cost of about four lakhs of rupees. For this purpose a plot of 50 acres of land has been allotted in the suburbs of the city. It has been estimated that this scheme will provide for 200 destitutes annually. Able-bodied beggars will be given training in various sorts of handicraft and it is proposed to engage them, after they have gained some proficiency, on wage basis. The poor house will have separate accommodation for the diseased and the disabled. for those who suffer from infectious and communicable diseases, for the children and also for the ablebodied. The municipal authorities expect generous aid from the provincial Government. This is a good scheme deserving emulation.

It is pity that there is no Central legislation to eradicate this menace, and the solution of it has been left to the respective provinces. The enthusiasm of the provincial Governments in this regard also is tardy and half-hearted. The cities and towns are practically left to themselves to find out their own solution and it is because of this that they are experimenting in their own way, keeping the financial consideration always to the forefront. The West Bengal Government, for example, which has already a Vagrancy Control Act (enacted in 1943), has recently appointed a 13-man Vagrancy Advisory Board to advise the Provincial Government on all matters relating to the control of vagrancy. For an effective solution of the problem the principle of repartriating the foreign elements to their respective provinces will have to be accepted. No government can take the responsibility for the persons who have migrated from other provinces and have swelled the population living on the pavements. In Murch, 1948, the West Bengal Government repatriated about 200 vagrants. But the Government was good enough to give them a period of vocational training before repatriation so that they might become useful to their home provinces.

# GOVERNMENT RESPONSIBILITY

But the problem will not be solved simply by round ing up the vagrants and housing them in the Vagrants Homes or repatriating the foreign ele-ments. Every province must have a colony for beggars where they will be properly housed, looked after, treated in their ailments, imparted education and practical training so that they may become useful citizents instead of remaining as mere drags on the society. The colony must have separate quarters for the persons suffering from infectious diseases. Other diseased persons must be sent to hospital or infirmary situated within the colony. The child beggars must be properly schooled and the able-bodied beggars must have ample scope for vocational and other forms of training in wellequipped industrial centres. The West Bengal Government had established such a colony at a cost of about six lakes of rupees in the district of Midnapur, but the Government was never very serious about the matter and the scheme was abandoned after some time. An alternative sit was solution in Manufactural ten as a manufactural t

little progress has been made towards its development.

In the Western countries, provision of food and shelter for those unfortunate people who have nothing to fall back upon is primarily the responsibility of the Government. The Government maintains a large number of Poor Homes where they are provided for. In this the Government gets liberal and generous aid from the public. Private subscriptions are collected in churches and other places the receipts are sent and to ernment. In our country as well, a part of the huge temples income of the could be set apart for this purpose. This sum should be under the direct management and super vision of the State and should go towards the maintenance of the Vagrants Homes. The Gentral Government must take a direct responsibility in this matter and there should be an All-India Scheme sponsored by the Central Government to eradicate this menace. The problem can no longer be left to the Provincial Government or to the city municipal boards to be solved in a haphazard, halfhearted manner.

# LETTERS TO THE EDITOR

[The Editor does not held himself responsible for the views expressed by the correspondent]

CALCUTTA'S BEGGAR PROBLEM

THE EDITOR, CALCUTTA MUNICIPAL GAZETTE

Sir,—The comment appearing under "No Begging in Bombay City" in your Gazette of November 26, 1949, has attracted my attention.

I had knowledge that the Bengal Vagrancy Act was enforced in Calcutta in 1948. I also knew that there exists, or existed, a Directorate of Vagrancy with its office on the Upper Circular Road. Calcutta, where the Vagrancy Court also used to sit. There were at least three Vagrants' Homes in Calcutta besides the Destitute Homes started for the Famine Destitutes. In fact, in a report to the Government of Bengal I had suggested that the discrimination that was made between vagrant children and delinquent children should be abolished and both treated on the same principle of treatment of juvenile delinquency as conceived to-day. I am afraid, I have not been in touch with the developments in Bengal since the last two years

and would, therefore, like to be enlightened on the latest position as regards the tackling of beggar problem.\*

Incidentally, I may add a few sentences mentioning the work we, in Lucknow, are trying to do in this field. The tackling of the problem was taken up in 1940, by the Social Service League, Lucknow, a private organization. It was through the efforts of this League that the U. P. Municipalities Act was amended in 1942 to revise Section 248 of the Act to bring in a better antibeggary legislation. The amended Act provided a more effective legislation than before and recomrended the custody of a beggar in a Poor House where the disabled were to be cared for and the able-bodied and the juveniles rehabilitated after training in some craft. The accompanying case sheet will show the lines on which we proceeded for the rehabilitation of the beggars. The work of the League, however, remained quite inadequate in so far as the extensiveness of work was concerned, since it is almost impossible for any private organization like the League, depending upon private charity mainly for its funds. The League contimously insisted that the problem should be taken over either by the Government or the Local Government. The Lucknow Municipality has now taken over the problem and is proceeding with steps for tackling the problem effectively. It is proposed to tackle the problem through a separate department of the Municipality with a trained social worker to guide the work. It is proposed that adult beggars should be taken care of in separate Homes for men and women and to send juvenile beggars to existing Orphanages and Widow Homes (including Homes for Destitute women) after enacting a Municipal Act for the control and supervision of orphanages and widow Homes by the Municipality so that such institutions are run on lines adopted by institutions recommended by Children's Act and Immoral Traffic Act.

Yours faithfully, B. K. Roy,

Off Napier Street, Tabsinganj, Lucknow, December 10, 1949, Superintendent, Lucknow Poor House.

\*!If any reader of the Gazette should feel interested in sending us a brief account of the present position in the matter of tackling the beggar problem in Calcutta, we may publish the same in the Gazette.—Acring Editor.]

SPECIAL ARTICLES

# Winter In Calcutta

[By ARUN BHATTACHARYA]

This article is very much belated in appearance, Howver, the delay does not take away the interest of the article. It rather adds the mellow of "we pine for what is not."

S. Eliot should have written instead:
Winter is the cruelest month, breeding
Lilacs out of the dead land, mixing
Memory and desire . . . . . .

How I wish to murmur those lines just inside my own clothing in the morning before tea-time! You can ignore your mother, your wife even refusing tea just at the first call. It is heaven, heaven for one inside the blankets and shawls. You can hear the newspaper-hawkers crying loudly of Panditji's tour in America and the air crash over the city. But even you do not feel inspired to rise up and peep through the windows. Really, it is so, as the great poet suggested, your memory and desire are mixed up and you lose yourself in the midst of dreams and realities. You forget your immediate past, the present withers away in the winter softness that is pain and pleasure alike, and the future is lost in the whirlpool of imageries that you recollect in your own poetic moments. But you can not enjoy it for too long. Slowly but steadily you become conscious of yourself and come out of your cosy shelter. The steaming tea makes you feel yourself again and that 'airy nothingness' helps to remind you of the great Shakespeare. And then with a shawl wrapped round the body you enter the foggy lanes. You can not see the Sun, even of its rays. You can look high up in the sky and the sea-blue canvas makes you delighted and you feel confident again. You then pass the lanes, drop amidst the wide street where life had already started hours ago. The sweepers have cleaned the streets and the scavengers washed away the dirt. Not only that, the streets have been watered. The Calcutta streets are glittering, as if, with joy.

# PROLONGED TIME

The moments are so quick, so short in day time! They fly away—they do not stand and stare. You feel lost in a sense of bewilderment, arising out of the fleetingness of time—time, a fraction of your entire life—a reality. After all, what is there beyond time?

You try to avail the running double-decker and you miss. The next, the next—and then you become desperate. In that cold morning of a pale dying city you store all your energy and face life—a life vibrating with all its gloomy realities. You reach your office, but too late, too late! A red tick is there for you.

And there as usual: the head-assistants and the worn-out files—a gush of winter air at times thru' the northern window—the chaprashi, tea and the cigarettes, a bit of chat, loose gosaip, aenseless humour, nonsense talking and suddenly you feel for your shawl, and again that file. Time is prolonged here. Oh! how long, how long!

When you get up, the Sun is no more there to greet you, to bid you good-bye. The pale horizon becomes darker and darker and you feel cold, so cold!

# SILENCE AND LONGLINESS

Suddenly you feel the urge for a cup of coffee-coffee of the southern provinces. You are inspired instantaneously. But is it only for coffee? Surely not. There you feel free among the ideas. You meet your friends and meet intellectuals. You dream of those good old days of Dr. Johnson. There in that corner is sitting an old professor with his students, there a party man with his inspiring ideologies, in the extreme north, a writer of mediocre talent and in the middle there are critics. Businessmen come and go. They talk little and talk shop, wind up their conversation, pay the bill and go away. But these intellectuals sit tight till late at night and enjoy the world—the world of Shakespeare and Tagore, of Michael Angelo and Picasso, of democracy and humanism.

Is it cold—too cold when you come out of the coffee-house? The winter night is fast approaching the city—the streets are no more crowded. Here and there are lights flickering thru' the windows. Tram cars are running fast-faster in the lonely streets. You feel a cometary atmosphere and shiver within yourself. The sky above is brighter still and amidst the dazzling stars reflects a panorama of eternity. So wide, so free there-in those infinite spaces! You try to deepen your mind there and you feel the essence of the unknown. The north wind is blowing—the mist is slowly settling over the city and your vision becomes dim. Life has its romances too and 'in such a night as this' like Jessica and Lorenzo, you can recollect the memories of years past. After all, man lives in his dreams more than anything else. Suddenly a shiver runs thru' the nerves and you feel so cold! You hurry up and reach your home, stuffed with ideas. And then an hour later you are back again in your heaven—in winter and in shawls. The night, the silence and the loneliness!

# UNITED COUNCIL OF RELIEF AND WELFARE

The United Council of Relief and Welfare opened recently its office for West Bengal at 8, Government Place North.

The first meeting of the centre was held at Government House, Calcutta. The proceedings opened with a short speech by H. E. Dr. Kailas Nath Katju, in which he expanined the aims and objectives of the organization. Its main purpose, he said, would be to co-ordinate the activities of all social welfare organizations already engaged or desirous of taking part in refugee relief work and he was glad that representatives of so many social welfare organizations were co-operating with the centre.

Dr. Katju is the Chairman of the Council with Shrimati Phulrenu Guha, as Secretary. Shri H. C. Sen, Secretary to the Governor of West Bengal, is its inseres.

# Recent Art Movements In Paris-II

[By Asse H. SINEA]

(Concluded from the issue of 31st December, 1949;

EZANNE'S works at the first Exhibition held under the name of Impressionists in 1875 roused much indignation among the spectators. Many trails of Modern Art can be traced from Cezanne, whose objection to be included in the Impressionist school has strong grounds. Deviation on his part is so conspicuous that even a layman is impressed with it, when he is seen side by side with the Impressionists. His unique treatment of space and the stress on structural form, besides other characteristics, go a long way to differentiate him. He was well represented in the Exhibition. His works are beautiful as well as illustrative of the qualities for which he is famous.

Among the post-Impressionists, besides Cezanne we have Ganguin and Van Gogh. The new conception of nature which Ganguin brought into his paintings was the result of philosophical, moral and literary ideas, but they never disturbed the plastic qualities of his art. He discovered a harmony between what he saw and what he imagined. Never did he over-stress the imagination so much that the plastic qualities might suffer. Van Goglio's values of feeling and expression are not more illustrations of literary ideas transferred to canvas. His feeling for colour in combination with other features of his art form a dominant note which wust be understood to appreciate his works. The plastic qualities of his art impart a clear conception of space, whether he painted in too many details or in simple suggestion.

Since the advent of Impressionism almost every conceivable style and conception has been brought into practice. Impressionism, post-Impressionism, Fawrism. Cubism. Orphism, Negroism, Expressionism. Classism neo-Romadiam, Abstractism. Dadaism, Sur-realism—have all been theorised and

are still being widely practised. These numerous schoo's react against one another, and many artists practise a different form of artistic expression, simultaneously producing each his own product of art.

### SUR-REALISM AND ABSTRACTION

Sur-realism and Abstraction are the vanguard of these artistic forces. Sur-realism as a doctrine is noteworthy. But still it has not produced any major work of art. Along with a host of artists, Picasso, Matisse. Brague, Derain and Walch (who were represented in the Exhibition) were profoundly influenced by it. Through their adaptation its nesthetic and moral modification was brought to bear to fit in with artistic expression. Picasso is triumphant and prolific: triumphant in his indisputable tondorship and prolific in the amount of works he produces. He attempted so many styles, prompted so many movements and again proved his mastery of so many media. Matisso comes next. His course of development is one of gradual growth without any startling or abrupt change. His ideas settled on three principles: Simplicity, organisation and expression. His conversation piece in the Exhibition was fascinating. Chagall and Utrillo are instinctive painters -- a movement that preceeded Expressionism. Bonnard and Vuillard can only by named 'Intuitionist' painters. 'A work of art is a fruit of a character' and is so to Vlamic. His slap-lash, those melodramatic effects of contrasts have contributed to make 'Storm' his exhibit outstanding. Dufy's 'Rowers' is at par with his repute for the freshness of his inspiration, poised between Production and naivety. Van Dougen's exhibits proved that he has transformed his box of colours into a make-up box.

# Australia's Second City To Be Mayoral Mecca Melbourne To Welcome World Civic Leaders

[By GEOFF TAYLOR]

COUNCILLOR James S. Disney, Lord Mayor of Melbourne, Victoria, host-city for the 1956 Olympic Games in Australia, is sponsoring something new in Pan-Pacific conferences.

He has invited mayors of cities in Australia, New Zealand, Canada and the United States of America to attend a conference of city-fathers at Melbourne.

If all his invitations are accepted, Councillor Disney will be welcoming to Melbourne the civic heads of London, New York, Los Angeles, San Francisco, Ottawa, Vancouver, Toronto, Montreal, Quebec, Auckland, Wellington, Christchurch and Dunedin, as well as the Lord Mayor of each Australian capital.

Aim of the conference is to stimulate general interest in local government and promote a goodwill spirit on both sides of the Pacific.

Cr. Disney has discussed details of the conference with Alderman Ernest C. O'Dea, Lord Mayor of Sydney, who recently visited Vancouver as a guest of a Canadian airline now operating a service to Australia.

A preliminary conference of Australian Mayors was held at Melbourne in February.

Australian sportsmen Frank and John Livingston, competitors in last year's annual Los Angeles-Honolulu yacht race, stimulated pan-Pacific civic goodwill when they brought home to Melbourne a letter of greeting from the Mayor of Los Angeles, (Cr. Fletcher Bowron).

On Disney is confident that, despite traveldistances involved, the conference is no pipe-dream.

"It is so easy now to cross continents in swift air-hops". he said, "that I am very hopeful of a full attendance".

# Britain's National Trust

# Henry James' Home Among Latest Acquisitions

AMB House, in the picturesque old-world town of Rye, Sussex English home of Henry James, the American novelist who became a British subject, is soon to become the property of Britain's National Trust. James lived for nearly twenty years in this red-brick Georgian house. He found the peaceful atmosphere of his Sussex home ideally suited to his temperament and there wrote the bulk of his work. His study will be made into a memorial room when the transfer of the property to the Trust has been completed.

Lamb House is soon to be opened to the public and it is expected to prove a big attraction for American

tourists visiting Britain.

The proposed acquisition of Lamb House was revealed in a recently published list of National Trust properties which now number over 1,000. The Trust was founded in 1895 for the purpose of preserving lands and buildings of beauty or historic interest in Great Britain. The scope of the organization has since been extended to embrace furniture and paintings.

Another recent addition to the list of property under Trust control is 17th century Ham House in the County of Surrey, one of the best examples of domestic architecture of the period. This house also will shortly be opened to the public.

Much of the lovely farm-land in the Lake District, favourite centre for Britain's overseas visitors, is administered by the Trust and in its care also are the homes of many of Britain's famous poets and writers. These include Wordsworth's birthplace at Cockermouth. Cumberland; Coleridge's home at Nether Stowey in Somerset; the home of Rudyard Kipling in Sussex and Thomas Hardy's cottage at Higher Bockhampton, Dorset.

Entire villages have been taken over by the Trust. The village of Selworthy in Somerset and picturesque West Wycombe village in Buckinghamshire are among these. In Buckinghamsire also is Hughenden Manor, home of former British Prime Minister Disraeli, which was acquired by the Trust in 1947. Disraeli lived in Hughenden Manor for 34 years until his death in 1881. The Manor contains much of his funiture, pictures and books.

Most National Trust properties are open to the public. A small fee is usually charged for admission to the buildings while free access is given to the Trust's own lands.—By courtesy of British Travel Association.

### THE WORLD OF BOOKS

RABINDRA CHITRAKALA by Monoranjan Gupta; Published for Saraswati Library, C, 18-19, College Street Market, Calcutta; Price Rs. 6.

Shri Gupta's appreciation of the ideals and techniques of paintings and drawings executed by Poet Rabindranath Tagore, though not emanating from an artist by profession, is yet very much praiseworthy, and in writing the foreword of the book Shri Nandalal Bose, the present exponent of the Santiniketan School of Art, has said that the more there is discussion about the poet's artistic practice, the more such unparalleled production will meet public approval, who will find in the poet a myriad-minded personality. Rhythm was inalienable from the very existence of the Poet; so, in his art there is fullness of expression of order and harmony through certain patterns. No longer will the poet's workmanship in lines and colours appear to be whimsical and queer if only the poet's idea behind it may be guessed at. A bunch of the poets' coloured sketches and linear drawings, numbering 20, has been included in the book to offset a few articles, as "Rabindranath's Draw ings" "Rhythm of Lines and Forms",, "Technique of Rabindranath's Drawings and his subjects of study" "Assessment of the value of his Art and Appreciation." and a collection of varied opinions about the Poet's Art.

The book is printed and got up with some distinction.

TWO YEARS SINCE INDEPENDENCE: A Resume of the Activities of the Government of West Bengal, August 15, 1947-49; Published by the Director of Publicity, West Bengal; Price Rupec One.

The principal contents of the publication are: Birth of a Province; Our Finances: Looking after Patriots (an account of Government assistance to political sufferers); Food and Cloth (and other controlled commodities); Land and Land Settlement, People's Health; Education; Roads and Transport: Refugee Resettlement; Law and Order and the Press.

Issued on the occasion of the Second Anniversary of our Independence, August. 1949, the publication under notice takes stock of the activities of the Provincial Government during the two years after Independence. The province started its new life in August, 1947, with a deficit of funds compared to the urgent problems demanding immediate solution. Partition greatly complicated the situation affecting the old economic equilibrium and further complications were brought in by the influx of refugees from Eastern Pakistan, and the growing menace of subversive forces. Dr. B. C. Roy, Prime Minister of the province, has expressed hope of recovery from troubles in the "Foreword" in these words: "We can still, by closing our ranks, by rising above sordid interests, by putting our shoulders to the wheel, turn the 'problem province' into an ideal province."

In the first article of the publication the Hou'ble Shri N. R. Sarker, Finance Minister, reviews the "Problems of West Bengal After the l'artition." and says in conclusion. "the record of work done by the West Bengal Government will indicate that whatever the present Government may lack, they certainly do not lack sincerity of purpose and earnestness to do things and get things done.

Now, going through the record, although we do not find any account of progress of the local self-government ideal in the province, we are glad to note the various works done and the different projects formulated under Health, Education and Transport schemes, which constitute our immediate concern.

The way of presentation of the materials has been quite attractive and the publication seems to be well followed up with other such publications brought out from time to time in order to inform the people of the province about the activities of their government. And we feel to suggest that brochure-way of treating every separate subjectmatter with profusion of illustrative materials will be the most helpful publicity of the government activities and the most engaging for the average readers to consult and know truth direct from its source.

EUR-ASIA: Editor-in-chief Prof. P. K. Ray, Third Anniversary Number, January, 1950: Published from 20, Tamer Lune, Calcutta—9; Price Eight Annas.

An international monthly journal aiming to interpret the aspirations and social economy of free India "Eur-Asia" was born in 1947-the year of both chaos and cosmos in the political, social and economic spheres of Indian life and the year in particular in which India became free. But it was for Prof. Benoy Sarker to "lift the journal out of obscurity." Soon "Eur-Asia" was the forum of progressive ideas, held by the Indian intellectuals, and supported by the foreign writer of eminence. It may be said with some emphasis that Eur-Asia" is today one of the front-rank journals of the country that have won consideration of the leaders of thought in the West. A few of the profusely spent over and attractively got-up journals of the Government of India seem to be a fair introduction of India to the outside world but even those journals fail to carry impression of the living India as Modern Review or Eur-Asia does.

"REPUBLIC NUMBER" of the H!NDU, Madrus, published on January 26, 1950, the date on which the country was declared a Republic; the supplement containing 92 pages is priced at Annas Eight only.

All the journals of the country have observed the occasion of the declaration of India as a Republic with publication of special issues but probably none will compete with the "Hindu" for having given such a bumper presentation of reading materials at such a cheap price. The supplement is divided into four major sections (1) general, (2) Financial, (3) Industrial labour and other developments, (4) Sports, Film, Art and literature.

The supplement of the "Hindu" possesses more value than temporary reading may do justice. But their size and other difficulties stand in the way of their preservation for future reference. The Republic Number should have been brought out in a convenient book form. However, the authorities of the "Hindu" may now so arrange to reprint the supplement with additions and alterations in a book form.

NEW REPUBLIC: Inaugural Number; Editor; Waman P. Kabadi; Published from Prospect

Chambers Annexe, Hornby Road, Bombay 1; Annual Subscription Rs. 6 only.

At present the journal is proposed to be run as a monthly magazine. But, it may soon be converted into a weekly "in order to make it an even more efficient vehicle of service to the people.

The journal is intended to promote two objectives:

- (1) to save the middle-classes from becoming extinct by fighting their battle for existence; and
- (2) to promote the interests of the medium scale industries which are faced with many problems and difficulties.

We wish the journal a successful career.

Nationalisation of Life Insurance or Private Enterprise under Rigid State Control in Free India by P. D. Khosla, M.A., Managing Director, Policyholders Assurance Ltd., Delhi.

The author is a man of considerable experience in the insurance line and he has stressed the need for legislation to promote the growth of Insurance business in India. So long the business has been directed to feed the foreign concerns and our leaders have always opined that such imperceptible drainage of national wealth should be stopped. The principle of insurance is co-operation, so the benefits should be distributed as much as possible among the policy-holders, agents, etc., and not confined within the Management only. We will be happy if the ideas suggested are considered by the Indian Parliament and the present Act is smended on the lisse indicated.—B.B.

PHYSICAL FITNESS: Edited by S. Muzumder and S. C. Verma; Published from 9, Hamilton Boad, Allahabed (U.P.): Price single copy Re. 1-2-0, Annual subscription Re. 4.

This is a quarterly journal to be published in January, April. July and October. This issue under notice is the second issue of 1949. Various causes, such as, lack of nutrition, high prices, over-population and absence of national health programme have made the health of the nation quite unsatisfactory. In this state of affairs, and specially when the country is today an independent republic, the appearance of a journal like the one under notice is not only very timely but also very much welcome. The editorship of the journal resting, however jointly, upon Shri Massaudar, a versatile writer and a specialist in the different types of exercises for body building and their accessories, ensures a very bright future for the journal.

JAWAHARIAL, IN PICTURES AND POBES: By Shri Giridhuri Boy Chaudhury; Published for Betaukar Publishing House, 116-A, Rash Behari Avenus, Calcutte-29; Price Annas twelve only.

Written in simple Bengali the tender boys and girls of West Bengal may know the life-story of the nation's beloved leader. Pandit Jawaharlal Nehru, through pictures and phythmical verses. This book they will surely find interesting.

BISWABANI: Founded by Srimat Swami Abhedananda; Editors: Swami Sadatmananda and Swami Vedananda; Published from Shri Ramkrishna Vedanta Math, 19-B, Raja Rajkrishna Street, Calcutta—6; Price: Single Copy Annas Eight; Annual Subscription Rs. 4.

Biswahani is a Bengali journal. The issue under notice is the last of the eleventh year of its existence. This is a judiciously edited, soher journal of religious, cultural, scientific and philosophical discussions. Today, when the country is beset with a peculiar sense of frustration and immorality, dishonesty and selfishness, the usefulness of such journals is easily appreciable.

THE NATION: Netaji Special: January 23, 1950; Editor: Mohit K. Moitra; Published for Mahajati Publishing House Ltd.; 8-E, Dacres Lane, Calcutta; Price Rs. 2.

A well-produced special number, it deals with various activities of Netaji Subhas and also presents the modern trends of politics of the world as well as other interesting reading materials. The article, entitled "Netaji's Second Expedition," is the most exciting of all. This article fills our hearts with hope without doubts that Netaji is not dead and is sure to return. May his way to India be free from troubles and difficulties.

# CALCUTTA NEWS & VIEWS

A PORTRAIT OF MAHATMA GANDHI was unveiled by H. E. Dr. Kailas Nath Katju, Governor of West Bengal, in the West Bengal Assembly Chamber on Tuesday, the 28th March.

Dr. Katju said that Mahatma Gandhi had ataked his life to establish peace in Calcutta and Bengal. He had achieved this and peace had reigned for over two years.

The portrait of Mahatma Gandhi should remind them how he had saved them in the past. He prayed that the Mahatma's spirit might come to every home in Bengal so that Hindus and Muslims might live with goodwill and in peace and friendliness, and that they might be taken out of the ordeal of fire through which they were passing today.

Dr. B. C. Roy, Chief Minister, and Mr. I. D. Jalan, Speaker, made touching references to the teachings of Mahatma Gandhi and his activities in Calcutta and Bengal in 1946 and 1947 to restore communal harmony.

THE DEATH OF SHRI K. C. NAG, a former judge of the Calcutta High Court occurred in Calcutta last week. at the age of 68.

Shri Nag was appointed a District and Sessions Judge in 1921 and was the first Bengali to be recruited from the Bar for this post.

In 1928 he was appointed to try the famous Tarakeswar case and his judgment was upheld both in the Calcutta High Court and the Privy Council.

In 1930 he was appointed Legal Remembrancer and Judicial Secretary of Bengal and in 1933 became a judge of

### HELP RESTORE PEACE IN THE STATE

W. BENGAL GOVT.'S APPEAL TO THE PUBLIC

The West Bengal Government, in a 'Press Note' issued recently appealed to the public to help restore peace in the State as quickly as possible so that all energy might be directed to give succour to those who were coming distressed from East Bengal.

the High Court. On retirement from Government service, he was appointed Chief Justice of the Tripura High Court, which position he hold till July, 1948.

MR. A. L. CAMERON, President of the Bengal Chamber of Commerce, and Chairman of Andrew Yule and Co., Ltd., was killed in the morning of Sunday, the 26th March, near Bandel Station, about 25 miles from Calcutta while attempting to save the life of his bearer who was attacked by a crowd of people.

Mr. Cameron was on his way back to Calcutta from a place near Ranaghat where he had gone on a visit to a children's home.

Several arrests were made in that connection.

A memorial service was held in St. Paul's Cathedral the following morning before the funeral which took place in Calcutta.

Mrs. Camerou and their son and daughter are in England.

IN AN ARMED RAID on the Burra Bazar Branch of the Central Bank of India in the morning of Tuesday, the 28th March, 12 men were wounded as a result of indiscreminate firing of guns by the raiders. Among the wounded is an alleged raider.

Four arrests were made and a miscellaneous collection of firearms, bombs and other weapons has been seized.

The bank is situated on the first floor of a building overlooking Harrison Road.

THE WEST BENGAL ASSEMBLY was prorogued on Tuesday, the 28th March after the Secondary Education Bill was passed.

Before the House was prorogued, Shri I. D. Jalan, the Speaker, expressed the hope that members of the House would now devote their energies to restore peace and alleviate the sufferings of the people.

TO MOURN THE DEATH OF SIR B. L. MITTER a meeting, called by the Sheriff of Calcutta, was held at the Mahabodhi Society Hall on Sunday, the 26th March. His Excellency Dr. Kailas Nath Katju presided. The meeting requested the University to found a chair in constitutional law after Sir B. L. Mitter. The Corporation was also requested to name an important road after him.

# VITAL STATISTICS

For the City of Calcutta for the week ending 11th March, 1950.

City of Calcutta (Town and Suburbs.)

The total number of deaths registered during the week was 1008 against 996 and 982 in the two preceding weeks and higher than the corresponding week of the last year by 306. The general death-rate of the week was 17.52 per mille.

# Town (WARDS 1-27.)

The number of deaths registered during the week ending 11th March, 1950, was 833 against 825 and 736 in the two preceding weeks. Hogg Market to the exclusion of the names of the recorded occupiers of the Stall. Objections, if any, to this application should be submitted to the undersigned within 15 days from date hereof.

A. QASIM, Superintendent.

S. S. Hogg Market, The 21st March, 1960.

### UNION HEALTH CENTRES IN WEST BENGAL

Union and Thana Health Centres in West Bengal are intended to be used for medical relief and equivolence public health measures.

According to the Scheme, all the existing Auxiliary Government Hospitals will be ultimately replaced by Health Centres. New Health Centres are, also, being opened in places where considerable donations are forth coming.

In order to convert the existing Auxiliary Government

Hospitals into Health Centres the following plan has been adopted:

Atxiliary Government Hospitals will be closed whenever there is a Health Centre established to replace the same either, in the same area, or within a radius of 2 miles; where the record shows attendance of less than 25 per cent. Where Health Centres are under construction but not yet opened, the existing Auxiliary Government Hospital will continue till the Health Centres are opened.

# Chronicle & Comment

A MARKANIA AND A STATE OF THE S

# DEATHS OF THREE PROMINENT CITIZENS

The deaths took place in this city early this week of Dr. Sundari Mohan Das, a renowned social worker and an ex-Councillor of the Corporation of Calcutta, Shri Amulya Dhone Addy, an ex-Commissioner of the Corporation and Shri Upendra Nath Banerjee, a political leader, journalist and an ex-empolyee of the Corporation. The municipal offices and schools closed at 8 p.m. on the 4th April as a mark of respect to the memory of Dr. Das and on the 5th April to the memory of Shri Addy and Shri Banerjee. Detailed career sketches of the three well-known citizens will be included in the next issue of the Gazette.

# MAYOR OF BOMBAY

Shri S. K. Patil has been elected Mayor of Bombay for the second time in succession by 68 votes, defeating his Socialist rival, Shri M. B. Donde, who secured 39 votes.

This is the first time the Bombay Corporation has elected the same Mayor twice in succession.

# SUPERSESSION PERIOD EXTENDED

In exercise of the power conferred by Section 3 of the Corporation of Calcutta (Temporary Supersession) Act, 1948, (West Bengal Act VIII of 1948) as amended by the Corporation of Calcutta (Temporary Supersession) Amendment Act, 1950 (West Bengal Act I of 1950), the Governor is, states a recently published Press Note, pleased to extend

the term of supersession of the Corporation of Calcutta for a further period from the 1st day of April 1950, up to the 31st day of December 1950, both days inclusive.

# NEXT MUNICIPAL ELECTION

The next Municipal election is suggested to be held by the 31st October this year.

The West Bengal Government have, in accordance with the Municipal Act as amended during

# NOTICE

There will be no issue of the "Gazette" due to be published on Saturday, the 15th April, 1950, on account of "Good Friday" and "Bengali New Year" holidays.

The Market Prices Current will, however, be published as usual on that date and will be available on sale at the Corporation Markets.

the last Budget session of the Assembly, suggested certain rules to be observed regarding preparation of electoral rolls under the extended franchise. The need of recording the names of fathers or husbands of the voters in the electoral roll has been stressed upon.

# THE STREET CLEANING APPARATUS AT WORK

Here pur jets are delivering water under high pressure to wash away surface dirt. If required, gutter-flushing may be done by using only the rear-side jet.

# BOMBAY SEES NEW METHOD IN STREET CLEANING

THE recent five-month sweepers' strike piled Bombay's streets with garbage and gave rise to grave anxiety on the part of the local Public Health authorities. The authorities decided upon calling any mechanical device to their help. So a demonstration of the work of a gully-emptier and street cleaning apparatus was held.

Unloaded from the ship only a short while previously, the gully and street cleaning apparatus was put through one of the most gruelling tests which could be devised.

The gully selected was approximately 25 feet deep, with a long-standing accumulation of clayey deposit to a considerable depth at the bottom of it. The apparatus was however equal to the occasion; owing to the unusual depth of the gully, a supplementary length of hose (carried on the vehicle for such purposes) was connected to the vacuum pipe before emptying began, exemplifying the readiness of the equipment to deal with nearly any conditions which may be encountered in different cities. In spite of the depth at which the vacuum pipe was working, the machine proved conclusively that it was a practical and effective means of rapidly clearing drains and gullies of accumulated solid deposits as well as storm-water. Subsequently the auxiliary equipment for street-washing and sprinkling was demonstrated to an obviously impressed audience.

Essentially simple in design and operation, the apparatus consists fundamentally of a vacuum pump and large-capacity tank. The vacuum pipe, counterweighted to allow of easy handling, is carried on the top of the tank and can be swung through 860° to empty gullies at front, rear, or on near or offside without having to turn the vehicle around. The emptying procedure is extremely simple and can be carried out in a few minutes by only two men. The manhole cover is removed with the key carried on the vehicle, the vacuum pipe is then swung over the opening and dropped into the gully. The vacuum pump, operated by the engine, is then set in action by a control conveniently situated on the outside of the body, and water and solids are immediately drawn through the pipe and deposited in the tank. If necessary the operator can immediately switch over from suction to air-pressure in order to free obstinate congestions. Provision has been made for the suction valve to be quickly dismantled in order to remove any object too large to pass along the pipe. The gully emptied, the manhole cover is replaced and the vehicle moves off to the next without loss of time.

The water which is drawn into the tank along with the solids is squeezed out of the sludge by the action of an hydraulic-ram which, when the rear door is opened, also ejects the load at the dump. The surplus water can be discharged at any

The apparatus is emptying a gully, only two men are required and emptying is completed in a few minutes.

convenient spot and at any time by the simple turning of a water-cock. The result is that the sludge is held in an almost dry condition—a desirable feature when durating. As the draining off of water greatly reduces the bulk of the load, the sludge-tank need be emptied only when full of dry solids, resulting in fewer time-consuming trips to the dump. The hydraulic ram also obviates the necessity for any tipping gear at the dump. Additionally, the apparatus can be used, of course, for cesspool-emptying.

A range of auxiliary power water-apparatus converts the vehicle, almost at a moment's notice, into a complete mobile street cleaning and washing unit. A street-washing assembly slips easily into place under the front bumper. This is provided with four jets which spray water, under pressure, across a width greater than the wheelbase itself, as the vehicle moves along the street. If necessary, three of the jets may be shut off, the remaining near-side jet being used to flush the gutter with a powerful, non-splashing flow.

For street-sprinkling, another attachment throws a single stream-lined jet across the width of the street, giving a spray up to 60 feet in length and effectively damping the entire area as it moves forward. Pavement washing is carried out by means of a reel of hose carried on a detachable mounting on the front near-side of the vehicle. The hose is connected to a jet with a long handle which is pushed on wheels before him by the operator who merely walks along the pavement. The water is under his control and he can cut it off and remove the hose connection instantaneously in order to circumvent obstructions such as lamp-posts, etc. The powerful jet washes away surface dirt into the gutter, leaving the pavement as though scrubbed.

For street-cleaning the clean-water compartment may be replenished from the nearest hydrant. The total capacity of the tank is 750 gallons, made up

as follows: sludge compartment—325 gallons; surplus water—50 gallons; clean water—300 gallons; cooling water (for cooling and sealing the vacuum pump)—75 gallons. The apparatus has a further use to commend it to Municipalities—it may be used as an auxiliary fire-fighting unit. For this purpose, a twenty-foot length of canvas hose and a ½" fire nozzle are supplied, the water-pump providing a powerful single jet of water. Alternatively it may be used to fill static water tanks, sucking up and bringing water to the scene of the fire from any available supply, such as rivers, irrigation tanks and the like. The pump delivers 100 gallons per minute at 50 lbs pressure.

The entire assembly is mounted on a short wheelbase chassis which gives it extreme manoeuvrability, and is powered by a six-cylinder 27 h. p. engine. Hydraulic four-wheel brakes give maximum safety when the vehicle has to be stopped on steep inclines, such as met with when filling from rivers, etc.

The product of thirty years' of experience, the machine is a practical, efficient and reliable answer to the threat to public health inherent in any scavenging scheme which relies upon strike-minded sweepers.

Organized by Mr. H. Nalor, Sales Representative for Commer and Karrier, the demonstration of this apparatus was staged by Dr. J. H. Rane, General Manager of Dadajee Dhackjee & Company Limited who are distributing the equipment in Western India for the Rootes Group. Keenly interested were Mr. N. Farch, a member of the Standing Committee, and Messes. B. K. Patel and P. V. Mody, Municipal Commissioner and Deputy Municipal Commissioner, respectively, of Bombay. The demonstration was held under the expert eyes also of Messes, N. V. Modak, Special Engineer, K. C. Batliwalla, Drainage Engineer and N. R. Junnarkhar, Mechanical Engineer all of Bombay Municipality.

# MUNICIPAL CORPORATION FOR DELHI

A large Municipal Corporation like those of Bombay and Calcutta will be set up soon in Delhi for its future administration. The Corporation will have jurisdiction over the whole of Delhi urban area other than New Delhi.

The decision of the Government of India on the future set-up of Delhi under the new Constitution was some time ago communicated to the Chief Commissioner of Delhi province with instructions to submit the necessary proposals for the constitution of the Corporation to the Government of India at a very early date. The Chief Commissioner was asked to consider whether a new Bill for the purpose would be necessary, or it would be possible to extend to Delhi an existing Provincial Corporation Act with necessary modifications.

We have come to know that a Bill determining the future set up of the Municipal Committee of Delhi will be brought up during the next session of Parliament.

New Delhi should have a separate Municipal administration. It has been excluded from the scheme of the proposed Corporation, in view of the fact that it consists largely of official institutions,

Government offices, property owned by Government and Foreign Embassie, Legations and Chanceries. Apart from this, the majority of the inhabitants of New Delhi are Government servants, who would be debarred from taking part in Municipal affairs, except on nominated bodies. The inclusion of New Delhi in a Corporation meant for the whole of Urban Delhi would, therefore, virtually mean entrusting its management to a majority of its inhabitants who would not have any substantial stake or interest in the administration.

The existing statutory bodies in the Delhi urban area, namely, the Joint Water and Sewage Board, the Central Electric Power authority and the Delhi Improvement Trust are expected to continue to maintain their present autonomous status. The question as to the manner in which the work of these statutory bodies can be co-ordinated with the work of the proposed Corporation will be considered later.

A central co-ordinating authority may be set up later for co-ordinating the activities of the local authority in the rural areas, the sepparate Municipal administration in New Delhi, and the Delhi Municipal Corporation, if the existing arrangements for such co-ordination are found insufficient.

# SPECIAL Articles

By JATINDRA MOHAN DATTA

# ASSESSMENT VIEW COMMITTEE IN BENGAL MUNICIPALITIES

THE World War II has upset the financial equilibrium of every municipality in Bengal; while the income is more or less steady the expenditure has gone up on account of the increased prices. The end of the War has not eased the situation; the prices continue to rise; the officers and employees and mehthers demand and usually get increased allowances; the continued influx of immigrants from Pakistan compel the municipalities to render more services without any corresponding increase in the incomes—and their position is worse than at the end of the World War II. In Bengal—West Bengal, the position is acute, although the financial dis-equilibrium affects all the local self-governing bodies throughout India.

# LOCAL FINANCE ENQUIRY COMMITTEE

Under the auspices of the Government of India a Conference of provincial and States' Ministers in charge of the portfolio of Local Self-Government was held at New Delhi in August, 1948. The Conference recommended the appointment of a strong Local Finance Enquiry Committee. The terms of reference given to the Committee are as follows:—"To enquire into the question of the finances of local bodies and to make recommendations for the improvement of local finance and for that purpose:—

- (1) to examine whether the existing resources are adequate for the performance of the functions assigned to the local bodies and to consider whether and, if so, what further sources of revenue should be provided;
- (2) to examine the methods of Government assistance to local bodies, and
- (8) to examine the existing machinery and methods of (i) assessment and (ii) collection of taxes."

A Committee under the Chairmanship of Shri P. K. Wattal, Retired Accountant-General, has been appointed with almost all the provincial secretaries in charge of the Local Self-Government Departments as members. It has issued a questionnaire and has been touring throughout the provinces. It came to Calcutta during the latter half of December, 1949 and examined witnesses; but its proceedings and activities were blacked out in the local press. This is ominous—the press blacked out its activities, because we the rate-payers do not take much interest in such matters. We are activated periodically only when our assessments are increased, and then we hold meetings and abuse the authorities.

# ASSESSMENT OF CALOUTTA PROPERTY

Recently the Calcutta Corporation has been reassessing the Calcutta properties, and there is

much hue and cry over it. Still, the Corporation has got a competent assessment staff presided over by an Engineer. If the assessee is dissatisfied with the assessment imposed upon him, he may object to such valuation under Section 139 of the Calcutta Municipal Act III of 1923; and such objection shall be investigated by the Chief Executive Officer or the Deputy Executive Officer under Section 140 of the Act.

Any person dissatisfied with the order passed by the Chief Executive Officer or the Deputy Executive Officer upon such objection may appeal to the Court of Small Causes—the Presidency Small Causes Courts at Bankshall or the Sealdah Small Causes Court—under Section 141 of the Act.

If the assessee is dissatisfied with the decision of the Court of Small Causes, there is a further right of appeal to the High Court under Section 142 (3) in all cases.

Formerly when the amount involved was over Rs. 10,000 or when it involved a question of principle there was a further right of appeal to the Judicial Committee of the Privy Council. Now, such an appeal lies to the Federal Court or the Supreme Court at Delhi.

# ASSESSMENT OF CANTONMENTS

In Cantonments the assessment is made by the Executive Officer, who is usually a competent Military Engineer, under the supervision of the Cantonment Board. Any one, who is dissatisfied with the valuation or assessment may object in writing to the Cantonment Board under Section 68 (2) of the Cantonments Act II of 1924. Such objections are inquired into and investigated by an Assessment Committee appointed by the Board under Section 68 (8).

The Assessment Committee shall consist of not less than three persons and it shall not be necessary to appoint to the Assessment Committee any member of the Board (Section 68 (4). This provision enables the Cantonment Board to appoint proper representatives of the assessees with suitable technical knowledge.

If the assessee is not satisfied with the decision of the Assessment Committee he may appeal to the District Magistrate under Section 84 (1); and a further reference to the High Court may be made under Section 84 (2) of the Act whenever the question as to the liability to, or the principle of assessment of a tax is involved.

# Assessment In Bengal Municipalities

But in mofussil municipalities the position is different. The assessment is supposed to be done by an Assessor appointed under Section 145 of the Bengal Municipal Act, 1982. The Provincial

Government prepares a list of persons qualified in its opinion to be appointed as municipal assessors, (Section 145 (1) of the Act). According to the rules framed under Section 76 (a) of the Act the main qualifications of a Municipal Assessor are:—

- (1) A candidate for employment as a municipal assessor may be an official, a retired official or a non-official. Preference would be given to persons who have had at least five years' experience in valuation of lands and buildings, or assessment of rents or land revenue (italics ours).
- (2) Municipal Commissioners shall not ordinarily be eligible for appointment as assessors.
- (3) None but persons who are known to be well conversant with the local conditions of a particular division shall be selected for the panel of assessors of that division.

The result is that persons of Kanungo type without any knowledge of surveying or principles of valuation are often selected for the panel of assessors. A gentleman, who acted as a magistrate in the Orissa State of Dhenkanel, was selected for the panel because he was related to a prominent Swarajist M.L.C. Further it is not easy for a man to acquire knowledge of local conditions of a whote Division. A knowledge of local conditions of Darjeeling and Kurseong—both of them Hill municipalities—may unfit him for making assessments in Baranagore or Bhatpara.

# SOME CASE REPORTS

Let us now see how he works. In a case reported in 34th volume of Calcutta Weekly Notes page 155, the Calcutta High Court observed that "when the valuation list was prepared no attempt was made by the officer appointed to value the holdings or to ascertain the annual rent at which the plaintiff's holding might reasonably be expected to let, or to obtain information as to the cost of construction of the buildings that had been erected on the holding. All that the valuation officer purported to do was to estimate by guess (italics curs) what he conceived to be the cost of erecting the buildings that he found on the holding and to settle the valuation upon the estimate thus made.!!

In another case reported in 45 C.W.N. 1113, the Assessor ascertained the annual value of a holding consisting of 22 bighas of paddy land and 70 bighas of jheel by inspecting it once from the adjoining road to be Rs. 1,800 by applying a flat rate of Rs. 20 per bigha for garden land and disregarding registered Kabuliyats, which showed the rent to be in the region of Rs. 250. Although the appeal of the assessee was dismissed on the ground that the Civil Court has got no jurisdiction, the High Court found the assessment to be so excessive and arbitrary that after dismissing the appeal it recommended thus:—

"Nothing in this judgment will prevent the Municipality from giving the Appelant such relief as they may consider proper." So much for the work done by the Assessors.

# REVIEW OF ASSESSMENT

If the assessee is dissatisfied with the valua-

for review under Section 148 of the Act. Every such application under Section 148 is to be heard and determined by an Assessment Review Committee, popularly known as Appeal Committee, "consisting of the Chairman and not less than two nor more than four Commissioners who shall be appointed by the Commissioners at a meeting." [Section 149(1)]

It has been provided in Section 149(2) thus:—
"The Committee \* \* \* after taking such evidence and making such enquiry as it may deem necessary, \* \* \* pass such orders as it thinks fit."

There is no compulsion on the Committee to make enquiry or to take evidence. We shall give an instance how the Committee works in the mofussil. Sarat Sen had a two storied building on 8 cottahs of land—and it had been assessed to Rs. 8 per quarter. Kshetra Mohan Ghosh had a marble floored two-storied building on 1 bigha 11 cottahs of land—and it had been assessed to Rs. 14 per quarter. On Sarat Sen's asking the Committee to make the necessary comparison, the Committee for make the necessary comparison, the Committee refused to look to it; and one member of the Committee facetionsly told the assessee that he need not groupe this small amount quarterly as he has found him to purchase lobsters (galda chingel regularly,

The decision of such Committee, or of a majority of the members present shall be final [See Section 149(4)].

There is no appeal to the District Magistrate, or to the High Court; and the Civil Court has got no jurisdiction to revise the valuation. And it has been provided in Section 150 of the Act.

No objection snall be taken to any assessment or valuation in any other manner than in this Act provided."

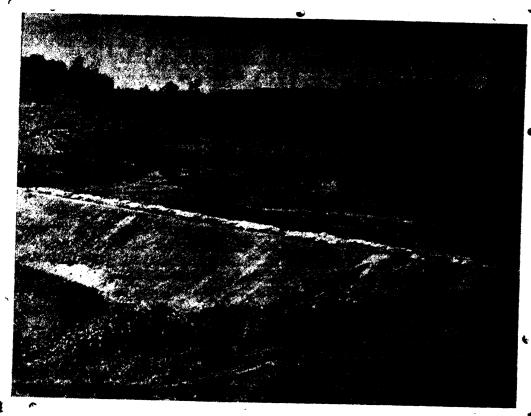

If there is injustice, the assessee is helpless. We want a change of this state of affairs. Let there be an appeal to the District Judge, with a further appeal to the High Court as in the case of the Calcutta Corporation, if the Appeal Committee is to be retained as a matter of policy.

### EVIL OF UNDER-ASSESSMENT

But to remove the root cause of the evil of under-assessment in some cases (where the parties are rich and can use their influence and wealth in procuring under-assessment), and over-assessment in other cases, to provide the municipality with sufficient income, the present system of periodical assessment by an ad hoc assessor should be scrapped. It is not possible for a mofussil municipality to maintain an assessment staff—far less a qualified staff.

So what we suggest is this: Let the Provincial Government provide a fully qualified staff for all the municipalities; and let this staff go on with the assessment of the municipalities in a seriatim order. For example, let this staff take the work of assessment in Baranagore in 1950; or Kamarhatti in 1951; and in Panihati and Khardaha, which are smaller municipalities in 1952; and so on. Probably this assessment staff may have to be split in groups to finish the assessment of all the

(Continued on page 451)

A view of the Ruiru River, 17 miles from Nairobi, (East Africa), showing the temporary Dam built to hold water back from the site of the permanent Dam during its construction.

# DAMMING AFRICA'S RIVERS

# Nairobi's Water Supply To Be Doubled

THE rapid growth of Nairobi's population, together with the need to provide for the estimated future expansion of the town to more than twice its present size within 25 years have made the augmentation of the town's water supply an urgent necessity. The situation is being met by damming the Ruiru River, 17 miles from the town, and the Sasumua River, 40 miles away in the Aberdare Mountains.

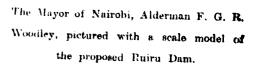

Slightly under two million of Nairobi's daily supply of just under three million gallons are drawn from the Ruiru River through a river intake, the Launce coming from the Kikuyu Springs. The primary object of the Ruiru dam is to safeguard the Ruiru supply which, under existing conditions, is liable to be affected by drought. Using the Sasumua pipe-line, which will pass nearby, it will be possible to draw off a further one million gallons

A general view of the northern flank of the Ruiru Dam. Of mass concrete construction the Dam will be 700 ft. long.

T

V.

daily until such time as the Sasumua project comes into operation. With the completion of the Sasumua project the pipe-line will of course, be needed to convey the Sasumua supply. The Ruiru dam and the Sasumua pipe-line up to the vicinity of the Ruiru dam are scheduled for completion by the end of this year.

Of the two projects the Ruiru dam is the smaller but nevertheless, until the Sasumua dam is completed, it will be the largest in East Africa. Designed to impound 700 million gallons of water, it will cost nearly £300,000 (Rs. 40 lakhs). Construction was commenced in 1946 using directly recruited labour but, following the decision to increase its height from 35 feet to 60 feet, the work was taken over in 1948 by a British firm.

# -ASSESSMENT REVIEW COMMITTEE

(Carried over from page 449)

76 municipalities within five years, the period provided in Section 187 of the Bengal Municipal Act of 1982.

After the assessment is finished; let the assessees file their appeal before a permanent Appeal Board, consisting of an Engineer, an experienced Surveyor and Valuer, and a lawyer of some standing to be appointed for a group or groups of municipalities by the Provincial Government; and another representative of the particular municipality to be elected by the Commissioners. This Appeal Board, free from local influences and possessing sufficient experience and local knowledge, is expected to do justice to the rate-payers. Let there be provisions of a further appeal to the District Judge and to the High Court under suitable safeguards, whenever the question as to the liability to, or the principle of, assessment is involved.

The Sasumua dam which will yield a daily supply of four million gallons to bring Nairobi's total supply to seven million gallons daily, will be commenced this year and is scheduled for completion in 1952. Including filtration plant and the pipe-line it will cost £750,000 (Rs. 1 crore).—B.I.S.

# MANUFACTURE OF PENICILLIN AND OTHER DRUGS

GOVT. OF INDIA'S FOUR-CRORE SCHEME

A four-crore scheme for the manufacture of penicilline anti-malaria medicines and sulpha drugs has been sanctioned by the Government of India.

The project will be undertaken jointly by the Central Government and the Government of Bombay, who will subscribe 60 per cent and 40 per cent of the capital respectively.

The proposed factory is to be set up at Dehu Road near Poons and pending the completion of the legal technicalities, Government have set up an interim committee of management to proceed with the scheme and place orders for the plant.

The committee will consist of Mr. Venille Dadia, Shri A. V. Choksey and the Accountant-General of Bombay on behalf of the Central Government and Maj.-General Sahibsing Sokhey Director of the Haffkine Institute, Bombay, and the Secretary of the Finance Ministry of Bombay as the representatives of the provincial Government.

A Swiss firm, Karnbolaget manufactures of drugs, will be consultants and will assist in the execution of the project.

It is expected that six months after the start, the factory will begin to produce 1,200 billion units of penicillin per annum rising to 3,600 billion units, thus meeting the bulk of India's requirements of this drug.

The Government of India are also understood to be examining a proposal for the setting up of a factory in Bengal. The proposal is that the West Bengal Government in collaboration with an American firm will obtain penicillin in bulk, cure it and fill it in ampoules.

# SOME NEWSY NOTES

# TRAINING OF CHILD HEALTH WORKERS

UNICEF's first training centre for child health workers in South-East Asia will be set up in Calcutta, it is understood. The fund's 26-nation executive board has sanctioned a contribution of \$1m to foster the scheme. The Government of India has agreed in principle to grant an equivalent amount in Indian currency, which means a sum of Rs. 45.00.000.

The main idea is to organize an international centre for the training of maternal and child health workers which will be an integral part of the existing All-India Institute of Public Health and Hygiene in Calcutta. It will take 60 students yearly half of whom will be Indians. Others will be from South-East Asia countries.

All costs in connection with the construction of buildings and the provision of staff and equipment of the department and auxiliary institutions will be capitalized over a period of five years and shared equally between UNICEF and the Government of India.

The period of five years has additional significance INDO-UNICEE collaboration over this scheme will cover this period, which is considered "essential for the full development and consolidation of the project as at present onvisaged."

During this period, it is expected, first-rate facilities will have been provided and a high level of efficiency in instruction attained. It is hoped that the department will soon assume a leading place among medical teaching institutions in Asia.

The institute, in addition to providing a specialist postgraduate course for dectors in maternal and child health will give a course in public health nursing for certificated nurses. The established medical institutes in Calcutta will also benefit, as the institute will permit them the use of the advanced educational facilities it proposes to develop.

Refresher courses will be organized for general parctitioners and medical officers in Government or municipal service in maternal and child health. The programme will also include demonstrations, seminars and public discussions on child health and related problems.

The courses of study will be drafted by the Director of the Institute, in connection with the senior member of the international staff.

Accommodation for teaching purposes will be provided by constructing an additional storey to the present institute building. The building was designed to allow such additions. Alterations in existing buildings will also have to be made to accommodate students.

The institute maintains a rural health centre at Singar, 30 miles from Calcutta. This will also be developed for practical training in rural problems.

Mr. Morris Pate, Executive Director, UNICEF, will visit in April to finalize arrangements with the Government of India.

# SYSTEM OF AYURVEDA

Dr. S. P. Mookerjee, Industry and Supply Minister, Government of India, opening the 37th Annual Session of the All-India Ayurvedic Congress sometime ago at New Delhi, said that hundreds of years ago when countries of the West were steeped in ignorance, Indian medical experts discovered a correct scientific approach to the great problem of human disease. "It has been proved beyond doubt that the system of Ayurveda travelled from India to distant lends—to Egypt, to Arabia and to Rome and other places. It would not be wrong to say that our system laid the foundation—may be in an indirect way—of the very system of Western medicine of which the world is so proud."

Over 600, delegates from all over India—some of them well known experts in the Ayurvedic system—attended the session.

Pleading for a spirit of tolerance towards all systems of medicine, both indigenous and foreign, Dr. Mookerjee said there was no need for rivalry among them.

After all, he added every system had the same objectives, namely to cure disease and serve humanity.

"There is no harm in allowing different systems to function in this country", he said. "Equal opportunity should be given to all to develop and the doctrine of the survival of the fittest must be allowed a free play".

On the question of recognition of the Ayurvedic system by the Government the Minister said no Government could refuse "reasonable demands from any quarter. If you stand united and make people realise that your approach to the health problem is rational and scientific, the recognition is bound to come,"

Tracing the history of the system. Dr. Mookerjee referred to its eclipse during the Muslim and the British rules and said the Ayurvedic system had to be revived mainly because it was still serving nearly 80 per cent of the Indian population. Another reason for encouraging it was its cheapness which fitted in well with the economic condition of the Indian mass.

Dr. Mookerjee urged the "Vaids" all over the country to stand united in this transitional period in the history of Ayurveda. He stressed the need for undertaking greater research, raising the standard of education in schools and colleges of Indian medicine and formulating "certain basic principles for the system on which you can base your claim for the recognition by the Government".

# GEOGRAPHICAL EXHIBITION

TO THE EDITOR, -- CALCUITA MUNICIPAL GAZETTE,

DEAR SIR,—I take the liberty of applying to you with a little request.

Being a teacher of languages and geography I want to show my pupils the beauties of the world in the form of a geographical exhibition at our Goethe-School. I should, therefore, be much obliged if you would send me an illustrated prospectus or some picture postcards of your city being one of the largest in India.

In our geography lessons we are often talking of your country, but unfortunately we have no good photos at hand.

Some stamps would also be very welcome, many of my pupils being ardent philatelists.

Do you happen to know a teacher, a student or a business man being interested in a regular correspondence with me?

If you have any special wishes referring to Germany or German goods, please, let me know. I should be pleased to render you a service in return.

Thanking you in advance for your kind endeavours, I am,

# Yours faithfully, HELMUT GOIIIL

Bad Lauchstaedt Sachsen-Anhalt bei Halle (SAALE).

AM THEATER 3. Deutschland Germany. Bad Lauchstaedt,

The 15th January, 1950.

[The Act: Editor requests the interested readers to be in contact with the writer of the above letter.]

# CALCUTTA'S POPULATION

5,100,000 people in the Calcutta industrial area, 400,000 to 500,000 in the other rationed towns, besides others were stated by Shri P. C. Sen, Minister in charge, Civil Supplies, in the budget session of the West Bengal Assembly on Tuesday, the 21st March, to be the charge of the Government for being fed.

Thus, we may note Calcutta's present population to be roughly about 5,100,000.

# SOUTH SUBURBAN MUNICIPALITY

Behala is arranging an additional drinking water supply of 30,000 gallons daily with a master tube-well constructed by the Municipality.

This increase of drinking water supply will meet only a partial requirement of the increasing population of Behala. The Municipality contemplates constructing two more similar tube-wells in the near future.

THE CALCUITA SOCIETY FOR THE PREVENTION OF CRUELTY TO ANIMALS held its annual general meeting on the 30th March last at the Society's premises. Presiding at that meeting Sir Bejoy Presad Singh Roy announced that the West Bengal Government had appointed a four-nan committee to enquire into the affairs of the Society. The committee is composed of Sir B. P. Siugh Roy, Chairman; and Maharaja Sris Chandra Nundi of Cossimbazar, Dr. Narendra Nath Law and Shri P. C. Choudhury, Members.

As a result of the enquiry, Sir Bejoy Prasad pointed out the Society would be in a position to claim greater support both from the Government and the public of Calcutta.

During the year 1949, it was the chief concern of the Society to secure humane treatment and welfare of all dumb creature within the city and its suburbs. During that year nearly 4907 persons were prosecuted for flagrant citielty to animals as against 4627 in the previous year. No case of 'Fuka' was reported during the year. During the year under review nearly 1507 animals were treated in the Society's hospital as against 1451 in the previous year. The Society had also purchased a fully-equipped ambulance during the year. Nearly 479 cases in which

Incidents of unrest in the City of Calcutta and the Howrah town have very appreciably calmed down since the beginning of the week till the time of our going to Press.

h c were made to work under unfit conditions were ledt by the Society and drivers and owners of the hases were prosecuted. Nearly 784 turtle and tortoises were involved in cruel method of carrying and killing a against 613 in the previous year. All the culprits were brought to book and fined.

THE INDIAN CHAMBER OF COMMERCE held its annual meeting on the 31st March last. Presiding at the inceting Shri K M Naik made an appeal to the people to lend til support to the Government by keeping the peace in the country.

Referring to the relations between India and Pakistan, he said that in spite of the economic interdependence of the two countries and the close trade links between them, Pakiston's attitude towards India in trade as well as in other matters indicated that she believed in a permanent parting of the ways.

THE INDIAN MINING FEDERATION recently held its aroual general meeting in Calcutta. Shri N. B. Lali Singh presiding, said that the coal industry achieved a record output of 51,457,707 tons during 1949 and was able to meet the entire requirements of the country besides creating an exportable surplus.

I about relations during the year were fairly satisfactory and n in days lost were fewer than during the previous year.

The long term needs of the country would require all its coal producing units to be maintained highly efficient and healthy

ţ

CHANGES IN THE SECURITY BILL as recommended by H. E. the Governor, were recently effected by the West Bengal Assembly.

The Bill was passed by the Assembly on February 25. As required by the Constitution, it was then presented to the Governor who reserved it for the consideration of the President. The President directed the Governor to return the Bill to the Assembly to reconsider its provisions with a view to excluding from it matters covered by the Preventive Detention Act, 1950, and make necessary changes.

BANGIYA SANSKRIT PARISHAD held its first annual Convocation at Government House on Sunday, the 2nd April. Speaking at the convocation His Excellency Dr. Kailas Nath Katju said that the learning of Sanskrit was associated with the Hindu culture. He pointed out that it was the old Hindu culture which demanded the people not to avenge on the innocent for the wrong done by others.

Rai Harendra Nath Chouchury, Education Minister, West Bengal, said that to understand the Hindu culture, one should learn Sanskrit. But he regretted that today the study of Sanskrit had lost its popularity among the students.

Referring to the report of the University Enquiry Commission he said that due importance had not been attached to the study of Sanskrit in it.

Thirty-six students received diplomas, while 33 others including two girls were awarded medals for proficiency in different examinations.

diseases. The death-rate of the suburbs (or added areas, was nil per mille.

There were nil imported deaths. Excluding these, the death-rate was nil.

There were 6 deaths from tuberculous against 8 in the previous week.

There was nil imported death. Excluding these, the death-rate was 24.32.

There were 6 deaths from imperculosis against 6 in the previous week.

### SHRI ANIL BISWAS

Sri Anil Biswas, a fourth year student of the Campbell Medical School, was injured on the 51st March last as a result of fire opened by Pakistan police while he was engaged in doing relief work among incoming East Bengal refugees inside Indian Union territory at Joynagar near West-East Bengal border. Shri Biswas was brought down to Calcutta the same evening in a serious condition and admitted in Campbell Hospital.

Shri Biswas breathed his last at the hospital on Monday night, the 3rd April.

The Funeral took place at Nimtala Burning Ghat on Monday evening.

In the afternoon, at about 2-30 p.m., a procession carried Shri Biswas' body, placed on a decorated bier, from Campbell Hospital to Nimtolla burning ghat.

### LADY OF FATIMA

The statue of Lady Fatima, representing an apparition seen by three children of village Fatima (Portugal was accorded reception by a vast congregation of Christians in the grounds of the St. Xavier's College on Sunday evening, the 2nd April.

An imposing procession of thousands of Roman Catholics, men, women and children, carrying benners started earlier from the Maidan and parading through different thoroughfares terminated in the College grounds. The procession swelled in dimension as it wended its way, many non-Christians participating. Flowers were dropped from an aeroplane over the procession at the Maidan.

Hymns in praise of Lady of Fatima, prayers for peace and goodwill on earth and lectures emphasising the need for fraternity and good neighbourliness were features of the reception.

# Chronicle & Comment

ADDRESS OF WELCOME TO GOVERNMENT SERVANTS

It has long been the custom for public and sometimes private organizations to make presentations of addresses of welcome to persons they seek to honour. These addresses of welcome are generally enclosed in caskets of varying value. Sometimes the caskets are of silver, sometimes even gold.

Pandit Nehru, Prime Minister of the Republic of India, sometime ago informed the Provincial Governments in order that they might pass on information to the authorities of all private and public organizations:—

"I have repeatedly urged that such addresses of welcome should not be placed in

#### NEW YEAR GREETINGS

On our reappearance after the Bengali New Year and other holidays we take this opportunity for offering our most cordial greetings and well-wishes to our patrons, readers, advertisers and others.

expensive caskets. In particular, gold and silver should be avoided, as well as, of course. any form of jewels or precious stones. Beauty and artistic excellence do not depend upon expensive metals and stones.

"Mahatma Gandhi was against the practice of giving expensive caskets. At any time this is to be avoided, but, more especially at in present moment when there is the uto

need for economy, such extravagance is not only uncalled for, but rather improper.

"I should also like to add that it is not in the fitness of things for Government servants to be presented with such caskets by public organizations. This embarrasses them and is not a suitable procedure to follow."

#### CALCUTTA POLICE TO TAKE NOTE

An authoritative work providing a thorough analysis of the strong and weak points in the police methods, a ready source of reference to current information concerning the entire police mechanism including organization of police departments their costs, personnel and training, problems of crime and traffic, criminal identification and police science is a great necessity towards public-police co-operation. This idea has been the result of our recently going through a book, called Police Systems in the United States by Bruce Smith (New York: Harper Brothers).

When armed robberies in and round the city have occasionally happened since some time it is useful to offer to the public suggestions on general methods of protection. If the public may adopt precautionary measures against any untoward happening, the police would be greatly helped in weeding out the disorderly elements.

The police of Calcutta may also prepare for their own profitable use an automobile directory. This directory will give every possible assistance to a police in identifying cars in common use in the city. It may include side and front views of various types of motor vehicles, testinical data, descriptions and other important close for identi-

#### Dr. Sundari Mohan Das Grand Old Man Of Calcutta Passes Away

A well-known Gynaecologist, Founder-Principal of the National Medical College, of this City, an ex-employee of the Corporation of Calcutta and also an ex-Councillor and the first Chairman of the Public Health Committee of the first 'Swaraj' Corporation, Dr. Sundari Mohan Das came to Calcutta as a college student and almost since then till the last day of his life he served this City in different capacities,—primarily as a physician and also as a social reformer, a City Father and a nationalist. The ideal of his life that we have come to know about, was to earn his livelihood for each day and never keep anything by for the day following. This ideal alone is a pointer to many of the sterling qualities of Dr. Das.—his unbounded charities and his life of activities principally. And such a life of activities flowed through the channel of social and humanitarian services. We feel, there should be a fitting memorial erected in this city to perpetuate the ideals of his noble deeds.

We pay our deepest regards to the great departed.

Dr. Das passed away on the 4th April last at 7-30 a.m. at the Chittaranjan Hospital, Gorachand Road, where he had been lying seriously ill since January 9. He was 94 at the time of his death.

The cause of his death was concussion of the brain.

Dr. Das is survived by his two sons, Premananda and Yogananda Das and one dauther, his wife having predeceased him.

#### A SHORT SKETCH OF HIS CAREER

BORN in Sylhet district on December 22, 1857 Dr. Das received his school education in the district town.

After passing the Entrance Examination with a scholarship of Rs. 15 he came to Calcutta and joined the Presidency College.

During his college days he came under the influence of Brahmananda Keshub Chandra Sen.

After passing the F. A. Examination in which he stood 15th, he entered the Calcutta Medical College. Dr. D. B. Smith was then the Principal of the College and its First Physician and the famous Dr. Rajendra Chandra Chunder was the Second Physician. In the Medical College, he was a Goodeve Scholar. He graduated after six years and in the year 1882 went to Sylhet to practise as a physician.

While young Dr. Das had taken a pledge not to serve the Government under the inspiration of Pandit Sivanath Sastri, who had gathered round him a band of promising young men, among whom Dr. Das was one. All these young men took pledge in the year 1876 to renounce idolatry, advocate widow marriage, agitate for self-government, equip themselves for self-defence and refuse Government employment in any shape.

#### His Plenge

The most important pledge was never to save money and to spend all surplus over daily needs in charity and national service. As a result, though he earned lacs and lacs of rupoes in his life as a top man in his profession, he was never rich and died a poor man. One of his colleagues who took pledge with him was Gagan Chandra Home, father of the Foundation-Editor of this journal.

Dr. Das resided in Sylhet from 1882 to 1896. From there he went to Habiganj as the District Board doctor in charge of the sub-division. He went back to Sylhet again and stayed there from 1886 to 1889. In the year 1889 he came to Calcutta and began to practise in the city.

Although Dr. Das was a member of the Brahmo Samaj he had a great sympathy for the Vaishnava religion and had the widest catholicity of outbook.

As a physician, Dr. Das was a specialist in midwifery and gynaecology and contributed largely on the subject in medical journals. He contributed to the Calcutta Municipal Gazette a series of articles on the history of the evolution of public health and sanitation, and also other articles.

Sundarimohan had deep love for the Bengali literature which induced him to write Briddha Ithatrir Rosenamcha—(Diary of an old Nurse), and other books.

#### NATIONAL MEDICAL INSTITUTE

The National Medical Institute was started in 1921 under the influence of Deshabandhu C. R. Das when the Non-co-operation movement swept the country. Dr. Sundari Mohan Das was one of the chief founders of this medical institution from its very inception. He was its Principal from the very beginning till sometime before his death. He gave his lucrative practice for this hospital and every brick of this institution is cemented with his life-blood.

He was elected a Councillor of the Calcutta Corporation in 1928 on Swarajist ticket when election took place under the reformed constitution.

He was made the first Chairman of Public Health Committee and many of the improvement measures were introduced by him. The Ward Health Association and the Co-operative milk movement were two of his creations.

#### Shri Upendra Nath Banerjee

#### Death Of A Calcutta Editor And A Pioneer Revolutionary

One among the pioneer revolutionaries in Bengal, a close associate of Shri Aurobindo, the name of Shri Upendra Nath Banerjee is even today remembered as one of the co-accused in the Alipore Bomb Case of 1908 who were transported for life and sent to the Andamans. With him also went Shri Abinash Chandra Bhattacharyya, later the Head Assistant of the Gazette department, now living a life of well-earned retirement. After 11 years of confinement release came to him on the inauguration of the Montagu-Chelmsford Reforms in 1919.

Upendranath was not only a revolutionary but also a powerful writer in both Bengah and English. Before his transportation he was one of the main contributors to the Jugantar and the Vande Mataram, one in Bengali and the other in English,—both organs of the Revolutionary Bengal. After his return from the Andamans he worked on the editorial staff of the Forward, served the Corporation for sometime and then again turned to journalism as a leader writer of the Amrita Bazar Patrika. At the time of his death he was the Editor of the Basumati.

One, who had chance to meet Shri Banerjee, would like his company very much if not for anything but for his scintillating humour. He at first looked on life through the vision of a revolutionary but had a very bitter taste of it while under duress. Disillusioned as he was, he could not look at life without jeering at it. Yet, he was a man of unbounded sympathy and fellowship. We are sorely grieved at his death.

The death occurred of Shri Banerjee at his Calcutta residence in South Sinthee Road early in the morning of the 5th April last. He was 72.

Shri Banerjee had been suffering from diabetes for sometime past and could not attend office for about a month, for the last one week he was almost bed-ridden. He is survived by his wife and three sons, Nripendranath, Rajendranath and Ganendranath.

#### A SHORT SKETCH OF HIS CAREER

Chandernagore in 1879. After completing his school education he joined the Dupleix College and passed his F. A. examination. He then entered the Medical College, Calcutta, and read up to the third year when his health failing, he gave up medical studies and got himself admitted in third year B.A. class. But he felt disinclined to study and roamed about as a mendicant throughout India. He returned after long travels and began life as a teacher of a school at Bhadreswar in Chandernagore. But those were stirring times when Shri Aurobindo's Bande Mataram had awakened a new life and a new consciousness among the youth of Bengal and made them intolerant of foreign rule.

#### A FIRE-BRAND REVOLUTIONARY

While engaged as a school teacher. Shri Banerjee had contributed a letter to the Bande Mataram which made Shri Aurobindo discover a firebrand in him and at his invitation Shri Banerjee joined the editorial staff of Bande Mataram and Yugantar. In this way he came in touch with the well-known revolutionary leader. Shri Barindra Kumar Ghose. Among the fourteen person who were arrested on May 2, 1908, in connection with the find of bombs at the Muraripukur garden house in Manicktala were Shri Ghose, Shri Banerjee and Shri Ullaskar Dutta. Of 36 persons who had been put up for trial in the historical Alipore Bomb Case, Shri Auro-

bindo and 18 others were acquitted and Shri Ghose, Shri Banerjee and Shri Dutta along with several others were transported for life. After spending 11 years in the Andamans Shri Banerjee along with his colleagues were set at liberty on the eve of the inauguration of Montague-Chelmsford Reforms in 1919.

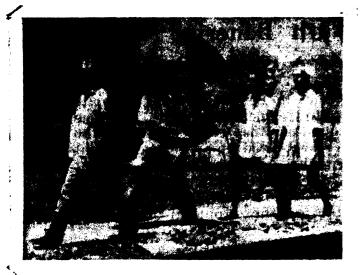

After his release Shri Banerjee joined the Swaraj Party and worked on the editorial staff of Forward. Later he served for sometime under the Calcutta Corporation. He also worked for some years as a leader-writer in Amrita Bazar Patrika. He joined the Basumati as its Editor in 1945. He joined the Hindu Mahasabha in the closing year of his life and was elected President of the Provincial branch.

The books written by Shri Banerjee included Nirbasiter Atmakatha and Unapanchasi in Bengali and Memoirs of a Revolutionary in English.

#### CONDOLENCES

A resolution expressing deep sorrow at the death of Bengal's great revolutionary leader and eminent journalist, Shri Upendra Nath Banerjee was adopted at a largely attended meeting convened by the Bengal provincial branch of Hindu Mahasabha at the University Institute Hall on the 7th April last to condole the death of its President.

# Refugees Pouring Into Calcutta

#### A Gigantic Problem Ably Handled

DURING the last week of March about 6,000 evacues were estimated to be daily arriving at Sealdah from Eastern Pakistan.

Although about 8,000 refugees were daily transferred by the Government from Scaldan station to relief camps in various places in the State, over 3,000 people became concentrated at the Scaldan Station. Attending to their needs valuable service was rendered by various non-official relief organisations working in the station area.

Some of these organisations are of long standing while others have sprung up with the present emergency. Many are affiliated to the United Council of Relief and Welfare, West Bengal Branch, of which His Excellency Dr. Katju is the Chairman.

A considerable number of refugees also arrived by air at Dum Dum airport. About 7,000 refugees

#### BOMBAY MAYOR'S APPEAL

An appeal to the people of Bombay to contribute their mite for the relief of East Bengal refugees has been made by Shri S. K. Patil. Mayor of Bombay, presiding over a variety entertainment in aid of East Bengal refugees held on Sunday, the 16th April.

Shri Patil said that, though the Union and State Governments were doing their best to rehabilitate refugevs, the problem was so colossal that it could not be solved by the Government alone without full co-operation from the cammon people. He, therefore, urged all to help the Government in this noble task of rehabilitating uprooted humanity.

About Rs. 18,000 was collected at the show and the money was handed over to the Ramkrishna Mission, Bombay, to be utilized for relief of East Bengal refugees.

were reported on the 30th March last to be crossing the border of Pakistan at many points on foot.

Three types of slips were issued to the refugees by the Relief Department of the Government:

White slips meant for those who wanted to go to Government relief-camps, the red for those who wanted to go outside Calcutta to put up with friends and relatives or wanted to make their own arrangements and the blue, meant for refugees who wanted to go to Calcutta to their friends or relatives or wanted to make their own arrangements.

Transport was provided by West Bengal Government to refugees who wanted to go to refugee camps.

Refugees, who came by air, were looked after on their arrival at the airport by Congress and other relief workers.

#### GOVERNOR VISITS REFUGEES

H. E. Dr. Katju, Governor of West Bengal, visited Sealdah Station in the morning of the 23rd March lost and spent about an hour speaking to refugees and inspecting arrangements made for their reception and relief.

He saw relief operations, medical and other, being carried on by various organizations and made detailed inquiries about them. He spent some time at the free kitchens functioning at the station.

#### CHARTERED STEAMERS

By the 25th March last arrangements were known to have been completed to bring to Calcutta Flast Bengal refugees who had been waiting for transport at Naraingunj, Barisal and Chandpur. Fifteen steamers had been chartered by the West Bengal Government.

According to the official estimate in Calcuttate towards the beginning of April over 4,00,000 East Bengal refugees had entered West Bengal since the beginning of this year. The influx was stated to

#### SARDARJI IN CALCUTTA

Sardar Patel, India's Deputy Prime Minister, arrived in Calcutta by air at 11-10 a.m. on Sunday, the 16th April, on a five-day visit.

Imministely after arrival at Government House he conferred with Dr. Katju, the Governor, and Dr. B. C. Roy, the Chief Minister.

In the afternoon, the Deputy Prime Minister had a conference with editors of Calcutta newspapers. Later, Dr. R. V. Martin of the International Red Cross called on him.

Sardar Patel had a meeting with West Bengal Ministers the next morning. Shri Shankerrao Deo, General Secretary of the AICC and Shri S. M. Ghosh saw him on Monday, the 17th April. After lunch, he met officials of the West Bengal Government at Government House.

A detailed story of Sardarji's stay in Calcutta will be included in the next issue of the "Gazetle".

be on the increase and about 6,000 people were arriving in Calcutta by train daily.

Provision of housing for these people presented a serious problem. About 75,000 had been housed in relief camps in various places in the State. Many found accommodation in garden houses near Calcutta in unoccupied premises in the city and in settlements built on open lands lying about the city.

#### SM. RENURA RAY'S ADVICE

Shrimati Renuka Ray, Member of Parliament, who has been looking after refugee rehabilitation on behalf of the Government, urged the refugees to move to other provinces. She said in the course of a statement issued to the local Press:

There is a tendency among some of the refugees not to want to move out of this very small province and a desire to concentrate in the already overcrowded City of Calcutta.

It is the Indian Union and obviously not only the most densely populated part of the Union which can absorb the new refugees as citizens. I would appeal to the refugees who

are coming over to take indvantage of the facilities and of the welcome offered in the neighbouring provinces.

They should realise that it is not West Bengal alone but the whole of India is so concerned for their welfare. The camps to which they are being brought are in the nature of holding centres. Unless they are prepared to go on to other parts of the country where arrangements have been made for them, it will only mean that those who are coming afterwards will not get adequate shelter or soccour. It will also make it impossible to tackle the problem of rehabilitation.

During the first week of April refugees, who came to Calcutta by rail, numbered 4,200 on April 1 and 4,360 on April 5. On other days their numbers varied between 8,600 and 2,800.

#### REHABILITATION MINISTER IN CALCUTTA

Shri Mohanlal Saksena, Minister of State for Rehabilitation, Government of India. who arrived in Calcutta during the week visited Sealdah Station and spoke to a large number of refugees there. He also inspected the relief arrangements at the station by non-official organizations.

Several schemes for the rehabilitation of displaced persons from East Bengal were reported

#### CONGRESS PRESIDENT'S APPEAL

Dr. Pattabhi Sitaramayya, President of the Indian National Congress, has issued an appeal from New Delhi to citizens of Delhi and other cities of India to make generous contributions both in money and gift of blood to the Blood Bank. West Bengal has sent out an urgent call for 2,000 blood plasma transfusions.

about the middle of the first week of April to have been considered by the Government of India. They have been drawn up by the officials of the Centre's Relief and Rehabilitation Department, the Directorates of Industries of the Central and West Bengal Governments, and representatives of manufacturing concerns in West Bengal.

The schemes lay emphasis on the establishment of training-cum-production centres either by the Government or through a co-operative organization, which can provide employment after the training period. Bookbinding, waste-silk spinning (on a cottage industry basis) and tailoring are among the trades in which training is to be given. Suggestions have been made for the training of seamen.

#### ARRIVAL OF MORE REFUGEES

The second week of April opened with the arrival of refugees to Calcutta by chartered steamers. The steamers Mullard. Bhamo and Lushai, three of a fleet of 15 chartered by the Government of West Bengal to transport refugees concentrated at Narayangunj. Chandpur and Barisal, arrived in Calcutta on the 8th April last carrying about 1,500 people. They berthed at the BNR steamer ghat at Shalimar, Howrah, where the refugees were met by officers of the Government Relief Department and other officials.

Dr. K. M. Hatju, Governor, West Bengal, accompanied by his Private Secretary, Shri H. C. Sen, visited Secident Station in the morning of the 8th April last. He enquired of some refugee families who arrived only recently from Sylhet and Harisal about their present difficulties. He was at the station for nearly an hour.

A refugee special left Sealdah for Gaya on the

night of the 10th April last. The train carried over a thousand refugees including a considerable number from Ranaghat who had arrived at Sealdah Station earlier in the day. As on the previous day, Scaldah Station area remained crowded with

refugees.

Trains from Pakistan brought about 4,000 East Bengal refugees at Sealdah Station on the 11th April last.

Of them, 2,000 arrived by Barisal Express, 1,400 by Chittagong Mail and the rest by the Assam

#### STILL MORE TO COME

It was reported that different steamer and railway stations in Eastern Pakistan were still crowded with passengers eager to come over to places in Indian Union. From the rural areas the trek of people to district and sub-divisional towns in East Bengal with a view to availing themselves of the limited transport facilities for coming over to Indian Union continued.

Nearly 2,500 refugees from East Bengal arrived the same day at Shalimar Ghat in Howrah by four of the steamers chartered by the Government of West Bengal.

Of these steamers 'Dufa' and 'Lepcha' carried . 478 and 654 passengers respectively from Barisal and the 'Kite' and the 'Murmi' carried 579 and 518 passengers from Narayanganj and Chandpur respectively.

About 750 refugees from Barisal arrived at Shalimar by special steamer on the morning of the 12th April. Of these, 450 were sent to Salbani by train; the rest went to their relatives and friends in

Another steamer with 1,100 from Narainganj arrived in Calcutts in the evening.

A special train with 2,100 refugees left Sealdah for the relief camp at Dhubulia in Nadia district, relieving to some extent the heavy congestion at the

#### SEALDAH RECEPTION CENTRE

About 5,000 people have been staying at Sealdah, occupying three large waiting rooms and a few platforms. Some families were camping in the station compound.

About 10 cases of cholers were taken from Sealdsh to hospital, bringing the total from April 8 to 50. Cases of smallpox, chickenpox and measles were reported.

On an average, 800 cholera inoculations and 600 smallpox vaccinations are being given every day by different medical relief units at the station. The Corporation has installed additional drinking water

#### MINORITY PROBLEM

The minerity problem was discussed by Dr. Choitram Gidwani, President, All-India Refugees Association, at a tea party given him on behalf of Sind Relief and Rehabilitation Committee, Calcutta,

in its pressions in Lindsey Street on the 19th April last.

the predicts had not been solved. Their leaders had found other methods of its solution and these were embodied in the Nehru-Liaquat Agreement. There was an admission on the part of leaders that partition did not solve the communal problem.

In the recent Agreement they were going to introduce a new form of communalism, he said, to solve communalism with which they were faced today by having a so-called minority representative in the Cabinet of different States which meant that they accepted the position that the Hindus of Eest Bengal would be represented not as belonging to the Congress or to the majority party but as a class by

#### \_DR. SUNDARI MOHAN DAS

(Continued from page 470)

He had a style of his own in literary writings and was composer of songs and a musician of no mean order. His Kirtans were well-known.

A long funeral procession composed of medical students, doctors and admirers of Dr. Das carried the body on a decorated bier to Nimtolla Burning Ghat, where it was cremated in the night of the 4th April last. Floral wreaths were heaped on the bier on behalf of numerous organisations including various medical students' unions, the Calcutta Corporation and Srihatta Sammilani. His Excellency Dr. K. N. Katju, Governor of West Bengal also sent a wreath.

#### FUNERAL PROCESSION

The procession which started from the lawn of the National Medical College passed along Park Street, Free School Street, Surendra Nath Banerjee Road, Taltolla Avenue, Dharmatala Street, Lower Circular Road, Upper Circular Road, Raja Dinendra Street, Sukeas Street, Cornwallis Street, Beadon Street on way to Nimtolla. On its long route it stopped before the Municipal Buildings, W.B.P.C.C. office, Calcutta Medical School, Sadharan Brahmo Samaj—institutions which Dr. Das had the privilege to serve for long years.

As a mark of respect to the memorfy of Dr. Sundari Mohan Das, the Central Municipal Office was closed at 3 p.m., on the 4th April last.

The death of Dr. Das was condoled at a meeting of the students and staff of the National Medical Institute and Chittaranjan Hospital in the Hospital premises on the 6th April last. Shri Satinath Roy, Advocate, presiding.

Presiding at a meeting held in memory of Dr. Sundari Mohan Das at the University Institute, Calcutta, on the 11th April last H. E. Dr. Kailas Nath Katju, Governor of West Bengal, referred to the services rendered by Dr. Das to alleviate the sufferings of man for over 70 years. He said that by preaching the message of love and goodwill they could honour his memory best.

Shri C. C. Biswas, Vice-Chancellor, Calcutta University, said that Dr. Das loved his country and people more than anything. He had devoted his long life to the service of humanity.

The meeting appointed a committee, with Shri Biswas as President and Shri Jagadish Bhattacharjee as Secretary, to organize a memorial to Dr. Das.

Dr. Sundari Mohan Das frequently said "I was born in one Revolution (Sepoy Mutiny) I will see another before I die." Was his wish fulfilled?

themselves. Similarly Muslims in certain States would be represented not from the erstwhile Muslim League party or the majority party but as a distinct entity.

Nearly 4,800 EastBongal refugees arrived at Sealdah on the 14th April last.

Of them, 2,000 came by Barisal Express, 1,300 by Chittagong Mail and 1,000 by Assam Mail.

The previous day's number of arrivals was 3.500 including 1.500 by Barisal Express, 1,200 by Chittagong Mail and 800 by Assam Mail.

#### Exopus Continuing

With the exodus continuing unabated, nearly 5,000 to 8,000 refugees daily congregated at the Scaldah Station premises filling every inch of space there including platforms and waiting halls.

A large number of refugees on their arrival had to be served with food there as they had no place to go, now resources to buy food for them. They huddled together at the station waiting halls (Main, North and South) and on platforms before they could be removed to Government camps.

More than 1.500 refugees arrived in Calcutts by S. S. Jalagopal' from Chittagong on the 14th April last and 85 other refugees from Chittagong also arrived by steamer 'Vanira'.

Thir live East Bengal agriculturist refugee families, comprising 184 members, men, women and children, left for the Andamans the same day.

Nearly 1.840 East Bengal refugees arrived in Calcutta by different Pakistan trains on the 15th April last.

Of them, about 600 came by Chittagong Mail, 450 by Barisal Express and the rest by Assam Mail.

A refugee Special carrying about 1,500 East Bengal refugees left Sealdah for Ranaghat with a view to relieving congestion,

Nearly 1,600 East Bongal refugees arrived at Sealdah Station on Sunday, the 16th April. Of them, 1,100 came by Barisal Express and 500 by Chittagong Mail.

Two refugee specials carrying 1,000 passengers left Scaldah for Ranaghat.

Two refugee special steamers, 'Merlene' and 'Kestrel', arrived at Shalimar Ghat (Howrah) that very day carrying 622 and 647 persons respectively including children from Narayangunge.

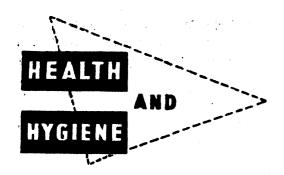

#### --SHRI UPENDRA NATH BANERJEE

(Continued from page 471)

Shri N. C. Chatterjee, who presided, said that Shri Banerjee was a prince among patriots. The English Judge who had convicted him and his colleagues stated that he was the brain of the conspiracy. A truly religious-minded man. Shri Banerjee believed there could be no compromise with evil.

The Bengal Press Advisory Committee at its meeting on the 18th April last recorded its deep sorrow at the sad demise of Shri Banerjee, Respectful homage was paid to the memory of Shri Upendra Nath Banerjee by different speakers at a meeting held at Ram Mohan Library Hall to condole the death of Shri Banerjee the same day.

A resolution requesting the authorities concerned to re-name Bowbasar Street as Upendra Nath Banerjee Street and the reingee colony at Jadu Mitra Lane as Upendra Palli was adopted at the meeting.

DURING THE WEEK ENDED APRIL 15

#### LONGEVITY IN INDIA

[By K. B. Roy, M.B., D.PH.]

PROBABLY everybody will agree with me that individually speaking, each one of us is born with a definite span of life, and when that time is up nothing and nobody in this world can keep us back for a second longer. Call it fatalism or call it what you will, but I can find no other explanation for the strange fact that a bullet on the battlefield will not really hit you unless 'your name is written on it' nor for the common experience of the young man in prime of life getting a 'perforated appendix' or some such calamity and departing from this world in what seems to be great haste. It may be all accident, but that term does not explain anything.

From time immemorial it has been man's desire to find out some means to prolong life, if not to attain freedom from death. But there is no evidence in history that his attempts have been successful in prolonging his life in this world for even a few years beyond the Biblical three score years and ten which in rare cases may touch the magnificence of a century. The well-known methods of 'gland transplantation in the Western system of medicine or Ksya-kalpa' in Ayurveda go only to produce a short-lived sense of youth and vigour: there is nothing to prove that they can increase our span of life in this world.

#### EXPECTATION OF LIFE

But it is also an observed fact that speaking about whole populations, people of some countries live longer than in others, or in scientific language, the expectation of life in some countries is higher than that in others; and the expectation of life in tropical countries generally is lower than in temperate zones c.g., it is 27 years in India and 59 years in Great Britain. A practical application of this observation is seen in the fact that most life-insurance companies give a rebate on the premium if the insured person goes out of India to live in some country in Europe or North America.

When we say that the expectation of life in India today is 27 years, we mean that the average life of a number of Indians born at the same instant, will be 27 years, i.e., though some of them may live to be 90 years of age, the great majority of them die at such an early age that for all practical purposes we may take it that most of them will die before attaining their 27th year of life. And this fact has a great significance in the economic life of a country that is trying to develop her industries and agriculture as rapidly as possible.

It is a truism to say that the most fruitful period of a person's life is the so-called middle age, when he has gained some experience of life and has not yet succumbed to the physical infirmities of growing age; for labours that require experience,

1.04

foresight and knowledge the middle-aged man is the most suited, just as for labours that require physical strength, courage and initiative the young adult is the best. But a country, where the majority of the people die before they can become even young adults, uses the services of both the above categories of its population as much as it loses the benefit of the wisdom that can come only from the aged people. Our country has a very high birth rate but full 30 per cent of all children die within one year of their birth; a high percentage of the rest gradually die off till only a few are left who cross the border into an old age. Apart from the loss of potential manpower-and womanpower too-, the loss in money and human effort that this large death-rate in infancy and young adulthood implies is somthing colossal. The social and economic effects of this devastating death rate we see everyday all around us—a surprisingly large number of children, puny and malnourished, all depending on one sole breadwinner of the family who may not look forward to any relief from his toils by handing over charge to younger people when he becomes old—such is the picture of the average Indian family today.

#### VITAL STATISTICS COMPARED

A very striking fact that emerges on comparing the vital statistics of different countries is that the expectation of life varies largely from country to country. The only two countries in Asia for which reliable figures are available are India (27 years) and Japan (45 years). Figures for some other countries are Germany (60 years), Australia (65 years), Norway (68 years). So far as we know, various factors, intrinsic and extrinsic, go to make this difference from country to country.

It is a commonplace observation in every country in the world that longevity runs in families, or in other words, if the parents lived up to a ripe old ago it is very likely that the children also will live to a good old age. But from this we cannot assume, i.e., no evidence is as yet available for the assumption, that certain races of men have a greater longevity than others. And even if such assumption was valid, it would not have much effect in a country like India where almost all the principal races of mankind have intermixed with each other to such an extent that practically speaking, they have lost their identity as separate races. But as we cannot always attribute the longevity of members of a family to any similarity of environmental conditions e.g., standard of living, education etc., we can say that the probability of longevity being one of the genetically inherited factors is not ruled

I have stated at the beginning that the expectation of life in tropical countries generally is rather low. But climate does not apparently have a major influence on this, as will be seen from the fact that Japan with a temperate climate has an expectation of life which is much lower than that of Great Britain with a similar climate, whereas Australia with her tropical climate has a figure which is higher than that of the latter. Though the enervating effects on the human body of a constantly hot humid climate cannot be denied, yet there is no doubt that in a country like India this cannot be of much importance on the life and achievements of the permanent residents of the country. There is no proof that the climate of India has changed to any great extent within the time of recorded history. and if it really had as much bad effect on the human body as it is sometimes supposed to have, it is very probable that by now at least the aboriginal Indians would have been extinct.

#### STANDARD OF LIVING

If we compare the two countries of Japan and Australia as they were before World War II, we can see that the standard of living of the general population has a great deal to do with longevity. Japan was a highly developed country with a cold invigorating climate, and with a population derived from that sturdy stock of Northern and Southern Chinese who have a reputation for living a happy and useful life in the face of all obstacles, natural or man-made; whereas Australia was industrially underdeveloped, has a tropical climate, and her people are emigrants from a cold country. But the economic system in Japan kept the major part of her population—whether agricultural skilled industrial worker, office clerk or the professional man-on a subsistence level of wages. whereas the average Australian worker was one of the most highly paid in the world. And this difference in the standard of living-including good food, good house, good medical facilities, and everything else that it connotes—gave the Australian a better chance to keep the machinery of his body in a more fit condition.

Is it possible to raise the expectation of life of the people in India to the same level as that of say Great Britain or the Scandinavian countries? It remains a debatable point. It is quite possible that the present high death rate in India is Nature's way to counteract some of the evil effects of the present high birth rate in the country; with a rise in the standard of living this high birth rate will inevitably come down, and this combined with the disappearance of the many preventible causes of death at present existent will naturally raise the expectation of life to a certain extent; but to have an expectation of life of say 60 years means that a very large number of people must live to an age much higher than 60 years. Is there any evidence in history that the average longevity in India was at any time as high as in some of the countries of western Europe today? The old Indian Shastric injunction to retire to the forest at 50 years of age shows that a man's physical and mental capabilities were supposed to become too feeble by that time for him to do any useful work in society; and if that was really so, it is improbable that his total span of life could have been

much longer than that. Also it is an admitted fact that physical maturity in a person occurs earlier in a hot climate than in cooler ones. So there is probably not much hope that even under the best circumstances, we can raise the expectation of life in India to a very high level; but what we certainly can do is to raise it higher from the present very low figure by reducing the abnormally high infant and maternal mortality and also the high death rate among the young adults—all mostly from preventible causes c.g. anaemias of pregnancy, gastrointestinal disorders, tuberculosis, etc.

A CONFERENCE OF CALCUTTA SCOUTS was held at the Chowringhee Y. M. C. A. on the 8th April last. His Excellency Dr. Kailas Nath Katju and Mr. John Thurman, Camp Chief, International Scouts Training Centre, London, addressed the Conference.

The Gove or in the course of his speech stated that scouts by heir individual and group acts of service without distinction of caste or community set an example for others to follow. In these difficult days not only for India but for the world, when humanity seemed in the grip of fear. Scouts should themselves be free of fear and teach others to shed fear.

THE BHARAT CHAMBER OF COMMERCE held its annual meeting in Prince's Grand Hotel on the 23rd March last. Lala Lakshmipat Singhania presided

Addressing the meeting His Excellency Dr. Kailas Nath Katju appealed to businessmen to help the Government in the development of cottage industries.

 Shri Singhania on behalf of businessmen offered whole hearted co-operation to the Government in developing road transport services, building programme and rehabilitation of refugees.

Shri I. P. Goenka was elected President for the 1950-51 year, Shri P. L. Saraogi, senior Vice-President; Shri G. L. Mehta, junior Vice-President; and Shri R. L. Periwal, Treasurer.

A DARING ARMED ROBBERY involving precious stones, jewelleries and cash worth about Rs, 2 erores was commuted at the junction of Mission Row and Mangos Lane near Dalhousic Square on the night of the 10th April, A Sindhi jeweller was returning home from his shop near New Market at about 9 p.m. with three other companions carrying precious stones, jewelleries and cash in three bags when the robbers fell upon.

 $_{\rm AS}$  a result of explosion of crackers and firing resorted to by the armed gang the Sindhi merchant died on the spot and three others were injured.

THE BENGAL NATIONAL CHAMBER OF COM-MERCE, eccently held its 63rd annual general meeting in its premises in Mission Row Extension.

 $Tr_{\rm c}/N = N_{\rm c}/Law$ , President of the Chamber was in the Chalc.

H.s. Excellency Dr. Katju, addressing the meeting made in appeal to the members of the Chamber of Commerce to render all possible help to the refugees from East Benge, and strengthen the hands of Government by maintaining peace.

appointed by the West Bengal Government to inquire into the affairs of the Calcutta Society for the Prevention of Cruelty to Animals upon various complaints and allegations having been made against the Society. The working of the Bengal Cruelty to Animals Act, 1920, has been, it may be recalled, entrusted by the Government to the Society and, for this purpose, it is paid Rs. 80,000 yearly to meet the pay and uniform charges of employees. A further Rs. 6,000 is paid for dearness allowance.

Sir B. P. Singh Roy has been appointed President of the committee. Maharaja Sris Chandra Nandy and Shri P. C. Chondhury, members, and Shri M. M. Sen, Secretary.

THE IRON AND STEEL SUB-COMMITTEE of the Economic Commissions for Asia and the Far East recently met for a 4-day session at the office of the Iron and Steel Controller. Government of India, in Netaji Subhas Road. Shri M. K. Powvala, Iron and Steel Controller, Government of India and Smilials delegate to the Committee, was elected Chairman for the session.

Nearly 20 delegates from India, Burma, Pakistan. United Kingdom, United States, France, Australia, Indonesia, Laos, Nepal, Netherlands. Philippines, Thailand, and Viet Nanr participated in the conference. Representatives of the International Chamber of Commerce, Supreme Commander for the Allied Powers, United National educational, scientific and cultural organisations and the Reonomic Commission for Europe also attended the conference as observers.

The Committee on its first-day meeting discussed the present and future requirements of iron and steel products in the countries of E.C.A.F.E. region, progress of plans for expansion of existing iron and steel industries and for the establishment of new projects and studied the raw material resources used in the manufacture of iron and steel in this region. The Committee also discussed the causes of delay in the realization of specific projects and practical ways of accelerating the realization and considered the possibilities and problems of securing plant and equipment-for expansion of capacity and for new projects.

THE DEATH OF A WELL-KNOWN CALCUTTA JOURNALIST. Shri Rasoniony Dhara, took place at Chirimiri in Madhya Pradesh early this month.

THOUSANDS OF BATHERS, congregated at different ghats of Calcutta on the night of the 2nd April last and took their dip in the Ganges on the occasion of complete lunar eclipse.

The eclipse started half an hour after midnight and was over at 3.49 a.m.

Volunteers of different relief organizations were in attendance at the different ghats.

A DRPUTATION ON BEHALF OF THE INDIAN JOURNALISTS: ASSOCIATION waited on the 6th April last upon Shri C. C. Biswas, Vice-Chancellor of the Calcutta University, when the scheme for a University course of journalism prepared two years ago by the Calcutta University in consultation with the Indian Journalists was discussed.

DR. BROCK CHISHOLM, Director-General of World Health Organization passed through Calcutta on the night of the 6th April last on his way to Geneva from Australia. In a talk broadcast on the night of the 7th April from the Calcutta Station of All-India Radio who had it recorded on

Andrew State (1997年) Andrew State (1997年) Andrew State (1997年) Andrew State (1997年) Andrew State (1997年) Andrew State (1997年) Andrew State (1997年) Andrew State (1997年) Andrew State (1997年)

the previous night assured the people of different regions that W. H. O. would do everything possible to assist the Government of the member nations to make people healthminded.

The Director-General added that the W. H. O. worked in many ways to help the member nations to improve the health of their people. Upto the present time between 660 and 700 scholarships had been given for study in foreign countries to students of medicines and public health. It also provided for public health demonstrators to go to various countries to demonstrate ways to control a particular disease. The scheme was that health experts would visit different areas but all aspects of health would be taken care of by units composed of people from the country itself.

Dr. Chisholm said that the organization had decided to concentrate during the first year of its existence on six major fields of works, namely, to control tuberculosis, malaria, neuralgia, maternity and child health, nutrition and environmental sanitation.

#### CALCUTTA'S SPECIAL CONSTABULARY

About 200 citizens have so far been enrolled in the Calcutta Special Constabulary which is being formed to assist the police in maintaining law and order in times of emergency. Another 100 volunteers have been enrolled and enlistment will continue.

The force, which is being raised under a scheme prepared by the Commissioner of Police and approved by the West Bengal Government, will hold its first rally on the Brigade Parade Ground on April 28. The volunteers will be given a short training in drilling and musketry. Many of those already enrolled possess firearms.

In the event of large-scale disturbances breaking out in the city, the services of special constables will be utilized to control unruly elements.

THE WEST BENGAL STUDENTS CONGRESS in Calcutta held its annual session sometime ago. Dr. P. C. Ghosh addressing the Conference appealed to students to maintain peace and devote themselves to the service of offigees.

No useful purpose, he said, would be served by merely criticizing the Government and indulging in wild and loose talk. This would only lead to chaos. Students must come forward and save the two Bengals.

SIR FREDERICK BOURNE, Governor of East l'akistan, and Lady Bourne arrived in Calcutta recently by air from Pacca on their way to the U.K.

Sir Frederick spent 35 years in India. The first five years had been spent in the British Army in India during World War I.

From 1920 to 1945 he had served in the I.C.S. in the Punjab and later in Assam, the C.P. and East Bougal.

The last 2½ years he spent in East Bengal as Governor. Sir Frederick and Lady Bourne left by air for the U.K. the day following his arrival.

# RPORATION NOTICES

#### To Contractors

Tenders are invited in duplicate for the following and will be received by the Second Deputy Executive Officer on the date noted for each, up to 12 noon. Each tender in duplicate must be enclosed in a sealed cover and superscribed—"Tender for . . ." For specifications and tender forms apply to the Keeper of Records. Price Rs. 2 per set.

- 1. Extension of Corporation conservancy Railway line at Bantala for accelerated dis-tribution of sludge manure.
- 2. Repairs to the time-keeper's quarter and member quarter at Goragatche Incinerator Compound.
- Lighting street and institution oil lamps for the year 1950-51.

#### Muhamadan Burial Grounds

This is for general information of the Muslim public in the city that the burial in the Bagmari Burial Ground has temporarily been suspended due to disturbed conditions in the locality and consequently most of the burials are being diverted to the Gore-Goriban Burial Ground at Gobra, smoothly and there should be no need for The work in that burial ground is running diversion of dead bodies from the localities other than Kidderpore and adjoining areas to the Sola-ana Burial Ground where space for burials is very limited. It is therefore desirable that the public should in their own interest carry the dead bodies as usual to the Gore-Goriban Burial Ground at Gobra and thereby help the Board in the smooth running of the burial grounds concerned. An attempt is being made to re-open the burial ground at Bagmari at an early date which will be emmunicated to the public in due course.

M. RAHMAN, Secretary Muhammadan Burial Board

The 17th April, 1950.

#### Drain Land Closed

Notice is hereby given for the information of the public that in pursuance of an order passed by the Administrative Officer of the Corporation of Calcutta on the 6th June, 1949, in exercise of the powers vested in him under Section 252(1)(b) of the Calcutta Municipal Act III (B.C.) of 1925 as well as read with Section 22 of the Bengal General Clauses Act (B.C.) of 1898 and read with the Corporation of Calcutta Temporary Supersession Act, 1948 (W. B. Act VIII of 1948) the abandoned drain land measuring 5 ch. 31 s.ft., adjoining premises No. 20/1, Roy Street in Ward No. 22 and delineated in the map or plan, prepared in this behalf and thereon coloured green has been permanently closed with effect from the date of the said order.

A. D. KHAN, Chief Executive Officer.

Central Municipal Office, The 19th April, 1950.

#### Road Land Closed

Notice is hereby given for the information of the public that in pursuance of a resolution passed by the Corporation at their meeting held on the 21st January, 1948, in exercise of the power vested in them under Section 306(C) of the Calcutta Municipal Act (B. C. III) of 1923, that the portion of the road land adiacent to premises Nos. 43/A and 43/B Chakrabere Road North measuring 2 k. 5 ch. 7 sq. ft. in Ward 22 delineated in the map or plan prepared in this behalf and thereon coloured green has been permanently closed with effect from the date of the Corporation resolution noted above.

A. D. KHAN, Chief Executive Officer.

Central Municipal Office, The 19th April, 1960.

D.D.T. Solution & Powder RELIABLE INSECTICIDE

BENGAL CHEMICAL & PHARMACEUTICAL WORKS LD CALCUTTA BOMBAY

#### MARKET NOTICES

- 1. It is recommended that coolies should be paid at the following rates:—15 Minutes—Two annas. 4 Hour—four annas.

  1 Hour—eight annas. Every succeeding hour or part of an -lour and
- 8. Coolies for carrying bear purchases are obtainable at all the principal entrances and care should be taken that only coolies bearing number badges are engaged. For the serrent half-year "A" class coolies have been allowed a Navy blue arm badge with red numbers from Nos. 1 to 400.

- 3. Any complaints about coolies should be made at the Superintendent's Office giving the number of the conly.

  4. All complaints relating to the conduct of vendors should be made to the Superintendent. No action can be saken where 'le articles in dispute have been removed from the shop premises or in regard to transactions which are not brought to the notice of the Superintendent at the time of cocarrence.
- 5. To avoid conflicts of statements both as regards the goods purchased and the nature of the sales, customers are requested to insist on getting a voucher, as far as practicable.

6. If goods are taken "on approval" customers are minereded to obtain a voucher to that effect stating the

price paid. 7. Any articles lost or found in the market should be provided at the Superintendent's Office. 8. No doys, broycles, pricycles, or perambulators allowed inside the markets

9. For the convenience of the public a stand is provided at the south-west corner where the visitors can keep their breyels in charge of the lessee thereof on payment of a fee of 0-1-6 for a Bicycle and 0-3-0 for a Motor Cycle, between 6 a.m. to 7 r.m.; between 7 r.m. to 12 a.m. Bicycle 0-3-0 Motor Cycle 0-6-0 and after midnight Bicycle 0-12-0; Motor Cycle Re, 1-8-0. The Corporation does not take any liability in this connection. this connection.

this connection.

10. Customers are requested that if they suspect any weight used by any vendor of the market to be short, they will bring the matter immediately to the notice of the Superintendent when the weight will be duly tested in the Office and the vendor punished if it is found short.

11. The public and the shop-keepers of the market are requested a assist in the mitigation of the beggar-nuisance by refraining from giving alms of any description within the market.

market.

12. Customers are requested to examine the coins, obtained in the course of transaction, before they leave the shop. Ordinarily no action can be taken against the shop keeper if any spurious coin is alleged to have been detected after they leave the shop.

#### RECENT ADMINISTRATIVE CHANGES

THIS week has opened with the most important administrative changes in the body-politic of Calcutta's Civic Corporation. Shri S. N. Ray, C.I.E., I.C.S., Administrative Officer of the Corporation of Calcutta since the 27th March, 1948, having taken up appointment as Chief Secretary, Government of West Bengal, has relinquished his office as Administrative Officer to his successor, Mr. Aurelius David Khan, 1.c.s., Chief Executive Officer of the Corporation.

Mr. Khan has been in active service of the Bengal Government since April, 1920, and was a Joint Magistrate and Deputy Collector in 1929 For sometime he was connected with the Civil Supplies Department. Immediately before his joining the office of the Chief Executive Officer of the Corporation in November, 1948, he was Private Secretary to the Premier of West Bengal. We hope that our new Administrative Officer, with his experience as an administrator and with his fairly long connection with the Corporation as its Chief Executve, will efficiently guide the institution.

Shri Ramanlal Shankarlal Trivedi, i.c.s., has taken over charge of office vacated by Mr. Khan. Although Shri Trivedi now comes from Cutch, where he was the Judicial Commissioner, he is not at all unknown in West Bengal rather Bengal. He was for sometime a Judge of 24-Pergannas and held the post of the Special Officer, Anti-Corruption Department of the Government of West Bengal for sometime prior to his services being placed at the disposal of the Government of India, Ministry of States, who posted him as Judicial Commissioner of Cutch.

Shri Trivedi is an experienced public servant and we expect the Corporation to flourish under him.

Our good wishes to both of our new Administrative and Executive Heads.

#### COMMENT

#### FIGHTING CHOI **MENACE**

DURING the week ended January 25, Cholers was declared epidemic. Since then till the week ended April 22 deaths from the disease totalled 1,660 and attacks 8,911.

> Week ended April 8:-Attacks 406; Deaths 188. Week ended April 15:-Attacks 685; Deaths 272. Week ended April 22:--Attacks 777; Deaths 480.

The highest number of deaths from cholera recorded during the period from 1986 to 1949 was 188 in 1945 in the week ending April 17. Last year during the corresponding week attacks and deaths from cholera were 849 and 102 respectively.

Cases have occurred all over the city, although a few of the wards are more badly affected than others.

A conference of the city's health experts met at the Writers' Buildings early this month, and a programme for mass inoculation was decided upon. Later, at another recent conference, attended by Shri R. S. Trivedi, Chief Executive Officer, Dr. M. U. Ahmad, Health Officer and Shri R. Gupta, D.C.,

#### OUR REQUEST TO CITIZENS

As the doctors and vaccinators have been very busily engaged in the mass inoculation drive against cholera, the citizens are earnestly requested to refrain from calling raccinators at their residences, as far as possible. They are also requested to help the drive by offering themselves to be inoculated at the inoculation centres or at places where inoculation is being given.

D.D., Calcutta Police, it was agreed that the Food Inspectors of the Callcutta Corporation along with police patrols would be sent out to the different parts of the city to seize and destroy exposed food-stuffs cut-fruits, drinks, etc. Such drives, which started on Wednesday, the 26th April, are being continued every morning and evening.

The mass inoculation drive against cholera started by the Health Directorate of the West Bengal Government in collaboration with Calcutta Corporation has been started and the work is progressing satisfactorily.

Doctors and Health assistants belonging to the Corporation and the Government are going round the affected areas in publicity vans, every morning and evening giving inoculation. The Corporation inoculation centres, numbering about 30, are also working at full speed.

Inoculation is being given to the incoming East Bengal refugees at Sealdah Station by the Government and the Corporation Health staffs and different relief organizations.

Arrangements have also been made to inoculate students in schools and colleges and assistants and workers in business establishments, mills and factories on request.

We are hoppy to record that a numb medical students in the city and some doctor offered their services in the inoculation drive. No if the citizens feel inclined to co-operate with the Health authorities the progress of the epidemic may successfully be halted.

Inoculation is the most important preventive measure. Some 250,000 people out of a population of 4 million were inoculated till April 8 last. Since the mass inoculation drive has been started the number of inoculated persons has increased greatly.

During the week ending April 22, about 97,407 persons were inoculated. The number of inoculated persons for the previous week was 80,000.

#### -PERSONALIA

(Continued from page 8)

The Deputy Prime Minister took a three-hour trip down the Hooghly river in the morning. He was accompanied by Dr. Katju, Governor of West Beng**al.** 

In the morning, Sardar Patel received a deputation of West Bengal Muslim MLA's who made certain suggestions regarding the implementation of the Delbi agreement.

After lunch, he met some representatives of East Bengal refugees and had an hour's talk with them on their experiences in Pakistan.

Dr. A. C. Chatterjee, formerly of the I.N.A. and Shri Eknath Ranade, local chief of the B.S.S. also saw the Deputy Prime Minister.

Sardarji left for Delhi by air in the morning of the 22nd April after a six-day visit to Calcutta.

The Deputy Prime Minister's party included his daughter Shrimati Maniben Patel, and his Private Secretary, Shri V. Shanker.

#### DR. S. P. MOOKERJEE

Dr. Shyama Prasad Mookerjee, who had recently resigned from the Central Cabinet on the issue of the Indo-Pakistani agreement; arrived

in Calcutta from Delhi by train on the 21st April

He was enthusiastically received at Howrah Station by thousands of people including representatives of the Hindu Mahasabha, Hindu Students Federation, Arya Samaj. Sana-Dharma Parisad, Unity Party of India, Prabartak Sangha, Bengal Relief Society, East Bengal Relief Committee (Howrah) and various other organizations.

DR. SYAMA PRASAD

The day following Dr. Mookerjee visited Sealdah Station spending about an hour there. He spoke to the refugees and inspected the relief arrangements at the station.

# Personalia

Deputy Prime Minister of India, arrived in Calcutta on a five-day visit on Sunday, the 16th April. He later extended his stay for one day more.

On the first day Sardarji met the journalists of the city. Ministers of the province and officials. On the second day of his stay he discussed with the Ministers and civil and

rious aspects of the Indo-Pakistan Agreement and also the measures of law and order in the State.

He also discussed the question of relief to the large number of refugees from East Bengal.

Shri Shankarrao Deo, General Secretary of the A.I.C.C. and Shri S. M. Ghosh, President of the W.B.P.C.C. called on the Deputy Prime Minister in the morning.

During the third day of his stay Sardar Patel met the Congress leaders and workers of the State, including Presidents and Secretaries of the W. B. P. C. C. and different District Congress Committees in and around Calcutta.

The same day Sardar Patel received Shri-Santosh Kumar Basu, India's Deputy High Commissioner, at Dacca and representatives of 70 Relief Organizations in the city.

At a largely-attended Conference of officials held on the fourth day of his stay in the city, the Deputy Prime Minister discussed the problem of relief camps, transport of refugees to various centres and the question of cultivation of abandoned lands.

The Conference was attended among others by the Governor of Assam. Shri Sri Prakasa.

Shri P. C. Chowdhury, 1.c.s., Secretary, Ministry of Information and Broadcasting, Shri H. M. Patel, 1.c.s., Defence Secretary, Government of India, Shri V. P. Menon, Secretary, States Ministry,

Ministry of States, who arrived from Delhi by air in the afternoon saw the Deputy Prime Minister at Government House.

Sardar Patel also received Shri Deven Mukherjee, Dr. Meghnad Saha, Dr. B. C. Guha, Shri Jagadish Sinha, Shri Satyaranjan Baksi and Shri T. C. Goswami.

In the afternoon Sardar Patel was entertained at a tea party by the West Bengal Governor at Government House lawn which was attended by several leading citizens and editors of Calcutta newspapers.

During the fifth day of his stay Sardar Patel acquainted himself with the present situation in Assam and the steps the State Government had so far taken to implement the Indo-Pakistani agreement when he met the Governor of Assam, Shri Sri Prakasa, the Chief Minister, Shri Bardoloi, and the Finance Minister, Shri Bishnuram Mehdi.

A deputation on behalf of Muslim Congressmen in Calcutta met Sardar Patel for about half an hour. Representatives of the All-Bengal Teachers Association and a number of student organizations in the city also met Sardar Patel.

In the morning, he received Shri K. P. Mookerjee, Labour Minister of West Bengal, Shri S. P. Desai, Chief Secretary to the Government of Assam, Shri Raja Ram, Collector of Customs, and some local newspaper editors.

The Chief Minister, Dr. B. C. Roy, called on Sardar Patel in the evening.

Sardarji visited Gandhi Ghat. He was accompanied by Dr. Kailas Nath Katju. Governor.

In the evening of the sixth day of his stay in Calcutta Sardar Patel gave a Broadcast talk to the people of Bengal on the Delhi Agreement.

He appealed to his friends in West Bengal fully to comprehend the delicate and difficult situation in which they were placed. The agreement had been concluded, and its implementation was a point of honour for the Government and people of India.

In the course of his talk he stressed:

The heart of West Bengal is sound. I have faith in West Bengal and its people. I have belief in its destiny...if we succed, we might, in a humble way, have started an era of peace, understanding and good neighbourliness."

## Problems Of Unemployment And Resettlement

#### How Calcutta Tackles Them

BY SANTOSH CHATTERJI

HEN the Great War No. II ended, over a million of the sailors, soldiers and airmen in India left the services and they needed some help for resettling down as civilians. Both the Central and the Provincial Governments took immediate steps to find suitable employment for the exservicemen by reserving a substantial percentage of jobs in Government service. They also made provisions for free training facilities in a number of technical and non-technical trades and occupations as well as for higher studies. They rendered help in the formation of Co-operative Societies and for settlement on land under colonization schemes.

#### FIRST EMPLOYMENT EXCHANGES

The Government of India set up in July, 1945, an organization called the Directorate-General of Resettlement and Employment and this organization had under it special offices called "Employment Exchanges" which assisted the applicants among ex-service men in finding out suitable jobs. The organization also started Technical and Vocational training schemes. Under the first scheme training was given in some 50 engineering and building trades and under the second scheme training was given in agricultural occupations, cottage and small-scale industries, commercial and clerical occupations and other miscellaneous vocations. A special training scheme was evolved for helping disabled ex-servicemen ,and special arrangements were made for exservice women.

With the headquarters of the organization located in Delhi, there were several regional directorates, such regions comprising one or more provinces. Employment Advisory Committees, consisting of representatives of workers, ex-service men and employers, were set up at the centre as well as in the regions. At first there were 10 employment exchanges all over the country. Between July, 1945, and July. 1947 the number of such exchanges increased to 70. After the partition of the country in August, 1947, there were 58 such exchanges in the Dominion of India. The number of applicants for assistance and the number of persons receiving assistance from the employment exchanges from year to year between July, 1945, and November, 1947, may be given as follows:—

| Year         | Number of Applicants | Number of the Assisted |
|--------------|----------------------|------------------------|
| July, 1945   | 6,690                | 1,420                  |
| June, 1946   | 1,42,507             | 6,428                  |
| July, 1947   | 3,52,010             | 16,688                 |
| Nov., 1947 ( | after                | 1 6 707                |
| partition)   | 2,26,086             | 15,797                 |

#### I.L.O.'s IDEAL

Although the organization for resettlement and employment of ex-service men was in fulfilment of one of the many post-war problems confronting not only India but almost the whole world the origin of the institution may well be traced back to a long-cherished ideal of the International Labour Organization, aiming at full employment for peoples of the

World. It may be recalled here that the first International Labour Conference held in Washington in 1919 shortly after the conclusion of the Great War No. I adopted a convention providing for "the establishment of a system of free employment agencies under the control of a Central authority." This authority finding a suitable worker for every useful job would ensure full employment in a country and would also secure management-labour co-operation in the field of employment. The Convention was ratified in 1921 by India, one of the few countries to do so. But at that time the economic condition in the country was not so rudely disturbed as to necessitate the introduction of public employment agencies. However, the bogey of unemployment gradually seized the Indians, whose standard of living had somewhat improved. The Government of India Act of 1985 placed some amount of responsibility upon every provincial Government for effecting a situation of maximum employment within its respective domain.

#### PERMANENT FEATURE OF PUBLIC SERVICE

As time went on, the idea of rendering employment assistance to all, who sought it, demanded serious attention of the Government of India. And, in January, 1948, the Central Employment Advisory Committee recommended to the Government of India that the Employment Exchanges and the Technical and Vocational Training schemes should be made a permanent feature of public service, the benefit of which should be enjoyed by all.

In the meantime refugees coming in streams rom West Punjab and East Bengal into the Dominion of India had presented a problem very difficult of solution. A mighty disruption uprooted these families from their hearth and home and they needed immediate rehabilitation in India if they should be saved from annihilation. Such a crowd of humanity. driven to despair and utter helplessness demanded sympathy and help: moreover, the country could hardly throw off such an enormous amount of manpower, that might be productive of national welfare great dimensions. So, the Exchanges of the Government of India, and also the Government Technical and Vocational Training Centres faced an urgent duty before them.

#### PROBLEM OF REFUGEE REHABILITATION

In November, 1947, within three months from the Partition of India coming into effect, of 2,26,086 people including both ex-service men, refugees and others who had their names registered at the Employment Exchanges, 15,797 persons obtained employment and 9,732 persons were admitted into 234 training centres for lessons in various vocations.

According to a statement of the Minister of State for Relief and Rehabilitation. Shri Mohanlal Saxena, in reply to a question put to him in Parliament towards the beginning of 1949, it appeared that since its inception in September, 1947 to December, 1948, the Relief and Rehabilitation Department of the Government of India had spent about Rs. 22,13,00,000 of which a sum of Rs. 2,85,85,000

had been given as loan to the refugees, Rs. 1,52,44,000 used on building quarters for refugees, Rs. 18,64,76,000 on refuge camps, Rs. 2853,000 on training centres for refugees. In West Bengal about Rs. 21 lakhs were given as loans.

With a view to collecting the data necessary for the handling of the problems of rehabilitation in the different parts of the country the Government of India undertook in July, 1949, a census of all displaced persons, who had left their homes in Wastern Pakistan on or after March, 1947, or in Eastern Pakistan on or after October, 15, 1946 on account of civil disturbances or fear of such disturbances or on account of partition of the country. Particulars regarding names, sex, age, occupations, annual income of the family members, particulars of property possessed by the different families before partition and details of the present living conditions of those families were to have been collected.

#### WEST BENGAL EMPLOYMENT EXCHANGES

In West Bengal the employment exchanges during 1948 registered 1,16,294 candidates from among the ex-service men out of whom 25,585 found posted. During the themselves same year **30.**588 refugee candidates were registered of them 2,384 were with and provided Under the Vocational jobs. training scheme 19,257 refugees applied for training in 1948. of whom 2,951 were posted and 1,976 received training. Some 38 firms and establishments, co-operating with the Resettlement Directorate. accepted refugees as apprentices.

At a Conference held in Calcutta by the Labour Minister of West Bengal, Shri Kalipada Mookerjee, towards the end of January, 1949, the future of employment exchanges and training centres was discussed. Although the number of registrations far exceeded that of placements the growing use of the exchanges was thereby proved. The various training schemes, technical, vocational and apprenticeship, were found inadequate for the increasing number of refugees, this fact required the West Bengal Government to approach the Centre for providing funds and other facilities to accommodate all probable trainees.

About July, 1949, the Refugee Rehabilitation Board, set up by the Government of West Bengal was known to have taken up in right earnest a programme for tackling the refugee rehabilitation problem.

#### EFFORTS OF PRIVATE ORGANIZATIONS

Besides the Governments, both Central and Provincial, a number of private organizations in the city, like All India Women's Conference, Bangiya Silpa Pratisthan, Nari Siksha Samiti, have either enlarged the scope of their training centres or have opened new centres for vocational training of refugee women in particular. This is indeed a very good sign.

According to recent reports from the employment exchanges in West Bengal, there is a shortage of skilled technicians in various trades in West Bengal and a considerable surplus of unskilled and clerical personnel on the other side. The total number of registrations and placements effected by the Employment Exchanges in May, 1949, was 10,896 and 2,082 respectively. The causes of such a large measure of unemployment were stated to

1.04

be shrinkage of business activity in general, strikes and lockouts, and short supply of raw materials in some industries. Already, due to the lack of industrial activities in India, employment opportunities have not so far kept pace with India's growing population. Hence the unemployed far outnumber the number of persons profitably employed.

But how long may the growing menace of unomployment be allowed to remain? For soon this
menace will make the structure of economic stability
and progress of the country crumble down. Proper
utilization of manpower alone can help the situation.
For this it is necessary that a dependable machinery
be set up "to impart technical training to the unskilled workers and to properly absorb technically
trained hands in the industry". (Shri C. C.
Biswas in the course of a broadcast from the Calcutta
Station of the All India Radio in May, 1949). Thus,
the establishment of a full-fledged National Employment Service in the country to undertake full
responsibilities of bringing up trained and skilled
labour and finding them proper jobs is urgent.

#### RAPID INDUSTRIALIZATION

Now, it is a complaint made by the industrialists that productivity of labour has been failing and the cost of production mounting. It is true that wages have one up since 1939 but the labourers have not had enough to eat even to this day. In this context His Excellency Dr. K. N. Katju, Governor of West Bengal, said sometime ago, "The worker alone may not be to blame for falling production and the rising cost of production. It should be the endeavour of all to bring about conditions in which wages may be fairly high and prduction costs low." Presidential speech at the 4th Anniversary of the Regional Employment Exchange, Calcutta area in July, 1949). His Excellency also said, "Unemployment is growing, and even women are coming forward in larger numbers in search of jobs. The Employment Exchange has to work within the limitations prescribed for it. It is not an organization to create employment; its main task is to bring employers and employment-seekers together. The organization has done some admirable work under its vocational and apprenticeship training schemes." Now, it is needless to stress that at the present moment as the report of the Employment Exchanges in West Bengal (referred to before) shows. enlarging the number of skilled ers is required for rapid industrialization of the country either by introduction of large-scale industries on capitalistic or nationalized basis or by concentration on cottage and small-scale industries as in Japan.

#### RESETTLEMENT OF REFUGERS

In a review recently prepared by the Government of West Bengal about the relief and resettlement provided to the refugees within the municipal area of Calcutta and in Greater Calcutta and the indutrial area up to September last year, the following facts stand out:—

Number of displaced refugees in Calcutta— 851.814: Number of such persons in Greater Calcutta and the industrial area—19,262.

and the second of the second o

Vince of these displaced refugees have been resided in Government Camps, but their actual number has not been given. A great number of the camp-living refugees have also received gratuitous

relief. Some refugee families have been accommodated in requisitioned buildings, flats and hutrooms. Many refugees living outside Governmentprovided accommodation have received financial assistance either in the shape of gratuitous relief or in the shape of loan. Many displaced students have received loans, many new schools have been started for them. Displaced businessmen have been aided, grants have been made to a large number of displaced medical men. In all those cases the figures for Calcutta and Greater Calcutta area are, however, wanting. It is known that as many as 111 Co-operative Societies have been organized in West Bengal for the resettlement of displaced persons from Eastern Pakistan. Of these societies 28 are colony societies, 35 multi-purpose societies, 20 weaver societies. 2 co-operative stores, 16 fishermen's societies and 6 industrial co-operatives. Among these various cooperative societies, Calcutta and suburbs have some 7 colony societies and 14 multi-purpose societies in the main.

#### VISIT TO TRAINING CENTRES

Leaving out of consideration the progress of refugee resettlement with gratuitous relief, loans and advances all made by the Government and also with the polling of resources of the refugees themselves, what may we be more interested in than the Government provision for training up the evacuees for employment? For, such method of resettlement will mean a methodical approach not only to the solution of the problem of the evacuees but also to the improvement of present industrial situation of the province.

Sometime ago I wanted very much to see for myself what actually was being done for the resettlement of the refugees who had gathered in and around this city. I visited several places where the refugees had found accommodation. I can say, much more should have been done but could not have been done. And, I personally do not lay much stress upon their living condition for the present. For, the refugee rehabilitation problem is to be considered on a long-term basis. Mere finding of houses will not help them much. What they actually need is permanent resettlement in life. And, for this they must have to be given individual sources of income for maintenance of the respective families.

It is idle thinking that the refugee population may be allowed to draw upon financial or other help from the Government for an indefinite period. This will mean a great national loss, even if such loss is only temporarily supportable in view of humanitarian reasons. Moreover, so far I am aware, not much of the financial assistance, offered to the refugees, has been properly utilized. In this connection what I should like to point out is that if from the beginning the refugees could be suitably grouped and the professional people among them helped to be in their old jobs, while the rest were sent to the different educational, technical or vocational training centres, the start of a right move would have been made.

#### AT ONE SUCH CENTRE

Already, I have found in the course of my recent visit to a few of the Government Vocational and Technical Training Centres, located in and around this city and originally opened for the training of the Ex-Bervice men with a view to their resettlement, some refugees have already found place there. And, most

of them, as the Officer-in-Charge explained to me, have done well during the training period. One of the centres having a teaching staff of eleven members has an accommodation strength of 160 trainees at a time. Actually, the number of trainees was not, as I found, more than fifty. The different sections of this Centre have been for clay toys, wooden toys and sportsgoods, ordinary clay work, bakery and confectionery, nandmade paper, umbrella making and pottery work. Of the toys, they are of various kinds: motive, idle or educative. The sportsgoods are generally these: bagatelle, cricket bats and stumps. Also, picture-framing is taught at the wooden toys section. The clay and porcelain work consists of tea cups, saucers, teapots, and even busts. The bakery section gives lessons on preparation of bread, biscuits, lozenges and chutneys.

The Principal of the Vocational School, who is a civil engineer, told me that in the recruitment of teachers their practical experience, both technical and vocational, had been taken into consideration.

# PROBLEM OF UNEMPLOYMENT HOW CALCUTTA TACKLES IT

The various employment exchanges in the State of West Bengal have registered 52,987 candidates for employment between November 1949 and March 1950, of whom only 6,680 could be employed.

The Regional Employment Advisory Committee is understood to have expressed its concern for the growing unemployment situation in the State, particularly in view of the recent influx of displaced persons from East Pakistan.

The Ministry of Labour, Government of India, it is known, have adopted a scheme for imparting technical and vocational training to 1.200 adult civilians in the State of West Bengal.

And, the permanent staff of the Centre was further assisted by a peripatetic pottery party attached to Department of Industries, Government Bengal. In selection the of the trainees, though no educational test was at present held, certain vocations required an average education up to the standard of Classes VII and VIII of the English High Schools of our country. Among the students whom I met at the Centre, some were totally illiterate but most of them possessed the average education required. There were also some. who had passed the Matriculation Examination of the Calcutta University.

The training given at the Centre is intended to prepare a trainee for higher education in his vocation. Its principal aim has been to make the trainees self-sufficient, whether by finding out any suitable employment or by adopting a trade profession.

#### FREE TRAINING IN VOCATION

The particular Vocational Centre, of which I have spoken so much, was started by the Government of Bengal, now West Bengal, and has been under their charge, the Government of India however bearing a portion of the cost.

Training is given here free of charge; moreover, stipends are also allowed to all the students. And,

the course of training is for one year with an efficiency test at the tenth month. Yet, it was disappointing to find that not many trainees were there.

Such apparent apathy of the refugees to receive free vocational training for self-sufficiency does not speak well about their judicious thinking. The refugees are all welcome in India if only they should like to be useful citizens.

Here, I should say, when the training centres have not been made profitable use of by those for whom they were brought into being and expanded, why should not they be opened to all civilian trainees, who may like to be profited by these centres?

#### AT ANOTHER CENTRE

At a technical training centre, which also I visited refugees along with the Ex-service men were seen receiving lessons in electric motor wiring, switchboard connections, moulding and motor car repair works. The course is for one year with an efficiency test at the tenth month.

The In-Charge of the Centre, who kindly showed me round, told me that electricians and motor mechanics were easily absorbed by the existing companies in and around Calcutta and also the moulders were in great demand. But, since such technical jobs did not attract the attention of the fairly educated, say, up to Class VII or VIII standard of our English High Schools, only fifteen per cent. of the trainees were among the good students.

This may be due to a false sense of prestige or the wrong estimation that higher education will afford more lucrative jobs. Time has come when we should be very careful about selecting the future careers of our boys from the very beginning. Every-body in the society should be suitably and fruitfully employed, so that there is no unemployment and no loss of national wealth. When you cannot decide how best you can have your boy adequately employed, whether in service or in vocation, you may consult the Regional Directorate of Resettlement and Employment or any of its Employment Exchanges.

#### DAKSHINEE

RABINDRA CULTURAL CENTRE OF SOUTH CALCUTTA

The first library of musical books has been established in South Calcutta under the auspices of Dakshinee Cultural Centre of Rabindra Music and Literature. This library, which is expected to be of some use to research students of music, contains many valuable musical publications, rare notations of songs and critical works on music collected from different parts of the country. The entire collection refers to the various spheres of music,—Rabindra Music, Indian Classical Music, Indian Dance Art, Instrumental Music, Folk Songs, etc.

The authorities of Dakshinee are known to have given since sometime a serious consideration to the urgency of collecting funds for the erection of a suitable building to accommodate all the present and proposed departments of the Centre. The building will have a big auditorium in the ground floor, dedicated to the memory of the Poet. The General Secretary has sent out an appeal to the public to contribute generously to the fulfilment of this noble project.

BENGAL LOCAL SELF-GOVERNMENT ACT
To The Editor,—Calcutta Municipal Gazette,

Sir,—It is regrettable that for those rural areas where municipalities do not exist, none has taken much care to voice the problems of those localities. There are people who require the assistance of those who have received the benefits of municipal facilities for the betterment of their lot.

Your Gazette is the premier organ for voicing Municipal problems. Should you please deal with the problems which confront rural Bengal? I shall be much obliged if you would kindly put your views in your next editorial.—Yours faithfully,

BIMAL MUKHERJEE.

Vil.—Ayada. P.O.—Guptipara. Dist.—Hooghly. The 19th April, 1950.

[EDITOR'S NOTE: Your suggestion is welcome. But the scope of the Gazette is very much limited. First of all, it is the official organ of the Corporation of Calcutta. Next, its interest is very much limited to Calcutta's welfare. However for better public understanding we sometimes go beyond our scope to include facts of interest to other municipalities. It is the Local Self-Government Department of the Government of West Bengal who may publish a periodical serving the interests of the people of the province in the matter of better and healthier living.]

# A DEMAND FOR CHOLERA HOSPITAL To The Editor,—Calcutta Municipal Gazette,

Sir,—Cholera raging in the city, the Cholera Ward of the Campbell Hospital is not accommodious enough, nor the proper sanitary conditions of the Ward are likely to be maintained.

In similar circumstances, temporary hospitals were opened previously by the Health Officers of the Corporation.

Now, I feel an occasion has arisen when the Cholera Ward of the Campbell Hospital needs be supplemented.—Yours faithfully.

TARA PROSAD BANERJEE.
5. Tarak Pramanick Road, Calcutta.
The 20th April, 1950.

#### DR. PERCY HODGSON IN CALCUTTA

Dr. Percy Hodgson, President of Rotary International, was given a dinner by the Calcutta Rotary Club on the 22nd April last. On that occasion the current year's Rotary slogan "One World." its implications and the extent to which the individual could help in the achievement of the ideal, were discussed.

Dr. Hodgson, accompanied by his wife, was on a world tour, carrying the message of Rotary to Clubs everywhere.

Dr. Hodgson was presented with a miniature of the Asoka Pillar and of the Calcutta Rotary Club banner, Mrs. Hodgson was given a Banarasi sares.

and the same of th

By SASANKA CHOUDHURY

# UPENDA AMONG JOURNALISTS

Our evenings in the Forward Office was delightful. One could hardly take our assembly for anything else than a noisy parlour. We generally indulged in light talks—almost the whole lot of us, the Editorial staff—hurling points and counterpoints at one another. It was as if an energizing recess before we could sit at our desk to take a deep plunge into our telegrams.

Yes, there were light refreshments, too. And our proletarian dishes often attracted from the corner room Upenda who managed to steal into our midst and devour without notice and with a seemingly urgly avidity as much as he could snatch away caring a fig for anyone's protest. No, he would not talk nor would he stop; rather he thought it better to allow in the meanwhile both the hands to play adroitly lest he might not have his surfeit. It was just like Upenda—Upendranath Banerjee—the noted revolutionary, who having served the sentence of life trapsortation in the Andamans, found himself an Assistant Editor of the now defunct Forward, an organ of the Swaraj Party led by the Late Deshabandhu Chittaranjan Das.

#### An Enjoyable Fun

We got used to it, an enjoyable fun, and gradually learnt how to protect ourselves from the onelaught of this sturdy dwarfish fellow who had very little regard for rigid sanatani canons.

"There trotting he comes", someone gave a warning, and we gave him a good surprise by making a fool of him, having concealed the stuff he coveted.

He wouldn't mind, he could take it so easily but would never consent to contribute anything towards our poor dishes. Nevertheless our assembly was all fuss if he were not in it. He bore a peculiar charm about him, having had a halo of long incarceration and outstanding literary talent. His autobiography had already made him famous. Who could like to be cut off from enjoying so rich a fund of sparkling humour as Upenda could supply? Within a few seconds he could turn the whole lot to a hilarious band. So lovable a person you could hardly find in a newspaper office.

#### A GALAXY OF YOUNG MEN

My relation with Upenda was a bit more intimate, for it was he who picked me up in 1926 and introduced me to Shri Satyaranjan Baksi who was our Chief. It was in the heyday of Forward with its two Bengali counterparts Banglar Katha and Almashakti. I was overjoyed to find myself in the company of a galaxy of powerful young writers like Premendra Mitra, Saroj Roy Choudhury and others,—almost all of them in their Ewenties.

Subhas Chandra Bose, the young lieutenant of Deshabandhu, made it a point to gather round him a band of young journalists to help propagate the cause he took up so earnestly after the demise of his great Master. Subhas Chandra pinned his faith on the youth, for to him it was the youth that could advance his country to progress. It was also Upenda who influenced the authorities to appoint Sachin Sen Gupta, now a celebrated dramatist, to take charge of the weekly Atmashakti, once Upenda's own paper.

Bijoy Lal Chatterjee whom Upenda loved to tease every now and then joined our group later.

We were really a happy family under the fostering care of our young patron and idol Subhas.

#### HIS CONTAMINATING HUMOUR

During the long eight or nine years that we passed with Upenda as his colleagues, we never found him dull; his jovial moods always enthused in us a spirit that could transcend the monotonous yell of a noisy newsy world. His style of humour contaminated many and even our Managing Director, the Late Sarat C. Bose, could not escape it. His maternal uncle Mr. B. N. Dutt, our General Manager, was known in the office as "Dutt Sahib". Sarat C. conferred on him the title of "B. N. G. S." "What does it mean?"—We asked him. "Oh you don't know!" wondered Sarat Chandra and emitting a few puffs from his long Burma Cigar said in Bengali that his uncle was Belate Na Ginge Sahib. That meant that his uncle turned a sahib, though he never set foot to a foreign soil.

The Forward group of papers once wielded a tremendous political force in the country and Upenda's powerful pen was no less responsible for it. His language was always simple but sharp, musical but full of trenchant humour. Absolutely serious he could never be, for even in his seriousness he brandished his sword of banter. That was his nature and he flourished most when he was at it. He took not more than an hour to produce a leader or a few paras—so facile was his pen. He was never prolific, for he did not feel any need to be.

#### An Occasion

The manuscripts of Premandra Mitra, an Assistant Editor of the Bengali counterpart Banglar Khatha, were often left unpublished. On enquiry it was found that the printer would take last resort to them, if there were dearth of copies! For the writer's copies were hardly legible. On this Hemendra Prasad Ghosh, the veteran journalist who later for some time was on the Editorial Board of Forward began his story:

and the state of the Martin Commission of the Same of the state of the

"You see Upen, when I was in England I saw the handwriting of the great Editor so and son You can't imagine what it looked like. It was as if a wasp from an inkpot just crawled over a sheet of paper, yea! still it found a special compositor, you know!"

compositor, you know!"

We all burst into laughter and sympathised with Premen who had not the fortune to find for him such a compositor. That evening we enjoyed very much our tea cups, thanks to Subhas Chandra who made a permanent arrangement for supply of tea free to his staff.

"Really!" Upenda simply wore a smile over his lips and seemed to have wondered. We had never heard Upenda being addressed as "Upen" before this. He told us Hemendra Prasad was older than himself.

#### SUBHAS CHANDRA'S RESPECT

Subhas Chandra had a profound respect for Upenda and whenever he came to our officegenerally towards the close of the day-he closetted himself with Upenda for some time. Many eminent persons, be he a Satyamurthi or a Dr. Ansari or a Gaganbehari Lal Mehta, visited us along with Subhas Chandra. Once there came Mr. Brailsford, the noted British journalist attached to the Labour organ The Daily Herald. Subhas Chandra gave a tea party to him in our office. Mr. Brailsford in describing the career of their paper that day gave us to learn that once when the circulation of the above paper came down to a million, the authorities thought whether the paper should cease publication! Could anyone in those days or even now think in terms of millions?

#### MYMENSINGH SAMMELANEE

#### REFUGEE RELIEF AND REHABILITATION ACTIVITIES

A Refugee Relief and Rehabilitation Committee has been formed in Calcutta under the auspices of the Mymensingh Sammelanee in order to render adequate relief to the refugees now coming from Eastern Pakistan. A Relief Fund has also been opened to receive contributions from the generous public. The Relief Committee is composed of Shri Atul Gupta—President; Raja B. N. Roy Chowdhury of Santosh and Shri Sachangsu Acharyya—Vice Presidents; Dr. B. E. Roy—Treasurer; Shri Biraj Mohan Bhattacharyya and Shri Gopal Roy—Joint Sceretaries; and Shri Gopaldas Chowdhury of Sherpur. Shri Brojendra Kishore Roy Chowdhury of Gouripur, Principal J. K. Chowdhury, Principal A Chakravorti, Shrimati Sita Devi, Shri Prosad Roy Chowdhury, Prof. D. S. Chakravorty, Shri Nani Datta Roy, Shri Sushil Datta and Dr. R. K. Datta Roy.

The Relief Committee is working in co-ordination with the United Council of Relief and Welfare. West Bengat Centre, of which H. E. Dr. Kailas Nath Katju is the President.

Shri Biraj Mohan Bhattacharyya, Joint Secretary, appeals to the public of the city, specially those bailing from the district of Mymensingh, to send their contributions to the Sammelanee Relief Fund. He also requests students and others, who would like to serve as volunteers, to register their names in the Sammelanee's office at 241. Bowbazar treet (City Dental College), Calcutta. Refugees are hereby squested to have their names and requirements registered at manuscanee's office in the prescribed form available there.

Upenda parted company with us before the Forward concern went in liquidation. He was of so independent spirit that he could never submit to anyone who differed with him. That was why he did not succeed to get to the top; for, the authorities had always this fear that they might be thrown overboard if his pen had unrestricted freedom. Essentially he was a journalist but he had to drag his career without his whole soul over it. This was nothing but prostitution, he used to say. He aspired to be at the head of a paper which he might call absolutely his own. For, only then he could expect to show himself off fully. But this his dream was never fulfilled.

He served the Amrita Bazar Patrika for some time but severed connection with it because of difference of opinion and lastly joined the Bengali Dainik Basumati. He was never happy in his profession but stuck to it any way, for it gave him and his family sustenance. He earned a lot but not enough to create his own world where he could move freely to shape the ideal he worshiped. This oppressed his soul and he grew a confirmed pessimist. He did never support the Gandhian way and to his last days he felt he had failed to make his country adopt what he thought the right path. He often used to say rather cry to me that he was a misfit as many others were in this world. Was this cry due to the frustration caused by his failure to see the India of his dream? Did this hasten the end of his tormented soul?

#### - EFECTS OF ARGEMONE OIL

(Continued from page 6)

quantity of the toxic substance taken over long periods may cause some harmful effect.

#### APPEARANCE OF ACTUAL SYMPTOMS

A concentration of less than 0.5 per cent of argemone oil in the human system has no injurious effect at all and actual demonstrable symptoms of disease may not appear below that percentage. But injury is caused to the human system by even smaller doses of argemone oil, although actual symptoms of disease do not appear on the surface, till after the required concentration has resulted at the end of a certain interval.

Thus even the slightest admixture of argemone oil cannot be disregarded. Shri Om Prokash, the oil expert to the U. P. is also of opinion that mustard oil must not contain the slightest admixture of argemone oil.

#### KHALSA PANTH-GURUPURB BAISAKHI

The Khalsa Panth-Gurupurb Baisakhi was held in the city on the 13th April last,

The celebration took place in a decorated pandal in a park adjoining Shri Guru Singh Sabha Gurdwara.

Addressing a very large gathering of Sikhs, men, women and children H. E. Dr. Kailas Nath Katju, Governor of West Bengal, made an appeal to people to do their utmost for spreasful implementation of the Indo-Pakistani agreement

On behalf of the Sikh community of Calcutta, a cheque for I: 10.000 was presented to the Governor for the relief of East Bengal refugees.

HEALTH & HYGIENE

# Effects Of Argemone Oil On The Human System

[By S. P. Chatterjee, Third Municipal Magistrate, Calcutta.]

[This article on an important social problem of the day is prepared from extracts taken out of the judgment recently delivered by the learned Municipal Magistrate in a case—Corporation of Calcutta vs. Messes. Sadiram Gangaprosad of 3, Doyehatta Street, Calcutta. In his judgment the Magistrate ordered for destruction of about 463 maunds of mustard oil, which stored for sale in a tank-wagon at the Jagannath Ghat railway siding and intended for human consumption, had been seized by the Corporation Food Inspector, Dr. H. C. Saha, from the possession of Messes. Sadiram Gangaprosad.]

IT has been established by authorities like Col. R. N. Chopra, Dr. R. B. Lal and others that Argemone Oil is extracted from the seeds of a wild, plant called Argemone Mexicana which are frequently found in stocks of mustard seeds used for pressing oil.

The consensus of present medical opinion about argemone oil is that it is a toxic substance which leads to epidemic dropsy and other diseases. Dr. A. K. Sen and Dr. R. B. Lal who have got a lot of research in this subject to their credit, agree that argemone oil is a toxic substance. In an article on this subject in the July, 1940 volume of The Indian Journal of Medical Research, Dr. R. B. Lal and others have stated that the causative role of this weed in epidemic dropsy has been supported by Dr. Chopra and his collaborators. In an article on this subject by Dr. Chopra, Dr. Pesricha, Dr. Goyal, Dr. S. Lal and Dr. A. K. Sen in the April, 1939 volume of the Indian Medical Gazette, the following lines occur:—

Argemone oil when present in oil used for cooking gives rise to certain symptoms. The most marked effect is Oedema of the legs and in some the development of a generalized flush and Cardiac involvement. Similar symptoms are produced by the use of mustard oil implicated in outbreaks of epidemic dropsy and which gives a causative reaction for argemone oil.

#### Injurious Effects

So there is no doubt that argemone oil is a poisonous substance and has an injurious effect on the human system. There are varying opinions about the exact nature of such effect on the human system. Some opinions state that the effect of argemone oil on the human system is cumulative which means that small doses of the poison when injected in the body do not go out of the system but accumulate in it resulting in ultimate damage.

Basically, therefore, there is no quarrel among doctors as to the principle involved in the effect of argemone oil on the human system, that it accumulates in the body, be it called cumulative or by any other name. In a recent article, Dr. Lal has however sought to make out the case that the gradual intake of argemone oil is to reach a certain concentration before actual symptoms of epidemic dropsy do appear. In that article he agrees that the severity of the symptoms varies with the amount of mustard oil consumed. While discussing certain aspects of some investiga-

SHRI SATI PADA CHATTERJEE, M.A., B.L.

Born in 1908, Shri Chatterji, Third Municipal Magistrate of Calcutts, got his M.A. degree in English in 1931. At the Final Law Examination of the Calcutta University in 1935 he stood First Class First, got the University Gold Medal, Prosanna Kumar Tagore Law Scholarship and Ritchie Prize in Law.

In 1937 he entered Bengal Civil Service (Judicial). He also exercised powers of a First Class Magistrate for some time in 1944-45 and in 1947. He worked as Assistant Labour Commissioner in Calcutta on deputation from the High Court from October, 1947 to January, 1949.

Again on deputation from the High Court he has been at present working as Municipal Magistrate with the powers of the Presidency Magistrate since February, 1949.

tions which he describes as "Sathkshira Investigations," he accepts a suggestion that the families involved in that investigation were just lucky to escape, as according to the information contained in the table, they had probably consumed toxic substance in amount just short of causing symptoms. He makes mention of possible sub-clinical effects of the toxic substance taken in smaller doses and does not altogether rule out the possibility that small

#### As A Tempeyer Sees Us

# Municipal Administration Of Calcutta

[BY NRIPENDRA KUMAR GUPTA]

1E Editor has sent me the report on the above for review. I have always taken a lively interest in the doings of our Corporation, but it is difficult to feel enthusiasm, when one is asked to comment on happenings which occurred four years ago.

The report (Vols. I & II) is a formidable collection of statistics, and as such will have very little appeal to ordinary people, who have little taste for details. There is a good deal of repettion, and if I may say so without offence, a total lack of a sense of perspective. The proper way is to devote a chapter to each of the most important topics, giving a bird's eye view of the activities as well as improvements effected during the year and append all relevant statistics separately to each such chapter.

#### PROGRESS FROM YEAR TO YEAR

Happily, our Corporation, in spite of the misguided interference of several of our Councillors, is progressing and progressing rapidly. From the year 1928-24 when the New Act came into force to the year under review, the actual receipts under the Consolidated Rate has nearly doubled. In the former year, they came upto Rs. 125,51,673 and in the latter year upto Rs. 209,88,983.

The difference between the Budget Estimate and the actuals in 1945-46 are given below in a tabular form.

|                 | Budget Esti    |            | Difference        |
|-----------------|----------------|------------|-------------------|
| I tems          | mate           | Actuals    | - or -            |
|                 | Rs.            | Rs.        | Rs.               |
| Receipts        | <br>331,24,000 | 303,66.923 | - 75 <b>7·077</b> |
| Expenditure     | <br>306,13,000 | 285,35,810 | 20,77 190         |
| Closing Balance | <br>19.90,000  | 39,64,082  | +19.74.082        |

A public body, with a huge income and expenditure is a sort of government in itself. It will be sufficient to give below some of the principal items of expenditure in order to give the reader an idea of the duties and responsibilities of the Corporation:—

| adunes | and reshousinmes or me (      | or boraric | M :              |
|--------|-------------------------------|------------|------------------|
|        |                               | Rs.        | Rs.              |
| 1.     | Establishment                 |            | 71,88,420        |
|        | Superior Supervision—         |            |                  |
|        | Cl. & Sub 44                  | 1,84,895   |                  |
|        |                               | 5,99,025   |                  |

| AVI.   | Purchase of Stores            |            | 24.79 hors       |

#### WATER SUPPLY

The total mileage of filtered water mains at the end of the year was 557.81, and that of unfiltered water mains 378.38. There were 72,676 filtered water and 54,401 unfiltered water house connections.

The average quantity of filtered water supplied daily was 71.5 million gallons, and that of unfiltered water, 89.0 million gallons. Taking the population of the city at 21,06,891 persons, the average consumption per capita of filtered water was 81.5 gallons per day.

#### DRAINAGE

The main drainage pumping stations are (1) the Palmer's Bridge Pumping Station, and (2) Ballygunge Pumping Station. Subsidiary stations are (a) Manickiala Pumping Staton, (2) Mominpore Pumping Station and there are small sub-stations at Topsia, Chetla. Ninerkmahal, Belgachia, Bagjola, Ultadanga. Mancktola, Narikeldanga, Beliaghata, Pagladanga and Kulti. It is a complicated system. The Outfall has since the report under review been greatly developed and Calcutta's present system of sewage treatment and subsequent discharge into a long concrete canal which is connected with the river Kulti about 18 miles off, is one worth the study of all drainage Engineers.

Infortunately during the rainy season, the fall sometimes is so heavy that city streets are flooded and the five flushing penstocks at Sovabazar, Nimtola Jackson Ghat, Chandpal Ghat and Telegraph Store Yard had to be opened on several occasions to help discharge storm water into the Hooghly. Fortunately this occurs in the rainy season when the river is in flood and the storm water is rapidly drained away.

The whole system is still unsatisfactory and now that the population has risen to over 50,00,000 it is outdated and requires remodelling and a thorough overhaul.

#### STREET LIGHTING

The total number of street lamps on the 81st March, 1946 was 28,421 composed as follows:—

| Cias     | • • • | • • • | 19,102 |
|----------|-------|-------|--------|
| Electric |       |       | 8,965  |
| Oil      | •••   | •••   | 854    |
|          |       |       |        |
|          |       |       | 28.421 |

One of the deadly enemies of street lamp-posts is vehicular traffic. It was responsible for damages to no less than 197 street lamps during the year. Considering its size and importance, the city is badly lighted and considerable improvements must be effected, before the lighting system can attain the standards of the leading municipalities of Europe and America.

#### FIRE BRIGADE

The expenditure on Fire Brigade during the year was Rs. 845,758. Out of this amount the Fire Brigade Tax brought in only Rs. 119,726. The

balance had to be met from general revenues. The only remedy is to raise the tax from 10% of the annual valuation of the ware houses to 20%. The Government ought to make a liberal contribution.

#### COLLECTION

Out of a gross current demand of Rs. 214,02,567, the Collector succeeded in gathering Rs. 194,63,881. The percentage riz., 90.94 must be voted as extremely unsatisfactory. There is not only considerable laxity on the part of the collecting staff, but the law also is defective making collection in the case of the evador a difficut problem. There is also slackness in the Law and the Assessment Departments and I hope the New Act will close all loopholes and impose strict sanctions.

#### MARKETS

There are 9 municipal markets in Calcutta on which a capital sum of Rs. 97,59,867 had been spent upto the end of the review year. The most profitable market is Sir Stuart Hogg Market which brings in an annual revenue of Rs. 11,41.724. The College Street Market has been a costly failure upto 31st March, 1946, the total cost was Rs. 29,27,058 and the revenue only Rs. 216,697. Entally Market on which Rs. 659,299 has been spent shewed better result with an income of Rs. 78,466. The most lucrative are the Lake Market and the Gariahat Market. The next best is the Park Circus Market.

|             | Total Capital   | Annual | Percent-     |
|-------------|-----------------|--------|--------------|
| Market      | Exp. to date    | Income | age          |
|             | $\mathbf{Rs}$ . | Rs.    |              |
| Lake Road   | 55,482          | 37,955 | <b>68</b> ·5 |
| Gariahat    | 91,017          | 35,744 | 39.6         |
| Park Circus | 62,997          | 26,677 | 42.2         |

It is evident that the Corporation can with profit open small markets of the Lake Road type in the fast developing suburbs, and thereby add to the city's amenities at a small cost which may be provided out of Revenue.

#### CONSERVANCY

There were 172 vehicles out of which 156 were in regular service, employed in the task of removal of refuse. Besides these 10 were used to remove silt from gully-pits. 3 for night soil removal and 2 for removal of carcasses. There are 11,568 service privies in Maniktala for which 420 mehtars are employed. Cossipur has 18,558 privies with only 322 mehtars. It is plain that unless and until the underground sewage system is introduced in these two areas, sanitation will continue to be primitive and wholly unsatisfactory.

During the year 1,46,160 tons of street refuse were removed and 4,49,073 r.ft. of pipe sewers were cleaned and flushed 50 times on an average in District IV alone. The quantity of refuse in District III was 66,930 tons. The figures for Districts 1 and II are not available. In all Districts the total quantity of silt removed from sewers ran up to 6.12,476 c.ft. In my opinion the Department of Conservancy should be separated from the Engineering Department, and a Conservancy Engineer directly responsible to the Chief Executive Officer should be placed in charge. The Chief Engineer has to tackle drainage, internal and external, water supply and road maintenance and development. He should be relieved of the duty of supervising the Department. 一百年 李联 医肾

VALUATION OF THE CITY. assessed annual valuation afood at Is. 11,44,88,758 shows by itself that the City is underassessed. Rents have gone up by leaps and bounds, the value of land has increased 4 times in 10 years in many areas. The Assessment Department should be placed under an Expert Valuer trained in England, or America. It is imperative that the post should be subject to Government approval, and steps should be taken to prevent Councillors and outsiders from interference. Assessment appeals should be heard by a Judicial Tribunal appointed by Government completely independent of Corporation control.

#### LOAN POSITION

The Annual Rateable valuation at the end of the year under review was Rs. 10,94,85,918. The Corporation would under the Calcutta Municipal Act. be justified in incurring public debts to the extent covered by Rs. 10,948,600 in the shape of loan service (internal and sinking Fund). The total amount of debt at the end of the year was Rs. 786,77,500 plus £5,00,000 and accumulations in the Sinking Fund aggregated to Rs. 386,06,491. Unfortunately a large amount of the loans bear a high rate of interest  $4\frac{1}{2}\%$  to  $6\frac{1}{2}\%$ . The following are the figures:—

| Rate per cent. | Amount         |
|----------------|----------------|
|                | Rs.            |
| 6 <u>1</u>     | <br>124,80,000 |
| 63             | <br>65.50.000  |
| 6.             | <br>95,59,800  |
| 5 <del>]</del> | <br>27.56,000  |
| 5              | <br>86,00,000  |
| 43             | <br>8,06,000   |
| Total.         | <br>40.701,800 |

£5.00,000 sterling debt at 6%. besides should be remembered however that the net liability is Rs. 448,10,001. The Corporation therefore can under the law raise another Rs. 600,00,000, but there is no sufficient surplus after meeting all necessary and obligatory expenses to provide for the additional interest payment and contribution to the Sinking Fund, under Section 100 of the Calcutta Municipal Act of 1928. Most of the high interest bearing loans will be paid off within the next 5 years.

#### TRAFFIC PROBLEM

Although the Calcutta Improvement Trust has made a notable contribution towards the solution of this growing problem. Calcutta is facing traffic deadlocks within the next 3 or 4 years. It is therefore necessary to open out wide roads (not less than 100 ft. in width) parallel to the Cornwallis Street and the Circular Road. At present the main N. & S. Roads are (1) The Strand Road, (2) the Chitpore Road , (8) The Central Avenue plus the Chowringhee plus Russa, Road, (4) the Cornwallis Street, (5) the Circular Road. At least 2 more roads must be opened out. I suggest the extension of the Amherst Street northwards to Grev Street and southwards to Dharmatala Street as an immediate possibility. The Corporation and the C. I. T. authorities must pool their resources to meet the cost. The net cost is not likely to exceed 80 lakhs of rupees which is worth paying in order to save the city from traffic debacle.

#### HEALTH DEPARTMENT

population between 1941 (last Census year) and 1946 has not been taken into account. The registration of births is wholly unsatisfactory as many cases are not reported. If the Corporation makes the registration of all midwives and nurses compulsory and makes it incumbent on all nurses, midwives and doctors who have attended child births to report, on pain of heavy fines, to the Health Department, the statistics can be made at least 95% accurate.

The total number of deaths were 37,656 and of births (registered) 31,206. The following are the figures for deaths due to the principal diseases:—

| Cholera               | <br>1,788 |
|-----------------------|-----------|
| Enteric Fever         | <br>1,298 |
| Diarrhoea & Dysentery | <br>8,199 |
| T. B. (Lungs)         | <br>2,582 |
| Malaria               | <br>1,611 |
| Respiratory Diseases  | <br>6,489 |

The infantile mortality rate of 245.15 is mainly due to the undernourishment of the pregnant women. The mother during the putative period requires nourishing food in the shape of milk, butter, fruits, etc., of which the high prices place them beyond the reach of the lower middle classes, not to speak of the bustee dwellers.

I am of opinion that milk kitchens for expectant mothers should be opened and maintained in each ward and the cost should be borne as between the Corporation and the Government in the proportion of one-third and two-thirds.

The dismal fact that out of a total population of 21.08.891 (Census 1941) there were only 70,754 males and 34,988 females of the age-group 50—60, shows that the average expectation age of life must be put down very low indeed.

Naturally, the wards in which the mortality rates are highest are the unhealthy suburban areas which have as yet been imperfectly developed, and in which the residents form the poorest sections of the population. These are Ekbalpore (Ward 25), Tangra (Ward 18), Maniktala (Ward 29), Entally (Ward 19), Belliaghata (Ward 28), Cossipore (32).

Attention should be paid to the fact that the areas. Entally-Beniapukur. Ekhalpur-Watgunge, Maniktala. Tangra, Cossipur and Ballygunge (Ward 21) are the unhealthiest in the city and a ten-year scheme should be drawn up to bring the sanitation in these areas to a reasonably satisfactory standard. Bemodelling of busices, filling up of dobas and insanitary tanks, more ample provision of street hydrants for filtered water supply, widening of narrow lanes and alleys and provision of free dispensaries are among the measures which will pay dividends within a short time.

#### MATERNITY HOMES

There are only 4 Maternity Homes serving an area of 30 sq. miles. This is farcial. There should be at least one Home in each ward. For the better class of women visiting these Homes a reasonable fee can be levied, and a small admission fee for free beds will help to meet a part of the cost. Government must meet at least half of the cost. It is a fact that excepting only 20 per cent., the remaining pregnant women cannot meet the expenses of midwives, or nurses and of the nourishing food required during the first month after child birth.

The number of the ambulances must be doubled. Corporation contribution to Hospitals is very meagre. A minimum sum of Rs. 15 lakks should be provided out of which a fixed number of beds should be maintained at the important Hospitals of the for the indigent.

#### Mosquito Control

I am of opinion that this department needs reorganisation and in each district the work must be done under the supervision of real experts. A good deal of needless suffering and a large percentage of deaths can be prevented if sincere and efficient work is done. It is a pity that Government of India which derives half its total revenues from the city and the Government of Bengal which benefits to the extent of 60 per cent, do not feel any responsibility for the hen that lays the golden eggs. Calcutta and Bombay should get ample central subventions.

#### CONCLUSION

It is easy to discover that the activities of the Corporation are cramped to a great extent for want of sufficient funds. A contribution of only 4½ lacs out of the motor vehicle—tax is sheer injustice to the Corporation. The Act should be amended to enable the municipality to impose town duties and terminal taxes—I think the huge percentage of the population who enjoy all the amenities—but pay nothing should be compelled to pay a poll—tax of Rs. 6 per year. This will bring in at least 60 lakes of rupees. License fees in the upper grades should at least be doubled. Corporation's field of work is so extensive that a large augmentation of its income is a crying necessity.

#### LEGAL INTELLIGENCE

#### PROFESSIONAL LICENSE FEES

Before Shri S. P. Chatterjee, Second Municipal Magistrate. Calcutta, was prosecuted under Section 175 read with Section 492 of Calcutta Municipal Act, Shri Nirmalendu Dutt Mazumdar, Advocate of the Bombay High Court, now practising in the Courts within the jurisdiction of the Calcutta Corporation for non-payment of the professional license fees to the Corporation for the year 1947-48 and 1948-49.

The case of the defence was that as he was not an Advocate of the Calcutta High Court, but of Bombay High Court, subsequently registered as an Advocate of the Supreme High Court, he was not liable to pay the professional license fees to the Calcutta Corporation.

The learned Magistrate held that the Advocates are the creation of the Indian Bar Councils Act of 1926 and as Shri Dutt Mazumdar, according to the provisions of the Indian Bar Councils Act, was an Advecate of the High Court admittedly carrying on his profession as such within the jurisdiction of the Calcutta Corporation, he was liable to pay for each year the professional license fees. He was hence fined Rs. 25 for each year.

The Municipal Pleader, Shri Ramani Ghoshal, conducted the prosecution and the accused defended himself.

TRIBUTES TO THE MEMORY OF THE LATE SHRI SARAT CHANDRA BOSE, a great son of Bengal, were paid at a crowded public meeting held at the Senate Hall on Sunday, the 23rd April. The meeting was called by the Sheriff of Calcutta, Dr. S. B. Dutt. Dr. Radha Binode Pal presided.

A resolution passed at the meeting placed on record its deep sense of sorrow at the "unexpected death of Serat Chandra Bose at a time when the country needed his devoted, single-minded and selfless service and mature judgment."

The meeting also appointed a committee to devise ways and means for perpetuation of the memory of Sarat Chandra in a suitable manner. Members of the committee included Dr. Radha Binode Pal, Dr. S. B. Dutt, Sheriff of Calcutta, Shri Sures Chandra Majumdar, Shri Amar Bose, Shri Nripendra Chandra Mitra, and Shri Mohini Mohan Chakravarty.

Dr. Pal observed that internal and international politics were going through a period of transition and dictatorship was raising its head.

Democracy, he said, was being destroyed from within and external forces were trying to hamper its growth. It was in this crisis that a patriot like Mr. Bose was most needed.

Shri Charu Chandra Biswas said that if Sarat Chandra rose high in the field of political field it was because he gave the country a bold and sincere leadership.

Shri Phanindra Nath Brahma said, it was the courage of conviction of Sarat Chandra which raised him to the estimation of his followers.

CONSTRUCTION OF A CRICKET STADIUM, inauguration of the National Cricket Club of India along lines similar to those of the Cricket Club of India in Bombay and a plan for the coaching of young pupils were discussed recently at a Press Conference held by Shri J. C. Mukerjea, President of the Cricket Association of Bengal.

It was revealed that the estimated cost of construction of a Cricket Stadium according to the plan drawn up by Messrs. Balladie Thompson and Matthews was between Rs. 30 and 40 lakhs.

The stadium will be constructed around the present Calcutta Cricket Club ground at Eden Gardens.

DEATH OF SHRI KARTIC CHANDRA SEN, founder editor of the Calcutta Commercial Gazette, recently occurred from heart failure at his Bhowanipur residence.

He was a well-known figure in Calcutta trade circles. In 1907 Shri San joined the Technological Institute of Leeds for training in different branches of leather industry and secured high first class in the Honours degree.

Shri Sen leaves behind him his wife, four sons and a host of friends to mourn his loss.

THE ANNUAL ARTS AND CRAFTS EXHIBITION OF LA MARTINIERE. Calcutta, was opened at the School premises by Dr. Kailas Nath Katju, Governor of West Bengal, on Monday, the 24th April.

The Exhibition, which remained open during the week included about 100 paintings and drawings and a similar number of items of decorated pottery, such as ashtrays, powder boxes, vases, candle sticks and lampshades. There are also a few exhibits of leatherwork and clay modelling. The work has been done by about 60 pupils of the Boys' School, ranging in age from 8 to 14 years.

THE OCHTERLONY MONUMENT, in Calcutta Maidan was damaged as a result of a terrific explosion near its entrance at about 5 a.m. on the 20th April.

As a result of the explosion, a creater was formed on the inside right wall of the 160-feet-high structure and there was a long crack on the staircase inside involving nearly 22 of its steps. The iron gate of the monument was also damaged.

Window glass panes of some of the shops on Chowringhee Road were cracked as a result of the vibration caused by the explosion. Many people in the adjoining areas were awakened from their sleep by the sound of the explosion.

Vigorous police investigations is proceeding.

CALCUTTA'S HEAT WAVE continued for days during the week. The maximum temperature reached at 105.3 degree.

The minimum temperature was 80 degree and the maximum wet bulb temperature 74 degree. Maximum and minimum humidity were 95 per cent. and 14 per cent. respectively.

SHRI SUBHENDU BOSE, a Calcutta journalist and an old member of the Indian Journalists Association, has been appointed as the Associated Editor of the Kayastha Patrika for the year 1950-51. Shri Bose is on the staff of the Amrita Bazar and the Jugantar.

SARAT SAMITY, a cultural organization of South Calculta, celebrated the Bengali New Year's day with Shri C. C. Biswas in the chair. Shri N. C. Chunder inaugurated the function with a neat little speech.

Speaking upon the present-day crisis of Bengal Shri Biswas expressed hope that after all brighter day will soon usher in.

Shri K. D. Ghose, Hon. Secretary of the Samity, announced that the Corporation of Calcutta had kindly grganted a plot of land within the area of the Ballygunge triangular Park, thus enabling the Samity to start on the work of building a fitting memorial to the memory of the well-known Bengali novelist, Sarat Chandra Chatterjee. He made an appeal to the public to contribute generously to memorial building fund.

# ANNIVERSARY OF SRI SRI JOGESWARI RAMKRISHNA MATH (SARADA SANGHA)

This function was recently held at Lilloosh (Howrsh). H. E. Dr. Kailas Nath Katju, Governor of West Bengal, speaking on the occasion observed, "Service to humanity is the best religion and it should be rendered irrespective of caste or creed." A welcome address was given by Shri Subhendu Bose. The Annual Report of the Math was read by Shri Rajendra Puri.

#### NIKHIL BANGA KAYASTHA SAMAJ

#### ANNUAL GENERAL MEETING

The 27th Annual General Meeting of the Nikhil Banga Kayastha Samaj was held under the presidency of Rai Bahadur Suresh Chandra Sinha.

For the year 1950-1951 the following office-bearers were elected: President—Rai Bahadur Radha Raman Mosoomdar Barman; General Secretary—Dr. Kshirode Lal Deb; Treasurer—Shri Sarat Kumar Mitra; Editor of the "Kayastha Samaj"—Dr. Makhan Lai Roy Chowdhury.

# RPORATION N

#### To Contractor

Tenders are invited in duplicate for the following and will be received by the 2nd Deputy Executive Officer on the dates noted for each, up to 12 Noon. Each tender in duplicate must be enclosed in a sealed cover and superscribed "Tender for......" For specifictions for specifictions and tender forms apply to the Keeper of Records. Price Rs. 2 per set.

1. Reconstruction of collapsed sewers during the period from 1st April, 1950 to 31st March, 1951.

2. Rewiring and remodelling the electric installations of the Pulta Pumping Stations (Parts II and III and portion of

Tenders for 1 will be opened on 16th May, 1950 and tenders for 2 will be opened on the 2nd June, 1950. The rates quoted in the tenders are to hold good for the tenders three months.

S. GHOSHAL. Secretary

Central Municipal Office, The 24th April, 1950.

#### Notice To Petty Improvement Contractors

- 4. Repairs to door shutters in Stall Nos. A20-23 in S.S. Hogg Market.-Rs. 370.—dated 25th April, 1950, (15 days).
  5. Repairs to privies, urinals, and C. I. railing of nursery garden of Eastern Park.—Rs. 665,—dated 25th April, 1950, (1 month) (1 month).
- 6. Construction of lamp hole in connection with House Drainage connection of premises No. 32, Ritchie Road,—Rs. 332,—dated 25th April, 1950, (15 days).
- 7. Paving the carriage-way op 87, Dr. Suresh Sarkar Road,—Rs. dated 25th April, 1950, (2 weeks).
- 8. Repairs to footpath of Meherali Road portion),—Rs. 727,—dated 25th April. (portion),—Rs. 1950, (1 month).
- 9. Repairs to northern footpath of Park Street (portion) from the junction of Lower Circular Road,—Rs. 881,—dated 25th April, 1950, (1 month).
- 10. Repairs to doer shutters in Stall Nos. B28-29 and C (New) 36-37 in S. S. Market,—Rs. 203,—dated 25th April, Market,—Rs. 20 1950, (2 weeks).
- 11. Repairs to flank of Hughes Road near Reserve Tank,—Rs. 519,—dated 3rd January, 1950, (3 weeks).
- 12. Repairs to office of Superintendent, Pig Slaughter House,...Rs. 496,...dated 22nd December, 1949, (3 weeks).

Please note that the words in italics (7 days' notice) as printed in Clause 6 of the Tender and Agreement Form for piece work, is to be read as "5 days' notice".

S. C. GHOSH.

District Engineer 111.

Dist. III Eng'g. Office. The 28th April, 1960.

#### Notice.

Re: Carrying 1900 B. G. Sleepers (wooden) from Entally Workshops to Bantola Pruss Sedimentation Tanks

Quotations in scaled covers and superscribed

Quotations in sealed covers and superscribed for the above work are invited and will be received by the radersigned up to 2 p.m. of the 3rd May, 1950.

The cost should include loading the Sleepers at Batelly Workshops and unloading and steeking them properly at Bantola. Corporation will not supply any Petrol Coupons but the Toll Cisarges at Point 'A' will not be charged. The dimension of each Sal Word Sleeper is 9 ft. 6 in. (length) by 10 in. (breadth) by 5 in. (thickness).

A. N. BANERJEE, Outfall Engineer,

Special Officer's Department, The 25th April, 1950.

#### Carriage & Horse Tax: 1st Half-Year, 1950-51.

Oviners and persons in chargo of carriages, Jinrickshaws, race-horses, horses, carriages, Jinrickshaws, race-horses, horses, ponies or mules, are hereby informed that Section 167 (1) and (2) of the Calcutta Municipal Act, 1923, requires that a statement showing the number of vehicles and animals owned or kept in their charge, together with the tax payable, should be forwarded to the Municipal Office before 18: May 1950. Printed forms of such return may be obtained on application to the License Officer at the Central Municipal Office. It is further notified that failure to forward such return entails liability to prosecution and to a fine of Rs. 20. Persons, who for the sake of convenience, prefer to make payment of taxes on the Persons, who for the sake of convenience, prefer to make payment of taxes on the spot may pay such amount, as may be due, to the Inspector when he calls; he is authorised to receive money and grant license then and there. Claims for remission of tax on carriages on the ground that they were not used, will not be entertained after the 30th June, 1950.

#### REGISTRATION OF CARTS

The half-yearly registration of carts under Section 183 of the Calcutta Municipal Act, 1923, for the current half-year has begun on the 1st April, 1950. Owners of carts, including hand-carts, which are not used for the conveyance of human beings, should not the conveyance of human beings, should get them registered without delay. The fee payable for registration of every cart shall be Ra. 4. An additional charge of Re. 1 shall also be payable in each case for the number-plate to be affixed to the

#### CART DRIVER'S TICKET

Under Section 187 of the Act, drivers of carts are required to carry (exposed to view) a ticket granted by the Corporation bearing the registration number as driver.

TAX ON DOGS FOR THE YEAR 1950-51 Under Section 173 of the Act, a tax at Rs. 5 per annum is payable for every dog kept in Calcutts and the owner or person in-charge is required to forward to the Municipal Office before the first day of May a list of dogs owned by him or in his charge and at the same time pay to the Corporation the tax payable in respect of every such dog. On payment of the fee,

a license will be issued for the current year and number ticket will be provided, to be kept attached to the collar or otherwise suspended from the neck of the dog. Any top which has no number tickes so attached or so suspended runs the rick of being seized or destroyed.

B. N. GANGULI, License Officere

Central Municipal Office, The 23rd April, 1950.

#### Workshop Apprenticeship Examination

Applications are invited for permission to sit for the Competitive Examination to be held in the Chief Engineer's Drawing Office, Central Municipal Office Buildings, Calcutta, on the 3rd June, 1950 at 2 p.m., for admission of 10 apprentices to the Corporation Workshops at Entally. The applicant must have passed the Matriculation Examination, obtaining 50 per cent, marks in Mathematics or Mechanics. The age of the candidate should not be less than 15 years or more than 19 years on the 1st of July, 1949. The candidates should submit their applications to the Chief Engineer, Corporation of Calcutta, in the prescribed form along with their mark sheets before 24th May, 1950. Printed application forms may be had from the Central Keeper of Records at 5, Surendra Nath Banerjee Road, Calcutta, at Rs. 2 only per copy. Certificates will have to be shown at the time of examination.

Candidates, will be tested for physical

Candidates will be tested for physical fitness before admission to the Competitive Examination. The health examination will be held from 25th to 31st May, 1950, by the Corporation Health Officer. For that purpose the candidates should first appear before the Manager, Entally Workshops (5, Convent Road, Entally) with two copies of their photographs (passport size, unmounted) for proper identification. They will thence be sent to the respective Corporation Medical Officer with a card for health examination. Details regarding stipend etc., may be laid from the office of the Chief Engineer, Calcutta Corporation.

D. N. GANGULI. Chief Engineer.

Central Municipal Office: The 26th April, 1950.

#### Muhamadan Burial Grounds

This is for general information of the Muslim public of the city that the Bagmari Burial Ground at No. 52, Bagmari Road which had been temporarily closed for burial due to disturbed condition of the locality will now be reopened for the public on and from the lat of May, 1950 and will be functioning for the usual burial work as before. It is therefore desirable that the public specially of the northern side of the city should in their own interest carry the dead bodies to this Bagmari Burial Ground only and thereby avoid abnormal congestion in the Gobra Burial Ground.

Jan British British Barrell

M. BAHMAN. Muhammadan Burial Board.

#### CORPORATION NOTICES—Contd.

#### Street Sweeper-Sprinkler-Collector

Quotations are invited for the supply and delivery of one Machanical Street Sweeper-Sprinkler-Collector, capacity Three Ross, built in chasis or mechanical horse attachment. Detailed specification of the equipment together with cost C.I.F. Calcutte and delivery time should reach this office by not later than 2 p.m. on the 10th of May, 1950.

S. GHOSHAL, Secretary.

Central Municipal Office, The 22nd April, 1950.

#### Sir Stuart Hogg Market

#### OALCUTTA'S PUBLIC LIBRARIES

There are in this city more than 250 public libraries receiving Corporation grant. There may be a few hundreds more that do not receive grant of money from the city Corporation. Besides it is a matter of pride that Calcutta houses India's National library, biggest in the country. The Calcutta University Library contains the largest collection of books and manuscripts, when compared to other University libraries in the country. And the name of Poet Rabindranath is so intimately connected with one of the city's local libraries. is Chaitanya Library situated in Beadon Street near the Minerva Theatre. At this place mostly between 1893 and 1908 the poet addressed meetings and read papers on different subjects, ranging from contemporary political thought and social reform to literary ideal.

Public libraries of Calcutta hence form not only a useful but also a glorious feature in the life and activities of the city. The members of these libraries will surely be delighted to know that Britain's public libraries are celebrating their centenary this year in 1950.

In 1850, Parliament passed an Act permitting—not compelling—English and Welsh towns with 10,000 people or more to impose a rate of up to a half-penny in the pound to build or maintain public libraries. Five years later another Act reduced the population limit to 5,000 and also allowed books to be bought.

Today 590 local authorities have libraries under their control and together they own 42,000,000 books. In the whole of the British Isles there are only 60,000 people out of a popular

tion of just over 50,000,000 who live in areas which have no public library service. Even remote villages and hamlets are now served by travelling libraries of County Councils—specially fitted motor vans from whose shelves readers can make their choice.

In the last hundred years these far-sighted library Acts have brought enjoyment and education into the homes of Britain's people on a scale which is remarkable. There were, of course, libraries—some world famous—before 1850, but they catered mainly for scholars and technicians.

Today anybody in Britain can go to a local library and get almost any book on almost any subject, and there is nothing to pay—unless the book is retained beyond the permitted time.

When shall our public be so much library-minded and our libraries be so very usefully equipped?

#### CALCUTTA FIRE BRIGADE

The Calcutta Fire Brigade, which claims an international reputation for its efficiency has been amalgamated with the West Bengal Fire Services since April 18 last. This has been effected in pursuance of an Act recently passed in the West Bengal Legislative Assembly. This Act repeals the Licensed Warehouse and Fire Brigade Act of 1893 and establishes a Fire Brigade for the whole of West Bengal. Originally the service was meant for the city of Calcutta. It was then gradually extended to the industrial areas. It may be noted here that money has already been provided in the current year's budget for the extension of the fire-service throughout the State.

# Personalia

PR. B. C. Roy, Chief Minister, West Beneal has now been very much engaged in discussion, planning and working of the programme of rehabilitation of the refugees who have been pouring in into the State of West Bengal since some time. Accompanied by the Chief Secretary, Shri S. N. Ray, he went to Delhi on the 29th April last for consultation with Pandit Nehru in connection with the implementation of the Delhi Agreement and rehabilitation of the refugees. He returned to Calcutta on Monday, the 1st May.

On Tuesday, the 2nd May, Dr. Roy left for Amarda Road, in Orissa, by air to visit refugee reception camps opened there by the Orissa Government. From Amarda Road Dr. Roy went by special plane to Ranchi where he also visited refugee camps.

Dr. S. P. Mookerjee met Dr. Roy, at Writers Building, on the 26th April last and had a two-hour talk with him on problems relating to relief of East Bengal refugees. Shri B. Majumdar, Irrigation Minister, and Shri S. N. Ray, Chief Secretary, were also present.

Pandit Hriday Nath Kunzru saw Dr. Roy at the Secretariat on the 28th April last and discussed with him various problems relating to refugee relief rehabilitation.

Shrimati Renuka Ray, M.P., Central Adviser for Refugee Rehabilitation, was also present.

Shri Satish Chandra Das Gupta saw Dr. Roy and discussed with him the question of rehabilitation of displaced persons in Howrah and Hooghly industrial area.

Shrimati Mridula Sarabhai met Dr. Roy in connection with the rehabilitation of displaced persons in West Bengal.

Shri K. C. Neogy, Member of the Indian Parliament, who recently resigned his Ministership in the Central Cabinet, arrived in Calcutta from Delhi by Calcutta Mail on the 28th April last.

Shri Neogy who was accompanied by his wife, was accorded a hearty reception on arrival at Howrah Station. He was greeted with shouts of Bande Mataram and was garlanded on behalf of individuals and organizations.

SHRI K. SANTHANAM, MINISTER OF STATE FOR RAILWAYS AND TRANSPORT, Government of India, arrived in Calcutta on the 29th April last on his way back to Delhi from a tour of inspection of the Assam rail link.

Immediately after his arrival at Howrah, Shri Santhanam, accompanied by Shri H. M. Jagtiani, General Manager, East Indian Railway, proceeded to inspect the railway workshop at Lilooah. Later in the afternoon he inspected the Shalimar goods sheds.

During his three-day stay in Calcutta Shri Santhanam met representatives of various Chambers of Commerce, timber merchants and slipper suppliers association and held discussion with heads of departments and other officers of the E. I. and B. N. Railways.

At a Press Conference held on Monday, the 1st May, he announced the possibility of resumption of through goods traffic by rail between the two countries will begin soon.

BRIGADIER P. H. DENYER, O.B.E., the last British officer to command a formation of Indian troops, handed over command of the Calcutta Sub-Area, which he had held since August, 1948, to Brigadier H. S. Randhawa on the 1st April last.

A veteran of World War I, Brigadier Denyer was wounded in the Battle of the Somme in 1916 and was awarded the Military Medal for gallantry.

He joined the Indian Army after World War No. I, and put in 82 years' service.

During the earlier part of World War II he was senior instructor at the Indian Military Academy at Dehra Dun. In 1942 he went to the Western Desert with a battalion of his regiment—the 11th Sikhs. He was wounded in Italy in 1945.

In 1946 he was appointed Military Adviser, Bajputana State Forces, and later became Military Adviser-in-Chief. In 1948 he came to Eastern Command as Commander of the Bihar Sub-Area and after a few months took over the Calcutta Sub-Area.

Shri J. P. Narain, the Socialist Leader, while addressing the students at Marwari Chhatra Niwas on the 25th April last reiterated that the future of India depended on the implementation of the Nehru-Liaquat pact.

If India succeeded in creating such conditions she would acquire the moral right to take action

#### LATE SHRI AMULYA DHONE ADDY

The late Shri Amulya Dhone Addy, an ex-Commissioner of the Corporation, died recently at his residence in Chetla. Shri Addy was Commissioner for nearly 30 years from 1894-95 to 1923-24. He was at one time a Member of the Legislative Assembly. He was known as the Rice Prince of Chetla.

against Pakistan in case the latter failed to follow the agreement.

The transfer of population on a communal or sectarian basis, he said, was bound to affect the economy of the country adversely.

SARDER K. M. PANNIKAR, INDIA'S AMBASSADOR-DESIGNATE TO COMMUNIST CHINA, accompanied by his wife and daughter, arrived in Calcutta by air from Delhi on Sunday, the 30th April, on his way to Peking.

THAKIN NU, THE BURMESE PRIME MINISTER, accompanied by his wife and U. Hlla Maung, Secretary of the Finance and Revenue Departments of the Government of Burma, arrived in Calcutta from Rangoon by air on Monday, the 1st May, on his way to London to attend a Westminster Abbey service on May 11 in memory of the 10,000 Commonwealth soldiers, sailors and airmen who died in the Burma campaign.

From the aerodrome the Prime Minister and Mrs. Nu drove to the Mahabodhi Society's hall in College Square to attend the Buddha Day celebrations.

## SAPTAGRAM: A Forgotten City Of Bengal

[By NATABAR DATTA, Pura-Tattwanidhi]

SAPTAGRAM was the capital of Bengal in the Hindu and Muhammadan periods and was the residence of the Kings of the country. The city was 16 miles in area and consisted of seven Wards (villages) viz., Triveni, Debanandapur, Shankhapur, Bansabati (Bansberia), Vashudebpur, and Krishnapur. It has a unique place in the history of Bengal and it had once the same position as Calcutta occupies in the present era. It was the principal port and chief commercial centre of Bengal of the Hindu and Muhammadan periods. Its name and fame has been elaborately mentioned in the ancient literatures of Bengal as well as that of India. riz., Mahabharata, Ramayana, Shrimad-Bhagabatam, Skanda-Puranam, Manasha-Mangal, Kavikankan-Chandi, Chaitanya-Bhagabata, Chaitanya-Charitamrita, Bhakti-Ratnakar, Tabaqati-i-Nasiri by Minhaj, etc., etc.

#### THE CITY IN HISTORY

The name and fame of Saptagram has been mentioned by many eminent historians of this country, and abroad and authors of the old days.

The Roman historian Pliny, in the middle of the 1st Century A.D., in his book "Historia Naturalis" (translated by Philemon) mentioned Triveni which was a Ward of Saptagram.

Riazu-S-Salatin, by Ghulam Hossain Salim, translated from the original Persian by Maulavi Abdus Salam (1902) page 48, stated,—

'Sarkar Satgaon comprised a small portion to the west of Hughly, whilst a large portion comprised the modern districts of the 24-Parganas to Kabadak river (Kapotaksha), western Nadia, south western Murshidabad and extending to Hatiabagh Hatiagarh) below Diamond Harbour." To this Sarkar Province belonged the Mohal Kalkata (Calcutta) which together with two other Mahals (subdivisions) paid in 1582 A.D., a land revenue of fis. 23,405.

In "Lekh Mallika" an old Bengali manuscript, it has been stated that, "There was a Samaj (Association) of Benias at Mahasthan. In the town of Sakarma, Gour. Garveswar Datta was the merchant in chief. Those Benias used to go for trade by voyage, filling with their merchandise in big vessels, to Lanka (Ceylon), etc., through Gourand Saptagram."

#### OTHER REFERENCES

The celebrated Chinese traveller Hiuan Tsang who visited India in the seventh century A.D., wrote in his diary—"After performing the "Navaratri festival (Sharadiya Durga Puja), on the Bijoya Dasami day (the tenth day of full moon) the Hindu traders used to set out for trade with merchandise, by land and voyage. These Indian traders used to carry their merchandise to Greece, Somaliland, Kushadwipa, Shankhadwipa, Java, etc., for trade. They also used to carry muslin, pearl, sugar, etc., for sale and brought ivory, crystal, gold, black-wood wares, etc., to India."

In the Ramayana, by Krittibasa Ojha (1885), it has been stated that Saptagram was a famous and peerless city and a place of great sametity and pilgrimage of the Hindus, also as sacred as Prayaga (Allahabad).

Raghunandan Rhattacharjee (fifteenth century A.D.) the Hindu law maker, in his famous

book "Prayaschitta-Tattwa" quoted a sloka from Mahabharata that,—"on the south of Pradumnyanagar (present Fandua) and on the north of the river Saraswati the village Triveni was a Ward of Saptagram. The junction of the three rivers—Ganges, Jamuna and Saraswati, is called Dakshin-Prayaga and is as sacred as Uttar-Prayaga (present Allahabad). The three rivers—Ganga, Jamuna and Saraswati joined at Uttar-Prayaga (Allahabad) and separated themselves at Triveni, (District Hughly, Bengal).

Saptagram is mentioned in the old Vaishnaba work "Chaitanya-Bhagabat" written by Brindabandas Thakur, (sixteenth century A.D.) a contemporary of Shri Chaitanya Mahaprabhu. Kavikanan Mukundaram Chakravarti, in his notable book "Chandi" (16th century A.D.), in the voyage of Dhanapati Sadagar, described that Saptagram was a place of great commerce. The merchants from Kalinga, Trailanga, Karnat, Guzrat, Malaya, Lanka (Ceylon), etc., used to bring their merchandise for sale in the mart of Saptagram, it was also a place of great sanctity and pilgrimage of the Hindus.

#### PORTUGUESE IN SATGAON

J. De Barros, a Portuguese traveller visited Saptagram in 1516 A.D. and mentioned the place in his book "Da Asia" and put the name of Saptagram as 'Satiga' in his map as published in 1517 A.D. (vide Asiatic Society Journal, Vol. LXI, Part I, page 298).

The renowned traveller Caesar de Frederic, in 1565 A.D., mentioned Saptagram as "Satgaon" in his diary and described it as a large city.

In 1530 A.D., the Portuguese anchored their first merchant vessels at Saptagram and were amazed to find the splendour of commerce at Saptagram and named Saptagram as "Porto Piqueno".

In the period of Pathan rule (Fifteenth century A.D.) Saptagram was called Hossainabad after the name of Allauddin Hossain Shah, the Nabab of Bengal. (Vide. catologue of coins in the Indian Museum, Calcutta Vol. II, pt. II, page 172).

Encyclopædia Britannica, 9th Edition, Vol. XIII, page 148, stated, "In the early period of the Mahammadan rule, Saptagram was the seat of the Governors of lower Bengal and a mint town. It was also a place of great commercial importance."

In 1526 A.D. a mosque was established by Seikh Jamaluddin Amuli, at Saptagram, in the reign of Naseruddin Nasratshah, Nabab of Bengal (1497 A.D.).

#### PROVISION FOR LABELLING OF DRUGS

The provisions of the Drugs Act 1940, and the Bengal Drugs Rules 1946, are in force in the country since April 1, 1947. It was decided to enforce rigidly from January 1, 1950 the labelling provisions under the Drugs Act and Rules in respect of drugs (both pharmacoposial and non-pharmacoposial) imported into or manufactured in the country before April 1, 1949. However, it was subsequently found out that large stock of patent and proprietary medecines and other drugs not conforming to the labelling provisions under the Drugs Act and Rules, which were imported in the country before April 1, 1949 were still lying with the trade and the rigid application of the labelling provisions with effect from January 1, 1950 would entail heavy loss on the trade. It has, therefore, been decided to extend the date of enforcement from January 1, 1950 to July 30, 1960. (Press Note).

The first Church established in Bengal, by the Portuguese, was at Hughly, in the 4th quarter of the sitteenth century A.D. (1860), with the permission of Akber Badshah. In Akber time Satgaon (Saptagram) was known as Balghak-Kahana, the "house of revolt".

The first Englishman who visited Saptagram, was Balph Fitch, in 1586 A.D. He was astonished on seeing the riches of Saptagram. He wrote in his diary—"When I reached Saptagram, I saw hundreds of vessels full with merchandise, of which one hundred and eighty vessels came from Agra alone and most of them were with 24 and 26 cars."

#### A FLOURISHING PORT

Saptagram was a flourishing port on the river Saraswati, where ships from China, Malaya, Java. Siam, Ceylon, Persia, Egypt, Italy, etc., brought their merchandise for sale in the mart of Saptagram. In the first Century A.D. the Hindus exported pearls, finest muslin, silk, betels, lac, rice, sugar, etc., for sale in European Countries. (Vide McCrindle's Ancient India, as described by Potlemy. Once (about 40 years ago) I saw myself a big iron anchor tied with iron chain, half buried in the bed of the river Saraswati. The river Saraswati is at present a narrow stream (8 feet).

Formerly, it flowed to the west of Saptagram, meeting the river Bhagirathi on the north at Triveni, District Hughly, and on the south at Sankrail (near Botanical Garden) District Howrah through Battor, Andul, etc.

The place of the Vaishya King Singhabahu, a contemporary of the Lord Buddha, was on the bank of the river Saraswati at Singhagarh (at present Singur, District Hughly). His son Bijoy Singha invaded and conquered Lanka in 500 B.C., and named it after his name as Singhal (Ceylon).

It is also understood that two Hindu Kings ruled over Saptagram in the old days viz. Vaishya King Rajya Bardhan and Raja Satrujit. The place of the Hindu King Pundrabardhan, was at Pandua, a few miles to the north of Saptagram.

#### ITS INDUSTRIES

Saptagram was famous for paper (hand made) industry in the old days up to the 1st quarter of the Seventeenth century A.D., which was exported to places far and near, and also famous for yellow silk and 'Balapose'—(warm wrapper).

Ramusio stated that though the Port was removed (to Hughly), about ten thousand houses still existed at Saptagram even in the 4th quarter of the seventeenth century and there were seven hundred betel shops.

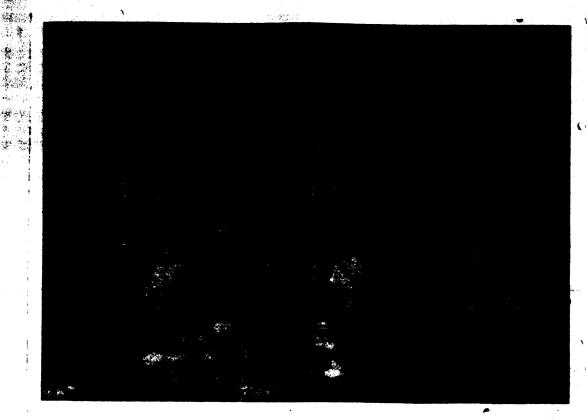

A market price-list of the capital Saptagram in 1850 A.D., as mentioned by Ibn Batuta ran as follows:—

25 ratal rice or 80 ratal paddy—1 Dirhm (silver mohar); 1 ratal sesame oil—2 Dirhm (1 Dirhm); 1 ratal cow-ghee—4 Dirhm (1 dinar); one milch cow—3 Dinar; 8 fowl or 15 pigeon—1 Dirhm; one full grown sheep—2 Dirhm; 1 ratal sugar—4 Dirhm; 30 yds fine muslim cloth-2 Dinar; one beautiful and young female slave-1 gold mahar.\*

Ijuddin Mahaia Asmul Mulk, Governor of Saptagram, established a mint at Saptagram in 1828 A.D., (Vide: "List of Coins", Vol. II, page 69,

(Continued on page 80)

<sup>\*1</sup> Ratal—13 seers. 1 Dirhm—As. 2-6 p. (ten pice), 1 Diner (silver mohur)—Rs. 1-4-0, 1 Gold mohur—Rs. 20.

THE COMMUNITY DINING ROOM

Where one main meal is provided at no additions, tharge and the aged housewives

return to their own cookers to prepare other meals.

#### HOME LIFE FOR OLD PEOPLE

#### Poor Law Institutions In Britain To Disappear

OLD people in bratain are living longer than they used to do, but they are finding much to interest them in the evening of their years. Great and successful efforts are being made to improve their lot, to make them happier and healthier. The National Health Service Act which came into force in July, 1948, provides all types of medical care for them and the National Assistance Act which provides for financial help from the National Assistance Board for those in need, gives local authorities new responsibilities for finding accommodation for people

Formerly it was the duty of Britain's local authorities to make provision for the destitute aged. Now they have to take care of all who can be described as in need of care and attention.

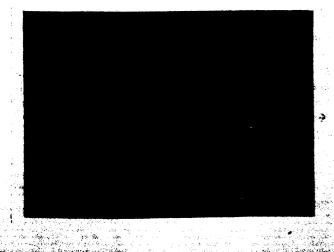

item before World War II the local authorities told begun to break up the old Poor Law institutions and make smaller, more comfortable and less functional? homes. World War II interrupted this work but after it had ended, and before the standard Assistance Act was passed in July, 1948, local hodies were asked by Britain's Ministry of the old more comfortable, by exchanging big committees for smaller rooms, providing pleasanter terreture and generally giving more individual persons to old people.

#### NEW EXPERIMENT

An imaginative experiment undertaken by the masters of the London Parochial Charities might

(Left) How an old couple live an easy lite in the flat provided to them.

(Right) Some of the old people enjoying their time in the Garden Court.

well form a model and give a lead to public authorities elsewhere. The experiment is lineden House, Islington, a block of flats opened a few months age by Queen Mary, and designed to combine accommodation for the aged together with family flats for normal council tenants. The block encloses a central garden court, and this and all the accommodation opening on to it are reserved for old folks.

The accommodation takes the form of oneoccupant flats and flats for couples, some of which are single-storey dwellings, while others are in the ground-floor storey of the block, whose upper floors are arranged as ordinary family flats. This latter fact, which ensures that the aged occupants see and hear something (but not too much) of the bustle of every-day life, is believed to go far in removing that leeling of succession which can make special institutions for the succession affairs. In addition, all the old folks' flats have entrances on to the rasin road, and the sounds and activities of city life are there to be enjoyed if they wish it so. There are several rommunity services. One meal a day is provided, without additional charge, and this is cooked in a central kitchen sign served in a communal dining-room. There is a laundry with modern washing appliances available for the tenants to use, and there is a matron with fully-equipped sick-bay. The community services, however, though essential, are less important than the privacy and home life thus made possible for the aged.

#### -SAPTAGRAM

(Continued from page 28)

by Nelson Wright). Saptagram was a big Pargana extending from Nadia (including) to Bay of Bengal.

RELICS OF AN OLD CAPITAL

Saptagram was the Royal Port of Bengal and famous for the splendour of commerce. Traders from all parts of India and foreign countries used to visit Saptagram. Its wealth and commercial importance dated as far back as the time of the Hindu and Mahammadan periods, even at the beginning of the English period and was recognised by the different ruling chiefs of the day. The silting of the river Saraswati brought about its ruin, but the time honoured name and fame are there coming down from generation to generation with all regards and reverence from both the Hindus and Muhammadans alike, as exemplified by the temple of Shri Shri Udharan Datta Thakur (a great saint and companion of the Great Lord Shri Gouranga and Nityananda Prabhu who flourished in the sixteenth Century A.D., and another at Krishnapur, the birthplace of the great devotee Srila Ragu Nath Das Goswami, one of the six Goswamis, the chosen diciples of the Great Lord Shri Chaitanya Mahaprabhu. There are also ancient Mahammadan relics and relics of old capital, fort and port demarcated with marble tablets by Lord Curzon, Viceroy and Governor-General of India. lt was undoubtedly one of the seats of culture and learning also. Udharan Datta was a big trader, merchant, Court-Banker and a person of enormous wealth. He had several mercantile vessels. He opened shelter (langarkhana) for the famine stricken people, on the bank of the river Saraswati, where 10 to 12 thousand persons were fed daily for a considerable period.

#### CENTER OF VAISHNAVA CULTURE

The name of Saptagram is a household word to every one in many districts of Bengal. Unfortunately much of its history is lost owing to the disappearance of the city on account of Mang of the river Saraswati. The towns of Hughly Chinsurah, Chandernagore, Shrirasapar, Sa. practically rose out of the sales of Saptagram, which Headh

destroyed physically is yet one of the spiritual centres of the great Vaishnava culture and religion of Bengal. Thousands of pilgrims visit their respective shrines every year.

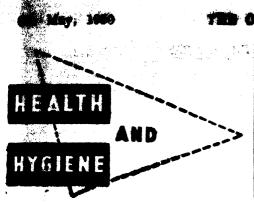

There are still two mounds of ruins at Saptagram, one is the ruin of a Fort and the other the ruin of a temple of Kali. They are situated side by side on the eastern bank of the river Saraswati.

The length of the mound of the Fort is about 400 yds and the height is about 25 feet, the top of the mound being now used for cultivation. Local people told me (about thirty years ago) that an iron cannon was found, some time previously when ploughing the land (top of the mound of fort).

The mound of ruins of the temple bears an old banian tree on the top. Local tradition has it that, the sailors and crewmen used to tie iron chains, ropes of ships and vessels, round the trunk of the tree. A local old man of 80 told me that he heard from his grandfather the same. This quarter where the mound stands, is called "Dingir Haut" i.e., the mooring place for anchoring vessels, boats, ships. The height of this mound is about 25 feet and the top is about 20 sq. feet. The above two mounds were discovered by me about twenty years ago. It was also brought to the notice of the Archaeological Department and those mounds were inspected by the Archaeological Survey Department in 1939.

Foreign travellers who learnt about the glory of the ancient Saptagram from history, do not know where the place is now situated, as at present the firms bonoused, glorious and famous Saptagram is entirely engulied with jungle, situated on the side of the Grand Trunk Road, District Hughly. Septagram is only twenty-seven miles from Hourah railway station and 2 and 8 miles from Banded and Hughly railway stations. The nearest railway station of Saptagram is Adi Saptagram.

Shri Ban Da

# FIGHTING CHOLERA MENACE

A NTICHOLERA campaign by the Calcutta Corporation was started at the usual time, about the middle of December last in usual manner by appointing extra Doctors as Inoculators and stressing on prompt disinfection of infected places, writes Dr. M. U. Ahmad, Health Officer, Calcutta Corporation, in his review specially written for the Gazette.

The above measures were extended according to public demands and by the middle of February 48 extra Inoculators were working in addition to the 16 permanent hands and 18 Corporation Dispensaries were functioning as additional Inoculation Centres in addition to the permanent Vaccination Stations. These Centres are so spread all over Calcutta that one or the other Centre is within easy reach of a person wherever living-desiring for inoculation. Publicity was also arranged through Press, Posters as well as Broadcast-of the Centres of through Radio Inoculation with their addresses and of the fact that inoculation is given free of any charge either at the Centres or at the persons' own residences when so -called.

#### OUR REQUEST TO CITIZENS

As the doctors and vaccinators have been very busily engaged in the mass inoculation drive against cholera, the citizens are earnestly requested to refrain from calling vaccinators at their residences, as far as possible. They are also requested to help the drive by offering themselves to be inoculated at the inoculation centres or at places where inoculation is being given.

Public response was very slow and gradual.

The arrangements of inoculation and prompt disinfection have been further elaborated and 86 extra Inoculators, 16 permanent Doctors and 26 Vaccinat ors as help are at present engaged for inoculation work and 88 disinfecting gangs reinforced by 15 gangs diverted from Mosquito Department are working for disinfection work.

#### MASS INOCULATION DRIVE

Mass inoculation drive has been started from 19th April, 1950 jointly by the staff of the Health Directorate and the Calcutta Corporation in the Publicity Vans belonging to Government and Calcutta Corporation as well as of Indian Red Cross. The total number of persons inoculated in the joint mass drive is 1,67,875 of which 51,048 have been given by the Health Directorate and 1,07,180 by the Corporation staff and 9,647 by the Medical Practitioners and Voluntary Organisations.

A special drive against the evil practice of sale of exposed food and drink and cutfruits etc., has

and the second of the second o

been launched jointly by the Calcutta Corporation and Calcutta Police from the 27th April. In Police vans Corporation Food Inspectors accompanied by Armed Guards are daily going round different districts in Calcutta specially at places notorious for such sale. In this campaign about 4 tons of stuff have been destroyed at the Corporation Incinerator after making them unfit for human consumption by sprinkling them with finyle and bleaching powder.

Dr. B. C. Das Gupta, D. H. S. is meeting daily Corporation Health Officer Dr. M. U. Ahmad and the District Health Officers in a conference at the Writers Buildings for reviewing the progress of daily work as well as chalking out further (to be made) arrangements.

The new Chief Executive Officer of the Calcutta Corporation Shri R. S. Trivedi, r.c.s., is personally inspecting and supervising the drives etc., almost daily.

#### LATE DR. SUNDARI MOHAN DAS His Connection With The Corporation

Dr. Sundari Mohan Das, son of the late Shri Svarup Chandra Das, was born in the town of Sylhet on the 19th December, 1857.

He was appointed by the Corporation of Calcutta as Medical Inspector in charge of Wards Nos. 7—9 on a pay of Rs. 150. He rendered a qualified service till the 81st July, 1901, for 11 years and 9 months under the then Health Officer, Dr. J. N. Cook.

On August 21, 1901, the Corporation granted him an invalid pension not exceeding Rs. 27-8-0 from the date of retirement.

When the New Corporation came into existence in 1924 Dr. Das re-entered the institution as a Councillor representing Ward No. 4 for a term of three years till 1926.

#### DANGER OF EATING EXPOSED FOOD

The Regulations under the Indian Epidemic Diseases Act provide that no person shall sell or offer for sale or expose, keep, store or hawk about any milk, bread-stuffs, cakes, pastry, sweetmeats, confectionery, icecream, cut or sliced fruit or any other article of food or drink commonly used for human consumption without further preparation by hoiling or cooking, unless such article is kept properly covered in a closed container of glass, wood or metal so as to protect it from the risk of infection by dust, dirt or flies, according to a Government Press Note. Similarly, no person shall offer or sell or expose, keep, store or hawk about sugarcane juice extracted by hand press or by any mechanical device in any public place, park, maidan, street, road,

lane, gully, market, bazar or in places adjacent thereto, or shall prepare or extract sugarcane juice for purposes of being sold as a drink without further preparation by boiling or cooking.

An order issued by the Government of West Bengal provides that Police Officers of the rank of an Assistant Sub-Inspector, a Sergeant or above will be authorised to inspect such articles of food or drink and destroy them on the spot or remove and destroy subsequently such articles of food or drink which may be found to be exposed to the risk of infection by dust, dirt or flies. No compensation will be payable to the owner thereof in respect of such articles destroyed. The owner of such articles will also be liable to penalties provided under the Indian Diseases Act for breach of regulations.

The inspecting officers will also ascertain that no person in charge of a hotel, restaurant, cafe, lodging house or any other place of public resort in which articles of food and drink are supplied for consumption on the premises, shall use or cause or permit to be used in the cooking, preparation and storage of or for serving to any person any article of food or drink in any vessels or utensils which have not been properly cleansed to the satisfaction of the inspecting officer. For the purpose of these rules no vessel or utensil for service shall be considered properly cleaned unless it is cleaned with soap or washing soda and with clean hot water each time it is used and in cases of utensils and vessels for cooking prepartion or storage unless the vessel or utensil is cleaned at least twice daily.

Already our Health Officer, Dr. Ahmad, repeatedly appealed through the local newspapers to the people to refrain from eating exposed foodstuffs. And, until the public co-operate with the Health Authorities no measure undertaken against sale of exposed foodstuffs will bear any result.

#### DANGER OF DRINKING UNFULTERED WATER

Lt.-Col. C. K. Lakshmanan, Director, All-India Institute of Hygiene and Public Health, recently opined at a Press Conference that the unfiltered water supplied in Calcutta contain cholera germs and one of the reasons of the high incidence of the discase in the city may be drinking of unfiltered water by a large section of the people due to the limited supply of filtered water.

According to a Survey conducted by the Institute two years ago the unfiltered water was found to contain cholera bacilii.

Our Health Officer has repeatedly requested the citizens to desist from using unfiltered water for domestic purposes. And we further appeal to the citizens to pay heed to our Health Officer's request.

To the facilities for treatment. augment additional staff has been appointed in Campber Hospital. Extra equipment has also been supplied. Arrangements have been made by the Government to put up three extra sheds at Bahir Surah Hospital with accommodation for 260 beds. When these sheds are ready, smallpox patients from Campbell Hospital will be transferred there. The beds thus released will be reserved for cholers patients.

#### VITAL STATISTICS

For the Oity of Lulcutta for the week ending 8th April, 1980

CITY OF CALCUTTA (TOWN & SUBLEME)

The total number of deaths registered during the week was 1185 against 1081 and 1023 in the two preceding weeks and higher than the corresponding week of the last year by 411. The general death-rate of the west was 1948 and

#### Town (Wards 1-27)

The number of deaths registered during the week ending 8th April, 1950 was 1052 against 907 and 849 in the two preceding weeks. There were 147 deaths from cholera. against 112 and 96 in the two preceding weeks. There were 165 deaths from small-pox during the week against 172 in the previous week. There were 2 deaths from influenza against nil in the previous week. The mortality from fevers anb dowel-complaints amounted to 50 and 135 respectively against 52 and 115 in the preceding week. The general death-rate of the week was 20.89 per mille per annum.

There were 44 imported deaths. Excluding these, the death-rate of the Town was 20.01.

There were 120 deaths from respiratory diseases against 106 in the previous week.

There were 56 deaths from tuberculosis against 37 in the previous week.

#### Suburbs (Wards 28-32)

The number of deaths registered was 133 against 174 and 174 in the two preceding weeks. Of these, 36 werfrom cholera, 19 from small-pox, nil from influenza, 8 from fevers. 22 from howel-complaints and 10 from respiratory diseases. The death-rate of the suburbs (or added areas) was 18.59 per mille.

There were nil imported deaths. Excluding these, the death-rate was 18.59.

There were 2 deaths from tuberculosis against 5 in the previous week.

#### For the City of Calcutta for the week ending 15th April, 1950

#### CITY OF CALCUTTA (TOWN & SUBURBS)

The total number of deaths registered during the well was 1324 against 1185 and 1081 in the two preceding weeks and higher than the corresponding week of the last year by 542. The general death-rate of the week was 23.02 per mille.

#### Town (Wards 1-27)

The number of deaths registered during the week ending 15th April, 1950, was 1129 against 1052 and 907 in the two preceding weeks. There were 227 deaths from cholera. against 147 and 112 in the two preceding weeks. There were 183 deaths from small-pox during the week against 168 in the previous week. There were nil deaths from influenza against 2 in the previous week. The mortality from fevers and bowel-complaints amounted to 53 and 136 respectively against 50 and 135 in the preceding week. The general death-rate of the week was 22.42 per mille per annum.

There were 57 imported deaths, Excluding these, the death-rate of the Town was 21.29.

There were 147 deaths from respiratory diseases against 120 in the previous week.

There were 41 deaths from tuberculosis against 56 in the previous week.

#### Suburbs (Wards 28-32)

The number of deaths registered was 195 against 133 and 174 in the two preceding weeks. Of these, 45 were

Figure 1 is district boards numericals and lack of fund at the district boards numericals and union boards

in Asi o Hill organized a conference on the 20th April la 1 see over the conference, Sir Arthur Trever H (1) a listice of Calcutta High Court, appealed to the calculation of Republican India a fair title

He said that people differed in their views about the Cost in for but so far as the course were sometimed they were extra does of the Constitution. and if the Danisal or State Covernments crossed the Educate of later, where could declar logislation enacted by them alter bloke.

Justice Shri P. B. Mukerji, who read a paper on Modern Legislation, complained that law-making had been on a wider scale than necessary. He suggested that there should be liaison between High Court Judges and law-makers from time to time to find out what laws would be useful.

Among others who read papers were Shri S. C. Mitter, Shri Atul Chandra Gupta and Prof. D. N. Banerji.

A SEVEN-FOOT MALE SHARK, weighing over 200 pounds, was landed by some Hooghly boatmen in the early hours in the morning of the 28th April last off Jagannath Ghat, just north of Howrah Bridge.

It may be recalled that there sharks in the same vicinity were caught in May and June, 1948.

#### RATES OF FEES OF MEDICAL OFFICERS

The Government of West Bongal have fixed the following rates of fees to be charged by different classes of Government Medical Officers attending to patients in their chambers and for visits to patients at their residences within the municipal head-quarters limits. The fees are exclusive of conveyance charges which have to be borne by patients.

In Calcutta the Presidency Surgeons and Surgeons of similar standing: Rs. 24 at patient's Home, and Rs. 16 at chamber. Outside Calcutta and in Calcutta: Civil Surgeons Rs. 8, Assistant Surgeons Rs. 4, Sub-Assistant Surgeons Rs. 2. The scale of fees shall be double of the above during the night between 8 p.m. to 6 a.m.

The Government Medical Officers may charge fees from private patients for consultation at the chambers of Medical Officers outside hospital hours or for visits at the residences of patients at rates not exceeding those shown above. The private patients of Medical Officers will not be entitled to free supply of medicine, dressings etc., from hospitals. Government Medical Officers are not to accept fees higher than the prescribed rates even if offered willingly by patients. (Press Note).

A HOT SPELL IN CALCUTTA began on the 22nd April last when the hereaster was to 194°, and continued for five days. On the last day the maximum temperature was 104.2°. This was the second bot spell this April. The first lasted for eight days—from April 3 to April 10, the peak being reached on April 4, when the temperature was 105°. The hottest day so far was April 24, when the maximum touched 195.3°.

Normal daily maximum temperatures for Calcutta in April vary between 95° and 97°. The day heat in April this year was below normal only for six days—from April 11 to April 16.

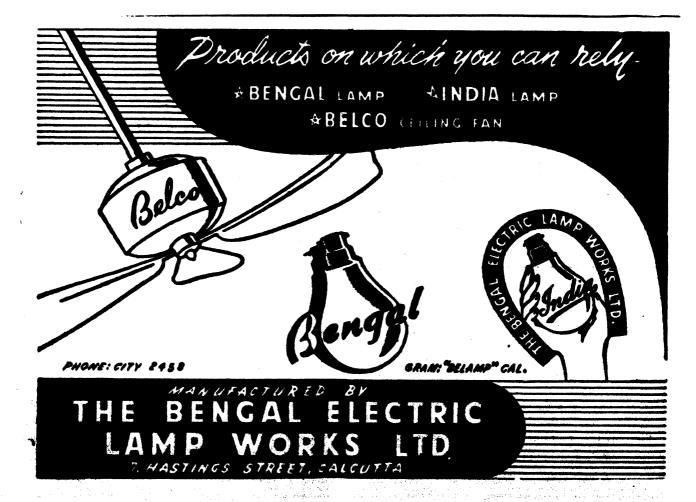

#### STRAY DOGS TO BE DESTROYED

During the year 1950, says a notification issued by the Commissioner of Police, Calcutta, dogs found straying in the streets or beyond the enclosures of the houses of the owners of such dogs, in the town and suburbs of Calcutta, will be destroyed between 9 p.m. and midnight on 1st and 15th or each month. In the following Sections such dogs will be destroyed every Thursday between the hours above mentioned: (1) Bowbezar, (2) Muchipara, (3) Taltola, (4) Park Street, (5) Hastings, (6) Ballygunge, (7) Bhowanipur, (8) Tollygunge, (9) Alipore, (10) Watgunge, (11) Garden Reach.

#### MORE TEA TRADE FOR CALCUTTA

The Commissioners for the Port of Calcutta have undertaken the construction of a four-storeyed permanent tea warehouse with a floor space of 140,000 square feet and a tea transit shed covering 20,000 square feet between the present tea transit sheds Nos. 1 and 2 and the sales tea warehouse. All this in accordance with the recent decision of the Government of India.

This decision follows the recommendations of the ad hoc committee appointed by the Government in February, 1949, to examine various problems confronting the tea industry and the marketing of tea.

# RPORATION N

d. etification. They will thence be sent to the respective Corporation Medical Officer with a card for health examination. Details regarding stipend etc., may be had from the office of the Chief Engineer, Calculus Corporation.

GANGULI. Chief Engineer.

Central Municipal Office: The 26th April, 1950.

#### Muhamadan Burial Grounds

This is for general information of the Muslim public of the city that the Bagmari Burial Ground at No. 52, Bagmari Road which had been temporarily closed for burial due to disturbed condition of the locality will now be reopened for the public on and from the 1st of May, 1950 and will be functioning for the usual burial work as before. It is therefore desirable that the public specially of the northern side of the city should in their own interest carry the dead bodies to this Bagmari Burial Ground only and thereby avoid abnormal congestion in the Gobra Burial Ground.

M. RAHMAN. Secretary Muhammadan Burial Board

The 27th April, 1950.

## MAY 8: 1950

POET'S 90TH BIRTHDAY

"Uttarayan" Santiniketan Bongal 19|11|33

Uptil Lovay our cities have grown up, as much of our enturine life has, charlically. as much of our enturine life has, charlically. They have been imitation of Europee and their brees have flowed in channels which have brees have flowed in channels which have been sometimes at tangent, sometimes parallel to our own. Now that India is farallel to our own. Now that India is slowly coming to her own own towns should slowly coming to her own own towns should niver our national culture and artistic nivers our national culture and artistic sensitivity. I look forward to a Colenta sensitivity. I look forward to a Colenta is high will reflect this ideal.

## POET'S 90TH BIRTHDAY

A BOUT noontime on the 7th August, 1941, Calcutta sunk into a profound grief over an intestimable loss. This was no loss to the city alone, it was a loss to the whole country, and a loss to the whole world. With sorrow and tears the 7th August was remembered by the city of the Poet's birth for years in succession. The city then began to realize how incompatible it was to mourn the loss of one, who defied death and would not like to die in this beautiful and romantic world, and also who wanted to see every dwelling an abode of joy and to see every citizen to "be inspired with civic spirit born of joy."

LAST year, we suppose, the birthday of the Poet was more elaborately observed than the death anniversary. The Poet has himself marked his birthday with glory and significance, having written a remarkable poem on it.

THE city on Monday, the 8th May, celebrated the 90th Birthday of the Poet. Tribute, of admiration and honour were paid to the memory of the Poet at functions organized by various educational, social and cultural associations and institutions in the city. The day resounded with songs and recitations from the Poet's works and also discussions on the services rendered by him to the country. The principal function was held at the Senate Hall in the afternoon under the auspices of the All India Rabindranath Memorial Committee.

AGAINST the background of a national calamity that has followed the partition of Bengal eloquent references were made to his social and political wisdom. Presiding over the Senate Hall meeting Dr. Syama Prasad Mookerjee said:

"It would not be improper to call the age we live in as the Rabindra age. Not only our literature but all our thoughts, ideas and endeavours have been influenced by him. He awakened Bengalis and helped India to regain her moral equilibrium and to gain a high status in the comity of nations

"Rabindranath has shown a new path to India. He gave guidance to the nation at moments of crisis and helped it to overcome obstacles. Though not primarily a politician, he had the vision of a statesman and was one of the intellectual leaders of the Swadeshi movement."

His Excellency Dr. Kailas Nath Katju in the course of a broadcast talk from the Calcutta Station of the All India Radio said:

"In our struggle for independence, he played a decisive part. His name will remain enshrined constantly in the heart of every Indian—man, woman and child—as long as our National Anthem continues to be sung in coming centuries.

"Santiniketan has been the outward expression of what Tagore symbolized during the whole of his life. He stood for international co-operation, for a synthesis of diverse human cultures and for enrichment of the human life through art, music, song and drama.

"Today, when we are paying homage to one who spent a life dedicated to the service of India, let us resolve that the Institution

shall always remain flourishing and grow from strength to strength as a sea of learning where boys and girls for all time would go to enrich their life with the highest and best in our ancient culture

A POET is immortal. His life and activities may not be limited between the dates of his birth and his death. If his memory is to be greeted and honoured that should be on the date and occasion of the Great Awakening of the Poetic Heart. In his *Reminiscences* the Poetwrites:

"Where the Sudder Street ends, trees in the garden of Free School Street are visible: One morning I was standing in the verandah, looking at them. The Sun was slowly rising above the screen of their leaves; and as I was watching it, suddenly, in a moment, a veil seemed to be lifted from the eyes. I found the world wrapt in an inexpressible glory with its waves of joy and beauty bursting and breaking on all sides. A veil was suddenly withdrawn and everything became luminous. The whole scene was one perfect music—one marvellous rhythm. That very day the poem known as The Fountain Awakened from its Dream' flowed on like a fountain itself. There was nothing and no one whom I did not love at that moment. I seemed to witness, in the wholeness of my vision, the movements of the body of all humanity and to feel the beat of music and the rhythm of a mystic dance."

IT was in 1881—1882 that the Poet was residing at 10, Sudder Street (off Chowringhee). Now, the date to which the Poet refers in his Reminiscences has to be determined, and steps are to be taken by the All-India Rabindranath Memorial Committee so that the great day of his Soul's Awakening may be suitably observed.

#### CHRONICLE & COMMENT

CITY OF CHANDERNAGORE

The French City State of Chandernagore, which became a permanent French settlement in 1816, has been the first foreign settlement to be merged in the Indian Republic. The administration of the city was taken over by an Administrator on behalf of the Government of India from the last French Administrator, M. Tailleur.

This change of administration of the city was first demanded by the Municipal Assembly. Then a referendum was held in which a large majority of the citzens cast votes in favour of the merger.

Without any formal ceremony on the occasion the transfer was effected on the 2nd May last under an agroement reached between the Governments of India and France.

The French City States of Pondicherry, Karikel and Mahe, all in South India, still remain to be annexed with India. The referendum has yet to

be held there to determine popular opinion for and against the merger of the City States in the Indian Republic.

NEW MUNICIPALITIES FOR WEST BENGAL

In consideration of the abnormal growth of population in the different non-municipal localities of West Bengal, the Government are understood to have decided to create seven new municipalities in the State, bringing the total number of such institutions to 82.

Two of the new municipalities will be for Rampurhat and Bolepur in the district of Birbhum.

The rest of the new municipalities are proposed to be created at Contai (Midnapore), Lilooati (Hooghly), Raiganj and Balurghat (West Dinajpore) and Diamond Harbour (24-Parganas).

Of the places where new municipalities are proposed to be created, two are Sub-divisional head-quarters, namely. Contai and Diamond Harbour and one is the District headquarter, namely Balurghat.

## PREMISES RENT CONTROL

#### A New Act Framed By West Bengal

THE West Bengal Premises Rent Control (Temporary Provisions) Bill was passed by the State Assembly during its last session.

The Act is to remain in force till March 81, 1958.

Framed on the basis of the recommendations of a committee appointed by Government in June last year to examine the working of the existing Rent Act, the Bill seeks to amend among others the provisions relating to

- (1) fixation of standard rent.
- (2) eviction of tenants,
- (8) right of sub-tenants, and
- (4) jurisdiction and procedure of courts in respect of ejectment suits and deposit of rents etc.

The Bill was introduced in the West Bengal Assembly by the Revenue Minister, the Hon'ble Shri Bimal Chandra Sinha. Certain clauses of the Bill were discussed by the House on the first day. The rest were considered on the following day.

#### LANDLORDS AND TENANTS

Moving consideration of the amending Rent Control Bill (entitled the West Bengal Premises Rent Control (temporary provisions) Bill, 1950, the Revenue Minister said that it was the considered opinion of Government that the amendments, proposed by the committee which examined thoroughly the working of the existing Rent Act were just and fair and would provide for establishing better relationship between the landlords and tenants and for regulating their respective rights and obligations. Government had, therefore, accepted the recommendations of the Committee almost in their entirety and the Bill had been framed on the basis of those recommendations.

Explaining the important changes in the existing law which have been introduced in the Bill, the Revenue Minister, Shri Sinha who introduced the measure said that in the matter of fixation of standard rent the distinction between premises in Calcutta and other areas as had been made under the existing Act had been done away with. Definite methods of fixing standard rent in different cases instead of leaving matters to the discretion of the Rent Controller about which there was considerable dissatisfaction have been laid down.

The existing clause (g) of Section 9 of the Act which gives wide discretion to the Controller to fix standhard rent if the rent at which the premises are for the time being let is not in his opinion just and fair, has been very much criticised. It has accordingly been omitted from the Bill.

#### FIXATION OF STANDARD RENT

In respect of premises wholly or substantially constructed after October 1, 1946, provision has been made for fixing the standard rent so as to secure an outturn of not less than 4 per cent and not more than 6 per cent of the reasonable cost of construction including the reasonable price of the land. This has been done with a view to encourage construction of more houses, the Minister remarked.

The permissible increase of rent in respect of residential premises has been fixed in the Bill at 5 per cent in the case of basic rent of not more than Rs. 100 per month and of 10 per cent in the case of basic rent of more than Rs. 100 per month as against the increase permissible in the existing Act varying between 64 per cent and 20 per cent in Calcutta and between 10 per cent 25 per cent in other areas.

In the case of non-residential premises it has been fixed at 10 per cent in the case of basic rent of not more than Rs. 100 per month and 15 per cent in the case of basic rent of more than Rs. 100 per month as against the existing permissible increase varying between 12½ per cent and 40 per cent in Calcutta and between 20 and 50 per cent in other cases which is considered to be unconscionably high in the present circumstances.

#### TERMINATION OF TENANCY

The existing law provides for ipso facto terminates of a tenancy for default in payment of a months' arrears of rent. It has been provided in the Bill that a suit for ejectment of a tenant would be cutertainable for default in payment of 2 months' rent only but that the tenant would get relief against forfeiture if all rents due up-to-date be paid with interest at 12½ per cent plus cost of the suit. Retrospective relief has been given in all pending suits and in cases where possession has not yet been taken.

In regard to eviction on the ground that the premises are required by the landlord for building or re-building or for his own occupation, powers have been obtained for the Court to judge the reasonableness of the demand and his requirement and not merely his 'bona fide' character.

Provisions regarding sub-tenants about which there has been considerable public criticism have been modified. In the opinion of the Government, the Minister said, the proper policy would be to see that while not encouraging speculation in sub-letting it should not be so forbidden as to limit accommodation anduly. Provision has accordingly been made in the Bill making the existing law more lenient. The amending provision is to the following effect:—

That a tenant who has sub-let a major portion of the premises may not be evicted from the whole, but may continue as a tenant of the portion in his actual possession. The right of the lessee under the general law to sub-let in the absence of any contract specifically withholding such right has not been interfered with.

#### JURISDICTION OF COURTS

Another important amendment provided in the Bill relates to the jurisdiction of courts in respect of eviction suits. To obviate the high cost of litigation in the original side of the High Court, the Minister pointed out, it was provided in the existing Act that ejectment suits should be triable only by the Court of Small Causes. But the High Court has held that its jurisdiction has not been taken away by the present

Act. Thus the object of the Legislature has been frustrated. This lacuna in the existing Act has been removed by a specific provision in the Bill. In the case of larger premises, however, the rent of which exceed Rs. 500 per month the jurisdiction of the Original Side of the High Court has been retained.

The existing provisions for deposit of rent, Shri Sinha said, have been largely modified under Clauses 19, 20 and 21. The procedure of first a tender and then a money order on refusal and deposit of the rent with the Rent Controller if the money order is not accepted and for the Controller again to forward the deposit money by postal money order to the address of the landlord is over-complicated. The amendments of the existing procedure as made in the Bill will allow the tenant to make the deposit at his own risk and make him liable eventually to a fine if the deposit is made unreasonably. The landlord in his turn has also been made liable to a fine if he falsely tries to get the tenant penalised.

#### The Minister added :--

The existing provision of the Act which empowers the tenant to make repairs or to take measures for the maintenance of essential services to the premises under certain circumstances and to recover the cost thereof by deduction from the rent not exceeding one-twelfth of the rent payable by the tenant per annum in any year has been rendered largely inoperative. Accordingly, under Clause 38 it has been made clear that the repairs or measures for the maintenance of essential services shall not be deemed to include such measures or repairs without which the premises are not habitable or usable. The landlord has been made liable to make such repairs and to take such measures in any event as under the general law. On his failure to do so the tenant will be entitled to have the repairs done with the limitation as to the amount recoverable as provided under the existing Act.

Clause 5 of the Bill provides that nothing in the Act would apply to a lease of any premises entered into after December 1, 1941, for a period of not less than 20 years which is not terminable within the said period at the option of the landlord.

Amendment, moved on behalf of Government which was accepted by the House, provides that the provisions of this Section would not in any way affect any right acquired or accrued under this Section or require the landlord to refund any premium, or salami or other like sum in addition to the rent, received by him in accordance with provisions of that Section.

#### AMENDMENTS MOVED

Janab Mohammed Rafique, who moved a number of amendments in the course of discussions, said he did not think the Bill would give relief to the parties concerned. On the contrary, it would create more bitterness between landlords and tenants and would give rise to more litigation.

The provisions of the Bill, he said, would adversely affect the finances of Calcutta Corporation. As a result of recent reassessment in certain wards, the income of the Municipality had increased. But if the Bill was passed, rents in some cases would come down and would ultimately affect the assessment also.

Janab Rafique urged that the basic rent should be fixed on the basis of actual rent paid in December, 1946 instead of in December, 1941. He said that no provision had been made for increases in the rent of houses requisitioned under the Defence of India Act. In respect of new premises the provision made for fixing the standard rent to secure an outturn of not less than 4 per cent and not more than 6 per cent on the cost of construction and price of land, was not adequate to give incentive to people to invest money in building houses.

The Government ought to have consulted the various interests concerned. He wondered whether the Government really wanted to help landlords and tenants or to prepare the ground for the coming election.

Shri J. C. Gupta said it was not true that the different interests concerned had not been consulted. The Advisory Committee appointed by the Government, whose recommendations had been embodied in the Bill, prepared its report after considering replies to a questionnaire issued to a large number of representative associations and individuals.

The policy underlying the measure was the policy of the Congress, namely, to provide for the greatest good of the greatest number. Under the existing circumstances when, on the one hand, there was extreme pressure on accommodation and, on the other, greed on the part of a section of landlords, a measure like this was absolutely essential. They had also ensured proper payment of rents to landlords.

#### REPLIES TO AMENDMENTS

Shri B. C. Sinha, the Revenue Minister, replying to the debate, said that the need for such a measure had become very great. Bengal was now passing through a great crisis. Calcutta was overcongested. The influx of refugees from across the border was continuing. It was for the Government and the Legislature to take notice of the realities of the situation. The problem of relations between landlord and tenant could not be tackled without a legislative measure of this kind.

Opposing Janab Rafique's amendments, he said that the income of Calcutta Corporation had recently increased not because of reassessment on the basis of rents as such but because of a change in the basis of assessment itself. So far as that basis remained, rents would not be a sufficient factor to disturb Corporation revenue.

Regarding Jansb Rafique's suggestion for an increased return on money invested in building houses, he said there was no limit to the demands of capitalists. If a concession was made today, they would demand further concessions tomorrow.

The Government had given instructions to entertain reasonable demands for increase in rents of houses requisitioned under the Defence of India Act and now under their administrative control. There were instances where such increase had already been allowed. They had also written to the Central Government to follow the same principle in respect of requisitioned houses under their control.

Bitterness and litigation to some extent could not be avoided so long as there existed strained relations between landlords and tenants. Instead of leaving tenants at the mercy of landlords, it was desirable that there should be some legislation.

## CALCUTTA AND HER POET

IN December, 1981, at the termination of the seventieth year of his life, corresponding with the Jayanti celebrations which Calcutta held to honour her poet, Rabindranath was accorded a civic address by the then Mayor of Calcutta, Dr. Bidhan Chandra Roy, on behalf of the Aldermen and Councillors of the Corporation of Calcutta. The civic address among other things contained the following:—

"You were born in this great city; and it was this city which saw the first blossomingg of your creative genius which has enthralled the entire civilised world. Here it was that the life of picty and action, which made our people regard your noble father as a 'Rishi' (sage), lived. It was here too that your princely grandsire found that field of his life's work. Here, indeed, is the home of that illustrious clan which has earned the esteem of all, by its high standard of conduct and social virtues, which has enriched thought, art and literature, and of which you are the brightest jewel. Therefore, whille all the world acclaims and claims you, we regard you as our very own. The citizens of Calcutta feel honoured by the recognition you have received in the world of learning."

#### THE POET'S REPLY

In reply to this address the poet not only expressed his cordial appreciation of the civic honour done to him but also in the form of a "prayer" pointed out the several duties of the city's municipal institution, to which it should pay due attention. He said:—

"In former times, it was considered the duty of kings to honour poets. They honoured poets just to highten the glory of their own kingship. For, they knew kingdoms were not ever-lasting but the fame of poets outlived them and extended far into unborn ages.

"In these times, the men of genius of the country have no place in the Court of the king of India. The king's language and the poet's language have not met in honourable friendship. To-day, the civic body has taken upon itself the duty of honouring the poet in the name of the country. This honour is not only an external ornament which has adorned me but has filled my heart with great delight.

"Let this Corporation make the city of my birth great in the amenities of life, health and sanitation, and dignity and self-respect. Let painting, sculpture, music and arts grow under its auspices and make the dwelllings of the citizen abode of joy. Let this city wipe out its blot of illiteracy with all its dirt and uncleanliness; let her citizens enjoy plenty. have strength of body and energy of mind, and be inspired with civic spirit born of joy; let not the paison of internecine strife pollute her life; let her citizens of all races and all sects and communities unite the goodwill and keep

her fair name untarnished and her peace undisturbed—this is my prayer."

#### BORN IN CALCUTTA

On May 7, 1861, at 6, Dwarka Nath Tagore Lane Rabindranath was born. He received his preliminary education at Bengal Academy and St. Navier's School of this city. Then a school student, he wrote and recited a patriotic poem at the Hindu Mela, an Indian gathering, held in this city, in February, 1875; this poem was later published over his name, the first poem to be published.

In 1878 he went to England for studies; on his return home he appeared in the principal role of a musical drama written by himself and staged in this city on two occasions before distinguished gatherings in 1881-82. This musical drama was something novel during that period and the high appreciation of the audience must have inspired the poet to inter make further experiments upon writing various musical and dance dramas.

The year 1882 came to Rabindranath's life with a conspicuous meaning. In this year, then living in a house at 10, Sudder Street, near the Indian Museum, the poet worte his poem, The Fountain Awakened from Its Dream. This poem heralded the beginning of his poetic career of great distinction. Vision came to him, and with it, music. All was effortless, as natural to him as life-breath.

#### POETIC LIFE DAWNS

His poetic life dawned in 1888 with the publication of his Provat Sangeet, Morning Songs, a collection of poems. The urge of poetry and music was so powerful in him that he was highly activised for the time beng. Even writing of poetry would not spend away all that energy. So he led the movement for the establishment of an Academy of Bengali literature and entered into controversy with the then greatest literary genius of Bengal, Bankim Chandra, on the ideals of Hinduism. And fortunately, his effort for setting up the Academy became unsuccessful, and his controversy with Bankim soon changed into profound respect for the literary predecessor.

His realization of his own capabilities as a writer kept him very much high-strung. In 1886 he became engaged in a number of controversies on social and socio-religious problems,, and wrote a series of articles in the Sanjivance, a Bengali weekly of this city, attacking the ideas and ideals of the Brahmo Samaj. Towards the end of that year on the occasion of the second session of the Indian National Congress he composed and sung the opening song: Amara Milechi Aj Mayer Dake, Assembled Are We To-day at Call of the Mother. The next year, besides a book of his collected poems. Kadi-O-Komal (Sharp and Flat) other publications of his included a collection of some letters on social problems and appreciation of his literary studies. In 1888 too the poet got entangled in a

bitter controversy arising out of his reading in the hall of the Indian Association in Calcutta a paper on the ideals of Hindu Marriage. From 1889 to 1892 the poet became very much interested in literary journalism, poety having been relegated to the back ground. He joined his nephew, Sudhindra Nath Tagore, in bringing out in Calcutta a new monthly journal Sadhana, that contained short stories, essays, reviews, political and scientific articles and also poems. He also collaborated with Krishna Kamal Bhattacharyya to start the Bengali weekly, Hitavadi. He also wrote for the Navajiban. In 1892 in the course of an article in the Sadhana he pleaded for acceptance of the Bengali language as the medium of instruction in the educational institutions of the province.

#### PROBES PUBLIC FEELINGS

The poet's attempt to establish an academy of Bengali literature in this city,—which indirectly bore fruit in 1894 when the poet was elected Foundatoin Vice-President of the Bangiya Sahitya Parishad, a well-known literary association of Calcutta,—his opinions on the ideals of Hinduism, Brahmo Samaj, Marriage and education through mother-tongue, and the controversies thereon and his journalistic activities in the midst of his serious engagements in looking after the family properties provided the poet a lot of chances to probe deeply the individual as well as social sentiments of the time. Touching life at various points among the poor men living on land in the country and among the social and literary men in Calcutta, who were leaders of thought of the whole province and outside, the poet began to feel that, the country's independence was absolutely necessary for its regeneration. He gave vent to his feelings in public when in 1898 he read his famous political paper, Ingraj-O-Bharatbashi, the Englishman and the Indian, at the Chaitanya Library of Calcutta with Bankim Chandra Chatterjee in the chair. Following this, he wrote in the Sadhana an article, Ingrajer Atanka, the dread of the English, n:sking the Indian National Congress conscious of the potential value of Muslim unity. The animosity against the English, that filled his heart, gradually transformed into patriotism creative of the country's welfare. This transformation resulted out of his actively helping the collection of money in Calcutta for the defence of Bal Gangadhar Tilak, his direct protest against the Sedition Bill then introduced in the Bengal Legislature (for he read out at a public meeting held at the Calcutta Town Hall his famous tract, entitled, Kantha-Rodh, Strangling of Voice), his assistance to Sister Nivedita in organizing relief for the plague victims of the city, his free expression of his ideas on the topics of the day through a large number of articles, his protest against violence of British Imperialism in the Boor War of South Africa (published in the Banga-darshan, revived by him in 1900), his search for the historic foundation of Hindu culture, and his occasional retirement to Santiniketan.

#### HIGH PRIEST OF NATIONALISM

Of all these activities the relief work in the company of Sister Nivedita and the recluse to Santiniketan must have shed on the poet's heart, burning with anti-British feelings, a sense of moderation and a sense of idealization. He expressed himself against patriotism shaped in the western

mould. In July, 1904, he read a paper at the Chaitanya Library, entitled, Swadeshi Samaj, supporting the Calcutta movement for honouring the memory of Sivaji. He wrote his famous poem on Sivaji and read that at the public meeting held at the Town Hall. In 1905 he addressed a meeting of the students at the Classic Theatre of Calcutta urging them to attend to the improvement of the villages: This year Lord Curzon's decision to divide Bengal inflamed his passion for patriotism and at a large public meeting of protest at the Calcutta Town Hall he read a paper on Abastha O Byabastha, Situation and Solution. He fretted and foamed and then jumped into the whirlpool of patriotic passion. A number of national songs came to be written by him. The poet became the high priest of a Swadeshi Movement, and a leading exponent of the new Gospel of Nationalism. Symbolizing the unity of divided Bengal the Rakhi Bandhan Day was initiated and Rabindranath composed his Banglar Mati, Banglar Jal, Earth and Water of Bengal. He attended a number of political meetings held in the city. Till 1908 his poetic and remained warmed with patriotic feelings and in 1905-6 his patriotism began to flow through the channel of propagation of National Education. He took a leading part in the establishment of the National council of Education and spent not a little energy for popularisation of this scheme.

#### A COMPLETE TRANSFORMATION

In 1908 Rabindranath once for all blazed out in the warmth of patriotism. Reading a paper, entitled; Path-O-Patheya, The way and the Wherewithal, at the Chaitanya Library of the city he referred to the first bomb outrage at Mazaffarpur. This was, according to him, in expression of exasperation from the policy of repression pursued by the then Government. His poetic soul was very much purturbed and new forms in expression of patriotic feelings did not impress him. He soon withdrew from the vortex of political agitation and retired to Santiniketan. And out of this recluse, and also out of the sense of futility that surrounded his patriotic passion, came forth the sweet songs of Gitanjali. Out of the well of imagination, into which had been stored all his past feelings and experiences, the poet drew forth his offer of songs to Almighty. A completely transformed soul was he. He moved and sang at the direction of the Divine Will.

Twenty-seven years ago one morning in this city the poet realized that the Muse came to him without any effort, they completely overpowered his human existence. Then, started a struggle between the power of Muse and the power of Self. And the poet would not submit himself to Muse before he had tired himself of expressing his self through various social, humanitarian and political avenues of life. And Calcutta provided him all the opportunities of such self-assertion and self-examination.

#### CALCUTTA RECEIVES NEW SONGS

As soon as the poet realized his poetic reincarnation he came for some time to Calcutta from Santiniketan to see how his new songs would be liked. Calcutta could at once appreciate them, and in 1912, on the occasion of his 50th birthday, celebrations were held in the city under the auspices

And the state of t

of Beartya Sahitya Parishad. Soon the poet went out to Rarope on a visit, and the year 1918 brought him the honour of Nobel Laureateship and interactional recognition. He went to America and returned home on the eve of the Grat War No. I to live in Santiniketan. In 1915 he came to Calcutta to read out a paper on Sikshar Bahan, Vehicle of Instruction, at the Ram Mohan Library Hall and to record his protest against the repression of Students after the Oaten-episode at the Presidency College.

From 1916 to 1981 the poet lived an almost itinerant life,-touring in 1916 over Japan and U.S.A., in 1919 over India, in 1920 over Europe, in 1921-26 over Southern India, China, South America and Europe, in 1927-29 over Java, England and Canada and in 1980 over Europe. He would come home occasionally to enjoy rest in between his tours, and every time he was at home he gave Calcutta his thoughts on politics, education and literature. In 1917 at the Calcutta session of the Indian National Congress he read his "India's Prayer". In 1919 he renounced his knighthood. In 1921 he read a paper on Sikshar Milan, Meeting. place of Education, at the University Institute and rejected the Non-co-operation Movement enunciated by Gandhiji. In 1929 he delivered a lecture on literature in Calcutta.

#### HE BELONGS TO CALCUTTA

In 1981 Calcutta rose to honour the poet who had done so much for her. Five years ago, however, the then Mayor of Calcutta, J. M. Sen Gupta, had ceremoniously received the poet at the Howrah Station on his return from a protracted tour over this country and abroad.

After 1981 the poet, except for the tour of Persia, lived either in Santiniketan or in Calcutta. In 1982-88 he delivered the Kamala lectures at the University of Calcutta. In February, 1986, he read a paper on "Education Naturalised" at the New Empire Theatre during the "Bengal Education

Week" and in July presided over a big public meeting at the Town Hall held to protest against the injustice done to Bengal Hindus under the Communal Award and in October spoke at Bengal Women Workers' Conference. In February, 1987, as the first non-official speaker addressed the University Convocation. The important public function in the city that he attended was in August, 1989, performing the opening ceremony of the Mahajati Sadan at the invitation of Subhas Chandra Bose; in December he spoke at the opening ceremony of a Food and Nutrition Exhibition held at the Corporation Commercial Museum. In September next year the poet fell ill and temporarily recovered and towards the end of June, 1941, his condition became serious. The poet, then at Kalimpong, was brought down to Calcutta where he breathed his last on the 7th August, 1941, in his ancestral home at Jorasanko, where he had been born 81 years ago.

Rabindranath belonged to Calcutta. He no doubt wrote his best songs and poems while at Santiniketan, in his ancestral Zemindary on the banks of the Padma, but Calcutta saw him in his different moods as no other place,—as a patriot, political thinker, educationist, social reformer and what not. Calcutta had the opportunity to hear the first sone and poems written by him and to inspire him in his varied activities since his very young days.

In the backyard of his ancestral house in this city he felt the first thrill of verse, and while living in a house in the Chowringhee area the fountain of Muse gushed forth and the poet's heart was overflowed. And the most significant of the circumstances, which ordained the poet's birth and death to happen in this city, have claimed for Calcutta a unique honour. What Rabindranath was to Calcutta, the city was to the poet. Both the names go together.

## Two Model Free Primary Schools Of The City

N March last year Silver Jubilee Celebrations of the two model Free Primary Schools in the city were held. The celebrations were inaugurated by His Excellency Dr. Kailas Nath Katju, Governor of West Bengal, and a programme of five-day functions was followed. These two schools have been the Sashibhusan Dey Free School for boys and the Rajrajeswari Free School for girls. Both the schools are situated at Sashi Bhusan Dey Street, a throughfare commemorating the munificence of a philanthropist, who had been bron in this city, worked here and collected an immense fortune by dint of his merit. Now a grand old man of 82, Shri Dey is still very much interested in the welfare of the two schools founded by him. Speaking at the inaugural function connected with the Silver Jubilee of the Schools Shri Dey sought to impress upon the Government the urgency of the taking over of the Primary Education of the city and the province. And, in support of his suggestion he added that of all the nation-building activities, the spread of Primary Education was the most urgent.

The FOUNDER

In September, 1886, Sashi Bhusan was born.

He was the third you of his parents. His father,
Shri Madan Gopal Dey, was the banian of Messas.

The state of the s

W. H. Heilgers & Co. Ltd., of Calcutta. One of the thoroughfares of the city still bears his name and is called "Madan Gopal Lane". Sashi Bhusan began his studies at home, then entered Hare School, and later also read at St. X'aviers College. After he had passed the Senior Cambridge Examination, he joined the Heilgers as a mere clerk and soon rose to be the Assistant of his father. In course of time, with a small capital, and supported by industry and honesty, Sashi Bhusan started the independent career of a business man. Later, he was one of the founders of the Stock Exchange Association.

In his retired life Shri Dey thought of giving away a considerable portion of his amassed fortune to worthy charities. In 1922 he intended to establish a cottage attached to the Medical College Hospital but his intention did not materialize. Then, Shri W. C. Mullick, the first Secretary of the Schools, came forward with his suggestion for the establishment of institutions for free primary education of the poor boys and girls of the city. Shri Dey accepted this suggestion.

About that time Mr. Evan E. Blas, the then Deputy Directr of Public Institutions, Government of Bengal, had submitted his scheme of Primary

TO TOPICAL OF THE WASHINGTON OF THE WASHINGTON

Education to the Government. And it was possible for Shri Dey and Shri Mullick to secure his expert advice and wholehearted support towards the success of their efforts. Also, the late Shri S. N. Mullick, the then Chairman of the Corporation of Calcutta and Shri Charu Chandra Biswas, then a Councillor, became interested in the matter and the Corporation agreed to undertake the maintenance of the Schools after they had been established and made over under certain terms and conditions. Thus the Sashi Bhusan Dey Free School for boys and Raj Rajeswari Free School for girls (named in memory of Shri Dey's wife) have come to exist till to this day having passed through various vissicitudes over a period of 26 years.

The sites where the two schools stand were selected by Shri W. C. Mullick and Mr. E. Biss. This site measuring 16 cottahs of land had to be acquired through the help of the Government under the Land Acquisition Act. Shri Dey paid Rs. 20,000 towards the value of land and the balance was paid by the Government of Bengal through the Corporation of Calcutta.

Mr. Hathway, the then City Architect, laid out the plans for two separate two-storied buildings whose construction was completed within eight months. Each of the buildings consisted of 10 rooms giving accommodation to 800 students. The entire cost of construction, amounting to Rs. 1,00,000, was borne by Shri Dey.

#### OPENING OF THE SCHOOLS

The Schools were officially opened in July, 1923, by His Excellency Lord Lytton, the then Governor of Bengal, at a function attended by distinguished citizens.

In 1985 at the suggestion of the late Shri Natabar Chandra Dutta, the then Secretary of the School and a Ward Councillor, the partition wall between the two schools was removed and some extension was carried out to the school buildings.

In terms of the Trust Deed the Schools are managed by a Committee of ten Members i.e., five representatives of the donor and five representatives of the Corporation. All recurring expenditures of the schools, including repair and maintenance of the school buildings and payment to the teaching staff, are borne by the Corporation of Calcutta. The donor, however, makes a grant of Rs. 200 towards such expenditures.

The present staff of the boys' school consists of 12 teachers of whom two are craft instructors. The girls' school has eleven lady teachers. When the schools were started they had each a staff of five teachers. In 1924 there were nine teachers for the boys' school and seven lady teachers for the girls.

The boys' school started with 105 learners and the girls' one with 90. At present, there are 340 boys and 400 girls receiving education. Since their inception till at present the institutions have imparted education to 3,784 boys and 4,952 girls.

#### EXTRA-CURRICULAR SUBJECTS

Both the schools, which prepare boys and girls for the Upper Primary Final Examination, share a well-equipped library of juvenile literature and magazines. The library also contains books for use by teachers.

Besides the usual curricular education the schools have arrangements for latern slide and cinematographic demonstrations of subjects, have to be deeply imprinted on the young minds. Previously, the schools also encouraged occasional excursions but for the last few years as the Corporation has stopped its special grant for the purpose the excursions have not taken place. Debating classes under the guidance of the teachers are held for the benefit of the boys and girls. To develop the natural aptitude of some boys for technineal work the Boys' School maintains a workshop. In the Girls' School cooking, sewing, tailoring etc., are taught. Regular music and painting classes are held in both the Boys' and the Girls' Schools. Drill and games form an important aspect of the total education imparted to the boy and girl students.

#### NEW LEPROSY DRUGS

New drugs, derived from sulfur, have halted the course of leprosy (Hansen's disease) in about half the patients undergoing treatment at the United States national leprosarium, according to Dr. Frederick A. Johansen, who has been medical director of the hospital since 1924.

"Because of these drugs, the outlook for sufferers is one of genuine hope for the first time in history," declares Dr. Johansen, who is a world-famous authority on Hansen's disease. Before the drugs were discovered, most patients regarded entry into the leprosarium "as the end of life in a normal world", he says. "To-day more and more patients are finding that the gates swing outward too."

During the past year, 18 per cent of the patients of the leprosarium have been returned to their homes. An additional 20 per cent of the patients were permitted to visit their families or friends for holiday periods, ranging up to 30 days.

The drugs—all variations of the same basic chemical compound (diamino diphenyl sulfone)—are called promine, diasone, promacetin, and promisole. Diasone is the only one that can be administered orally.

The drugs do not cure the disease, medical authorities point out, but they arrest its course and effect a "remission" of leprosy symptoms. In 50 per cent of the patients treated with the drugs, sores and skin lesions have healed, and a feeling of vitality and well-being has been restored. Bucteriological tests reveal no active germs in the blood or tissues of these patients.

Improvement is very slow in leprosy. It may take months or even years before noticeable progress is achieved, even with the new sulfone drugs. Nevertheless, although the results obtained are neither spectacular nor rapid, most cases show some improvement after treatment with the drugs. In many cases the disease apparently is completely arrested.

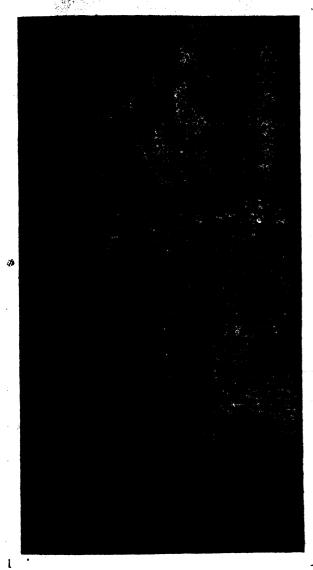

Additional benefits for the sufferers come from the fact that once the course of the disease has been halted, doctors can use plastic surgery to correct disfigurations caused by the disease.

Leprosy is rather rare in the United States. There is only one leprosarium—the Marine Hospital of the U. S. Public Health Service at Carville, in the state of Louisiana. This hospital, housing about 400 patients, is staffed by Public Health Service doctors, and by Catholic mans, all graduate nurses, who are also Public Health Service employees. The nurs are members of the Greer of Sisters of Charity, Daughters of St. Vincent de Paul, which founded the leprosarium late in the mineteenth patienty. The hospital has been administered by the II. S. Public Health Service since 1921. It is open to all affectors regardless of race, colours, or creed.

THE CONTRACTOR

## Personalia

Corporation of Calcutta, ex-Councillor of the Corporation of Calcutta, ex-Chairman, Corporation Investigation Commission, who recently submitted their findings to the Government and lately Vice-Chancellor, Calcutta University, has been appointed as a Minister of the Government of India for the purposes of the agreement signed by the Prime Ministers of India and Pakistan.

SHRI CHARU CHANDRA BINWAN

Shri Biswas is a Minister of State for Minorities.

He tendered resignation of his office as ViceChancellor on Tuesday, the 9th May. He was sworn
in as a Minister, Government of India, on Thursday, the 11th May.

Shri S. N. Banerjee, Judge, Calcutta High Court, has been appointed new Vice-Chancellor.

Shri Biswas has always been a great admirer of the Guzette and has occasionally contributed thought-provoking articles.

We offer our most cordial good wishes to

Shri Biswas.

DR. (MRS.) ASIMA CHATTERJEE, p.sc., Calcutte's Woman Scientist, 82-year old has returned to the city from Switzerland, via London, after about 24 years' study and research in the U. S. Universities:

Dr. (Mrs.) Chatterjee is the wife of Dr. Baradamandan Chatterjee, D. SC., Professor of Soil Cha-

mistry, Bengal Engineering College, Silpore: As the Head of the Department of Chemistry, Lady Brabourne College, Calcutta, she was sent abroad on study leave in 1947 by the Government of Bengal and during her stay there she obtained the Watmul Fellowship and a grant from the Rockfeller Foundation. She worked in various U.S. Universities as a visiting Scientist and during the last few months she worked with Prof. P. Karrer, Nobel Laureste, Rector of the University of Zurich, as his Assistant at the Chemsches Institute der Univ. Zurich, (Switzerland) on Biologically active alkaloids. In America she worked on Vitamins. Alkaloids and Glycosides and has published six papers in the Journal of the American Chemical Society and Archives of Biochemistry. In May, 1948 she has been elected a member of the Sigma XI Fraternity in Pharmaceutical Chemistry in December, 1949; she has been honoured with the membership of Sigma Delta Epsilon; and in February, 1950 Sigma XI Fraternity in Chemistry. She worked in the University of Wisconsin for one year and in California Institute of Technology for one year also as a visiting scientist in the Faculty staff. Her three-and-a-half-year-old daughter Julu was also with her during her study tour. Dr. Mrs. Characteriee is the daughter of Dr. Indra Narayan Mukherjee, well-known physician of Calcutta. Her brother, Dr. Sorashi Mukherjee, m.s. is now in U.K. on further Medical study and research.—P.S.B.

photograph with Prof. P. KARPER, Nobel Leureste, Rector of the University of Zurich.

#### SHRIMAT SWAMI BISWAJIT BRAHMACHARY

The 57th birthday of His Holiness Shrimat Swami Biswapi: Brahmachary Maharaj falls this year on the 23rd May. The occasion will be celebrated in a festival for 6 days from 22nd May to 27th May at Shri Guru Ashram, Hazaribagh.

#### D. V. C. HEADQUARTERS

The Headquarters of the Damodar Valley Corporation will be removed from Calcutta to Ranchi. This decision was reaffirmed by the authorities of the Corporation as a meeting of the Advisory Committee of the Corporation half has week at Hazaribegh.

VAISHAKHI PURNIMA, the auspicious day on which Lord Buddha was born ages ago, was celebrated in Calcutta at the Buddha Dharmankur Vihara on the 2nd May last.

Presiding over the occasion H. E. Dr. Kailas Nath Katju, Governor of West Bengal, expressed that the teachings of Lord Buddha influencing individuals to shed fear and show sympathy would influence Indians more and more as they developed as a free nation.

The Governor suggested that the Buddhist monks should go all over the country, carrying the doctrine of Lord Buddha to the hamlets of the poor and the mansions of the rich so that every one might benefit by it. It was in their national interest that Buddhism should spread in this land.

Shri Rama Prasad Mookerjee, a Judge of the High Court and President of the Vihara, said that the monastery, established 60 years ago, had been the meeting place of Buddhists and lovers of Buddhism not only of Bengal but other parts of Asia and the world.

A MINORITY COMMISSION for the State of West Bengal has recently been constituted in terms of the Indo-Pakistani agreement. The Commission replaces the Provincial Minoritie Board, set up under the Inter-Dominion Agreement of December, 1948. Shri K. P. Mookerjee, the Labour Minister has been appointed as Chairman of the Commission.

Shri D. N. Mookerjee, ex-Mayor of Calcutta and Janab Khuda Bakhah elected representatives of the majority and minority communities, respectively, are the members.

CALCUTTA'S GROWING AIR TRAFFIC needs a second aerodrome. The Government of India, in the Ministry of Communications, have decided to reconstruct the airfield at Barrackpore for the purpose.

A sum of Rs. 3,35,000 has been sanctioned to repair the runway.

When opened, the serodrome is expected to divert at least a third of the landings and take-offs from Dum Dum at present estimated at 300.

It may here be recalled that the Barrackpore aerodrome was developed during the last war and used mainly for the airlift to China over the Hump. Two years ago, it was taken over by the Bengal Flying Club.

SHRI CHARU CHANDRA MITRA, a well-known Solicitor of the city, died due to heart failure at his residence in Keshab Sen Street on the 4th May last. He was 83.

Shri Mitra leaves behind his wife, 5 laughters and a widowed daughter-in-law.

Born in the well-known Mitra family of Naihati in 186? Shri Mitra took a leading part in founding the National Council of Education during the Swadeshi days and acted for some time as the Vice-Presient and the Secretary of the Council. A reputed author, Shri Mitra presided at the Social Conference held in Madras in 1921. He was wellversed in western philosophy, Vedanta and sociology and carried on researches on these subjects till the last day of his life.

A FULL-GROWN TIGER stirred up the people in the vicinity of Sir Stuart Hogg Market for about 2 hours early in the morning of the 2nd May last.

- Amarendra Kumar Ghese, 55/6. Upper Circular Road, Calcutta.
- 2. Protul Coomer Guha Mazumdar, 5. Panditia Place, Calcutta.
- Rabindra Nath Das 36. Vivekananda Road, Calcutta.
- 4. Balahari Singha, 1/1. Durga Pithuri The 27th April, 1950.

- 5. Kalides Bose, 5/2E, Panditia Road,
- Calcutta.

  6. Bhimsen Jana. 24, Gopi Boss Lane,

D. N. GANGULI. Chief Engineer.

Central Municipal Office, The 9th May, 1950.

#### Muhamadan Burial Grounds

NOTICE

This is for general information of the Muslim public of the city that the Bagmari Burial Ground at No. 52, Bagmari Road which had been temporarily closed for burial due to disturbed condition of the locality will now be reopened for the public on and from the 1st of May, 1950 and will be functioning for the usual burial work as before. It is therefore desirable work as before. It is therefore desirable that the public specially of the northern side of the city should in their own interest carry the dead bodies to this Bagmari Burial Ground only and thereby avoid abnormal congestion in the Gobra Burial Ground.

M. RAHMAN, Secrete

Muhammadan Burial Board

#### VITAL STATISTICS

For the City of Calcutta for the week ending 29th April, 1950.

CITY OF CALCUTTA (TOWN & SUBURBS)

#### AMERICA CONSTRUCTS A DAM

#### To Serve As Source Or Municipal Water

Construction of a major dam, which involved moving one of America's greatest rivers, the Colorade, out of its natural channel, is nearing completion in western United States. The large man-made lake created behind the dam will help provide electric power and irrigation water for America's most arid region.

The dam, located on the border between the states of Arisona and Nevada, is regarded as an outstanding engineering feat by the United States Bureau of Reclamation.

The dam will also serve as a source of municipal water for many communities in the surrounding states of Arizona, Nevada, and California.

#### AMERICAN ARCHITECT'S NOVEL ATTEMPT

architect, Frank Lloyd Wright, will have 15 levels or floors, supported by a single core, or stem, rising through the center. The floors will be alternately circular and square in shape and the whole tower will be sheathed in glass.

The tapering stem—which is solid steel-reinforced concrete at its base—becomes a hollow cellular shaft at upper levels, containing tubes for air conditioning, an elevator shaft, and a stairway shaft. The tower will be 156 feet tall, and will weigh 7,200 metric tons.

An exterior wall, encasing the tower, will be of tubular glass, and it will have an interior wall of plate glass.

#### COLLEGE STREET MARKET-Shops To Let

Applications with offers of initial rent for the privilege of occupying the undermen ioned stalls on rents noted against each, are invited and will be received by the Superintendent in the Market Office daily between the hours of 9 A.M. and 4 P.M.

#### CHRONICLE & COMMENT

A STATE OF THE STA

## CALCUTTA'S MUNICIPAL CONSTITUTION-I

THE Calcutta Municipal (Amendment) Act of 1950, published sometime ago in the Calcutta Gazette Extraordinary for general information, is a very important amending Act since the Calcutta Municipal Act of 1928.

The municipal constitution of this city dates back to 1727. The first municipal body, consisting of a Mayor and nine Aldermen, collected ground rents and town dues. Unfortunately for them, their legal status for the pine the town in order, was nothing. It rested with the Police Commissioner. The carry efforts for representative municipal administration of the city by the rate-payers were made in 1840 under the inspiration and suidance of the then Governor-General, Lord Auckland. But the rate-payers showed no interest at all in the legislation, under which the Government were empowered, on the application of two-thirds of the rate-payers of any of the four divisions of the city (now there are four main Municipal Districts), to entrust them with the assessment, collection and management of rates, on a scheme to be approved by Government.

Following such dismal disinterestedness of the citizens in local administration of the city 86 years passed by. In 1876 the Government themselves by an Act of Legislature placed the constitution of the city's municipal government for the first time on an elective basis. Even then one-third of the total number of Commissioners, were nominated by the Government and the executive power of the civic body was vested in the Chairman, who would later be appointed only by the Government. In 1899 a change was introduced in the municipal administration which very much restricted the scope of popular opinion playing its full part.

Within 28 years since the City Corporation had been placed on an elective basis the principle of democracy was thoroughly smashed by the disreputable Mackenzie Act. Then, again, and strangely enough a period of another 28 years went by, loud with protests. It was for Surendranath Banerjea, the first Minister for Local Self-Government in Bengal, one of those who had resigned in protest against the Mackenzie Act, to invest Calcutta with a new constitution based on democratic lines, enlarging its powers and loosening the fetters of Government control.

This is the background against which the recent constitutional amendment of the Municipal Act has to be considered. The Corporation Investigation Commission, which was brought into being by the Government of West Bengal about March, 1948, to investigate into all matters relating to the finances and administration of the Corporation of Calcutta and the working of the Calcutta Municipal Act of 1928 and to make recommendations for improving the finances and administration of the institution and amending the Municipal Act, if necessary, for ensuring better administration, in the interim report submitted in June, 1949, expressed the following opinion about the Municipal Act of 1928:

"The way the Act (of 1928) was worked might well engender a distrust in the ability of Calcutta's citizens to govern themselves, but making full allowance for all the unhappy developments which have taken place, the Commission is still not

prepared to say that the situation, bad as it is, has really been so desperate as to call for such a desperate remedy as the abolition of the elective principle altogether. Paradoxical as it may seem to be, as a result of much anxious thought the Commission has come to the conclusion that if democracy has failed, the remedy lies not in tearing up its foundation, but in broadening its basis still further, taking care at the same time to seal up as far as possible the holes and fissures that experience may have disclosed in the civic structure."

Truly speaking, the Calcutta Municipal Act of 1923 is a very important document embodying not only the total experience gained since 1876 but also the experience gained in Great Britain through years and years and codified in the constitution of Local Government. As the preamble of the Act points out, the Act was designed to be a comprehensive source of "the law relating to the municipal affairs of the town and suburbs of Calcutta," and has moreover been a useful reference for other municipal bodies in this country. After about 26 years of working of the Act, the same has today been scrutinised and the defects, found out by experience, have been sought to be remedied. Within this period there have been occasions for amendment of the Act but such occasions arose either out of experience of out of contemporary necessity. In 1983 the following important amendments were introduced in the Act:

(1) creation of a new constituency known as Kalighat; (2) six additional seats were allotted to six Wards of the city: (3) exclusion of Garden Reach Municipality from the municipal limits of the Corporation: (4) introduction of Compulsory Primary Education in Ward No. 9: (5) prohibition against appointment of a person, convicted of an offence against the State.

In 1989 far-reaching changes were brought upon; a few of them were as follows:

(1) creation of separate constituencies for Mohammedans, Anglo-Indians and labour; (2) increase in the total number of seats open to election, from 77 to 85; (3) reservation of seats for Scheduled Castes, Anglo-Indians and labour; and (4) reduction of the number of nominated members.

Further constitutional changes were proposed in the Act in 1947 by-

(1) increasing the total number of seats, open to election, from 85 to 95; (2) introduction of joint electorates; (8) reservation of seats for minority Communities and Scheduled Castes; (4) division of the city into general territorial constituencies and special territorial constituencies; and (5) abolition of the system of nomination.

But these changes could not be given effect to, for the Corporation was superseded on the 24th March, 1948, the date on which the General Elections were to have taken place.

Now, considering the changes that were made upon the Act of 1928 on two occasions in particular, that is, in 1988 and 1989, all of them were not necessary for the better administration of the civic body, for many of the measures brought in their trial the seeds of discontent and disruption within the deliberative body of the civic constitution. The Act of 1928 ear-marked for Mohammedans 15 seats out of a total of 68 open to election. The Muslim members were to be returned by exclusive Mohammedan constituencies and the Act further laid down that the Muslim members would be returned by special constituencies for the first three elections and by mixed electorates thereafter. As the exigencies of the time required reservation of seats for Mohammedans it had to be made, and the evils of communal representation were sought to be moderated by gradually replacing special electorates by joint ones. The Act had to retain the existing systems of representation by the trading community and the Port Commissioners and nomination of some members by the Government. Government nomination was, however, reduced from 15 to 10. The aims of the Act, it may be pointed out, lay in "broadening" the basis of democracy but such aims were to be fulfilled by a gradual process of elimination of the forces of restriction that had held the civic constitution of Calcutta in a firm grip. The system of separate electorates was proposed to be changed into that of a joint one in 1947, some 28 years after the inception of the Act. The system of nomination was proposed to be totally abolished. The total number of elected members was to have been increased from 68 in 1928 to 95. Reservation of seats for minority communities was however continued, and arrangements were made so that all the various and divergent views and interests in the city might be called in together. Such a motley crowd of members would have raised tempests of quarrels over decisions of the House but would not have influenced very much the majority opinion of the members elected from the general constituencies.

But, the amending Act of 1947 could not have a chance to be put into operation. It is interesting here to recall that this Act enjoyed peculiar association with the one that had placed the Corporation for the first time on an elective basis, for within 28 years of this democratizing enactment the reactionary Mackenzie Act started to set at naught the progress attained by the rate-payers of Calcutta in their running the civic Corporation and again within the same 28 years of time Calcutta saw the rebirth of her Freedom, and then again within almost the same period of time, 28 years, the Act of 1947 was shaped on the legislative anvil.

## Personalia

#### SHRI R. R. DIWAKAR

Shar R. R. Diwakar, Minister of State for Information and Broadcasting, Government of India, who arrived in Calcutta on the 10th May last on a three-day visit on the day of his arrival saw Dr. B. C. Roy, Chief Minister, at Writers Building and had about an hour's talk with him.

Speaking at a luncheon party given by Shri Tushar Kanti Ghosh, he said that the problem which confronted Bengal today was not exclusively her concern but formed part of the major problems of the whole of India.

Regarding responsibilities of the Press in fulfilling the object of the Indo-Pakistan Agreement he said that although no one disputed its right of honest criticism and objective presentation of news, the Press should not lose sight of the peace and prosperity of the people and of the country.

An appeal to the journalists to adopt a more scientific and psychological approach to present Indo-Pakistani relations was made by Shri Diwakar at a reception given him by the Indian Journalists' Association in Calcutta on the 12th May last.

Broadcasting from the Calcutta Station of the All-India Radio in the evening of the 18th May last he expressed his opinion that the Indo-Pakistan Agreement was a right move and he was hopeful that Bengal would rise to the occasion and in its own interests take the fullest possible advantage of the agreement and help India to solve the bigger problem of Indo-Pakistani relations. "Let me hope that every one in Bengal, as in India, will have the strength and the capacity to see that the country's peace and prosperity are assured by abiding faith and proper action." he said.

That day he met the newspaper editors of the city at a conference and spoke to them about the activities of the Information Department so far as the information documentaries and the All-India Radio were concerned. He also met Dr. S. P. Mookerjee at the latter's residence and had a discussion with him regarding relief and rehabilitation of refugees.

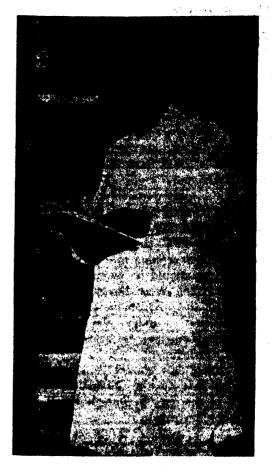

His programme also included meetings with the President and Secretary of the Indian Journalists' Association, Calcutta, and representatives of the Bengal Motion Pictures Association.

#### DR. E. C. ROY

Dr. B. C. Roy had been busy last week making visit to Orissa and Bihar inspecting the arrangements done by the Governments of those provinces for the refugees from Eastern Pakistan. On Monday, the 15th May, he left for Dacca by air and returned to Calcutta the same evening after attending the one-day conference of Chief Ministers of West and East Bengal and Assam. They met to discuss inplementation of the Indo-Pakistan pact.

Shri. C. C. Biswas. Minister of State for Minority Affairs in India who had come back from New Delhi had about an hour's talk with the Chief Minister, at Writers Buildings on Tuesday afternoon, the 18th May. Justice P. B. Mukher-

The second second

DR. B. C. ROY

jee, Chairman of the Inquiry Commission, and Shri K. P. Mookerjee, Chairman of the Minorities Commission, were also present.

Dr. Malek and Shri Biswas both Ministers of Minority Affairs, for Pakistan and for India, met Dr. Roy at a conference at Writers Buildings on Wednesday, the 17th May.

#### SHRI MOHANLAL SAKSENA

She Mohanlal Saksena, Minister of State for Relief and Rehabilitation, Government of India, who was in the city last week inspecting the conditions in which the refugees were living left Calcutta for Delhi on Wednesday, the 17th May.

On Tuesday afternoon, the 16th May. Shri Saksena had a meeting with Shri B. G. Bao, Joint Secretary of the Central Ministry of Relief and Dehabilitation, and other officials of the Ministry in Calcutta.

#### DR. ARNALDO GABALDON

DR. ARNALDO GABALDON. Head of the Malaria Envision, Venezuela, and Member of the W.H.O. Espect Committee on Malaria, who is new in Calcutta, gave a talk on "Malaria Control" at the Indian Institute of Hygiene and Public Health on Monday, the 15th May.

Describing the various anti-malarial measures that were taken by the Public Health Department on the Venezuela States, he expressed hope that within the next two or three years malaria would be wined out of Venezuela completely.

Speaking about India, he said that anti-malaria measures in India would cost very little probably about a rupee per head. He said that by taking proper measures India could be made completely free of malaria.

HEALTH & HYGIENE

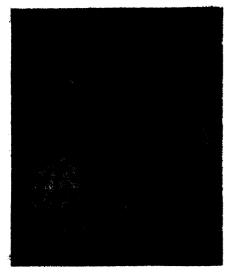

## HOW TO CHECK ADULTERATED MUSTARD OIL

[By DR. H. C. SAHA, L.M.F., W.M.S. (Nat), Food Inspector, Calcutta Corporation]

I T is now an accepted theory by the medical men that the consumption of mustard oil maked with Argemone oil is the cause of Epidemic Dropsy. The U. P. Government have declared the Argemone seed as "poisonous" and have also sealed several godowns of Argemone seeds and are taking necessary actions in the matter under provisions of line.

I think that it is now the proper time for vigilable inspection as was done previously by the Corporation to check the adulteration of mustard oil specially with Argemone oil. With this when, the following steps should be taken as early as spossible.

- (a) The West Bengal Government should declare the Argemone seeds and oil as "poisonous" under the provision of the Calcutta Municipal Act as has been done by the U. P. Government.
- (b) Public should be given free scope for having their mustard oil for domestic use tested free of cost, as is done in Patna for detection of Argemone oil in it.

FOOD INSPECTOR DR. H. C. SAHA

Who sometime ago first seized on suspicion about 1,000 mds, of Mustard Oil, adulterated with Argemene Oil in two tank wagons at the Bahebbazar Railway siding and helped the prosecution for successful conduct of the case before the Municipal Magistrate; and who was awarded a reward of Rs. 500 by the Corporation in appreciation of the very able services rendered by him in handling the famous Jam case and also a reward of Rs. 100 by Messrs. B. C. P. W. Ltd., for detection of manufacturer of spurious Emetine Hydrochloride Ampules.

For this purpose the following procedure may be adopted.

- (i) Two Food Inspectors may be directed to attend each of the District Health Offices every day and the public be informed by paper notification to have their mustard oil examined for Argemone oil.
- (ii) The test for Argemone oil can be done by the Food Inspectors attending the District office with Nitric Acid supplied by the Corporation. When the tested oil is found positive one Food Inspector may accompany the party who will first register the name and address of the shop from which he bought

the said mustard oil and seize the said mustard oil which is to be denatured or destroyed immediately on the spot, after verification, with the consent of the shopkeeper, in the presence of the party.

- (iii) In those cases where the consent of the shopkeeper will not be forthcoming formal samples have to be drawn by the Food Inspector for further analysis in the laboratory.
- (iv) If required the West Bengal Government may be moved for necessary amendments of the Calcutta Municipal Act or for issue of an ordinance thereby legal action may be taken through an easier process.
- (v) There is a fallacy of Nitric Acid test, no doubt, that the same may be positive if the mustard oil is adulterated with Mahua oil or Sesame oil or any yellow colour (either harmless or harmful which has not yet been ascertained) but still then the mustard oil will be adulterated in the strict sense of the term though it may be within the Government fixed range of standard.
- (vi) From my experience as Food Inspector I have found that only in a very few percentage of cases where the mustard oil which gave Nitric Acid test for Argemone oil positive, the confirmatory Ferric Chloride test gave negative result. For the greater benefit of public safety that much of allowance ought to be given to the Corporation by the authorities.
- (vii) A batch of two food inspectors should be specially deputed for examination of mustard oil for detection of Argemone oil in it at the Railway sidings before it is delivered to the wholesalers from the tanks or wagons.
- (viii) If so required a temporary laboratory should be opened by the Corporation at the Railway sidings for speedy examination and report so that the usual trade may not suffer in any way.
- (ix) Another batch of two food inspectors should be specially deputed for examination of mustard oil and seeds for detection of Argemone oil and seeds, as the case may be, in the local mills.
- (x) Other food inspectors will do the usual work in the Wards to check up the small shop-keepers. But if the sources can be properly tackled as suggested above there may not be any necessity at all for checking the small shopkeepers, as Argemone is not available in bulk, in tins or barrels like other adulterants of mustard oil such as Groundnut or Linseed oil.
- (xi) The Corporation should keep the seized stuff either in the Court's Godown or in Corporation Store until the case is disposed of.

I am confident that if the combing out of the culprits, which is a very difficult task in ordinary course of duties, is undertaken with the help of the public in the way as suggested above, which will also help to find out the source, the adulteration of mustard oil with Argemone oil may be totally stopped and the public will be saved from suffering from Epidemic Dropsy.

#### CALENTTA STREET NAMES

## Harish Mookerjee Road: Harish Park

[By Gour Chand Sen, formerly Librarian, Calcutta Corporation]

In recognition of invaluable services that Hurrish Chunder Mookerjee, a distinguished Bengali patriot and a journalist of repute in India, had rendered to his country, the whole length of the road from the end of Lower Circular Road near the Great Maidan, passing through Bhowanipore, the heart of the respectable Indian quarter in South Calcutta, up to the end of Hazra Road (which was formerly known as New Kalighat Road) was named as Harish Mookerjee Road on the 1st October, 1913.

#### A VERY USEFUL THOROUGHFARE

This road off 248, Lower Circular Road traverses through both the Wards Nos. 22 and 23. It was first opened up to the Maidan in extension of Badiapara Road, \*formerly the resort of gypsies, and was called Harish Chandra Mookerjee Road on the 18th April, 1898, without any opposition, on an application from Srish Chandra Chowdhury, Secretary to the Hurrish Memorial Committee, to perpetuate the memory of the great journalist whose family residence at the crossing of Harish Mookerjee Road and Chaulputty Road (now Suburban School Road) had been acquired for the construction of this road. On the wall at the entrance to the building No. 48, Suburban School Road may be

\*Old Badiapara Road formerly can from Lower Circular Road to Peepulputty Road (modern Shambhu Nath Pundit Street). With the sale of the last plot of land measuring about 2 kottahs and 4 chittacks used as the Corporation stone-metal depot on the west of 8, Harish Mukherjee Road, the major portion of the road became incorporated in the Presidency General Hospital premises and consequently the road was closed in 1917.

seen affixed a memorial tablet which states as follows:

There stood the house in which
Lived, worked and died
Hurrish Chunder Mookerjee,
Editor of the Hindoo Patriot and Father of
Indian Journalism

Born 1824.

Died 1861."

In the year 1909 this road was extended up to Kalighat Road at an estimated cost of Rs. 14,550 and then in June, 1910, an estimate of Rs. 28,778 was sanctioned for further extension of this road from Kalighat Road to Hazra Road. This very useful road owes its inception to the then veteran Commissioner of the Calcutta Municipal Corporation, Pran Lath Pandit Saraswati, and the Hon'ble Mr. J. . Apear, another Commissioner carried on what the former had conceived. This road is now a mante thoroughfare declared as such by the Corporation on the 29th August, 1980. The Corporation has a Free Municipal Dispensary at 56. Theish Mookerjee Road. It is known as Rhewampore Dispensary.

#### HUMBLE BIRTH

them of humble parents, brought up under the most adverse circumstances, with no college ediration, thrown in the wide world at a very early age without money to support and without friends to assist him Hurrish Chunder, by his own unaided exertion, chalked out a unique career for himself and a bequently held a high rank among the great

(Continued on next page)

#### DR. H. C. SAHA

#### A Short Sketch Of His Career

Dr. Haran Chandra Saha, L.M.F., L.M.S., (Nat) was born at Barhanganj in the district of Faridpur in 1905. He passed the I.Sc. Examination from Berhampore College in 1924 and joined the National Medical Institute started by Deshbandhu Chittaranjan Das during the Non-Co-operation movement. When the National Medical Institute was affiliated to the State Medical Faculty of Bengal he passed the L.M.F. Examination in 1930. He obtained a gold medal in Surgery and a silver medal in Hygiene and Jurisprudence. He acted as a House physician of the Chittaranjan Hospital in the Cholera Ward under Dr. A. C. Ukil and in the Kalazar Ward under the late Dr. U. N. Brahmachari. He then acted as a house surgeon of the Chittaranjan Surgical Annexie under Dr. K. S. Roy and Dr. J. K. Dutt.

Dr. Saha was permanently appointed as a Mosquito Sub-Inspector of the Calcutta Corporation. He also acted as a temporary Food Inspector for sometime. His satisfactory work made him permanent in this post. The Corporation have an many occasions referred to his commandable services during the about paried his has been here. He was awarded

Control of the state of the sta

a reward of Rs. 100 by Messrs. B.C.P.W. Ltd., through the Corporation as a commendation of his services in the detection of manufacturers of Spurious Emetine Hydrochloride Ampules. He was also awarded a reward of Rs. 500 by the Calcutta Corporation "in appreciation of the very able services rendered by the Saha in handling the Jam Case,—the big and complicated food adulteration case and for showing remarkable energy, ability and industry".

His services were also appreciated in detection of spurious quinese Dihydrochloride Ampules of Messrs, Modern Drug House and sourious Olive oil at Kankulia Road, Calcutta.

Recently he seized the tank wagons containing about 1,000 mds, of mustard oil adulterated with argemone oil and successfully prosecuted the offenders before the Municipal Magistrate. It is our pleasure to be able to state that Dr. Saha has written for the Gazette a number of articles of practical interest to the readers.

He has been connected with various organizations of the employees of the Corporation.

The property of the second of the second of the second of the second of the second of the second of the second

men of the country in the middle of the Nineteenth Century.

Hurrish Chunder, son of Ramdhan Mookerjee, a high caste Kulin Brahmin, by Rukmini Devi, the youngest of his seven wives, was born in 1824 in Bhowanipore, then a village about a mile to the south of Esplanade. Hurrish Chunder was brought up at the residence of his mother's maternal grandfather, a rich and respectable inhabitant of the locality. He learnt the English alphabet at home from his elder brother and at seven he was admitted to an English School in Bhowanipore as a free student. Appreciating his good memory, sound understanding and thoroughness of his studies the directors of the school made him at the age of thirteen only to appear at the competitive examination with the advanced students of the old Hindu College. He, however, could not come out successful. is yet ample reason for believing that he would have creditably acquitted himself but for the insufficiency of time during which he was to have prepared himself for the examination.

#### LOOKING OUT FOR EMPLOYMENT

adverse circumstances Owing his Hurrish Chunder could not prosecute his studies further and at the age of fourteen he was compelled to look out for employment to earn his livelihood. One day it so happened that he would have to actually starve but for the remuneration of Rs. 2 which he had received from the Mukhtear of a zamindar for having translated into English some important Bengali documents. Soon he secured a job under Mr. Tulloh, a well-known Calcutta auctioneer of those days, as a petition-writer on a salary of Rs. 8 per mensem. This post he held for many years. His pay was later raised to Rs. 10 per month. In 1848 he obtained a post on Rs. 25 per month in the Military Auditor-General's Office after sitting at a competitive examination. His office masters appreciated his talents and intelligence. He was promoted to a post carrying a salary of Rs. 100 per month during the course of the year. Gradually, he rose to be an Assistant Auditor of Military Accounts and received Rs. 400 per month at the time of his death on the 14th June, 1861, when he was only thirty-seven years of age. He had no issue. His wife Bhagabati Devi lived on a monthly pension so kindly afforded by the British Indian Association.

#### HIS JOURNALISTIC CAREER

When financial troubles became somewhat minimized, Hurrish Chunder launhced upon his literary career which later made him famous. An insatiable reader with no fund at his disposal he anyhow procured some books for home study and afterwards during the days of his affluence he became a monthly subscriber to the Calcutta Public Library (which is now incorporated in the National Library). He went every evening after office hours to the Metcalfe Hall where the Public Library was then accommodated and spent hours over the great authors with enthusiasm and attention. Thereby be acquired a fair knowledge of English. He then started contributing articles to newspapers and periodicals of the day. About this time he picked up acquaintance with Kashi Prosad Ghosh of Shambaser, the illustrious editor and proprietor of the weekly, The Hindu Intelligenciers and be

one of its chief contributors. He next joined the Hindoo Patriott of which Girish Chunder Ghosh, a colleague of his at the Military Audit Office, was the founder-editor. Hurrish Chunder gradually obtained complete possession of the paper which he edited with great ability. From June, 1855, he conducted this journal independently and became its proprietoreditor. He was indefatigable in doing good to others, which he thought to be a sacred duty to his country and his countrymen. And soon he became a leader of public poinion of those days. Extreme exertions told heavily upon his health and hastened his death. He died in the very height of his fight for the indigo-ridden raiyats of Bengal before he could witness the final triumph of the cause he had so nobly espoused. And he left none of his own to take up the cause even after him.

#### HIS UNBOUNDED POPULARITY

For his genuine patriotism, his love for his countrymen, his almost unparallelled self-abnegation and his earnest and unique devotion to duty Hurrish Chunder earned unbounded popularity among the people of this great city. His remarkable tact and judgment that he showed in writing his editorials, the vigour of his language and the depth of his feelings became a matter of great concern to the then government of Lord Canning during the troubled days of the Indian Sepoy Mutiny of 1857, who used to wait every morning to see what was recorded in the Hindoo Patriot.

The people of Calcutta out of gratitude for the great work done by this distinguished self-made editor had a marble obelisk erected in his memory with funds raised by public subscription. With the permission of the Calcutta Corporation on the 6th July, 1904, the obelisk was set up on a conspicuous place in the surplus land between Gopal Chandra Banerjee Street and Baloram Bose Ghat Road.

"The Hindu Intelligencier, then the only Indian paper of note, conducted in English, which rather freely criticised the oppressive conduct of the Europeans towards the people of this country. It was established in November, 1846, by Kash. Proshad Ghosh of Balaram Ghose Street near Shambazar, who discontinued it in 1857 on the passing of the Gagging Act of the then Governor-General Lord Canning following the suppression of the Inlian Sepoy Mutiny. The editor, was known in Calcutta as the Indian Poet (Bard) and was the author of the Shair and other poems. He was the eldest son of Siva Prosad by his firm wife He was born in Kidderpore on the 5th August, 1809 an., died in 1873. Munshi Ram Narain Bose Sarbadhicary was his grandfather on his mother's side. Kashi Proshad was a Justice of the Peace of the city of Calcutta and Honorary Presidency Magistrate. He shifted himself to 47, Beadon Street near Hedua (modern Azad Hind Bagh), where his descendants are still living with their family

†The Bengal Recorder was established in 1849. This was converted into the Hindoo Patriot in 1853 by Girish Chunder Chosh, a grandson of Kashi Nath Ghosh of Simla, whose name survives in Kashi Ghosh Lane. Sri Nath Ghosh, former Vice-Chairman of the Calcutta Municipal Corporation (6th December, 1875 to 28th March, 1879) was the elder brother of Girish Chunder who continued his connection with the paper as a contributor even when Hurrish Chunder became its principal editor. Girish Chunder was born in 1889 and died auddenly in September, 1869. He published a Life of Ram Dulal Sirear, the Bengali millionairs. The Bengales was founded by him in 1888.

This menument has for many years been a prominent landmark in the city of Calcutta. The inscription on the memorial obelisk runs thus:

"Sacred to the memory of Hurrish Chunder Mookerjee who, as Editor of the Hindoo Patriot, as a guiding spirit of the British Indian Association, and in connection with various movements of his time, rendered conspicuous services to the country by his able and disinterested discussion of public affairs, who waged war against wrong and vindicated justice with a rare courage, honesty and independence, who in a critical period of transition gave counsels of wisdom to the rulers and interpreted their policy, who was a father to the aggrieved poor and never denied them any personal help in his power, who lived a life of self-sacrifice and heroic devotion to duty, who was at once a Tribune of the people and a Pillar of the Empire."

Born 1824: Died 1861 at Bhowanipore, Calcutta.

#### HARISH PARK

The plot of land on which this memorial was raised was known at one time as Raja Bagan Tank; later it formed the roadside land on Harish Mookerjee Road close to the South Suburban School. It was converted into a public square in 1902 at a cost of Rs. 7,548 and called King's Square after the Bengali name of the place Raja Bagan. But as all the people knew it to be Harish Park, the Corporation at its meeting held on the 25th April, 1917, changed the name of the King's Square and called it Harish Park after Hurrish Chunder Mookerjee to preserve his memory. This park now comprises an area of 6 bighas, 14 cottahs, 11 chittacks and 36 sq. ft. Formerly there were two tanks in this square covering a total area of about one bigha. The need for a park in this thickly populated area being badly felt, the General Committee in the year 1901-02 approved the use of a surplus Corporation land for this purpose.

The British Indian Association which survives in British Indian Street (old Ranimudi Gullee) having lost in him one of its chief patrons, built a library in his memory. This association is a leading political association in India.

#### FATHER OF NATIVE JOURNALISM

Hurrish Chunder was a pioneer in the political regeneration of India. He was one of the few epoch-making men of whom Modern India might well be proud. He was the first to make his countrymen feel the influence of a newspaper. G. Parameswaran Pillai, an illustrious journalist of Madras, in his Representative Indians describes him as the Father of native journalism in India.

In the year 1860 he championed the cause of the poor and unhappy rayats who crowded his house to complain to him against the barbarous cruelty and oppression of the Indigo Planters the majority of whom were Europeans. Hurrish Chunder listened to the tales of sorrow with tears in his eyes, fed them, gave them counsel, helped them with money and cheered them up with hope, and with all boldness at his command would write against the Planters in his journal and thereby expose the different manners

Agricultural de la companya del companya del companya de la compan

of their oppression. In his zeal to befriend the poor he made enemies of the great. But his mind was strong enough not to be daunted. Literally, he lived for others and knew no fear. His articles in his paper contributed not a little to the ending of the Indigo Planter Raj in the Presidency of Bengal. This incensed the Planters so much that they instituted civil and criminal proceedings against him and after his death had his property sold up. This agitation against the Indigo Planters in Bengal appears to have assumed quite appreciable proportions. Its memory lives in Rai Bahadur Dinabandhu Mitter's celebrated Bengali drama Nil Darpan (The Mirror of Indigo, which played the same part in a popular movement as did Uncle Tom's Cabin in the movement against slave labour in America. This long and deadly struggle against indigo oppression began with Hurrish Chunder Mookerjee and ended with Rai Bahadur Kristo Das Pal, c.I.M.

Hurrish Chunder's numerous acts of patriotism and his veoman's service to his countrymen on the occasion of the Renewal of the Charter to the Hon'ble East India Company in 1858 by his masterly representation to the Home Government of the defects of the Company's admiration of the country, his adverse raiticism of the annexation policy of Lord Dalhous in 1856 which roused the attention of the authorities in England, his boldness and ability with which he stemmed the tide of hatred and prejudice against the inhabitants of the country evoked by the Mutiny of 1857, his scathing exposure of the unjust and oppressive dealings of the Indigo planters and his powerful advocacy of the Rent Laws and Sale Laws by which the status of the Raiyats of Bengal was considerably raised and their condition materially improved and his strong memorial addressed on the subject of Civil Service Examinations in India, raised him so high in the estimation of his country that he will never be forgotten by the people and his services will occupy glorious chapter in the history of Indian emancipation.

The large-hearted Christian Missionary Rev. James Long hast the Nil Darpon translated in English and wrote a preface to the Eventually he was indicted for libel and was sentenced to one month's imprisonment and a fine of Rs. 1,000 after from day trial. Rev. Long is also remembered for his theorem, as from the Unpublished Records of Government?

#### USEFULNESS OF RUBBERIZED HIGHWAYS

#### AUTOMOBILES SKID LESS

an automobile is less likely to skid in wet weather if the highway on which it is travelling contains a small amount of minimal orbiter. This is reported by the Natural Rubber Bureau a research and trade organization headquartered in the United States.

In fects conducted by the Virginia State Highway Department is car travelling at 40 miles an hour on a wet highway containing rubber was brought to a stop within 87.5 ft, On a bignway containing no rubber, the stopping distance at that speed was measured at 101 ft.

For the tests, dry natural rubber in small particles was mixed with the asphalt and crushed stone or gravel. The rubber comprised less than one per cent of the total mass of materials in the highway.

tontinued testing of rubberized highways is planned in the United States.

#### MUNICIPAL ENGINEERING

#### CLEANSING THE AIR

[BY VICTOR HILLERY]

Electronic air cleaners are sifting out soot, bacteria, pollen and mould spores in American factories and homes.

In the fall of 1948 when a lethal smog (a mixture of smoke and fog in the air) shrouded the little town of Donora, Pennsylvania, in the eastern part of the United States, one resident who might have died along with 22 other asthma or heart disease sufferers lived. Nine months before, P. Garrett Hayes, an asthmatic, had been ordered by his doctor to move to Arizona in the American South-West. Instead. Hayes, a physics teacher, had an electronic air cleaner installed in his basement. And during the poisonous pall he was unaware of its presence until his radio flashed the news. The air cleaner, he says, saved his life.

Mr. Hayes' home is one of many in the United States in which the air is now cleansed by electronic scrubbers known as electronic precipitators. The growing list of users also includes food processing concerns steel and aluminum mills, department stores, hotels, restaurants, breweries, chemical concerns, hospitals, banks and atomic energy plants. Madison Square Garden, New York City's huge indoor area, installed a precipitator to clear the air of smoke so that television audiences, watching sports, entertainment and political meetings, can see what is going on.

In 1948, American home-owners bought about 2,000 electronic precipitators. Single industrial units range from the smallest sizes which handle 1,000 cubic feet of air per minute to the largest which filter more than 2,50,000 cubic feet. Several units in the Pentagon building, Department of the Army headquarters outside Washington, D.C., together clean up 55,00,000 cubic feet of air every minute.

Manufacturers of electronic air cleaners like to explain that the average human being inhales every 24 hours more than 2,000 gallons of air. Its weight is about seven times greater than the food and water consumed in the same period. Each cubic foot of air in the average American city contains from 5.00,000 to 20,00,000 particles of dust, dirt and pollen. The air precipitator does its cleaning much as a magnet sucks up iron fillings. The soiled air is passed through an electrostatic field where electric charges are imparted to the dust particles. These particles are then attracted to electrically-charged plates of opposite polarity, and the cleansed air passes on into the room. At intervals dirt must be removed from the plates either by hand or automatically.

U. S. Bureau of Standards tests show that the electronic cleaner takes 85 per cent to 90 per cent of the dust out of the air. It also sifts out soot, oil mist, bacteria, pollen and mould spores. It is effective against tobacco smoke, the particles of which are one-fourth micron in size. The smallest

dust particle visible to the naked eye is about 10 microns, or about four ten-thousandths of an inch.

While the air precipitator has not made the dustcloth obsolete, it has helped emancipate women from a daily round with the mop and cloth. In 100 homes where Westinghouse Electric Corporation installed test units, housewives reported they had to dust no oftener than once a week. Many hotels and department stores throughout the United States are using the electronic devices. At the Briggs Manufacturing Company in Detroit, Michigan, electronic precipitators were installed to supply clean air for men in the paint booths. The company found that dust-specking no longer marred the finish applied to the surface; previously it had been necessary to repaint 50 to 100 bodies daily. The superintendent of dyeing at the Adelaide Mills in Anniston, Alabama, says that formerly "as much as five per cent of our yarn was spoiled by dirt in the air blown through the packages during drying. An electronic cleaner was installed; "now the air flow is no longer restricted by clogged filters, our drying production is increased and no yarn is spoiled by dirt.'

Power stations have put in precipitators to reduce the amount of airborne dirt that gets into the windings, of rotating electrical machinery. So have some of the steel companies. The Aluminum Company of America has the air electronically filtered at one of its plants to prevent contamination from causing minute flaws in aluminum foil. A New York film laboratory employs a precipitator to stop dust from getting on films while emulsion is being applied. The Trion Corporation, a leading manufacturerer of precipitators, recently got an order for an air precipitator at Oak Ridge, Tennessee, one of America's atomic energy research centres. It must be 99.9 per cent efficient in taking radioactive dust out of the air.

An early experimental unit to clean air for ventilating purposes was developed in 1933 at the Westinghouse East Pittsburgh Research Labora tories. In 1989, Westinghouse put its first Precipitron on the market for commercial and industrial use. In the same year a precipitator for commercial use was marketed by American Air Filter. Present home units, the smallest of which is about the size of a refrigerator, can be readily spliced in on forced warm air heating systems. Industry authorities cite statistics indicating that nearly half of all homes with central heating systems were of the warm-air circulation type. To put a precipitator into a home with any other sort of heating system is much more expensive, since air ducts and a blower must be installed to move cleaned air through the house .--The Wall Street Journal.

#### COMBATING CHOLERA

To THE EDITOR, -- CALGUTTA MUNICIPAL GAZETTE

Sin.—According to the opinion of expert medical nren, Cholera is a preventible disease. It may be checked with proper precaution. Its complete elimination is possible if proper steps are taken from the beginning. Such steps include maintenance of a high standard of sanitation and training of the rate-payers in Hygiene and Health Rules. Majority of the citizens is not conscious in civic matters.

In order to educate the rate-pavers, Government and Corporation should start vigorous publicity and the schools and colleges should be requested to arrange lectures on the subject particularly once in every week. The educated persons or political workers should regularly visit the affected areas of their respective wards and give clear directions to the rate-payers as regards inoculation and other preventive measures against this deadly disease. Arrangement should be made to inspect frequently restaurants and eating houses, bazars and bustees etc. Temporary hospitals should be opened to cope with the rush of patients. Watering of the roads should be done regularly. Broken tube-wells should be repaired immediately.—Yours faithfully, MRS. RADHA MITRA, B.A.

6, Brindabon Pal Bye Lane, Calcutta—4, The 80th April, 1950.

#### CAUSES OF CHOLERA

To THE EDITOR,—CALCUTTA MUNICIPAL GAZETTE, SIR, I had recently been to the cholera hospitals of Calo**f o**ne of the cutta in order to know much havoe how simple ignorance of personal hygiene could convalescent On questioning fifteen patients about their food and drinks within five or six days (the incubation period) prior to the malady I came to understand that out of those fifteen patients five contracted the disease by coming into direct cholera patients. Three with probably got it by taking cut fruits and fruit juices unprotected from dust or flies on the open road. Two confessed their having used unclean water for cooking and the rest could not simply give any reason by which the source of the infection could be guessed. However in five of these cases drinking water was not above suspicion. Of the contact cases three spoke about the presence of large numbers of flies in their residential localities.

Thinking that my findings as in the above may form useful data for the doctors and public health workers and also they may serve as a precaution for the citizens I would like you to please publish this letter.—Yours faithfully,

SUBHENDU SEKHAR GHOSH,

23/A, Nakuleswar Bhattacharjee Lane, Calcutta—26, The 1st May, 1950.

VISVAVANI—Bengali Monthly Journal. Founded by Srimat Swami Abhedananda. Editors: Swami Sadatmananda and Swami Vedananda. Published by Shri Ramkrishna Vedanta Math—19/B, Raja Rajkrishna Street, Calcutta—6. Annual Subscription Rs. 4, Single Copy—Annas eight only.

from the last Bengali month Falgoon 1856. Although it is published from a religious institution yet its writings are not confined to the realm of religion and theology alone. Besides religion and philosophy Viscarani also deals with science, history sociology, art, archaeology, literary criticism, biography and various other subjects. Unlike many other journals Viscarani represents a very broad and liberal outlook.

The present excellence of this journal, we have noticed has begun since Swami Vedananda has taken up its editorship. It is the journalistic quality and ability of Swami Vedananda that have given now Visrarani a new orientation. The three numbers (Falgoon, Chaitra and Vaisakh) before us, are all enriched with the writings of entinent scholars. Besides these learned articles some fine poems and many other interesting staff form its remarkable features. We are sure that the without will welcome this journal.

#### DAKSHINEE

Post Rabindianath's 90th birthday and the Second Anniversary of "Dakshinee", a Rabindra Culture Institute of Soch Calcutta, were together celebrated on Sunday, the 7th Minuscotte Asutosh College Hall, Bhawanipore.

A musical programme, consisting of Solo and group spaces, was gone through. Many uncommon songs were sung and all the group songs in particular were suitably displayed.

## BATTLE AGAINST T.B. ORIGINAL PROGRESS IN U. S.

The earth against tuberculosis is rapidly being won in the disease states, and within 10 to 15 years the disease would be vortably "wiped out", according to the Surgeon General of the United States, Leonard A. Scheele. Dr. Schoole makes this prediction on the basis of present control terminals now used in the United States.

having the techniques that have proved valuable in explained the former "white plague", he cites mass acreening to unsuspected tubercular cases by nation-wide free chest Handy end community environment. Such isolation, Dr. Scheele says, has erected barriers to the spread of the disease and has made tuberculosis "self-limiting."

Immunization through BCG (Bacillus Calmette-Guerin)
Ancome also is helping to reduce the incidence of tuberculesis

## Calcutta Improvement Trust

#### SAHITYA PARISHAD STREET

A Rs. 50,00,000 scheme to improve a three acre area in Sahitya Parishad Street, North Calcutta, covered by cowsheds, known as khatals, is under consideration of the City Improvement Trust.

Under the scheme, the whole area is to be acquired. A park will be laid out and model dwellings erected, with provision for children's playgrounds.

The Improvement Trust has appointed a special committee to prepare schemes to improve insanitary and bustee areas in the city. The committee consists of Dr. Maitreyi Bose, Rai Bahadur N. K. Mitra. Dr. R. Ahmed, and Mr. J. A. Parks. Chairman of the Improvement Trust.

#### TRUST'S HOUSING SCHEME

The Trust recently submitted a scheme to the Government of West Bengal for acquisition of land in Harinath De Road, off Raja Dinendra Street. The land will be utilized for housing persons likely to be displaced by the operations of the Trust in other parts of the city. Provision has been made to build blocks of flats on rent. In the case of working class people living in bustoes, the rents to be charged for the flats will be in conformity with their ability to pay rather than bear relation to the cost of construction,

#### REVISION OF ESTIMATE

The Government have accorded sanction to the revision of the estimate for the entire engineering works in Scheme No. XLIX (Gorachand Road to South Road, Entally) from Rs. 6,16,000 to Rs. 17,10,000.

#### HEARING COMMITTEE

The Calcutta Improvement Trust Board have appointed the following Committee to hear objections to Improvement Scheme No. LXI (Sauker Bose Road, Chetla):—

- (1) Dr. Mrs. Maitrevee Bose.
- (2) Shri J. K. Mitter.
- (3) Shri P. N. Brahma (as an associated member).
- (4) The Chairman.

#### BELGATCHIA ROAD OVERBRIDGE

The Board of Trustees has agreed to contribute 50 per cent of the nett cost falling on the Provincial Road Authorities subject to a maximum of Rs. 12 lakhs for the reconstruction of the Belgatchi-Road overbridge.

#### MR. T. GODLEY

The Bengal Chamber of Commerce have elected Mr. T. Godley, Agent, Calcutta Tramways Co., Ltd., as their representative on the Board of Trustees with effect from the 15th March, 1950.

SEVEN-MAN TIBETAN DELEGATION to Communist China left Calcutta on the 12th May last for Gangtok to escape Calcutta's heat. The delegation arrived in the city about four weeks ago.

TWO DOUBLE-DECKER LEYLAND BUSES are being run by the West Bengul Government between Gariahat Road and Shambazar, via Rashbehary Avenue, Russa Road, Chowringhee and Chittaranjan Avenue.

Thirty chassis of double-deckers purchased by the West Bengal Government have already arrived. Prefabricated materials for the bodies of the vehicles which have been ordered from England will be assembled in different factories in India.

The Government expect to put them on the streets with. in the next six months' time.

A NEW DREDGER, Jalengi, has recently arrived at King George's Docks after a 43-day trip from England. This belongs to the Calcutta Port Commissioners. The vessel cost more than Rs. 90 lakhs.

The Port Commissioners possess a fleet of three dredgers, two of which, the Sandpiper and the Balari, are rather old. The third Gunga, was launched in 1921.

The new dredger was designed for work in the very strong tides of the Hooghly and in particular for working under shoal conditions.

Launched in December last year, Julengi has an overall longth of 372 ft. The capacity of her hoppers is 3,000 tons and her 44 in, pump is capable, under normal conditions, of loading the vessel in about 40 minutes. She can discharge her load in about seven minutes,

The vessel was designed for a speed of 12 knots when baded and all her dredging appliances are worked from a special panel on the Bridge.

SEPOY MUTINY DAY, was observed at University Institute Hall on the 10th May last.

Prof. Debaprasad Ghosh said that like many other movements launched against the British the Sepoy Mutiny also started from Bengal and subsequently spread to other parts of India.

The meeting was hold under the anspices of Hinds Mahasabha Provincial branch.

THE 90TH BIRTHDAY OF POET RABINDRA NATH was observed lost week in the course of a week long function under the auspices of Rabindra Patha Chakra of North Calcutta, associated by 'Bhai Bouder Ashar.' On the 8th May the function opened under the presidency of Shrimati Arati Son at the Students' Hall, College Square The opening coromony, including singing of Rabindra songs and recitation of his poems, was directed by the Secretary of Patha Chakra. Shri Subhendra Bose. The last function of the celebrations was held on the 15th May last at the Students' Hall under the presidency of Shri Amal Home. Vocal and instrumental music and recitation from Rabindra literature formed a special feature of the function.

Rabindranath's famous dance-drama, Chitrangada was successfully staged by the girls of Bithika Smriti Pathagar at 56, Jatin Das Road, Ballygunge on the 13th May last. The Pathagar is a cultural centre for the young people in South Calcutta. The performance of the dance-drama was held under the presidentship of Shri Amiya Bagohi, a teacher of Tirthapati Institution, Ballygunge.

Howard was paid to the memory of the Peet on the 10th Market at a function held at the Geeta Bhaban. Lansdowns Road by the members of Chhanda-Bharati.

This musical institution is associated with the Lake School for girls. A number of Rabindra songs were sung on the occasion.

"EAST BENGAL REFUGEES should be given all possible help by the citizens as a part of their religious duty," said His Excellency Dr. Kailas Nath Katju recently inaugnrating the ladies' section of Nature Cure Department of Marwari Relief Society at the Society's premises in Upper Chitpore Road. The Governor asked the different organizations not to think even once that they were doing any charitable work. The people who were coming from Eas. Bengal and whom they were referring to as 'refugees,' were none else than their brothers and sisters and it would be wrong to call them 'refugees'.

"If East Rengal refugees can be dispersed over the villages. I think there will be no difficulty in rehabilitating the class of people that are coming, as they can be satisfied with very little," stressed the Central Minister for Relief and Rehabilitation, Shri Mohanlal Saxena in a Press interview in Calcutta on the 13th May last.

Shri Saxena said that Government proposed to have one Welfare Officer in each district in West Bengal to explore the possibilities of Rehabilitation in that district. He suggested that each village and town should take some of the refugee population.

Shri Saxena said Government were trying to get employment for displaced persons in different industries and commercial establishments.

About 250 East Bengal refugees, including several women, staged a demonstration outside the residence of Dr. B. C. Roy. Chief Minister, West Bengal, in Wellington Street, Calcutta, on the 13th May last. Dr. Roy was in his office at the Secretariat at the time.

The refugees came in batches from Muraripukur. Bag mari and adjoining areas, squatted on the road in from of Dr. Roy's house, and at intervals shouted auti Government and anti-police alogans.

The police on duty outside the house asked the demons trators to disperse in view of the order under Section 144 Cr. P. C. The demonstrators refused to leave, twelve persons including four women, were taken into custody.

#### CHILDREN'S ASSOCIATIONS IN N. CALCUTTA

#### ANNIVERSARY CELEBRATIONS

The third anniversary of a children's club in north Calcutta was observed at a function held at 3, Chunapukur Lane on the 30th April last. Many respectable gentlemen and ladies were present at the function. The little boys of "Balakbrinda Samiti" and the girls of "Gitanjall" regaled the occasion with songs, dances and recitations. The girls staged Rabindranath's dance-drama. Pujarini. It may be noted here that two medals were presented to Kumari Manju Banerjee and Kumari Jharna Acharyya for meritorious display. Shrimati Anjali Banerjee, a teacher, of the Lighthouse for the Blind, and herself unfortunately bereft of sight, directed the play staged by the girls of Gisanjali.

There were 5 deaths from tuberculosis against 6 in the previous week.

#### MALARIA STUDY IN AMERICA

By "planting" malaria germs in chicken egg cultices and keeping a constant microscopic watch over the germs as they develop to maturity, scientists in the United States are learning come of the secret, of the life cycle of the malaria parasite. The transledge pained from these studies, it is beyond well as a doctors weapons to light malaria in its ordinary of the secret.

The princers being studied are the type that causes malari in hirds. They are not the same as those that infect buman beings. The life cycles of both types of the parasite, however are believed to follow the same pattern.

body during the 7-day period between infection and appearance of the parasites in red blood cells has long been a mages obstacle to effective early treatment of the disease. During the 7-day period the parasite apparently vanishes from the body. When it re-appears, it is full grown and already firmly enablished in the red blood cells. The malaris victim is already in the "chills and fever" stage of the disease.

The technique for isolating the mularial parasites and growing them in chicken embryo cultures, was developed by scientists of the University of Tennessee, working for the U.S. cut a of Naval Research.

#### POET'S BIRTHDAY CELEBRATION BY LIGHTHOUSE FOR THE BLIND

The staff and students of the Lighthouse for the Slind celebrated the Birth Anniversary of RABINDRANATH in an atmosphere befitting the occasion on Sunday morning, the 7th May.

The students sang songs, played on orehestral music, and recited poems of Gurudeva. Shrimati Sushima Das Gupta recited the well-known poem of Gurudeva---"AMI".

A composition prepared by linking up different pieces of Rabindranath's poem portraying the evolution of the life and

philosophy of the Peat drom his analy shildhed days was very masterly and successfully represented in a series of recitals by Kumari Sulekha Mitra, Kumari Pravati Ghose, and Shri Dilip Mitra, Shri Asok Majondar and Shri Amarendan Ganguli.

Shrimati Renu Das Gupta, daughter of Pandit Kshiti Mohan Sen Sastri, narrated the reminiscences of her association with Gurudeva during childhood days when the Ashrania was in the making.

CHRONICLE & COMMENT

## CALCUTTA'S MUNICIPAL CONSTITUTION-II

THE Calcutta Municipal Amendment Act of 1947 contained the germ of fulfilment of the Act of 1928 but no effect would be given to the proposed steps of progress. For in September, 1947, and on the very last day of that month, the then Mayor, Shri Sudhir Chandra Ray Chaudhuri, made through a press statement some serious allegations about mal-administration of the Corporation, for which both the Officers and Councillors would be held equally responsible. About that time some important Officers were dispensed with on charges of dereliction of duty and misappropriation of money. The Mayor followed up his statement with a letter written to the Honble Minister in charge of Local Self-Government requesting him to depute some Officers to enquire into the affairs of the Corporation. The Government announced their decision "to depute a few Officers of integrity to enquire into the affairs of the Corporation without in any way impairing the interests of the rate-payers and the good name of the premier municipal Corporation of India".

Probably, the Mayor had thought that the inquiry by the Government would be able to suggest ways for weeding out the corrupt practices that had come to stay as a result of the several defects in the constitution seeking to serve the interests of test several communities and parties rather than of the city as a whole. Such defects were there in the Act of 1923, and without being remedied they were magnified and made more potent in the later amendments. Sir Surendranath must have felt that however democratic he might have sought to make the constitution for the City Government of Calcutta he could not make it as flexible as it would allow even "the Father of Calcutta's Municipal Constitution" to enter the portals of the Corporation of Calcutta as the First Mayor of the city. It is, however, not our intention to challenge Calcutta's choice of her First Mayor, Deshabandhu Chittaranjan Das. It is his programme of Service to the Poor that we still today hold before us and try our best to work it out. It is due to him and his worthy lieutenant, Subhas Chandra Bose, that Calcutte has to this day her Primary Schools, her Industrial Museum and the Official Organ of her Corporation. When leaders of men like Suhbas Chandra Bose or Jatindra Mohan Sengupta were at the holm of affairs in the Corporation the impact of the prevailing force of partisanship and favour was quite powerful and even sometimes threatening to throw the institution into chass, but a strong Mayor would easily put all things in order.

A public institution is open to direct or oven assaults and more exposed it is when its constitution provides ground for struggle of multifarious interests. So, if in course of time the Corporation of Calcutta has run down to utter mal-administration the public are primarily responsible for that. And no citizen can deny his responsibility in the present adverse circumstances. But, in a country and at a time, where and when public

opini in would not have fair breathing space, and would actually be imprisoned,—directives, Acts of legislature or ordinances, either beneficial to public interest or manoeuvred to appear as such, remaining on guard,—the public may not be held entirely responsible for the failure of Calcutta's Municipal Government.

The constitutional framework of the Civic Government of Calcusta, with the subsequent changes, has been the making of the Government and whatever part might the elected members of the legislature have played in finally determining its shape, it bears the impress of the will of the then Government, expressed or implicit. This is one thing. There are other factors, associated with the working of the constitution, over which public opinion could not have held sway, and justly. Within the Corporation there were interests of various kinds clashing and struggling with one another. And these interests the very constitution of the Corporation had shaped out. Then, there were follies of human nature,—the sum total of which may be called "self-interest". Then again, there were influences from among the members of the public, who are not expected to be wholly good or wholly bad, that worked through many crevices upon the Councillors and employees of the Corporation.

If public opinion was wide awake, as in the U. S. A., no constitution that the general public would not vote upon in a majority would be thrust upon them. And, they should have been conscious not to try to speil the integrity and honesty of anybody in the Corporation for any self-interest being served thereby.

Today, it is useless to make a detailed post-mortem examination of the old constitution of Calcutta and its working. Moreover, when the Corporation Investigation Commissions has already delved very deep into the affairs of the Corporation and have submitted their report in two parts: interim and final.

Although the Government of West Bengal on receipt of the letter of the then Mayor, Shri Ray Chaudhuri, decided to depute some Officers to enquire into the affairs of the Corporation, no action was, however, taken upon the decision. Later, by a special legislation the Government formed the Calcutta Corporation Investigation Commission with Shri C. C. Biswas as Chairman and Shri P. C. Chaudhuri and Shri H. P. Bhaumik as members. Shri Biswas was a Judge of the Calcutta High Court at the time of his appointment, Shri Chaudhuri a Retired Accountant-General of Bengal and Shri Braumik, a Retired Post-Master-General of Madras. The Commission started functioning on the 21st April, 1948, and submitted their interim report in June, 1949.

In their interim report the Investigation Commission suggested that there should be a Corporation Election Commission to prepare, publish and revise the electoral rolls for the conduct of elections. The Election Commission should consist of not less than three members none of whom should be a Councillor, Officer, or servant of the Corporation, or otherwise have any connection with that body.

It was further recommended that Calcutta should be divided into 75 Wards and the Corporation should consist of 75 Councillors, each Ward electing one Councillor; that the election should be upon qualified adult; franchise; that there should be a provision that no one should be enrolled as a voter incore than one constituency or Ward; and that there should be no special or communal constituency.

#### NEW MUNICIPAL MAGISTRATE:

Shri S. P. Ghosh has been appointed by the Government of West Bengal as a Municipal Magistrate of the City. He will sit at the old Manicktala and the Consipore Municipal Offices between 11 a.m. and 2 p.m. on Mondaya and Thursdays in case of the first office and wednesdays and Fridays in case of the second.

#### FOR PUBLIC INFORMATION

The Public of Calcutta may be interested to know that in all attendance registers, whether of the ministerial staff or of others, at the different departments of the Corporation the time of arrival of the employee and the time of his departure, shift by shift, are being noted under each date.

The Chief Executive Officer, Shri, R. S. Trivedi, I.C.S., who has ordered the new

system to be observed, is personally from time to thin existing the different departments at different hours of the day to see for himself how his orders are being earried out. He is also very vigilant about every supployee being usefully occupied during the prescribed office hours of the day.

However the Chief Executive Officer has not been all-emeting. Binding every employee to the hours of work, and very strictly, he has recently presed orders regarding fixing of tiffin intervals for the employees. The Public, who have business with the various Corporation departments, should be familiar with such slack hours.

Although no employee can claim such. the recess as a matter of right, he may be allowed to onjoy it for a period not exceeding half-an-hour. Lest office work may remain totally stopped for that period, the Chief Executive Officer has asked the Heads of Departments to allow their staff to avail themselves of the facility in two batches, from 1-30 p.m to 2 p.m. and from 2 p.m. to 2-30 p.m. The Accounts Department staff are, however, allowed the tiffin recess between 2 p.m. and 3 p.m. in two shifts.

#### A CALL TO CORPORATION EMPLOYEES

In order to give the willing Corporation employees the facility for joining the Territorial Army a Recruitment Centre may soon be opened in the Central Municipal Office Buildings. Already the Heads of Departments have been requested to ascertain the names of those in their respective departments who are desirous of enrolling their names for selection.

Within the age limit between 18 and 35 years they must possess following physical standards:

| Unit      | Height        | Chest                            | Weight   |
|-----------|---------------|----------------------------------|----------|
|           | ζ,            | (Max)                            | _        |
| Artillery | 5' 4"         | 33"                              | 115 lbs. |
| Engineers | 5' 4"         | 33"                              | 115 ,,   |
| Infantry  | 5′ <b>3</b> ″ | 32 <sup>1</sup> / <sub>3</sub> " | 110 ,,   |
| Signals   | 5′ 8″         | 82 <u>į</u> ̃″                   | 110 .,   |
| Medical   | 5' 2"         | 82 <u>1</u> "                    | 110 ,,   |

We hope, our brother employees in the Corporation will not allow this first opportunity for serving our National Government as soldiers of peace and prosperity to pass by unheeded while at the same time they are able to serve the country as dutiful and efficient civic servants.

#### AUTOMOBILE ACCIDENTS IN CALCUTTA

The statistics prepared by the Police authorities of Calcutta reveal that the number of deaths from automobile accidents has considerably decreased in the city in the recent years, writes the Hindustham.

Standard

In 1945 the number of deaths from such accidents was 328, while in 1948 it was 101. In 1946 and 1947, it was 225 and 188 respectively.

According to the statistics, majority of the victims of the automobile accidents are between the ages of 15 and 60. Out of the 101 cases of 1948, 66 were between the ages of 15 and 60, 29 cases

And the second of the second o

between the ages of 1 and 14 and the remaining 6 were above 60.

Accident statistics should also provide information about the types of vehicles involved in accidents, the nature of thoroughfare where an accident happens and the hour when an accident takes place.

Probably, the Police have in their possession all such details, which, made available to us, may help us to suggest concrete remedies for accidents on Calcutta thoroughfares.

## REHABILITATION OF TUBERCULOUS PATIENTS

For a successful rehabilitation of the needy-tuberculous patients of this country the Tuber-culosis Relief Associations of Calcutta has formed ascheme. To work out this scheme as fund of Rs. 50,000 has to be created, and the Association: assumes to start work as soon as a sum of Rs. 10,000 has been collected. At first, arrangements will be made for remunerative occupation for the convalencent and cured patients in a rented house; later, in future a big industrial colony on the model of the Papworth—Village Settlement, near Cape adds in England may be built.

The Association in order to materialize the scheme will have to a very great extent depend upon public co-operation and sympathy. We may appeal to the public of Calcutta to take interest in the scheme formulated by the Tuberculosis Relief Association and may also request them to send contributions to the Fund opened for the purpose according to individual ability.

#### A SCHEME FOR MILK SUPPLY IN CALCUTTA

To BE OPERATED BY GOVERNMENT SINCE JUNE 1

Calcutta Milk Supply will be supplemented by a scheme for supply of standard milk to people of lower income group by the Government. The scheme will come into operation on June 1 in South Calcutta. As such a scheme has been worked successfully in Bombay, it is expected to be successful in Calcutta also.

For the present, about 100 mds, of standard milk will be sold at 12 as, per seer (as against the present market rate varying between 12 as, and Re. 1-4) through 40 Government-run depots in South Calcutta. In course of the year, the authorities propose to increase the supply to 5,000 mannds aday, which is the city's normal consumption. According to the mutritional standard, however, Calcutta needs about 20,000 maunds of milk daily.

Milk will be pasteurized at the Government dairy and agricultural farm at Haringhata, about 28 miles from Calcutta, where the latest machinery and appliances have already been installed. The Government hope to supply standard milk for the entire city to the exclusion of all other kinds of milk by the end of this year.

It is proposed to confine the present experiment to acportion of South Calcutta. Back family will be given a fundquote of supply for which they will have to register their
sverage monthly requirements at the deputs selected by these
Government.

### Personalia

#### SHRI SHANKERRAO DEO

SHRI SHANKERRAO DEO, General Secretary, All-India Congress Committee, arrived in Calcutta on the 20th May last by air from Delhi on a proposed tour of East Bengal.

At a reception given to him by the local Congressmen on Monday, the 22nd May, he said that every part of India was concerned with Bengal's sufferings and an acknowledgment of this fact would promote a sense of co-operation which would help solve the present problem. He said that the problem that now faced Bengal should not be characterized as Bengal's problem only. India was an organic whole. "What affects Bengal, affects India too."

Describing the object of his proposed visit to-East Bengal he said that he was out to get first hand knowledge of the situation there since the signing of the Delhi agreement.

Shri Deo will visit different areas along with Dr. P. C. Ghosh, member of the Congress Working Committee, who has already been in East Bengal.

Shri Deo left Calcutta on the 18th May last for East Bengal and is expected to return on the 9th June.

#### DR. SHYAMA PRASAD MOOKERJEE

Dr. Shyama Prasad Mookerjee was accorded a public reception at a large meeting held at Deshapriya Park, Calcutta, on Sunday evening, the 21st May. Shri Makhan Lal Sen presided.

DR. SHYAMA PRASAD

Dr. Mookerjee in reply to the reception expressed that at a time as Bengal was facing they must keep cool and approach the problems with a sense of realism. He suggested exchange of population and property at Governmental level between East Bengal on the one hand and West Bengal, Assam, Tripura and parts of Bihar on the other. This, he said, was the only way for a

peaceful solution of the problem.

He appealed to the people not to indulge in any East Bengali-West Bengali controversy. Rehabilitation plans must be integrated in a way that would serve the cause of the entire population of West Bengal.

They should realize that apart from the Government they had also their duty, individually and collectively. To save people who were in distress for no fault of their own was to save the entire race. By a systematic process of exchange of population and property, by the implementation of rural and urban development schemes, by providing training to Bengalis in occupations and trades which were at present outside their sphere and by instilling in them a sense of dignity of labour and of co-operative economic endeavour, they could rebuild and recreate a new Bengal which would be healthy, prosperous and powerful.

### JUSTICE S. BANERJEE

JUSTICE SHRI SAMBHUNATH BANKEJEE presided over a meeting of the Calcutta University Senate on the 20th May last for the first time after his appointment as Vice-Chancellor and was felicitated by several members.

While offering full co-operation to the new Vice-Chancellor, they referred to the difficulties through which the University had been passing for about a year.

Justice Banerjee, in replying, thanked the members for their offer of co-operation in his difficult task. He would

name of the University, which was once the best in India but today something was wrong with it. He was trying to ascertain what had happened with an open mind and would act when he felt that he was in possession of the facts.

### DR. A. M. MALIK

DR. A. M. MALIK, Pakistani Minister for Minority Affairs, arrived in Calcutta from Karachi by air in the morning of the 17th May last.

by air in the morning of the 17th May last.

Shri C. C. Biswas, Minister of State for Minority Affairs, Government of India. saw Dr. Malik in the afternoon and together, they met Dr. B. C. Roy, Chief Minister, West Bengal, at the Secretariat. Shri K. P. Mookerjee, Chairman of the Minority Commission, and Shri Justice P. B. Mukerji, Chairman of the Inquiry Commission, of West Bengal, were also present. They had a preliminary discussion about the task before them and the machinery for the implementation of the Delhi Agreement.

In the evening, Dr. Malik saw the Governor.
Shri Biswas and Dr. Malik at a meeting in
Calcutta the following day decided to deal with the
present Bengal situation as "essentially a human
problem and not as a narrow, legalistic one."

Dr. Malik also met Shri Kalipada Mukherjee. Chairman of the Minorities Commission, West Bengal, and discussed with him certain aspects of the Nehru-Liaquat Agreement. He left for Dacca by air on 19th May last.

Shri Biswas who is now busy visiting the rural and urban areas of West Bengal, will soon go on a tour of certain areas of East Bengal in the company of Dr. Malik.

### **VISITORS**

Dr. Gregg, Chairman of the Council of the British Medical Association, and Dr. Macrae. Deputy Secretary of the Association, Dr. H. McPherdran. Chairman of the Council of the Canadian Medical Association, and Dr. T. C. Routley, Chairman of the Council of World Medical Association, arrived in Calcutta on the 16th May last. by air on their way to Brisbane to attend the Commonwealth Medical Conference.

U Ba Swe, Secretary-General and U Aung Than, member of the Executive Committee of the Anti-Facist People's Freedom League of Burma, arrived in Calcutta on the 16th May last, on their way to the U. K. at the invitation of the British Labour Party. They left Calcutta the following

and the second of the second of

A General View of Nainital, the summer seat of the U. P. Government.

### NAINITAL: THE SWITZERLAND OF ASIA

[By M. C. Triv......]

AINITAL is reached ria Kathgodam, 22 miles away, by what is claimed to be one of the finest motor roads in the world. Kathgodam, the rail head of the Oudh and Tirhut Railway is about 60 miles from Bareilly railway junction.

The most beautiful, picturesque and interesting of all the holiday or health resorts of the East is Nainital. It is renowned for its mild climate, its clear and soft air, its luminous villas and skies, the extraordinary variety of its scenery provided by gardens with flowers in profusion, the charm of its small neighbouring villages mirrored in the still water around and the imposing mountains in the background.

The principal topographical feature of Nainital, as the name conveys, is the lake. This has an elevation of about 6,850 ft. above sea level and measures about 1,500 yds. in length and 500 yards in breadth.

### DISCOVERY OF NAINI

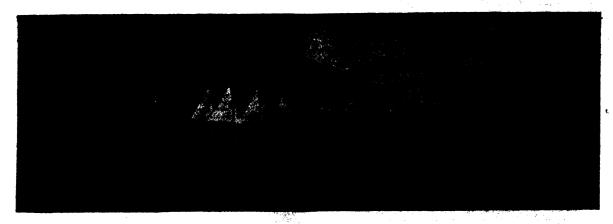

Nainital was discovered in 1841 by Mr. Barron, a resident of Rosa near Shahjahanpur. Within a few years of its discovery a number of bungalows

sprang up, the first being the Pilgrims Lodge which still exists. Bungalows are built at varying elevations all round the lake, and most of them are situated on or close to the three sets of main roads which run at different levels on each side of the lake. These roads are the Mall, the Middle Ayarpatta Mall and the Upper Cheena or Upper Ayarpatta Mall. The conveyances available are rickshaws, dunding and ponies for hire at fixed rates. There are good hungalows and hotels always available to the visitors as also a number of good boarding houses and hostels.

Nainital is the summer seat of the U. P. Government. There are three excellent beys' colleges: St. Joseph's, Philander Smits and the Eirla Vidyamandir and also two excellent girls' schools: All Saints and the Convent School. The Ramsay Hospital, founded in memory of Sir William Ramsay, is perhaps the best hospital in Northern India. It is aided by the U. P. Government. There are churches of all denominations. The temple of Shri Pakhan Devi, who is worshipped by thousands of Hindus, is very famous.

A view of the Bus Stand. The Naini Lake can be seen in the background,

A view of Naini Lake from Mall Road.

Sources of amusement are many and sufficiently varied to suit every taste and every pocket. Boating is available to all and a number of boats can be hired at the Talli-tal end of the lake at fixed rates. There are frequent regattas, and sailing on the lake is also a popular pursuit. Fishing can be done in the town lake and also in the neighbouring lakes at Bhimtal, Naukuchia-Tal, Sat-tal and Malwa Tal. One has to secure permission from the municipal board of Nainital for fishing in the lake. Polo, hockey, football, golf, shooting are other sports of Nainital. The dancing enthusiast may get as much

facility as he wishes. Every good hostel features a weekly dance programme.

In short, Nainital is the only hill station in the east with natural mountain lake, glittering springs, tonic air, romantic and magnificent surroundings, good hotels and boarding houses, and scopes for pleasure excursions, hiking picnics, boating and fishing.

The U. I'. Government is very anxious to develop its summer seat. A day may come when the Kumson Hills will be known to the world as the Switzerland of Asia. (Press Service Bureau).

# West Bengal Municipal News.

### ENGLISH BAZAR MUNICIPALITY

The English Bazar Municipality, in the district of Malda, was superseded for a period of one year with effect from the 1st April, 1949.

As it was not possible to arrange for holding the general election of the municipality before the expiry of the term of supersession and to finally decide the question of redistribution of seats to the different wards of the municipality the supersession period of the said municipality has been extended till the S1st March, 1951.

### BHATPARA MUNICIPALITY

The Bhatpara Municipality intends to restrict the speed of any motor vehicle on the public road within the municipality to the maximum of 15 miles per hour. A draft by-law has been prepared and circulated for opinion.

### WEST BENGAL MUNICIPAL AMENDMENT ACT

The Act directs that the number of seeks reserved for the members of the Scheduled Tribes, as described in the constitution of India, should bear the same proportion to the total number of seeks to which the Commissioners are to be selected as the population of the Scheduled Tribes in the municipality bears to the total population therein.

In the matter of taking oath of allegiance Commissioner will under the amended Act will have to "solemnly swear (or affirm) in the name of God."

### W. BENGAL VILLAGE SELF-GOVERNMENT ACT

This is an amended form of the Bengal Village Self-Government Act of 1919 extending the benefits of the Act to people irrespective of sex. The new Act has come into force since the 26th January, 1950.

### W. BENGAL LOCAL SELF-GOVERNMENT ACT,

This act is an amendment of the Bengal Local Self-Government Act of 1885. It has come into force since the 26th January, 1950. The amendments have become necessary in order to include both sexes instead of "male" alone for enjoyment of the benefits of the Act, and to reserve seats for the Scheduled Tribes proportionate with their population. The oath taking has also been amended to "in the name of God."

#### BANKURA MUNICIPALITY

The number of Commissioners of the Bankura Municipality is proposed to be changed from 12 to 15.

### MIDNAPORE MUNICIPALITY

The number of Commissioners of the Midnapore Municipality has been altered from 14 to 19. The alteration shall have effect from the next reconstitution of the Commissioners of the said Municipality. KHIRPAI MUNICIPALITY

The number of Commissioners of the Khirpai Municipality in the district of Midnapore is proposed to be increased from 7 to 9.

### HOWRAH MUNICIPALITY

The Howrah Municipality proposes to change tax rates on carriages and animals, the fees psyablle on warrants of distress and the tax rates for scavenging boxes, owe and other shads.

### Calcutta Corporation Co-operative Credit Society Ltd.

[Br A. B. Dutta, M.A., P.B.B.S., A.I.B. (Lond. Ex-Director of the Society]

THE Calcutta Corporation Co-operative Credit Society Ltd., was registered on the 23rd March 1916 and started work with a paid up capital of Rs. 84,800. Mr. C. F. Payne, i.c.s., the then Chairman of the Corporation, was its first Chairman. Like all other Credit Societies of office employees it has for its objects—

(1) creation of funds to be lent out to or invested for its members and for their benefit, and (2) encouragement to thrift, self-help and co-operation generally among the members.

#### ADVANTAGE OF CO-OPERATION

It is in the fitness of things that we should make a study of this useful institution which has served the Corporation employees for more than a generation. The institution as a lender was of immense benefit to the poorly paid employees. Not a few have given their daughters away in marriage or imparted education to their children or even built their houses or purchased land and engaged in other small businesses with the money they got as loan from the Society only on the personal security of their brother members. A member of the Society is not worth much as a borrower outside his Society but in his own co-operative group (as an employee of the Corporation) he occupies a respectable and responsible place not only as a borrower but also as a security as well. Not only he has credit but he stands for other's credit. Such an advantage of a co-operator is of special value in our present society and every day life and as such we should all try to see that the institution which provides for such benefits never suffers from any adverse effect of wrong administration and apathetic attitude of members towards its management. It is an institution of the members, by the members and for the members and as such, deserves active co-operation from all concerned.

CREDIT SOCIETY'S PROGRESS
A compartive study of the figures for the last thirty years shows an unbroken and uniform progress of the Society:—

regarding loans repaid show a low figure compared to loans issued except during 1946-47 which means a growing expansion of business. But when comparameters with the number of increased membership it is proved without doubt that the increase is due to increased re-borrowing by old members rather than admission of new borrower-members. In the above table, I have not included figures for membership during 1941-42, 1944-45, 1945-46 which were 4485, 4465 and 4400 respec-In 1946-47 the figure showed slight increase to 4407. Thus a very deplorable picture is revealed of economic deterioration of individual finance as a result of continued high prices on account of currency inflation and shortage of necessaries. Repayment of Loans became impossible for many as the surplus available after meeting the monthly expenditure became nil. The Society in its own way tried to meet the situation half way by allowing suspension of deduction fully or partly, discouraged of re-borrowing unless at least six regular monthly instalments were paid against a loan. But these mergeres cannot be the required treatment of an snomic cancer from which individual finance is suffering. The result is that individual borrowers are not in a position to repay their loans by normal instalments together with interest unless their income from Corporation increases.

### METHODS OF WORK

Under such circumstances the Society's entire method of work and administration requires reorientation because upon the stability of its management depends the credit and welfare of its members. One should not forget that a credit society is a business institution though a co-operative one, not a profit making company. At the present juncture the following methods should be seriously considered by the authorities:—

(1) Curtailment of further increased loans to old members unless they are repaid in full by ordinary instalments.

| •           |     | Particulars.      |          |       | 1916-17                  | 1926-27        | 1936-37   | 1946-47   |

|             | 6.  | Fixed Deposits    |          | •••   | <b>19,9</b> 50           | 1,79,870       | 12,60,014 | 82,88,987 |
| •. •.       | 7.  | Reserve           | •••      | ***   | 1,124                    | 15,456         | 71,544    | 2,19,612  |
| 14 to 40 11 | 8.  | Gross earnings    | •••      | •••   | 8,100                    | 21,980         | 84,881    | 2,05,008  |
| , ·         | 9.  | Net profit        | •••      | • • • | <b>2,74</b> 9            | 6,966          | 29,679    | 64,758    |
|             | 10. | Interest on Loans | * • 4,   | ,,,   | 91 p.c.                  | 93 p.c.        | 61 p.c.   | 5 p.c.    |

With the increase of membership there have been increased Fixed Deposits received by the Society to be lent out to its members. But the figures

Color of the Color

(2) Admission of the new borrower-members on a stricter condition as to repayment of loan-instalments.

- (8) Revision of loan rules in regard to maximum loans to be granted to each individual in view of the borrowing capacity of members having declined.
- (4) In a spirit of real help to stop altogether a loan which is for uneconomic or unsocial purposes.
- (5) A little rise in the rate of interest for borrowers to meet the rising cost of management.

Besides, it should be remembered that major portion of the funds for granting of loans comes from Fixed Deposits of non-members (including ex-employees). Accounts of 1945-46 and 1946-47 reveal the following figures:—

| Fixed Deposits | Members    | Non-members |
|----------------|------------|-------------|
| •              | Rs.        | Rs.         |
| 1945-46        | . 3,86,958 | 30,32,188   |
| 1946-47        | . 6,62 978 | 25.75.959   |

An increase of Fixed Deposits from members is a good sign but a decline of deposits from outsiders is not welcome. I would advise that although members, as soon as they retire from service of the Corporation cease to be members of the Society under the Rules and their deposits become nonmember-deposits, the management may discriminate in favour of these ex-members by paying a little higher rate of interest (as allowed to members) as is done by B. N. Railway Urban Bank and the E. I. R. Credit Society. Not only that, even widows and dependants of former members receive special consideration in the hands of the above Societies. Thus, good-will and better co-operation may be received from former members which is so very necessary in the forward march of the institution.

### REPAYMENT OF LOAN

As regards re-payment of loans it is suggested that the present monthly rate of 1½% is uneconomical from the points of view of both the Society and the members.

It should not be less than 2% per month although even this will contravene Rule 75(2) of the Bengal Co-operative Societies Rules, 1942, unless approved of by the Registrar as each loan is required to be paid within 3 years. It is an unsound policy to increase the amount of loan by lowering the monthly instalments on one hand and rate of interest on the other—member's earning capacity remaining the same. But this has been the policy not only with our Society and a good number of other Societies in Calcutta. Time has come when a line should be drawn to check further unsound practices. We are upon the brink of a great economic calamity and more early we take precaution the better for us individually and also for our institution.

### "THRIFT DEPOSIT" SCHEME

To encourage thrift, "Thrift Deposit" scheme should be introduced for members for which a scheme may be prepared. We have practically done nothing to encourage thrift among members, so our Society has become a money lending institution pure and simple.

One word must be said about loans or advances to members of the Society's staff. To grant such loans is not a business of the Society. Unless a person is a member of our Society he can not be granted any loan. Loans outstanding to staff show

Re. 18,384 and Re. 14,289 for the years 1945-46 and 1946-47 respectively. If the loan is under staff Provident Fund rules it should not figure in Society's account as Provident Fund is a trust fixed and requires to be separately administered, invested and kept. If the members of the staff require loan facilities, they may set up an independent co-operative Society of their own to reap all its benefits. Indeed it is bad business if an employer becomes a money-lender as well. The Insurance Act, 1938, distinctly prohibits such loans and Co-operative Societies Act should be amended accordingly to stop such practices of the co-operative institutions.

In the past, politicians among us tried to run the Credit Society on party lines. Of course, they had their economic programme. But time has now come where each member of the Board of Directors should be selected on non-party considerations so that best efficiency may be had from his services. Unselfish public work does not bring any outside reward, far less an approbation from fellow workers, although it gives best joy to the worker for serving his fellow men.

#### A SCHOOL OF SOCIAL STUDIES IN CALCUTTA

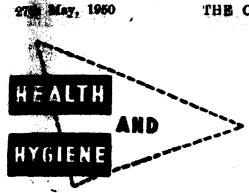

A Seminar was formed in Calcutta about July, 1949, with the object of promoting enlightened citizenship and educating the intelligent youth in progressive ideas. A Committee was formed consisting of Prof. T. Chakesvasta (President), D. Ghosh, Nirmal Bhattacharys, Dhiresh Bhattacharya, Provakar Sen, Amlan Datta (Joint Secretary) and A. N. Bose (Secretary). The Committee drew up a syllabus of 25 popular lectures on Modern Age and India and enrolled members of the Seminar with a fee of Rs. 1-8-0 for the whole course. The entire fund has been used to meet the expenses of rent, social gathering and the administrative arrangements which were made by the Leftist Book Club. The course covered the period of August, 1949-April, 1950. Among the speakers were Prof. Satyen Bose, Shri Atal Gupta, Dr. Naresh Sen Gupta, Shri M. N. Roy and others besides members of the Committee.

The Seminar has now decided to start a miniature School of Social Studies at the Seminar Hall, 186, Bowbarar Street from next July. Its administrative arrangements will be as before, under the charge of the Leftist Book Club. The curriculum will include 3 social sciences, viz., History, Politics and Economics and 3 languages from among French, German, Spanish, Urdu, Hindi. The Committee has been able to enlist the services of Dr. J. K. Banerji, Shrimati J. K. Banerji, Dr. S. P. Sen and Shri L. P. Sukul for the teaching of languages. The programme will include:

- 1. Classes usually once a week for each subject.
- 2. References and setting up of a small library.
- 3. Students' symposia, debate, etc., under expert guidance.
  - 4. Occasional general lectures.

There will be two terms in the year vis., July—December (4 working months) and January—April (4 months) for the social sciences and one term viz., July—April (8 working months) for the languages. Admission may be sought for in any one or more subjects at a time. A fee will be charged for the term just sufficient to meet the expenses of rent, library, etc. Enrolment shall be limited to about 100 students for all subjects.

The syllabus, date of admission, etc., will be announced about the end of June next.

# INFANT AND CHILD CARE IN THE UNITED STATES—I

[BY JANE JACOBS]

PHILOSOPHERS and parents have maintained since time immemorial that rearing a child is life's most creative experience. But the body of theory and general social understanding of child rearing has not always been, in itself, a growing and creative part of the cultural heritage. One of the constructive and hopeful aspects of life today is that, in many parts of the world, this important body of theory and its practice have become dynamic and searching as never before.

#### ASPECTS OF PERSONALITY

In the United States, understanding of the medical and hygienic aspects of child care, preceded scientific investigation and understanding of the child's emotional and social needs. Today, the physical aspect of child rearing is firmly established. In consequence, it is a comparatively minor concern of modern parents, physicians, and educators. Instead, they have come to concentrate upon the aspects of child rearing which deal with development of personality and social adjustment.

This thinking reaches American parents through many different channels. New ideas are published in booklets and pamphlets of the U.S. Government's Children's Bureau. Copies of "Infant Care", the Bureau's basic instruction booklet, alone reach one of every two expectant mothers. Some municipalities distribute copies of similar booklets with each birth certificate, and there is a steady stream of works in the field by private publishers. Family physicians and pediatricians, workers in clinics and maternity centres, teachers, of community classes for new mothers and fathers, and nurseryschool educators help spread new concepts very rapidly and in the form of useful answers to the parent's questions. Then, there are special clinics and community centres with facilities for helping parents with perticularly intricate problems.

### DEVELOPMENT OF SELF-DISCIPLINE

During the first years of life, the child learns, through participation, the "citizenship of the family", which is the basis for his future citizenship in larger social units. And, as one American expert puts it, "the home, like the state, has its problems of government". There must be respect for the individual, informal compromise in personal relationships, and decision by consent. The kind of discipline most valuable in a democratic society is self-discipline. Contrary to older beliefs, discipline rooted in fear does not foster, but blights, the development of self-discipline. To avoid arbitrary attitudes in the home is not always easy, because young children often need to be restrained for

The state of the s

reasons they cannot understand. Nonetheless, it is possible if parents are willing to consider the child's point of view with an attitude of courtesy and genuine respect for the essential soundness of the child's motives and instincts. Even a tiny child will readily sense the difference between such an attitude and the approach summed up by the words, "Do this because I say it is right".

Self-discipline and consideration for others are based largely on a sense of co-operation. A child should feel himself an integral and responsible member of the family unit long before he can share in the very simplest family tasks. His earliest step in this direction is enjoyment of the sense of porticip on and the sureness that he, as an individual, is appreciated in the group. This he learns as his family shares the delight of his infant play, applauds his first steps, and makes him feel that what he does is important and pleasing to the group. If this foundation of enjoyed participation is well laid, and if, later, doing tasks together is considered worthwhile, even though at first the child is more of a hindrance than a help, a true sense of responsibility to the group will follow.

### Phases Of Child Behaviour

Similarly, parents can show their respect for the child early in his life by taking him into their confidence, particularly in matters which relate to him, granting him privacy and a place for his own possessions, giving honest answers to his questions, and allowing him a reasonable amount of free time to do entirely what he pleases without adult supervision or suggestions. Such evidences of trust and respect teach the child, in turn, to respect others. An attitude of irritation or dismay behind honeyed phrases does not fool the child but only confuses his sense of values. Relationships between child and parent, and later between the child and society, must be based on directness and honesty, not on a pretence that things are well when they are not.

Such precepts as these are often of little use to the new parent who does not know what to expect of a child at different age levels. When the one year-old refuses to let his mother out of his sight, when the two-year-old says "no, no, no" to everything, when the three-year-old suddenly refuses to go to sleep peaceably, the new parent needs to know whether this is something quite ordinary or a sign of trouble. Thus, a great part of current American literature on child rearing is devoted to detailed reports, based on the observation of many children, which outline the phases of child behaviour that are common and uncommon and the reasons for them.

### Calcutta Improvement Trust

#### **RUDGET ESTIMATES FOR 1950-51**

The estimated cash balance on the 1st April, 1950, is Rs. 151.91 lakhs. Of this, a sum of Rs. 111.41 lakhs will be held in securities and the balance of Rs. 40.50 lakhs in short and fixed deposits and cash. It is to be noted that the cash balance includes the Provident Fund balances (inclusive of Trust contributions), aggregating Rs. 14.00 lakhs for the Trust and Rs. 0.58 lakh for the Tribunal.

This balance is Rs. 30.55 lakhs less than the opening cash balance for the current year, i.e., on the 1st April, 1949, but is Rs. 17.89 lakhs more than was estimated in the last budget. The fall in receipts of sales of land during the current year considerably exceeded the fall in the anticipated cost of engineering works, yet a fairly high cash balance has been maintained for another year. During 1947-48 we budgetted for Rs. 96 lakhs for capital expenditure for mainly land acquisition and engineering works. We could actually spend only about 18 per cent of the above amount. During 1948-49 we budgetted for Rs. 109 lakhs of expenditure for the same items and the actual expenditure figure for that year rose to 42 per cent of the budgetted amount. During 1949-50 we budgetted for Rs. 109 lakhs again, and in the revised estimate we expect to spend 71 per cent of the above amount. These figures show a decided improvement in the course of the last three years. mainly attributable to the restoration of normal conditions in the City and the gradual disappearance of the bottleneck in transport. It is, therefore, reasonable to forecast that even more work will be done during the coming year which will result in a substantial reduction in the large accumulation of arrears which have accrued during the war period. both as regards engineering works and land acquisition.

### LAND ACQUISITION

The amount to be spent as per revised estimate on land acquisition costs and engineering works is Rs. 72.19 lakhs against an estimate of Rs. 97.18 lakhs. The progress of work in the Land Acquisition Collector's Office has considerably increased and it is anticipated that there is a likelihood of the estimated expenditure of Rs. 50 lakhs being exceeded by Rs. 1.98 lakhs. This improvement in the Land Acquisition Collector's Office has been mainly due to a better continuity with regard to Collectors and if the present arrangement continues, reasonable progress can be expected in the coming year. The amount spent on the engineering works again has been much less than was estimated, and this is mainly due to the fact that it has not been possible to put into operation the making of the new Maniktala sewer on the scale that it was anticipated, and every effort is being made to accelerate this work during the coming year. Sales of land were disappointingly low, but this is due to the fact that the majority of the Trust lands that are at present available for sale are still under lease to the Government for the purpose of a hospital in the Lake Area. We cannot expect to have much improvement under this

heading in the next few years until the lands in the Lake Area are released for sale or until it is possible to speed up Engineering Works in the Maniktala Area, which will make further large areas available for sale when services can be supplied. The detailed figures for these items are:—

Original Revised
Estimate Difference

1949-50 1949-50 (in lakhs)

#### Assets Of The Trust

In addition to the cash balances the assets of the Trust in land and charges on the land do not figure in the budget. These were estimated on the 1st April. 1949, at Rs. 147.74 lakhs, of which Rs. 44.83 lakhs represented surplus land, which will be put on the market after Engineering Works in the various schemes are sufficiently advanced, and the balance is the capitalised value of rehousing schemes, storeyards, mortgages, rent charges and the reversionary value of leases. Of this balance Rs. 46.55 lakhs under the heading "Reversionary Value of Leases" mainly represents the lands under lease to Government.

Although the cash balance at the close of the year 1949-50 is lower than the estimated opening balance for the year by Rs. 80.55 lakhs, the cash balance and assets still remain at a fairly high level. It was estimated some years ago that these cash balances and assets would be absorbed in completing Engineering Works in the schemes where land acquisition had been completed but the Engineering Works had been held in abeyance during the war period. Owing to the considerable increases in the cost of materials and labour with a consequent rise in engineering costs, it is doubtful if this cash balance will be sufficient to meet the heavy accumulation of arrears of Engineering Works, and therefore these assets do not call for any undue optimism.

### RECEIPTS

The year opens with an estimated cash balance of Rs. 151.91 lakhs which, after adjustment for sundry debtors and creditors, gives a net balance of Rs. 141.44 lakhs. The Capital Receipts during the year have been estimated at Rs. 44.40 lakhs, of which Rs. 34.16 lakhs represents proceeds from sale of land and buildings and Rs. 4.90 lakhs for Government housing projects, in Scheme No. XLIX. I have already mentioned that the receipts from the sales of land did not come up to expectation, but the demand for small plots of land is still fairly keen. In the Entally area (Scheme No. XLIX), the demand for land is still very poor. In the outlying areas of Calcutta land values continue to rise, but in the city itself there is every indication that the peak period was reached in the autumn of last year. but except for the fact that the demand is not so great, there is not much indication of any slump in prices. The passing of the new Rent Act may have the effect of reducing prices to some extent, and if this is so it will be very welcome since the present prices demanded for land are still far in excess of the highest economic level.

The Revenue Receipts have been estimated at Rs. 60.12 lakhs, the main items being:—

Municipal Contribution 26.01 lakhs.

Government Grant 1.50 ...

Taxation Receipts ... 19.00 ,,

Rent Charges, etc. 8.98 ,,

The high prices demanded and paid for land resulted in the receipts from the duty on transfer of property to be Rs. 3 lakhs over our estimate. Without being unduly optimistic we have estimated that Rs. 10 lakhs may be realised during the coming year. We budgetted for Rs. 6 lakhs duty on jute. This figure was exceeded by Rs. 1.69 lakhs, but during the year the difficulties in the procurement of raw jute from Pakistan came to a head, and unless this difficulty is immediately overcome or adequate supplies of raw jute become available from this country, the estimated budget of Rs. 6 lakhs may not be realised during 1950-51. The estimated Municipal contribution for the year is Rs. 26.01 lakhs.

#### EXPENDITURE

The Capital Expenditure during the year is estimated at Rs. 112.08 lakhs, of which Rs. 50 lakhs is for land acquisition and Rs. 45.90 lakhs for Engineering Works. The balance of Rs. 16.13 lakhs is for other capital expenditure which includes Rs. 2 lakhs for the Land Acquisition Collector's Office, Rs. 8.20 lakhs for purchase of tools and plant, and Rs. 4.90 lakhs for Government housing projects, in Scheme No. XLIX.

During the coming year land acquisition will be completed in Scheme No. LV (Middle Road. Entally, Widening), Scheme No. V-M (Upper Circular Road to Ultadanga Main Road), and Scheme No. VI-M (Narkeldanga Main Road to Maniktala Main Road), and a start on acquisition will be made in Scheme No. LVII (Central Avenue to Blackburn Lane), Scheme No. LVIII (Extension of Central Avenue to Baghbazar), Bustee Improvement Scheme No. 1 (Singhee Bagan Bustee) and Scheme No. V-M (Re-housing Scheme). On the Engineering side provision has been made for over Rs. 8 lakhs to be spent on plant and machinery. This is specially necessary in connection with the Maniktala sewer especially for the portion which runs along the centre of Belliaghata Main Road where it is essential that deep excavation work for laying the sewer should have to be carried out within a narrow space without causing damage to the properties on either side of the roadway.

The Revenue Expenditure is estimated at Rs. 50.74 lakhs, of which Rs. 26.58 lakhs is for loan charges, Rs. 4 lakhs for Corporation rates and taxes, and Rs. 15.02 lakhs for this office establishment including the Improvement Trust Tribunal. It should be mentioned that the estimated amount for loan charges is on the assumption that the exchange rate will remain constant

The total expenditure under Revenue and Capital Accounts for the year 1950-51 exceeds the estimated total receipts for the year by Rs. 58.25 lakhs. The deficit will be met out of the cash balance. The year is estimated to close with a cash balance on the 31st March, 1951 of Rs. 93.32 lakhs, out of which Rs. 80.80 lakhs will be in securities, Rs. 10 lakhs in short-term deposits and the balance in cash.

CORPORATION CONTRIBUTION

The Board have considered a letter from the Government, in December last, asking for their views on a proposal by the Calcutta Corporation for reducing the contribution payable by them to the Trust by a sum of Rs. 17 lakhs spread over a period of two years. The Board considered this proposal and agreed in principle to allow the Corporation to reduce their contribution by Rs. 81 lakhs per annum for two years by way of deferred payment to be repaid over a period of 5 to 8 years. Nothing further has been heard from Government in this connection, and consequently no provision has been made in the Budget figures now before you. In the event of this being given effect to during the coming year, it will have the effect of reducing the Revenue surplus for that year to Rs. 0.88 lakh with a consequential reduction in the cash balance by Rs. 8.5 lakhs,

### CALCUTTA NEWS & VIEWS

BUIDDHIST DELEGATES TO INTERNATIONAL BUIDDHIST CONFERENCE from Viet Num, Burma, Japan, Tibet, Bhutan and Assam who have arrived in Calcutta or their y to Colombo, were given a reception by the Maha Bedt, Society at its premises in College Square on Monday, the 25nd May.

Shri Devapriya Valisinha, General Secretary of the Maha Budha Society welcomed the delegates.

The Ven. Eo Lien, leader of the Viet Nam delegation in reply to welcome said that Buddhism had spread to his country from India not through arms but through commercial and cultural contacts.

Leaders of the delegations from the other countries and the Consul-General for France in Calcutta, M. Dietre, also since

Dr. Nag said that the choice before the world lay between the cult of the atom bomb, which would mean its destruction, and the Buddhist principles of ahimsa and friendliness, which alone could save civilization.

DETEGATES TO THE COMMONWEALTH MEDICAL CUMPERFNCE to be held in Brisbane,—Dr. Gregg, Chairman of the Council of the British Medical Association, and Dr. Machae. Lieputy Secretary of the Association, Dr. H. M. Cherson, Chairman of the Council of the Canadian Medical Association, Dr. T. C. Routley, Chairman of the Council of William Medical Association, and Dr. S. C. Sen Gupta, General Science y of the Indian Medical Association, espent two days in the rate last week.

They met Dr. Katju at Government House and Dr. B. C. A. an Writers' Belldings; they visited Calcutta Medical Common Respirat. School of Tropical Medicine, and Jadavpur T. B. Watsund.

of the Press at the officer of the Press at the officer of the finite Medical Association. Calcutta branch, when the Press of the Canadian delegates gave an interesting are not of the medical problems and activities in their reserve to a countries.

of 1 Ageh May last.

AS A RESULT OF THE RECENT INDO-PARISTAN AGUEEMENT perishable goods like fish, eggs and pans are now arriving in Calcutta from East Bengal through Pakistan trains.

Imports of these essential commodities including vegetables are expected to increase in volume gradually.

All sections of Calcutta's important jute industry are now able to receive a steady flow of raw jute from Eastern Pakistan.

STREET LIGHTING IN CALCUTTA began to deteriorate from July 1941 when the Lighting Restrictions Order was imposed by the Government for obscuration of both gas and electric lamps as an ARP measure. This resulted in reduction by more than 90 per cent of the illumination effect of each lamp and in the long run every lamp was damaged. By an order of the Government, gas consumption for street lighting was reduced from 20m. c.ft. of gas to only 1½m c.ft, per month. To keep consumption within this ceiling, about 8,000 gas lamps were put out of commission. The rest, about 11,000, were used but with reduced illumination. In the case of electric lighting, the consumption of current was reduced from 800 watt to 40 watt per hour of lighting in each lamp and only alternate lamps were allowed to be lighted in the streets.

Besides a large number of lamps were damaged by fast moving vehicles and military lorries. Electric bulbs, wires, cables, burners, fittings, etc., were also stolen.

Lighting Restriction Orders were withdrawn in May, 1945
Before World War II, there were 19,000 gas lamps and
6,000 electric lamps in Calcutta. On important roads like
Russa Road, Chowringhee, S. N. Banerjee Road, Upper
Circular Road and Barrackpore Trunk Road, there were
electric lamps of 300 candle power on one side of the roads,
and gas lamps of 70 candle power on the other.

Financial difficulties did not allow the Corporation to restore the pre-war standard of lighting the City streets for long five years. A sum of Rs. 1.00,000 has, however, been provided in the current year's Budget for the improvement of street lighting.

Out of that sum cost will be met to instal 16 lampposts at the junctions of Hazra Road and Russa Road; Rash Behary Avenue and Lansdowne Road, four at each point, each post containing three 200-watt lamps. Additional post with four 300-watt lamps will be erected, at the junctions of Esplanade and Chowringhee, and Park Street and Lower Circular Road.

Fifteen posts will be put up on R. G. Kar Road from the Shan,bazar crossing to Canal Bridge, and 28 on Coruwallis Street from the same point to Barrackpore Bridge.

There is also a proposal to convert existing gas lamps to electricity in portions of Lanzdowne Road, Grey Street and Readon Street.

THE FOUNDATION STONE OF THE CENTRAL LABORATORY OF THE RIVER RESEARCH INSTITUTE was laid by Dr. B. C. Roy, Chief Minister, West Bengal at Haringhata on the Ganges, about 32 miles from Calcutta, on Sunday, the 21st May.

The institute will investigate the causes of deterioration in the drainage system in West Bengal and try to offer permanent solutions.

Besides Shri Bhupati Mazumdar, Irrigation Minister and four other Cabinet Ministers, Dr. Meghnad Saha, and Dr. J. C. Ghose were also present.

Speaking on the occasion, Dr. Roy recalled that a few years back, the people of Calcutta were alarmed at the news that the Bidyadhari River, which used to carry the refuse of the city, was silting up. People in Bengal had then little knowledge of rivers and, finally, the Calcutta Corporation [ha] to reorganize the sewage system. Subsequently, the river dried up. The maritime Port of Calcutta is at present not in a happy position because of the rising silt and sand deposits. The Port Commissioners are thinking of a ship canal from Diamond Harbour to Kidderpore Docks.

Dr. Roy expressed the hope that the various river projects in India as also in other countries of the world would be henefited by the results of research in this laboratory. The institute, which was opened in 1943, has carried out studies with models of different river projects in India and of many contemplated railway bridges. Following its findings, many changes have been made in the designs of various dams and barrages.

18TH DEATH ANNIVERSARY OF BEPIN CHANDRA PAL, the orator-journalist patriot of Bengal, was held at Indian Association Hall on the 20th May last at a meeting presided over by Dr. Radha Binode Pal. In the course of his speech Dr. Pal advised the people of Bengal to look inwardly for the solution of the problem taking lessons from the great life of Bepin Chandra. The Bengalees would have to think in a constructive way for the solution of the problem, Dr. Pal said.

The meeting was held under the joint auspices of Sylhet Union and Indian Journalists' Association.

WEST BENGAL MINORITY COMMISSION, set up under the Delhi Agreement, which met for the first time at Writers' Building. Calcutta, on the 20th May last, decided to undertake a tour of the districts of the State shortly. Shri K. P. Mookerjee, Chairman of the Commission, presided.

The meeting considered the steps to be taken to revitalize the district minority boards and settle preliminaries relating to the procedure of work of the Commission.

Shri C. C. Biswas, Minister of State for Minority Affairs, Government of India, and Shri D. N. Mukherjee and Janab Khuda Baksh, members of the Commission, attended.

### VITAL STATISTICS

For the City of Calcutta for the week ending 13th May, 1950

CITY OF CALCUTTA (TOWN & NUBURBS

The total number of deaths registered during the week was 1414 against 1276 and 1478 in the two preceding weeks and higher than the corresponding week of the last year by 675. The general death-rate of the week was 24.58.

### Town (Wards 1-27).

The number of deaths registered during the week ending 13th May 1950, was 1173 against 1048 and 1265 in the two preceding weeks. There were 229 deaths from cholera, against 270 and 339 in the two preceding weeks. There were 166 deaths from small-pox during the week against 194 in the previous week. There was 1 death from influenza against 1 in the previous week. The mortality from fevers and bowel-complaints amounted to 50 and 148 respectively against 50 and 112 in the preceding week. The general death-rate of the week was 23.29 per mille per annum.

There were 53 imported deaths. Excluding these the death-rate of the Town was 22.24.

There were 159 deaths from respiratory diseases against 97 in the previous week.

There were 40 deaths from tuberculosis against 37 in the previous week.

#### Suburbs (Wards 28-32)

The number of deaths registered was 241 against 228 and 215 in the two preceding weeks. Of these, 44 were from cholera-39 from small-pox, nil from influenza, 10 from fevers, 42 from howel-complaints and 28 from respiratory diseases. The death-rate of the suburbs (or added areas) was 33.69 per mille.

There were nil imported deaths. Excluding these, the death-rate was 33.69

There were 7 deaths from tubercuosis against 5 in the

# ORPORATION NOTICES

#### To Contractorn

Tenders are invited in duplicate for the following and will be received by the 2nd Deputy Executive Officer on the date noted for each, up to 12 Noon. Each tender in duplicate must be enclosed in a sealed cover and superscribed "Tender for......." For specifications and tender forms apply to the Keeper of Records. Price Rs. 2 per set.

1. Improving the road with sewer joining Annada Palit Road and Middle Road. Entally

Tenders for the above will be opened on 7th June, 1950. The rate quoted in the above tender is to hold good for three months.

S. GHOSHAL.

Secretary to the Corporation.

Central Municipal Office, The 23rd May, 1950

### Notice To Petty Improvement Contractors

District No. III Engineer's Department

Tenders for the following works are invited and will be received by the Chief Engineer in deplicate in scaled covers, superscribed "Tender for ......." on 31st May, 1950 up to 2 p.m.

- 15. Repairs to Cold Storage mon and rabbit room at Vaccine Institute.—Rs 821.—dated 17th May, 1950. (3 weeks).
- 16. Repairs to Checking Clerks quarters at 48/1, Marrier Screat in S. S. Hove Market.—Rr. 451,—dated 17th May. 1950. (15 days).
- 17. Repairs to durman ceiling in Potate Ranges in S. S. Hogg Market, Rs. 204. dated 17th May, 1950, (15 days).
- 18. Repairs to eastern culvert of Tangra 2nd Lane. Rs. 948,—dated 17th May, 1950. (14 months)
- 19. Repairs to culvert at the junction of Tangra 2nd Lane and Topsia Road north.

  —Rs. 948.—dated 17th May. 1950. (1½ months).
- 20. Repairs to Surface Drain at the junction of Tangra 2nd Lane and Topsia Road north,—Rs. 944,—dated 17th May, 1950, (1 month).
- 21. Repairs to Children's Park at Park Circus,—Rs. 730,—dated 17th May. 1950, (15 days)
- 22. Repairs to nurria tiled shed of menials quarters at Lanedowne Dhubi Khana.—Rs. 398,—dated 17th May. 1950, (15 days).

22. Monassary repairs to cooly quarters at Dhasps, Rs. 948,—dated 11th October,

24. Refining glass panes of the Analytical Department in Hogg Buildings.—Rs. 164, dated 17th May, 1950, (7 days).

Please note that the words in italies (7 days' notice) as printed in Clause 6 of the Tender and Agreement Form for piece work, is to be read as "5 days' notice".

S. C. GHOSH, District Engineer 111.

Dist. III Eng'g. Office. The 17th May, 1950.

### Assessment Department

Notici

Notice is hereby given the true valuation of lands and buildings in the Ward of Calcutta, noted below has been completed, and that the Valuation List can be inspected on any day (Sundays and bolidays excepted) at the Municipal Office, No. 5. Surendramath Banerjee Road, between the hours of 1! a.m. and 4 p.m.

WARD No. 25. ERBALPUR

North By-Circular Garden Reach Road. South By-Shabapur Road. Goragacha Road and Teratala Road.

East sy-Diamond Harbour Road. West sy-Hide Road

Special Officer-in-charge of General Revolution

Central Municipal Office The 26th May, 1950

#### Salami For License

Intending bidders are hereby invited to the public auction to be held by the Chief Executive Officer of the Corporation of Culcutta at the Central Municipal Office on the 7th June, at 3 p.m. in respect of the following is....

- 1. Salami for license for 3 Jheels and 4 small dobas measurin, about 12 highest on the east of Bhatchala Hindu Burial Ground for a period of 3 years at a monthly fee of Rs. 20.
- 2. Salami for license for 6 tanks measuring about 11 bichas at the Old Trenching Ground at 89. Narikeldanga Main Road for a period of 3 cears at a monthly fee of Rs 40.
- 3. Salami for lease of land at Nawpara Old Tranching Ground measuring about 14 bighas 1 kottah for a period of 5 years at a rent of Rs. 2-8-0 per bighas per month.

at a rent of Rs. 2-8-0 per bigina per month.

The full amount of sala n money together with a security deposit equivalent to six months' rent plus Rs. 2 as the cost of a printed form of agreement shall have to be deposited by the successful bidder in cash on the spot on the acceptance of his bid by the Chief Executive Officer subject to the approval of the Administrative Officer. The lease or license as the case may be will run from the date on which possession of the property will be made

And the second s

over and for which arrangements will be made as early as possible. Intending bidders are advised to bid after local inspection of the site as no objection will be entertained afterwards. Other conditions may be seen in the office of the Chief Valuer and Surveyor on any working day during office hours.

S. GHOSHAL, Secretary to the Corporation

Central Municipal Office. The 19th May, 1950.

### Notice To Fire Insurance Companies

Quotations are invited for the insurance

- (1) The portion of the Central Municipal Office Buildings occupied by the Printing Department of the Corporation together with its contents for Rs. 2 lakhs (25 per cent for building, 50 per cent for machinery and 25 per cent for stock of papers) for the period of one year from the 28th June, 1950.
- (2) The Central Stores Buildings at 149, Lower Circular Road including furniture, fittings, and fixtures together with the stores kept therein for Rs. 5 lakhs as per details noted below for one year from the 27th June, 1950:--

(a) Buildings ... 1,09,000
(b) Furniture, fittings and fixture 40,000

(c) Central Corporation Stores consisting of Lighting Stores, Water Works, Stores, etc.

Water Works, Stores, etc. 3,55,000 (d) Hazardous goods such as kero-

sene oil, paints, jute, cottonwaste etc. (kept in a separarate buildings)

Quotations for (1) and (2) above which must be enclosed in sepa.ate scaled covers and superscribed "Quotations for . . . ." will be received by the undersigned upto 2 p.m. on Wednesday, the 31st May, 1950.

S GHOSHAL,

5.000

Secretary to the Corporation.

Central Municipal Office, The 17th May, 1950.

### Lake Road Market

#### Notice

An application has been received from Sri Bhactalal Saha to record his name as sole occupier of Stall No. 10, Vegetable. Range in the Lake Road Market in place of Americand Saha, the recorded allottee who is since dead, being the sole heir of the deceased. Objection, if any, to this change of name is called for and will be received by the undersigned within 31st May, 1950.

The second secon

K. C. LAHIRI,
Acting Superintendent

Lain Read Market, The 16th May, 1980.

### GUY MOTORS NEW LINK WITH INDIA

### ASSEMBLY AGREEMENT WITH BOMBAY FIRM

An arrangement by which Guy passenger and commercial vehicles will be assembled in India has been agreed between Guy Motors, Ltd., of Wolverhampton, and the Bombay Engineering firm of Mahindra & Mahindra Ltd.

Under the terms of the agreement Mahindra & Mahindra will represent Guy Motors throughout India, and will assemble

Guy vehicles when the Indian organisation has been fully established. Arrangements have been made for the interchange of technicians between the two companies.

The Guy-Mahindra link is one result of a four months survey tour of India completed recently by Colonel G. W. Purser, of the Guy Company.

### COLLEGE STREET MARKET-Shops To Let

Applications with offers of initial rent for the privilege of occupying the undermen ioned stalls on rents noted against each, are invited and will be received by the Superintendent in the Market Office daily between the hours of 9 A.M. and 4 P.M.

CHRONICLE & COMMENT

### THE ELECTORAL ROLL

OR the purposes of the first General Election of the Councillors under the Calcutta Municipal (Amendment) Act of 1950, the preliminary steps for the preparation of the electoral roll were taken in the middle of April. 1950.

A notification of the Government of West Bengal, published in the Calcutta Gazette Extraordinary, dated the 20th April, 1950, authorized the Registering Authority to prepare and publish such roll. By another notification in the Calcuttu Gazette Extraordinary, dated the 22nd April, 1950, the Government appointed the Administrative Officer (Mr. A. D. Khan) as the Registering Authority. It may be recalled that before this occasion, the Chief Executive Officer used to be appointed as the Registering Authority, and also that the Corporation Investigation Commission in their interim report suggested the appointment of a Corporation Election Commission to prepare, publish and revise the electoral rolls and to supervise and control the conduct of the elections.

### QUALIFICATIONS OF A VOTER

Under the Calcutta Municipal (Amendment) Act, 1950, every person, subject to the provisions of the Bengal (Aliens) Disqualification Act, 1918, who owns or occupies or resides in any premises or exercises any profession, trade or calling within a constituency shall be qualified as an elector of that constituency if such person: :-

(a) having been liable to pay consolidated rate, tax or license fee to the Corporation has

paid to the Corporation any sum as such rate, tax or license fee during and in respect of the year or any portion of the year last preceding the year in which the election is held; or

(b) heing or having been the occupier of any premises valued for assessment purposes under the Calcutta Municipal Act or of any portion of such premises has at any time during the year last preceding the year in which the election is held, paid runs for such occupancy for at least six months during the said year at a rate not less than rube a Lour per month in the case of the premises below a but in a loustee or at a rate not less than eight rupees per month in the case of the premises not being a hut in a bustee; or

(c) has been for not less than six consecutive months during the year last preceding the year in which the election is held. the owner of a hut in a bustee which has been valued for assessment purposes under the Calcutta Municipal Act and on account of which any sum has been paid during the said vear in respect of consolidated rate; er

(d) has passed the Matriculation examination of any University in India constituted by an act of a Legislature or an examination which the State Government may greecibe hy rules as at least equivalent to such examination and has ordinarily and actually resided in Calcutta during the greater part of the year in which the election is held.

The state of the s

No person will be entitled to be enrolled as an elector unless he has attained the age of 21. Same person cannot enrol himself in different constituencies.

### COMPARISON WITH LAST ELECTION

It is estimated that there will be about 600,000 voters under the extended municipal franchise, including about 200,000 paying rates, taxes and license fees and owning huts.

The last election to the Corporation was held in 1944 when there were 61,000 voters on the rolls. The lists prepared for the election in March, 1948, recorded 90,000 voters. The election was then held up and the Corporation was superseded by the West Bengal Government.

Under the old Act, the franchise qualifications were: payment of Rs. 12 or more as rates and taxes, payment of Rs. 25 or more per month as rent for six months, and payment of Rs. 12 as rates by hut owners. Payment of Rs. 12 or more as tax under the Bengal Motor Vehicles Act, 1982, also entitled one to vote.

According to Rule 5 of the rules for the preparation and publication of the electoral roll for the purposes of the first general election under the Calcutta Municipal (Amendment) Act, 1950, (the rules were published in a Calcutta Gazette Extraordinary dated the 20th April, 1950), no person shall be included in the electoral roll of a constituency by virtue of the qualifications specified in clause (b) or clause (d) of sub-section (1) of Section 20 of the Calcutta Municipal (Amendment) Act. 1950, unless application is made in Form No. III by him or on his behalf by a person authorized by him in writing to the Registering Authority.

Thus, the making of a formal application in the prescribed form is imperative for those citizens of Calcutta who have either the tenancy or educational qualification and are willing to get themselves enrolled as voters.

Those who pay any sum to the Corporation as rates, taxes or license fees are not required to apply for inclusion of their names as voters but will have to furnish the name of their father, mother or husband as may be appropriate in each case.

### PREPARATION OF FINAL ROLL

The Registering Authority after having prepared the preliminary roll for each constituency in
alphabetical order (in English) will give it wide
publicity for public inspection and shall arrange
for sale of the printed copies of the roll. Within
21 days from the date of publication of the preliminary roll, claims and objections in writing will
be received by the Registering Authority. Such
claims and objections must state reasonable grounds
in support. No person, whose name has not been
enrolled for a particular constituency, shall be
able to make objection to the inclusion of any
name in the roll of that constituency.

A register of all claims and objections shall be maintained by the Revising Authority (to be appointed by the Registering Authority with the approval of the Government). Every person whose claim or objection is received in time shall be served with a notice by the Revising Authority specifying the place and time where and when his claim or objection will be heard. After all the claims and objections have been heard, the preliminary electoral roll will be amended and the final electoral roll published.

### Educational Qualification For A Voter In The Ensuing Election

THE Calcutta Municipal (Amendment) Act of 1950, with a view to giving effect to the suggestion of the Corporation Investigation Commission that all future elections of the Corporation should be run upon qualified adult franchise, has changed the qualifications of a voter as previously enacted. Among the new qualifications are included the educational and tenancy qualifications. A Matriculate of any Indian University of 21 years of age is competent to become a voter, if however, he applies for inclusion of his name in the Electoral Roll.

Here is a list of examinations to be considered as at least equivalent to the Matriculation Examination of a University in India constituted by an Act of a Legislature.

- (1) The Entrance Examination of any Indian University constituted by an Act of a Legislature.
- (2) The Entrance or the Matriculation Examination of the National University of Ireland or of a University in the United Kingdom, United States of America, Canada, Australia, New Zealand or Pakistan.
- (8) The High School Examination or High Madrassa Examination of the Board of Intermediate and Secondary Education, Dacca.

- (4) The School Final Examination, Science Side, conducted by the School Final Examination Board, Science Side.
- (5) The Junior School Certificate Examination (occasionally referred to as the Junior Local Examination) or the School Certificate Examination (formerly known as the Senior Local Examination and Senior School Certificate Examination) and the Higher School Certificate Examination of the Oxford or Cambridge University or an equivalent examination of any other University in Great Britain.
- (6) The "Madhya" Examination conducted by the Bangiya Sanskrita Shiksha Parishad (or the Bengal Sanskrit Association as it was previously called) or the Calcutta Sanskrit Association (or the Board of Sanskrit Education as it was previously called) or by any Sanskrit Association recognized by any State Government.
- (7) The "Madhya" Examination conducted by the East Bengal Saraswat Samaj, Dacca.
- (8) The Senior Madrassa Examination under the old or reformed scheme or the High Madrassa Examination conducted by the West Bengal Madrassa Board.
- (9) The Final Examination of the First Grade Training or a normal school in West Bengal or Assam.

- (10) The examination for the Senior Training Certificate for Women in West Bengal
- Examination for High Schools held in Bihar, Orissa, Madras, Bombay, Uttar Pradesh, the Punjab, Delhi. Hyderabad. Mysore or Travancore-Cochin or the School Final Examination in Bombay, Uttar Pradesh or the North Western Frontier Province (Pakistan).
- Board of High School and Intermediate Education in Uttar Pradesh, Rajasthan or Madhya Bharat or the Board of High School Education in Madhya Pradesh or the Board of Secondary Education in Delhi, Bihar or Orissa.
- (18) The High School Examination held by the Intermediate Examination Board of the Aligarh University.
- (14) The Admission Examination of the Benares Hindu University.
- (15) The Anglo-Vernacular High School Examination or the High English School Examination held by the Education Department in Burma.
- (16) The Diploma Examination of the Chiefs' Colleges.
- (17) The Bombay Government Commercial and Clerical Certificate Examination or Commercial Diploma Examination.
- (18) The Final Examination of the Government Institute of Commerce, Delhi or Calcutta.

- (19) The Final Certificate of the Indian Mercantile Marine Training Ship, "Dufferin".
- (20) The Diploma Examination of the Poyal Indian Military College, Dehra Dun.
- (21) The Diploma Examination of the Chelmsford Training College, Ghora Gali.
- (22) The Senior London Chamber of Commerce Certificate Examination.
- (28) The Assam Madrassa Final Examination.
- (24) The High School Leaving Certificate Examination conducted by the Nepal Government.
- (25) The Prathama Examination of the Benares Government Sanskrit College.
- (26) The Secondary School Certificate Examination (Senior) conducted by the Ministry of Education, Northern Ireland.
- (27) The School Certificate of the General School Examination, London,
- (28) The Training Institution Examination for Women Teachers, Uttar Pradesh.
- (29) The Fifth Standard Examination now known as the Final School Standard Examination of the National Council of Examination.
- (30) The "Adya" (First) Examination conducted by the Goudiya Sarva-Vidyayatan.
- (81) The Final Examination of the Government School of Art, Calcutta.

### New Electoral Constituencies For Calcutta

THE Calcutta Municipal (Amendment) Act of 1950, changes the number of Councillors for the Corporation of Calcutta from 95 to 75. Previously, the total of 95 Councillors would be elected by general and special constituencies. The general constituencies, numbering 32, returned 86 Councillors. The General constituencies included General Territorial and Special Territorial constituencies. Under the new amended Act all the 75 Councillors are to be returned from the general territorial constituencies, the special territorial and non-territorial constituencies being dropped. And there shall be one Councillor elected by each territorial constituency.

The city of Calcutta under the amended Act has been divided into 75 territorial constituencies. The full list of the new constituencies is given below:

### LIST OF CONSTITUENCIES

- No. 1—on the north, Paramanick Ghat Road, Cossipore Road and Kasinath Dutt Road; on the south, Gun Foundry Road; on the east, Barrackpore Trunk Road; on the west, the river Hooghly.
- No. 2—on the north, Kali Charan Ghose Road and Ram Krishna Ghose Road; on the south, Dum Dum Road; on the east, East Indian Railway; on the west, Barrackpore Trunk Road.

- No. 3—on the north, Gun Foundry Road; on the south, the Circular Canal; on the east,
  Barrackpore Trunk Road; on the west,
  the River Hooghly.
- No. 4—on the north, Dum Dum Road; on the south, Paikpara Raja Manindra Road and Belgachia Road; on the east, E. I. Railway; on the west, Barrackpore Trunk Road.
- No. 5--on the north, Paikpara Raja Manindra Road and Belgachia Road; on the south, the Circular Canal and the New Canal, on the east, East Indian Railway; on the west, Barrackpore Trunk Road.

### MECHANICAL AIDS FOR MUNICIPAL SERVICES

DISPLAY OF NEW EQUIPMENT AT LONDON EXHIBITION

The immense scope of Britain's municipal and local government services and the vast field that exists for every kind of mechanical device as an essential aid to the expeditious and efficient conduct of these services will be demonstrated more convincingly than ever by the Public Works and Municipal Services Congress and Exhibition, to be held at Olympia. London, from November 13 to 18 this year.

For administrators and technicians the Congress will be a national forum for expert opinion on many problems with which public authorities are confronted at the present time. Both for the diversity of the subjects to be discussed and for their importance in the light of current trends the Congress will surpass any previous assembly of this kind in dealing with the services administered by local authorities.

The fixhibition which is to be organised in conjunction with the Congress will be the biggest and most representative of its kind ever assembled under one roof. It will include a wide range of machinery and there will be exhibited in the specious halfs at Clympia the latest developments in plant, apparatus, vehicles and equipment, all triumphs of engineering skill and workmanship.

### SHRI MANINDRA CHANDRA SAMADDAR

Same death of Shri Manindra Chandra Same dear, Editor of the Behar Herald, Patna, we lose very distinguished and a much esteemed friend. Sometime ago when he was in Calcutta, he came to see us and we found him very much absorbed in planning a brighter future for the Herald. The Behar Herald is one of the oldest weeklies of India, now 76 years old.

Shri Samaddar was only 36. We learn, that he was suffering from intestinal trouble and had recently undergone an operation.

The youngest son of the well-known historian the late Prof. J. N. Samaddar, the deceased was a brilliant scholar of the Patna University. He took up journalism after completing his university career and had been editing the Behar Herald since 1938

He was also the founder-editor of the Benguli monthly Prabhati.

### WEST BENGAL FIRE SERVICES

We have already announced the incorporation of the Calcutta Fire Brigade with the West Bengal Fire Brigade Service. Here are a few details about the new institution.

The West Bengal Fire Service serves the following local areas:

City of Calcutta and Municipalities of Garden Reach, Budge Budge, Barrackpore, North Barrackpore, Bhatpara, Naihati, Kanchrapara, Panihati, Halishahar, Garulia, Titagarh, Khardah, Kamarhati, North Dum Dum, South Dum Dum, Dum Dum, Baranagore, Tollygunj South Suburban, Howrah, Bally, Uttarpara, Konnagar, Serampore, Hooghly-Chinsurah, Bhadreswar, Bansberia, Champdani, Baidyalati, Rishra, Kotrung, Raniganj, Asansol, Burdwan, Jalpaiguri and Siliguri.

An expert from England has been appointed Director of Fire Services by the Government of West Bengal. Besides granting certain facilities to the members of the Fire Brigade on the occasion of a fire, the West Bengal Fire Services Act of 1950 makes it obligatory on the Police Officers to aid the Fire Brigade in execution of its duties. The local police of the area where a fire occurs are required under the Act to "ascertain the facts as to the origin

and cause of the fire" and to report thereupon to the Magistrate of that area. License has to be taken from the Magistrate or any other officer to whom the Magistrate may delegate the power on payment of a fee to let off rockets or send up fire balloons or sell fire-works within any local area in which the Act Operates. A license has to be obtained on payment of a fee to the Collector in order to use a building or a place as a warehouse.

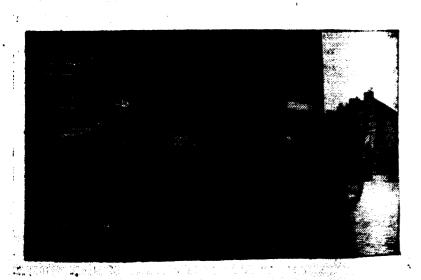

Within the city of Calcutta the Corporation will collect all warehouse license fees, and for other areas the respective municipalities. The general conditions guiding the grant of license to warehouses are that the warehouses do not become a nuisance to the inhabitants of the locality, that there is a clear 4 feet wide open space on all sides within the curtilege of the premises, and that engines and furnaces are built at a safe distance from inflammable articles. The articles, which are considered inflammable, are jute, and cotton in bales, gunny, rubber, asphaltum, wax, bamboo, plastics, cocoanut fibre, paint, linseed oil, rags, matches, petroleum and petroleum products and kerosene.

#### TO MAKE CORPORATION MORE EFFICIENT

The Corporation is often blamed for failure to nonntain the normal standards of sanitation and Lygien, and to ensure the elementary amenities of civic life. Such blame is not always justly due to the Corporation. Among the public are such people as wilfully disobey the injunctions of the Corporation.

The procedure for the demolition of unauthorised structures or for the removal of insanitary conditions in premises is so dilatory that by the time orders of the Magistrate are obtained, and efforts of the offenders to set aside such orders are exhausted, a considerable time lapses during which the offenders enjoy the benefits of their illegal and enti-social activities.

In order to improve the prevailing condition and to enable the Corporation authorities to take effective steps against the offenders without loss of time it is necessary that the Corporation is vested with wider executive powers for enforcing its orders upon the offending public in matters of Public Health and Public Convenience.

### LONDON'S NEW "FIRE BUSES"

The first of a fleet of "Fire Buses"—a new type fire engine which looks like a single decker bus—has gone into action in London. These engines, designed by the Home Office experts as the result of war lessons, are faster, more roomy and speedier to operate than existing appliances. They carry 100 gallons of water compared with 40 on the old type and pump it faster and farther. The main pump output is 850 gallons per minute at 100 lbs. square-inch pressure.

#### HIS EXCELLENCY DR. KATJU

HIS EXCELLENCY DR. K. N. KATJU presiding over the 30th anniversary meeting of the Sisir Kumar Institute on the 24th May last said .hat the real solution of the present Indo-Pakistani problem lay in the hands of the people, Hindus and Muslims alike, of both India and Pakistan.

The Government were trying their best to implement the terms and the undertakings they had given in either State with perfect sincerity; but the people must also play their part in implementing the terms of the pact.

The Governor earlier that day visited the Madhyamgram Refugee Colony in Baraset subdivision, where about 1,600 displaced families from East Bengal have been rehabilitated.

The following day, the 25th May last, His Excellency visited the Jadavpur Engineering College where two buildings are now being used, with the permission of the College authorities, to house temporarily about 100 refugee students from East Bengul. These students intend to appear at Calcutta University examinations this year.

The Governor spent about an hour with the students and listened to their grievances which related to inadequate facilities for study, shortage of textbooks, etc. He assured them that he would bring these matters to the notice of the authorities.

### SHRI B. SENGUPTA

SHEL BIDHU BRUGAN SEN GUPTA, Managing Editor, United Press of India, has been neminated by the Chancellor as a Fellow of the Calcutta University.

Shri Sen Gupta is a member of the Standing Committee of the All-India Newspapers Editors Conference and was President of the Indian Journalists Association for four terms.

The appointment of Shri Sen Gupta, suppose, is a prefude to the opening of the diplema course of Journalism at the University of Calcutta.

We are glad that a journalist of this city has been appointed as a Fellow of the University for the first time.

THARN Nu, Prime Minister of Burma, arrived in Calcutta from London on Sunday, the 28th May. on his way back to Rangoon.

The Burmese Premier was accompanied by his

On Monday, the 29th May, Dr. S. P. Mockett President of the Maha Bodhi Society, pressure portion of the enered relics of Lord Buddha to Prime Minister of Burma at a function at the Sadday premises.

The distinguished visitors left Calcula Tuesday, the 80th May.

### SHRI NARENDRA DEV

SHRI NARENDRA DEV and Shrimati Red Devi started for Bombay on Wednesday, the They will 81st May, by the B.N.R. Bombay Mail.

leave Bombay for Europe on June 5, accompanied by their only daughter Nabanita.

They will visit England, Scotland, Ireland, Norway, Sweden, Denmark, Holland, Belgium, France, Germany, Switzerland, Italy, Rumania, Czechoslovakia, Yugoslovia, Albania, Portugal and Egypt and return home during the Pujas.

#### RT. REV. A. N. MUKERJI

THE BT. REV. AUROBINDO NATH MUKERJI, Bishop of Delhi, who has been acting Metropolitan of India, Burma and Ceylon since May 1, when the Rt. Rev. Dr. G. C. Hubback retired and left India. was unanimously elected Bishop of Calcutta and Metropolitan of India at a joint meeting of the House of Bishops and the Electoral Body of the Diocese of Calcutta held in St. Paul's Cathedral on the 17th May last.

This is the first time in the history of the Anglican Church that an Indian is made the Metropolitan.

Bishop Mukerji, who is 57, was educated at St. Paul's School and College, Calcutta. He became Headmaster of St. Stephen's High School, Delhi in 1919 and was ordained priest in 1924. He was made a Canon of Lahore Cathedral in 1940. When the new Diocese of Delhi was formed in 1944, he became its first Bishop. He is married and has five sons and three daughters.

The first Metropolitan was Bishop Daniel Wilson who was consecrated in 1882 and died in office in 1858. The four previous occupants of the See were Bishops of Calcutte only.

Bishop Mukerji is the second Bishop to be elected Metropolitan, the previous occupants of that office up to Dr. Foss Westcott having been appointed by the King.

#### DR. B. C. SEN

By S. UPADHYAY

### STREET LIGHTING IN OLD CALCUTTA

MODERN city is the product of the industrial age and life in the city stript is of many complexities as the wide application of science greater man en**abl**es to exercise control over the environment. Of the countless physical amenities the city confers upon man mechanical transport and most electricity are important. In fact, these form the economic basis of the city and prosperity of the city is determined by the expansion of these. The story of development of modern Calcutta dates back to the seventies of the last century when introduction of mechanical transport within the city of Calcutta was suggested by the Government. The question of illumination of main thoroughfares challenged the attention of the Government much earlier, though progress was slow.

#### OIL LAMPS OF OLD

Till the middle of the last century lighted with Calcutta Was lamps. The Municipality supplied lamps and lamp posts and a foreman was in charge who was paid Sicca Rs. 800 every month. The oil lamps in the city numbered three hundred thirteen and many parts of the city where the poor lived were never lighted. A contractor supplied oil, wicks and undertook to light the lamps. He was paid Rs. 1.2 per year for each lamp and total annual costs of lighting amounted to Rs. 7,000. Supervision of street lighting was entrusted to an overseer who was paid Sicca Rs. 60 a month. Early in 1858 contractor's rate was revised and increased to Rs. 3.8 per lamp and the Commissioners offered to continue it for a period of five years. An important condition attached to the agreement was the right to terminate the agreement on six months' notice. With the increase in rate a system of levy upon certain classes of premises was introduced. By an Act of 1850 provision of gate lamps was obligatory on the part of occupants of premises rented at or above Rs. 70 per month. Another Act of 1856 abolished the mandatory provision of gate lumps and levied lighting charge at the rate of 2 per cent on all premises rented at or above Rs. 120. By the end of 1855 the number of street lamps rose to 417 and annual costs amounted to Re. 16,487. In January, 1857 the Government decided to introduce gas lamp in the city of Calcutta and permitted the Oriental Gas Company to complete installation of 600 gas lamps. These were to burn for ten hours at night and total annual costs for each lamp had been fixed at Rs. 90. The Company agreed to a deduction of eight annas for every thousand feet of gas consumed a month in excess of 2 million cubic feet.

### FIRST GAS LIGHTING

On the evening of January 6, 1857, Chowringhee was lighted with gas. During the first year realisation of lighting charges fell far below the actual demand. As the revenue continued to increase the Commis-

sioners decided to add to the number of gas and oil lamps. In 1860 the Gas Company charged an additional amount of Rs. 7,733 for the gas consumed in excess of the stipulated quantity. The Commissioners turned down the demand. At the end of 1860 total number of oil lamps rose to 805 and annual charge was reduced to Rs. 39. Continued complaints against the quality and quantity of gas led to an official investigation. The investigating body recommended introduction of photometric tests and in 1871 apparatus was obtained from England. The burners remained defective and illumination was deficient till the replacement of old gas lamps by incandescent burners in 1901.

When the original contract with the Gas Company terminated a new contract was concluded in 1871. By the terms of the new contract the rate for each lamp was fixed at 4.18 a month and illuminating power was increased to 15 c. p. on payment of four annas every year for each lamp and number of gas lamps to be maintained by the Commissioners was limited to 8791. Extension of gas light to other parts of the city was delayed because of legal obligations imposed by the second contract. In 1909 a new contract was executed by the Commissioners. It provided for the supply of eas only by the Company and actual lighting was entrusted to a department of the municipality and minimum cas pressure was fixed between 2 and 4 inches. Payment for the gas may not be determined by the metre but by the size of the nipple used.

#### EXTENSION OF GAS LIGHT

Extension of gas light coincided with the introduction of lighting with electricity. When the construction of Harrison Road was completed in 1891 the Commissioners decided to light the new road with electricity by contractors. The dynamos were set up at Halliday Street and costs of installation amounted to Rs. 92,000. In 1895-96 substitution of overhead for underground cables caused a temporary break in the supply of electricity on Harrison Road. The electric plant was worked 1. Kilburn and Company for annual payment of B. 9.750 and the company continued to work the plant till 1905. In 1905-6 the electric plant at Halliday Street was sold away and Oriental Gas Company undertook to light Harrison Road with seventy Lucas lights at an annual charge of Rs. 8,220. During the first decade of the present century question of extension of advanced methods of lighting was examined by the municipality and in 1914-15 Corporation Street and Chowringhee were lighted with Keith lamps. By the end of the above period the number of oil lamps rose to 1,759 and gas lamps to 11,900. Lighting of streets with electricity is a recent introduction. Electricity has put an end to the crude system of lighting the streets with oil lamps and has added to the beauty and grandeur of Calcutta.

# CHOLERA—ITS RECOGNITION PREVENTION & TREATMENT

[By Dr. NITA ROY, M.B., B.S.,]

We are concerned with the type that has caught Calcutta in its deadly grip and demanded a sadly big toll. At first the small band of tired and overworked doctors and nurses in hospitals were caught unprepared for so virulent an epidemic, which was helped by another epidemic, just as terribly deadly, namely small-pox.

#### CHOLERA AND ITS SYMPTOMS

Cholera is an insidious disease. Today a person who looks healthy and robust, in the very prime of life, may to-morrow lie prostrate, with body dried up, thin, wan cheeks, and sunken eyes, tobogganing down to Death's door. One of the chief characteristics of Cholera it its dehydrating process: the fluids of the body are ejected some times violently by the oral or rectal orifices. i.e., by vomitting and purging; and this is caused by the cholera eibro, a germ of microscopic dimensions but of tremendous potency and in many cases fatal, if not properly treated and in time. The signs of dehydrations are: a slow, weak pulse, a cavid in abdomen, a feeling of complete lassitude, an appaling lethargy. The dehydration explains the great thirst engendered by the disease. Nature seeks to replace what is lost: but that must be done carefully and judiciously. Quaffs of large amounts of liquids serve merely as an irritant to an already irritated stomach and out it comes again bringing with it also, what little there remained and thus the cycle is again started and goes on. Hence never leave a jug of water by the patient's bedside. It is a well known fact, that in the vomitting stage, it is better to take sips of fluid and suck ice-ice made from a reliable factory or the home frigidaire than drink gallons of water.

The patient generally complains of very frequent watery stools, nauses or vomitting, or both, accompanied by an intense thirst. At first the stools are coloured, but later they turn white, like rice water—the typical cholera stool.

### WHAT TO DO.

Call in a doctor immediately and you will be told immediately whether the case can be handled at home. It is best to send all cases to the hospital, though cases at the early stages can be tackled at home—only care and patience are required. The Doctor prescribes the medicine and all one has to do is to administer the medicine as directed, give glucose drinks ad lib, small drinks at frequent intervals, say about 5 minutes. Besides this, of course, the house must be disinfected as well as the stools and urine. The essential thing in cholera is replace lost fluids and these are supplied in

hospitals in the form of glucose salines intratenously, rectally, subcutaneously and orally, besides other medication.

#### METHODS OF PREVENTION

It has been shewn that Cholera is caused by the microscopic germ called Cholera Vibrio which thrives in the human small intestines. It is propagated by the contamination of food and drink. During these hot saltry days we long for iced drinks and ice cream and by partaking of these from a street vendor, who cares nothing about protecting the health of his customers, which can be done by taking the simple precaution of covering his goods, thus isolating it from the onslaught of flies and the germ laden dust of the streets, we often sign our own death warrant.

Remember the Four F's Food-Fingers-Files-Faces! Who would imagine these 4 Fs are responsible for spreading of Cholera and so many other diseases, such as typhoid and dysentery! The hot Indian summer when the 4 Fs are most dangerous, with the help of the street food vendor is the cause of the frightful toll that these diseases take.

The Calcutta Municipal Corporation has helped much in combating and controlling the spread of this cholera epidemic. The offending street vendors have been hunted off the street pavements and their open air selling sites. It has supplied large quantities of vaccines making it available for free innoculation for every one. Unfortunately the illiterate are afraid of the job of the needle. The Corporation has taken good care to prevent the contamination of the main water supply. If this source were contaminated, all of us would soon be on the flat of our backs, with our toes turned up, and our spirits wandering in the bourne from which no traveller returns.

#### A few tips

- 1. Get inoculated, especially if you live in an area infested with this fell disease, also
  - 2. Boil the drinking water.
  - 8. Do not take Sherbet, iced drinks and ice creams except from places safe from contamination.
  - 4. Cover all food with wiremeshed covers protecting it from flies sitting on it.
  - 5. Inaugurate a "swat the fly" campaign.
  - 6. Disinfect lavatories, drains and places where water stagnates.

u dhigh agailte na pagaist i baig i ga s

Watch for symptoms of cholers as given above and when you see them make a bee line for your doctor, do not hesitate or delay—it might be the saving of a valuable life.

### Celcutia Improvement Trust

### STREET LIGHTING

The Board has sanctioned expenditure on electric street lighting installation in the following schemes:

Scheme No. L (Howran Eridge Approach—from Canning Street to Strand Road).

Scheme No. L. ((from Synagogue Street to Netaji Subhas Road).

Scheme No. XLIX to Ananda Palit Road in Scheme No. LII.

Scheme No. XL1X (Gorachand Road to South Road, Entally).

#### DEBENTURE LOANS

A statement of the Debenture loans of the Trust for the year ending March 31, 1949, is as follows:—

| 1. | $6^{o}_{o}$ | Deb. | Loan | of | 1922/52         | for |     | £8,50,000 |
|----|-------------|------|------|----|-----------------|-----|-----|-----------|
| 2. | 510         | ,,   | ٠,   |    | $1923 \cdot 58$ |     |     | £7,00,000 |
|    |             |      |      |    |                 |     |     | 50,00,000 |
|    |             |      |      |    |                 |     |     | 25,00,000 |
|    |             |      |      |    | 1984/64         |     |     | 50,00,000 |
| 6. | 3100        | ••   | • •  | ٠. | 1985/65         |     |     | 85,00,000 |
| 7. | 300         | ٠,,  | ٠,   | ٠. | 1986-66         |     | , . | 80,00,000 |
|    |             |      |      |    |                 |     |     | 50.00,000 |
|    |             |      |      |    |                 |     |     | 20,00,000 |

Section 108 of the Calcutta Improvement Act requires the Trust to maintain a Sinking Fund. The Trust also holds securities against the loans.

### MEMBERS FOR HOWRAH

The Board has accorded sanction to the extension of the term of office for a further period of six months from the 27th January, 1950, of the following Associate Members for Howrah:—

- (1) Shri Saila Kumar Mukherjee, Chairman, Howrah Municipality.
  - (2) The Magistrate of Howrah.
  - (8) Khan Bahadur S. A. Rauf, B.A., W.L.A.
  - (4) Shri Chiranjilal Bajoria.

### NEW ROADS

The Government have accorded their sanction, under Section 25 of the Calcutta Improvement Act, 1911 to the estimated expenditure of Rs. 1.87.100 for construction of a portion of the main road between Road No. 7 and Middle Road, Entally, in Scheme No. L.H. (South Road, Entally, to Middle Road, Entally).

The Government have accorded their sanction, under Section 25 of the Calcutta Improvement Act, to an estimated expenditure of Rs. 1.67,500 for construction of a portion of the main road between Ananda Palit Road and Road No. 7 in Scheme No. L11 (South Road, Entally, to Middle Road, Entally).

### FOOT-PATHS AND CARRIAGEWAYS

The Board has sanctioned an estimated expenditure of Rs. 98,700 for paving footpaths and carriageways in front of built-up plots in different schemes in Southern Section. riz., Schemes Nos. XVB. XXXIII (Road No. 18 and Southern Avenue).

CHIPARATION OF ELECTORAL ROLLS

1. Ips. Editor. Calcutta Municipal Gazetta

Sig.—A Notice regarding Preparation of Electoral Holls for the ensuing General Election of
the Calcutta Corporation was published in the
Calcutta Municipal Gazette dated 20th May, 1950,
calling applications from citizens who residing
within the jurisdiction of the Calcutta Corporation are
either tenants paying rents, not less than Rs. 4 per
tenants, for occupancy of premises for at least
six months or have passed the Matriculation or
equivalent examination of any Indian University to
emoil their names, addresses, etc., to be eligible as
voters in the ensuing Corporation General Election.

Such applications were asked to be made in the Form III and to be placed before the Registering Authority (Administrative Officer) not later than the 6th Jun. 1950, corresponding to the 23rd Jaistha, 1857, (B. S.).

It is understood that till the 26th May, 1950, only 1,000 cone thousand) such applications were submitted in the Corporation Office. This is indeed very discouraging.

As an old and permanent citizen of Calcutta I may suggest the following:--

- (1) The matter was not adequately publicized from the beginning. Posters, placards and advertisements should have been the media for such publicity.
- (2) The prescribed date limit i.e., 6th June, 1950, needs be shifted to a future convenient date by which time wide publicity of the matter may be given and adequate arrangement made to distribute the application forms and to receive them duly filled in.

I should request the authorities, who are in charge of the preparation of the Electoral Rolls to consider my suggestions for the benefit of the citizens of Calcutta.—Yours etc..

NATABAR DATTA, Pura-Tattwanidhi.

7. Durga Pituri Lane, valcutta, the 27th May, 1950.

All steps for proper publicity as imperative under the rules for the preparation and publication of the Electoral Rolls were taken. The Notice regarding Voters was published in most of the important daily newspapers and copies were hung up at police stations, post offices, public libraries, etc., and in all municipal institutions.

Publicity vans were also out to inform the citizens about the necessity for enrolling their manes as voters. The last date for submission of applications for registration as voters has been extended to the 18th June, 1950, as may be seen from a notice published elsewhere in this issue.—Emror.]

Mariana de la compania del la compania del la compania del la compania de la comp

### Corporation of Calcutta.

### NOTICE

First General Election of the Councillors under the Calcutta Municipal Act, 1923 (Bengal Act III of 1923), after the commencement of the Calcutta Municipal (Amendment) Act, 1956 (West Bengal Act XXVIII of 1950).

Franchise of Companies. Bodies Corporate, Firms, Joint-families and other associations of individuals.

Notice is hereby given that the preparation of electoral rolls for the First General Election of the Councillors of the Corporation of Calcutta under the Calcutta Municipal Act, 1923 after the commencement of the Calcutta Municipal (Amendment) Act, 1950 has been taken in hand.

The attention of the public is hereby drawn to the provisions of sections 20 and 24 of the Act, and every company, body corporate, firm, joint-family or other association of individuals which is qualified as an elector by virtue of payment of any sum to the Corporation either as consolidated rate, tax or license fee during and in respect of the year 1949-50 or any portion thereof, or by virtue of having been for not less than six consecutive months during the year 1949-50 the owner of a hut in a bustee which has been valued for assessment purposes under the Act and on account of which any sum has been paid during the said year in respect of consolidated rate, is requested to apply to the undersigned not later than the 21st June, 1950, for registration of the name of one of its members, who is not under 21 years of age, as its representative on the electoral roll.

It may be noted that without the registration of the name of a representative, such franchise cannot be exercised under the law.

The father, mother or husband's name of such representative, as may be appropriate in each case, should be furnished for inclusion of the same in the electoral roll.

Any other information on the subject, if required, will be available from the Electoral Roll Officer. Election Department, Central Municipal Office.

ELECTION DEPARTMENT CENTRAL MUNICIPAL OFFICE May 31, 1950. A. D. KHAN,

Administrative Officer, Corporation of Calcutta. (Registering Authority).

CONTRIBUTIONS OF SIR ASUTOSH MOOKER-JEE in the field of education in Bengal, were remembered at a meeting held on the occasion of his twenty-sixth death anniversary on the 25th May last.

A 25 feet high memorial obelisk erected at the place where the last rites of Sir Asutosh were performed 26 years ago at Keoratala burning ghat, overlooking the Adi Ganga was opened.

The obelisk which has been erected under the auspices of Asutosh Memorial Institute bears in the middle a tablet with the dates of birth and death and a short life-sketch of Sir Asutosh inscribed on it. On its opposite side is a Scale of Justice. On the left flank has been inscribed the Sri and lotus symbol of the Calcutta University and on the right flank in a tablet on which is written the inimitable lines of Poet Rabindranath composed on the death of Sir Asutosh.

Wreaths were offered at the foot of the obelish on behalf of numerous organizations and individuals.

A PORTION OF THE RELICS OF LORD BUDDHA was handed over to the Prime Minister of Burma, Thakin Nu. by Dr. Syama Prasad Mookerjee. President, Maha Bodhi Society of India at a function held at the premises of the Society on Monday, the 29th May.

The relics were flown by a special plane to Rangoon the following day. They are proposed to be enshrined in a Pagoda and will be taken out in processions on some ceremonial occasions there.

Speaking on the occasion Dr. Mookerjee said that the relics were being handed over to Burma as a permanent loan. He had no doubt that the relics would re-establish the link of friendship and unity between India and Burma

Thakin Nu. receiving the gift, said that the gesture shown by India by handing over the relics to Burma would go down in history as the greatest benevolent act done to his country. "Burma will always remember with gratitude this magnificent gesture of India", he said.

SHRIMATI INDIRA DEBI CHOUDHURANI, former President of the All-India Women's Conference was accorded a reception by the Central Calcutta branch of the Conference at Gokhale Memorial School on the 27th May last.

A musical soirce was organized in this connection by the Cultural Club of the Central Calcutta branch of the Conference. An exhibition of hand-loom products by the industrial centre in South Calcutta and an art exhibition by the North Calcutta centre were also held in connection with the reception.

THE MARINE ENGINEERING COLLEGE will be established in Calcutta.

About 33 of the 98 acres of land ear-marked for the residential colony for the employees of the Indian Mint at Behala, Alipore, are being taken over by the West Bengal Government as the site of the proposed College.

The Government of India have provided Rs. 6.90,000 in this year's budget for the establishment of the college. It may be recalled here that to ensure recruitment of the engineering crow of the Indian merchant navy from Indian nationals, the West Bengal Government moved the Government of India in 1948 for the establishment of the college.

FIFTY-SECOND BIRTHDAY OF FORT KAZE NAZRUL ISLAM was celebrated last week at meetings held under the auspices of different organizations in the city.

Growing tributes were paid to Razi Nagrul's postic talents and his contributions for furthering the cause of nationalism and revolutionary upsurge and prayers were made to early recovery of the poet who has been lying ill for the last six or seven years.

A crowded meeting in celebration of the poet's birthday was held at Indian Association Hall under the auspices of Nazrul Birthday Celebration Committee. The meeting was presided over by Dr. Panchanon Neogi.

### NEW SURGICAL TECHNIQUE TO CURE ARTHRITIS

Five years ago an American nurse. Elizabeth Sheehey, resigned her hospital position Chronic arthritis was stiffening her knee joints. She was told that in a short time she might be unable to walk.

Today Miss Sheehey is back at her old job. Her joints are as limber as they were when she first began nursing. All pain has disappeared.

Her seeningly miraculous recovery is due to a combination of nylon plastic and a surgical technique perfected by doctors of Robert Teleck Brigham Hospital in Boston, Massachusetts, the only hospital in the United States which treats only arthritic diseases.

Miss Sheehey is one of 20 persons upon whom the unique operation—called an arthroplasty—has been performed in the last five years. All but one of these persons were able to walk within three weeks after the operation.

Chronic arthritis destroys the membrane that normally covers the heads of bones where they come together in a joint. Without this membrane, the cartilage that normally cushions the bones ossifies, and the joint becomes stiff and uscless.

The technique of the arthroplastic operation was devised man, years ago, but some operations were unsuccessful because doctors failed to find a material suitable to serve as an artificial membrane over the bones.

About five years ago. Dr. John G. Kuhns. Chief of Orthopedic Surgery at the Roston Hospital, and Dr. Theodore A Potter, who is credited with perfecting the arthroplastic technique, found the needed substitute for membrane. It was nylon plastic, three-thousandths of an inch thick. Experiments on animals proved the nylon plastic did not irritate surrounding tissues, did not absorb moisture, and was fairly elastic.

In performing the operation, surgeons make an incision around the knee cap and move it aside to get at the damaged joint. They cut away diseased tissue, then apply the nylon plastic over the lower end of the thigh bone, and sew the plastic to healthy tissue with silk thread. They then replace the knee cap and close the incision.

## VITAL Statistics

For the City of Calcutta for the week ending 20th May, 1950.

City of Calcutta (Town and Suburba.)

The total number of deaths registered during the week was 1337 against 1414 and 1276 in the two preceding weeks and higher than the corresponding week of the last year by 628. The general death-rate of the week was 23.24 per mills.

#### Town (WARDS 1 -27.)

The number of deaths registered during the week ending 20th May, 1950, was 1100 against 1173 and 1048 in the two preceding weeks. There were 201 deaths from cholera, against 229 and 270 in the two preceding weeks. There were 150 deaths from small-pox during the week against 166 in the previous week. There were 4 deaths from influenza against 1 in the previous week. The mortality from fevers and bowel-complaints amounted to 68 and 128 respectively against 50 and 148 in the preceding week. The general death-rate of the week was 21.84 per mille per annum.

There were 51 imported deaths. Excluding these, the death-rate of the Town was 20.83.

There were 150 deaths from respiratory diseases against 159 in the previous week.

There were 44 deaths from tuberculosis against 40 in the previous week.

#### MILK COLONY FOR DELHI

SOME PROPOSALS OF THE CITY IMPROVEMENT TRUST

To help establishment of a milk colony the Delhi Improvement Trust has recently approved the grant of 16 acres of land in Jhil Kuranja, beyond the Jumna river, to a co-operative society of displaced ghosis for erection of residential quarters, stabling sheds, etc. One of the condition of the grant of land is that the ghosis now carrying on their avocation in the City will shift themselves and their cattle to the new colony. To make the project self-supporting the Trust has also approved the grant of a five-year lease of 2,338 acres of adjoining land to the same society for grazing and granter of fodder.

The Trust has agreed to place at the disposal of Government a 250-acre block of land in Chiragah South for establishment, by the Ministry of Rehabilitation, of a housing-cum-occupational colony of displaced persons.

Another proposal to hand back to Government 5 acres of developed land near Idgah, for staff quarters, has been approved.

The Trust has also agreed to lease to the Joint Water and Sewage Board on area of over 12 acres in the Jhandewska estate for extensions to the water reservoir and staff quarters.

The Trust has decided to take over from the Civil Lines. Notified Area Committee the conservancy arrangements of the New Fruit and Vegetable Market in Subzimandi and decided to request the Chief Commissioner to directive to that body to transfer the same to the Trust from the 15th July, 1950.

#### SUBURDS (WARDS 28-32.)

The number of deaths registered was 257 against 241 and 228 is the two preceding weeks. Of these, 35 were from cholers, 36 from small-pox, nil from influence, 16 from fevers, 39 from bowel-complaints and 31 from respiratory diseases. The death-rate of the suburbs (or added areas) was 33.13 per mille.

There were nil imported deaths. Excluding these, the death-rate was 33.13.

There were 9 deaths from tuberculosis against 7 in the previous week.

#### HOUSE DRAINAGE-NEW CONNECTIONS

The following House Drainage Plans showing new sewer connections have been sanctioned:—

#### DISTRICT I (Proper)

| Premises No.                |   | Date of connections |
|-----------------------------|---|---------------------|
| 20. Tarak Pramanick Road    | 1 | 10-5-50             |

## Chronicle & Comment

TRIBUNAL'S AWARD

In the Calcutta Gazette dated 21st July, 1948, had been published the Award of the Tribunal appointed by the Government of West Bengal to arbitrate in the dispute then existing between the Corporation of Calcutta and its employees. This, however, had not the desired effect and fresh disputes arose, which culminated in a strike by the employees of the Corporation in October, 1949. Negotiations for a settlement went on and after certain concessions granted by the Corporation, the strike was called off after 9 days. The points in dispute were placed before a fresh Tribunal, whose Award has now been published in the Calcutta Gazette (extraordinary), dated the 31st May 1950. This Award shall be binding on the Corporation and the employees and shall remain in force for one year with effect from the date of its publication.

We will publish a detailed report of the latest Award in our next issue.

#### · TO STOP THE MALPRACTICE

On receipt of a number of complaints from the public to the effect that clothings, beddings, etc., which are brought to the burning ghats and burial grounds along with the dead bodies and which may be infected, are sold by the *domes* to private traders thereby spreading various diseases the Corporation anthorities with a view to stopping this sort of evil practice had certain bye-laws drafted some time ago.

The draft bye-laws were after approval of the Administrative Officer published in the local newspapers inviting objections to them. When all general formalities had been met the matter was

referred to the Local Self-Government Department of the Government of West Bengal for their sanction. The Local Self-Government Department having pointed out certain legal difficulties the draft was later amended by the Corporation.

The amended draft states as follows:-

- deceased person for burial or cremation or for disposal otherwise to a burial or burning ground or other place for disposal of the dead, and particularly the person signing the Register of Deaths as an informant, shall cause all cloth, bedding and other articles, which are brought to such ground and which have come in contact with the dead body on the bier, to be destroyed to the satisfaction of the Sub-Registrar of the said burial or burning ground or other place for the disposal of the dead.
- 2) Any such person desirous of making rift of new or unused clothing, bedding or other articles to priests, barbers, domes or such other persons, shall bring the same in such manner as not to be in contact with the lead body or the bier and may give away the same with the permission of the Sub-Registrar of the said burial or burning ground or other place for the disposal of the dead. The decision of the Sub-Registrar that the clothing, bedding or articles proposed to be gifted is or is not new or unused and has or has not come in contact with the dead body shall be final.
- of any of the foregoing bye-laws shall be punished with fine which may extend to Rs. 100.

The Administrative Officer has accorded his approval to the amended draft. Before these new bye-laws are put into operation they have to be published for public information and their opinion thereon, and lastly, to be placed before the Government, along with the public objections if any, for their sanction to the finally amended bye-laws.

#### FOR THE COMING CENSUS

Under a recent notification of the Government of West Bengal, the Special Census Officer for Calcutta has been authorized to call in help of the following persons:—

Officer-in-command of any body of men belonging to naval, military or air forces or of any vessel of war of India; any person, except a pilot or harbour-master, having charge or control of a vessel: in-charge of a lunatic asylum, hospital, work-house, prison, reformatory or lock-up, or public, charitable, religious or educational institution;

Keeper, secretary or manager of any sarai, hotel, boarding-house, lodging-house, emigration depot or club;

Manager or officer of a railway or any commercial or industrial establishment, and occupant of immovable property wherein at the time of the taking of the census persons are living.

#### UNAUTHORIZED CONSTRUCTION IN THE CITY

This week 38 cases of unauthorized construction,—19 for District No. I, 3 for Cossipore, 5 for District No. III, 8 for District No. IV and 3 for District No. II, were placed before the Administrative Officer. All these cases resulted out of construction without previous sanction, infringement of building rules, deviation from the approved plan or encronchment on Corporation land.

## NEW DEPUTY EXECUTIVE OFFICERS

Shri M. N. Ray. Deputy Executive Officer II has been appointed Deputy Executive Officer I in place of Janah Abdus Sattar, who has been granted leave, preparatory to retirement with effect from the 1st June, 1950.

Janah Sattar was appointed by the Corporation, with the approval of the Government, as Deputy Executive Officer I, for three years with effect from the 10th March. 1947. Later, before the expiry of that period the tenure of his service was extended upto the 10th July, 1950. He entered the Corporation as a Councillor and at the time of his appointment as Deputy Executive Officer I. he was the leader of the Muslim League Party in the Corporation.

Shri Haris Chandra Mukherjee has been temporarily appointed as the Deputy Executive Officer II. Shri Mukherjee was the Acting Chief Valuer of the Calcutta Improvement Trust.

There has lately been the following redistribution of departments between the two Deputy Executive Officers: The D. E. O. I has been in charge of License. Markets, Stores. Records. Treasury.

and Thestre Inspection and the D. E. O. II has been in charge of Assessment, Collection, Law and Education.

### FOR "HAJ" PILGRIMS

The Administrative Officer has sanctioned the estimated cost for making sanitary arrangements in connection with the coming Haj Pilgrimage for 1950. The cost amounts to Rs. 2,400.

The Corporation made every year in the past such sanitary arrangements for the Haj pilgrims during their stay in Calcutta.

#### KUMARI ARUBALA SENGUPTA

Kumari Arubala Sengupta, M.A., who held the post of Senior Inspectress of the Corporation Primary Schools, has recently been appointed as the Assistant Education Officer of the Corporation.

The post of the Assistant Education Officer, it may be recalled, was created in August, 1940. Owing to requisition of many of the Corporation School buildings for A.R.P. and other war purposes and later owing to the communal riots the number of schools, as well as the number of pupils, very appreciably dwindled, and consequently the post of of the Assistant Education Officer was abolished. In view of the resumption of full strength of the torporation Primary Schools now attended by over 40,000 children of the city the post of the Assistant Education Officer has been revived.

Kumari Sengupta was appointed Inspectress of Schools. Calcutta Corporation, in March, 1928 and has always indefatigably worked for the promotion of Primary Education amongst girls in Calcutta.

We really appreciate the appointment of Kumari Sengupta because in this the authorities have given necessary, though belated, attention to the education of girls.

#### DR. P. NEOGI

Dr. Panchanon Neogi, M.A., P.R.S., Ph.D., F.N.I., I.E.S., (Retd.), Principal, Maharaja Manindra Chandra College, an eminent scientist and educationist, expired at his own residence at 44/A. New Shambazar Street on Monday, the 5th June.

He served the Rajshahi College and the Presidency College, Calcutta as Head of the Department of Chemistry for 14 and 17 years respectively. He was the Founder-Principal of the Maharaja Manindra Chandra College. He was the President of the Chemistry Section of the All-India Science Congress held at Patna in the year 1983. He was President of the Science Section of Bangiya Sahitya Sammelan at Comilla in 1989. His contributions to the scientific world have been of great importance and value.

He was wellknown not only as a scientist and an educationist but also as an orator, literatuer, social worker and patriot.

He was born in the village Heerah in the district of Hooghly on October 4, 1883. He has left behind him, his widow, three sons and a married dughter and a host of friends and admirers to mourn his loss.

### EMINENT SCHOLARS PASS AWAY

DR. D. R. BHANDARKAR

DR. Devadatta Ramkrishna Bhandarkar, eminent scholar of Ancient Indian History and Archaeology died at his Calcutta residence on the 20th May last. He was 75.

Prof. Bhandarkar had an attack of bronchopneumonia. He leaves behind his wife, two daughters and a number of grand children.

Son of Sir R. G. Bhandarkar, the founder of Bhandarkar Research Institute for Indology in Poona. Dr. D. R. Bhandarkar was educated in the High School and Deccan College, of Poona. Shortly after he passed the first LL.B. examination of the Bombay University he became interested in the study of the history of Ancient India. He wrote a thesis on "the Ancient Towns and Cities of Maharastra in the Pre-Mahomedan Period" within three months' time and without anybody's help at all. The thesis was of sufficient merit to deserve a prize. Bhandarkar was asked by his father to discontinue his studies for the second LL.B. examination and prepare himself for M.A. in Languages (English and Sanskrit) with Optional Paper in 'Pali Palaeography' corresponding to "Ancient History and Epigraphy' of modern times.

#### Becomes A Professor

Dr. Bhandarkar joined the Bombay University as a Lecturer in 1908 and served the University till 1917. During this period he had already made a name as a distinguished research worker in various branches of Indology.

At the request of Sir Asutosh Prof. Bhandarkar came down to Calcutta and held the Carmichael Professor Chair of Ancient Indian History in 1917. He held the Chair for long 20 years, during which his reputation as a research worker spread far and wide.

In Calcutta, he became the Officer-in-charge, Archaeological Section of the Indian Museum for three years from 1917. He was also a member of the Board of Trustees, Indian Museum since 1917 and once became its Vice-Chairman in 1925. He had been a fellow of the Royal Asiatic Society, Bengal since 1918 and held the post of the Philological Secretary of the Society from 1920-25.

Notable among his publications are 4soka. Some Aspects of Ancient Hindu Polity, Origin of the Saka Era, Gurjaras, Foreign Elements in the Hindu Population and numerous other contributions on Indian History and Archaeology.

#### DR. W. BANKLOH

DR. WALTER BANKLOH, Professor of Metallurgy at Bengal Engineering College, Sibpur and formerly Director of Iron Research Institute, Berlin, is reported to have developed a new method of processing high quality steel. Dr. Bankloh is ably assisted by Shri P. C. Ghosh

The new method has very much shortened the time taken before in removing undesirable carbon particles from the steel prepared. The time is now several hours instead of several days.

production of the state of the

## Personalia

#### SHRI R. R. DIWAKAR

Sum R. R. Diwakar, Minister of Information and Broadcasting, Government of India, was in Calcutta sometime ago (vide Calcutta Municipal Gazette dated 20th May, 1950). During his visit to

the city among other engagements he met the journalists at a Conference. Before them he spoke about the progress and the difficulties attending the Film Division of the Government of India and also the All-India Radio, Some suggestions were made by the

is a new year suggestions were made by the journalists about improvement of the services of the two important public information departments of the Government of India.

This city of Calcutta is served so much by these departments that we particularly are greatly interested in their activities. Almost all the cinema houses in the city show the Information Films release to the Film Division of the Government of Inma. The news reed is generally interesting because it corroborates the reports read in the newspapers only the other day. But other public education films have not been equally informative and pleasant at the same time. Varying opinious bent reception of such films have reached us. But its one matter they hold the same remark, these are more or less pragmatical, and so far as the background annotation in vernacular is concerned it is very much hard and grating.

We, in this city have so many problems in condaily life in family, in business, in office, in can recreation, in society, at hotels and restaurants, on our way, at reading rooms, at clubs, so on and to forth. We feel if the citizens could have answers to the little problems of life, which sometimes become so grave and also grievous, while they a claved their minds of all other worries, they would surely be very much delighted. And they have learn many things through pleasure and as eastime.

At present, there is a continuous drive for making the roads accident-less. And now if the college and he imparted lesson on the "Safety Poles" of home, in the road, in an industrial workshop, and where not, through film-stories and describ radio speeches the effect would be abiding.

Although the Film Division and the All India. Justice are units of centralized public information the importance of their local existence must always be there. So even if a common policy guides them there should be local committees, particularly in Parelian, Madras, Delhi and Calcutta, that will addirection local colours to that common policy, and committees should be reconstituted every six months as well as they should represent every mossible interest in the city, elected by votes of the passible of specified qualifications.

Continued in the previous column

### EVENING ON THE HOOGHLY

[By Monoranjan Chatterjee]

beauty from seemingly impossible scenes and sources, I might have burst into verse while contemplating the muddy and lazy Hooghly from the Howrah Bridge. Even my poetic conscience would perhaps have jibbed if I had started like Wordsworth... The earth has not anything to show more fair," and so on. My prosaic and matter-of-fact sensibilities would have at once warned me against such a stilled hyperbole. If earth had nothing fairer to show than the muddy, lazy Hooghly flowing between unlovely and uninteresting banks, then, whatever the scientific prospects of success, the desire to fly to the moon is perfectly understandable. The Hooghly in the evening is not a fair sight.

#### A GLIMPSE OF THE RIVER

That is to say, if you can see it. But you can't. What with the rows and rows of country boats moored on either bank and throngs of men and women gathered at the ghats to have their evening dip you can perhaps only have a glimpse of the river at midstream. And when there are ocean-going vessels berthed at the docks it is hardly possible from the banks to have a glimpse of the river at all. Perhaps by dawn some of the berths will be empty as some of the vessels slip out of the berths with the tide in the middle of the night and make for the high seas bound for distant lands. Other vessels will take their places to similarly depart when there is no longer any need for them to stay. This constant coming and going of vessels to and from land across the seas is what keeps the panorama of the river alive.

And when the smoke-laden and murky twilight deepens into the gloom of night, blurred points of light begin to appear on the Howrah bank of the river to indicate where the iron has entered the soul of this once unfettered stream. The mills on either bank of the river are both a glory and a deservation. They have brought wealth and glory to the land. They have desecrated by tightening the stranglehold of science on her, the memory of a stream that was born of mountain torrents and that has rippled almost endlessly through history and romance.

#### EYE FOR BRAUTY

But even put into the straight-jacket of science the Hooghly which is but a local alias of the

mighty Ganges has not lost its holiness. The waters, draining as they do, the filth and impurities of a none too clear metropolis, are yet held in great reverence by millions of devout Hindus. Indeed, a dip in the river is supposed to endow the bather with almost a baptismal purity. The sins of yesterday are washed away and one is free to enter into another day with a clean conscience which, if it should gather any impurities in course of the next twenty-four hours may again be washed into a serene smugness the next morning by another dip in the river.

#### THE 'HILSA'

Those who are found roving by the river bank in the evening have not always an eye for beauty—many of them are on the look-out for the famous hilsa fish of the Ganges. Evening and early morning are the times when catches are made during the hilsa season and a sight of the silvery creatures struggling in the nets sends a fish-loving citizen of Calcutta into ecstasies. But alas, the man probably demands too high a price for the fish and many a disappointed buyer has to return dolefully to his fishless dinner at home. The Ganges hilsa which used to be the poor man's caviare is today only for the tables of the rich.

FIRE BROKE OUT on board the 5,000.ton Indian carrevessel, S.S. Jaybrahma, as she lay alongside Berth No. 21 (Coal Berth), Kidderpore Docks, Calcutta, on the 31st May last.

The fire was first discovered about 5 p.m. when one of the crew saw smoke issuing from the ventilator.

The fire was extinguished in about two hours but the Port Commissioners' fire float and personnel of the West Bengal Fire Services stood by in case of emergency through out the night.

In the evening of the 1st June last operators on duty in Bank Exchange, seeing sparks issuing from a subscriber's line, immediately informed the City Fire Services.

Two fire engines reached the Telephone Building in Hare Street, where the Bank Exchange is situated, in less than four minutes to find that their services were not required, a telephone engineer having already attended to the trouble.

### Local Self-Government In Baroda

A State having merged with Bombay. The number of village Panchayats in the "State" has been 2.479, the number of villages being 2,960.

The new system of administration of land revenue, justice and police under British Rule deprived the village organizations of India of much of their power and usefulness. But Baroda took pride in its preserving the self-government of the village. Panchayats have remained in all villages and they have been entrusted with powers and duties, such as they enjoyed in the past.

In 1904 the system of popular representation was extended to district and prant panchagats and districts were constituted. The prant panchagats consisted of a majority of members elected on a wide franchise. They were entrusted with the construction of roads, wells, cattle troughs, dharmasalas and schools, and with the management of sanitation and public health. In 1939 they were allowed to elect their presidents.

#### INTRODUCTION OF ELECTION

Previous to the Municipal Act of 1892 there were no self-governing institutions for the management of municipal affairs in towns. In that year the principle of election was introduced in the Baroda city municipality. Its present constitution is based upon the Act of 1905 which separated the executive and the deliberative functions, conferred considerable financial powers and increased the elected members from half to two-thirds. Since then its powers and privileges have been extended. It now elects its own president and except for such matters as taxation, making rules and bye-laws, the municipality enjoys independent powers.

In other towns there was no municipal government in its real sense, prior to the Municipal Act of 1905, which was based on the Bombay Municipal Act III of 1901. Under this Act Municipalities have been classed "A" and "B" according to their size, importance and fitness for self-government.

#### CALCUTTA WEDDING

The marriage ceremony of Shrimati Madhabi Roy (Gita), niece of Shri S. C. Roy, M.A., R.L., well-known industrialist and insurance man, was solemnized last week with Captain Anandamoy Maitra. M.B., son of Shri Gunamoy Maitra of Burdwan. A large and distinguished gathering assembled on the occasion including Dr. S. B. Dutt, Sheriff and Shrimati Dutt, Shri J. K. Biswas. Shri G. K. Khenka. Shri Nagarmall Bhawalka. Shri I. B. Sen. Dr. N. Sanyal, Prof. Dr. S. K. Mitter, Pandit J. N. Bhan. Raja Bahadur of Nashipur, Shri and Shrimati J. N. Majumder. Rai Bahadur Satis Chandra Ghosh, Prof. K. N. Sen. Shri D. K. Sanyal, Shri Inderchand Bhuwalka, Shri S. C. Gupta, Shri B. Kaitra, Shri Sachin Bagchi, Shri B. Sen Gupta, Shri Balai Chandra Germani, Shri Samaresh Chakravarti, Shri Sudarana Maitra, Shri B. K. Sen, Dr. Amiya Sen and others.

liesides the Baroda City Municipality, there are 41 district municipalities in the State. Of these municipalities in the moffusil, 11 are A-class in larger towns and 30 are B-class in smaller ones. All Valiass municipalities elect their presidents. In B-class ones the Vahiratdars are ex-officio presidents. However, three B-class municipalities, like Unjha, Vadiagan and Dwarka, elect their presidents.

#### Sources Or Income

In main sources of income of the A-class municipalities are house tax and octroi, and their total meome in 1946-47 was Rs. 11.79 lakhs. The mass items of expenditure of these municipalities have been lighting, water supply, drainage, roads and conservancy. The total expenditure in 1946-47 was Rs. 11.20 lakhs. Taxation in each of the numicipalities has been very light. In one municipality the incidence of taxation per head of population is Rs. 1-14-5. The highest incidence is Rs. 6-12.0, and the second highest is Rs. 6-9-6, the third Rs. 1-7-5 and the fourth Rs. 3-15-1.

Daning recent years the general numicipal services of three of the cleven A-class municipalities have been supplemented by anti-mularia compaigns, half of their costs being borne by the state government.

The main sources of income of the B-class anumapalities are octroi, house tax and government subsidies. Three such municipalities receive permanew government grants amounting to Rs. 6,695 to supplement their meagre resources. The total income of the thirty B-class municipalities in 1946-47 was Rs. 7.96 laklis; the amount of expenditure was Rs. 7.11 lakhs. The incidence of taxation per head of population of these municipalities has been Bs. 2 10 6 in the Baroda district; Rs. 2-18-3 in the Mehsana district; Rs. 2-1-4 in the Navsari district; Rs. 1-12-6 in the Amreli district and Rs. 2-10-0 in the Okhamandal. The minimum taxation has been Re. 0-1-11 and the maximum Bs. 6 13.9. Out of the thirty B-class municipalities ten have got water works. Schemes for water-works for four others have been taken in hand. Drainage has already been laid by two municipalities and other schemes have reached various stages of investigation or completion. In six municipalities anti-malaria campaigns have been taken in hand, the state Government bearing half the cost of these mo asmes.

#### BARODA CITY MUNICIPALITY

The Baroda City Municipality serves an area of 8.47 mare miles. The population of the city is, according to 1941 census, 1.58.801. The total income of this municipality was Rs. 18.52 lakhs in 1946-47. This income includes proceeds from the two main sources—Government grant and municipal rates and taxes. The Government grant represented 6.7 per cent of the total income in 1946-47. The following table shows the various proceeds from

municipal rates and taxes in 1946-47 and their percentages to the total income:—

| contrages to the total laborat | Rs.      | Percentage |
|--------------------------------|----------|------------|
|                                | in lakhs | • •        |
| Terminal tax                   | 6.52     | 85.2       |
| Taxes on houses and lands      | 2.28     | 12.8       |
| Taxes on animals and           |          | +12        |
| vehicles                       | 0.64     | 8.5        |
| Toll                           | 0.04     | 0.2        |
| Water tax                      | 2.80     | 12.5       |
| Conservancy                    | 0.76     | 4.1        |
| Drainage                       | 0.58     | 2.9        |
| Taxes on offensive and         |          |            |
| dangerous trades               | 0.21     | 1.1        |
| Entertainment tax              | 1.67     | 9.0        |
| Other sources of revenue       | 1.51     | 8.1        |
| Miscellaneous                  | 0.81     | 4.4        |
| Total                          | 17.27    | 98.8       |

The following table shows the expenditure of the municipality in 1947 and the percentages of the separate items of expenditure to the total expenditure:

| Head of expenditure | Rs.      | Percentage |
|---------------------|----------|------------|
| •                   | in lakhs |            |
| Administration      | 2.18     | 10.8       |
| Other charges       | 6.96     | 84.9       |
| Roads               | 1.48     | 7.2        |
| Public works        | 1.81     | 9.1        |
| Conservancy         | 2.46     | 12.4       |
| Lighting            | 0.72     | 3.7        |
| Water Works         | 1.88     | 9.5        |
| Drainage            | 2.05     | 10.1       |
| Compensation        | 0.46     | 2.8        |
| •                   |          |            |
| TOTAL               | 19.90    | 100        |

### Calcutta Improvement Trust

VALUABLE FREEHOLD BUILDING PLOTS FOR SALE

#### KUMARTULI AREA

Two plots are available in Scheme LI (Upper Chitpore Road to Central Avenue); very suitable for business or residential purposes.

#### ENTALLY AREA

A number of plots are available for sale in this good class residential area at attractive prices.

Purchasers are permitted to leave half the purchase price outstanding on mortgage for a period of 12 years

For rates and further information and application forms purchasers should apply personally to the Chief Valuer.

J. A. PARKS,

Chairman.

The 8th May, 1950.

10, Netaji Subhas Itoad,
Calcutta—1.

The general health of the city has been good. A few cases of typhoid, small pox and tuberculosis were however reported in 1946-47. Immediate preventive steps were taken to check their spread. Facilities for pathological examination were given for examining blood, etc., through the municipal laboratory. The municipal nurses by going round to the private practitioners in the city collected the figures of all notifiable cases. The birth and death rates per 1,000 people were estimated to be 42.6 and 26.8 respectively for the year 1946-47.

Among the important services rendered during 1946-47 were the following:

Thorough repairs of 25 metalled roads.

Construction of six storm water drains.

Completion of a new vegetable market and a new meat market.

Construction of a block of new shops at one market.

Planting of trees on different roads.

Laying of a new line of water-works.

The Baroda City Municipality possesses firebrigades. They successfully handled 29 fire outbreaks in the city in 1946-47.

The Baroda City Municipality conducted in 1946-47 propaganda for popularizing vaccination against small-pox and inoculation against typhoid. Booklets on the prevention of tuberculosis were distributed free. Twentyone magic latern lectures on the prevention of diseases were arranged during the year in the different parts of the city. It may, therefore, be concluded that this Municipality is a progressive one, trying to bring its services as much in consonance with modern and upto-date trends as has been possible within its limited resources.

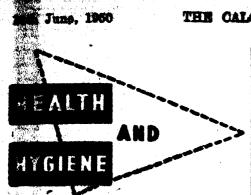

## INFANT & CHILD CARE IN THE UNITED STATES—II

(Continued from page 161)

special chapters on "the delicate child" as if a mysterious lack of robustness were a condition simply to be accepted and, if possible, alleviated with additional rest and special foods. With today's knowledge that virtually no child is predestined to "delicacy", current American manuals do not even mention such a "type" of child but instead deal constructively with the various environmental factors hampering robust development. Nervousness, stubbornness, hot temper—a host of qualities and traits once believed inborn—are now understood as responses to frustrations in the environment, often frustrations of the child's true individuality.

Obsolete today, also, is the once common concept that there is a "right way" to handle each situation or problem. The key to good parenthood, as it conceived by modern American psychologists and psychiatrists, is not the automatic application of "correct techniques" to situations as they occur, but rather a real understanding of the child's world and a feeling for relationships from which the appropriate actions will flow easily. The way parents will function depends basically on how they feel about their children, themselves, and each other. The foundation of successful parenthood is a successful marriage and a wholesome, constructive relationship with society.—U.S.I.S.

and the second s

## INFANT AND CHILD CARE IN THE UNITED STATES—II

[By JANE JACOBS]

(Concluded from the issue of 27th May, 1950)

MANY kinds of undesirable behaviour in children are important in that they reveal, early in the child's life, something wrong that should be corrected. The child who becomes extraordinarily possessive or dictatorial, for example, may be revealing his own insecurity or that he himself is being managed too much by others. Strictness in dealing with him, without understanding the reasons for his behaviour, would only make matters worse. The stress today is on prevention of child problems and, if they occur, on a sensitive, sympathetic attempt to get at the hidden root.

#### THUMB SUCKING

Illustrative of the changed approach is the present attitude toward thumb-sucking. Twenty years ago, child-rearing authorities classed this as a "bad habit", to be broken by such direct methods as removing the child's thumb from his mouth continually. Gradually, it became evident that such tactics often did great harm to the child, making him, for example, tense and nervous. Parents were then advised to ignore the "bad habit" in the expectation that the child would outgrow it.

The next step was a real effort to understand the reasons for thumb-sucking. Observation and study showed that thumb-sucking may be a signal that the child has not had sufficient opportunity to suck at feeding during infancy. To prevent the lack which thumb-sucking seeks to fulfil. mothers were advised to let the infant feed as long and as slowly as he wished. Still further study showed, however, that this is only part of the answer. Just as important to the child as the physical act of sucking is the sense of comfort and of being cherished which he derives at the same time. Not only is the child's mouth involved, but also his whole body with its emotional need for being enfolded and loved. A thumb-sucking child may thus be compensating for an emotional lack even more than for a physical one. Thus, thumb-sucking has changed, in the eyes of parents, from a "bad habit" to a significant indication of how satisfactorily the child is adjusting to his earliest environment.

#### CITIZENSHIP OF THE FAMILY

Underlying the development of the child in the "citizenship of the family" and colouring his total personslity and character is his inner sense of security or insecurity. Inner emotional stability is built very early, even during the first few months of life. To the infant, all impressions of the world are concentrated in the way he is fed and fondled. If this hunger-pains are assumed muckly, and if he feels, along with this physical

world' to him is a good place. If he is made to softer by waiting for his food, if an obscure sense of impatience or coldness is conveyed to him, he derives an obscure but tenacious feeling that the "world" is his enemy. Almost inevitably, he will come anto early conflict with his parents and others around him—for deep inside him, he is not convinced that they are his friends. Such evidences of deep insecurity come out in later life in many ways—for example, in aggressions against others, in defeatism and pessimism, or in an endless pursuit of material "security" which is never satisfied

States emphasize the necessity of fulfilling the intant's earliest needs for security and evidence of love. Thus, there is occurring a return to the old-fashioned method of feeding the baby whenever he cries for tood, instead of by a schedule as was tornerly recommended. In some advanced American hospitals, it is now the practice to place the newborn baby beside the mother's bed, instead of putting him into the infant nursery. In that way, the mother can feed and hold him whenever he appears to need it, and she will be used to the baby and feel confident and easy with him when they are ready to return home.

#### CHILD'S INDIVIDUALITY

A child who is secure and healthy and is growing in a warm and friendly family will develop as a useful and well adjusted member of society. But what directions his usefulness and talents will take, the parents cannot predict and should not try to control. Parents' preconceived notions of particular skills or aptitudes can do great harm if they do not fit with the child's own actual abilities and inclinations. They can undermine his sense of worth and security; they can cause his real capacities to be undeveloped. Respect for the child's individuality is important long before he begins to show special aptitudes or skills. Each child, from the beginning, grows at his own rate, and parents must accept this as right, instead of compering his development competitively with that of other children or holding him back because of rehectance to see him emerge from babyhood quite so wiftly. The parents' role today is seen, not as that of "moulding" the child, but instead, of giving the child the best possible chance to grow and find

Many traits, once considered innate, are known today to be the results of environment. Some child-rearing books of a generation ago contained

IN

**SOVIET RUSSIA** 

The picture shows one of Moscow's tall buildings. Located on the Smolensk Square the building is twenty-storied. The constructional work is not yet complete.

ESPECIALLY noteworthy among the architectural works of 1949 in Soviet Russia are the stations of the newly-laid lines of the Moscow Metro (undergound). Soviet architects' work in designing the palatial stations of the finest underground in the world have proved a potent factor in developing creative principles of architecture. Catering to the vital needs of the people and creating structures near and comprehensible to the people are what Soviet architects regard as their primary task. Precisely for this reason the Moscow Metro, a structure truly for the masses, stands unexcelled in magnificence, the most expensive facing materials being lavishly used for its elaboration, and, primarily, in the greatness of the artistic ideas embodied in its architecture.

#### Mass Housing Construction

A field of architecture both extremely important and honourable is mass housing construction which in the Soviet Union proceeds on an unprecendented scale. In the course of the four years of the postwar five-year plan, for example, over 72 million square metres of dwelling space have been built or rebuilt in the Soviet towns and workers' settlements and 2,800 dwelling houses in the country side. In Moscow alone 1949 witnessed the building of over 4,00,000 square metres of living floor space.

In designing dwellings Soviet architects do not merely strive to adorn the towns with beautiful structures but to create homes of supreme comfort for the tenants.

For designing a dwelling house in Moscow

1. Zholtovsky, a member of the USSR Academy of

Architecture, has exhibited good skill in the stark simplicity of the front with its splendidly delineated architectural detail—the cornice, the plastered ornaments of the loggias, the corner pieces, etc. and in the planning of the flats which provide a miximum of comfort for the tenants.

The desire to create homes of maximum comfort and convenience was the guiding principle of the design of a 132-apartment house as well as of that of a handsome 80-apartment house.

#### A Typical Example

A splendid example of housing architecture is another newly-erected dwelling house in Moscow. Particularly beautiful is its main facade, faced with uncut stone, in which the architect makes use of the national traditions of Georgian architecture. At the same time it is an extremely modern Soviet dwelling house. Unpretentious, yet interesting from the architectural point of view, is the elaboration of the side of the house overlooking the court. The superbly planned apartments testify to the architect's genuine concern for the comfort of the future tenants. Thus, for example, taking into account the preponderance of hot weather in a southern city the architect, besides balconies, has supplied each apartment with a glassed-in terrace of northern exposure, which may serve both as a dining-room and summer bed-room.

This building bears witness to the artistic progress made by architecture in the republics of the Soviet Union, where exists an architecture understandable and akin to the people, with the national traditions used to artistic advantage.

Soviet towns are evidence of the ever great strides aheat made by Soviet architecture. An extremely wide field of activity is open to architects in the Soviet Union. Soviet architects are reclaiming warshattered towns. They are rebuilding old towns and building new ones. They are erecting numerous monumental structures, meeting the needs and requirements of the working people, fostering in the people a keener appreciation of art and gratifying the people's longing for beauty.—Tass.

#### CIVIC NEWS FROM FAR AND NEAR

#### CORPORATION OF JABBALPUR

The Corporation of city of Jabbalpur, it is learnt, will be formed from June 1, 1950 with Shri R. N. Pendharkar who is at present Deputy Commissioner, Yeotmal, as Administrator.

#### NAGPUR MUNICIPAL COMMITTEE RECONSTITUTED

The public are aware of the recent decision of the Nagpur High Court holding that the Government order extending the period of suspension of the Nagpur Municipal Committee is invalid, and directing the State Government either to reconstitute the Municipal Committee or to give effect to the City of Nagpur Corporation Act within one month.

Ever since the City of Nagpur Corporation Act was passed by the State Legislature. Government have been endeavouring to complete the essential preliminaries so that the Corporation may be inaugurated as early as possible. There is, however, a difficulty which renders it impossible to bring the new body into being within the specified period of one month from the date of High Court's Judgment without heavy loss of revenue running into several lakhs of rupees to the Corporation. The present levy by the Nagpur Municipal Committee of the tax cannot be legally continued beyond the date of establishment of the Corporation, because, from that date, this tax becomes a source of Union revenue. In order that the new body may not have to incur such heavy financial loss, the Municipal Committee has already taken steps to replace the terminal tax by octroi duty before the Corporation starts functioning. The proposals have been published for eliciting objections, but they cannot be finalised within the period allowed by the High Court.

The other alternative, e.g., the reconstitution of the Municipal Committee under the Municipalities Act within such a short period is also not feasible. The election is a long drawnout process which takes several months for its completion.

• Government were, however, anxious to comply with the High Court's decision both in letter and spirit. The only fair and imparial course open to Government, was to reconstitute the Committee with the available members of the superseded body, by nomination. An Ordinance to that effect has been issued separately. Vacancies caused by death, migration or other causes will be filled by the members themselves by selection. As the members of the old body had elected Shri G. J. Pathak as their leader, Government have appointed

Mar Backery for Mary and Abrus

him President. He will choose his two Vice-Presidents

It is hoped that the newly constituted Committee will wholeheartedly assist in ushering in the Corporation with the least possible delay.

#### WATER-SUPPLY TO UDAIPUR

The Bajasthan Government have installed 55 public pipe connections in Udaipur city to meet the water difficulty there.

The Government also proposed to instal a Chlerine-plant in the town to ensure the supply of filtered water. A sum of Rs. 72,000 has been sanctioned by the Government for the purpose.

#### LETTERS TO THE EDITOR

#### HAZI ZAKERIA LANE

The Editor. Calcutta Municipal Gazette, Sir. Could I request you to kindly bring to the notice of the Corporation authorities the difficulties in which we, the evacuees from Pakistan, are living at Hazi Zakeria Lane, Maniktola, in Ward No. 3. The lane is not watered at all; the drains are bad enough. Again, Hazi Zakeria Lane requires to be tarred for proper and even levelling. The reconstitution disturbances have brought in thousands of people to the city and they are quartered in the different parts of the country. The civic authorities should see that these people may live a cleaner and healthier life in the city.—Yours faithfully,

S. N. BANERJEE,

1 5. Hazi Zakeria Lane, Calcutta—6. The 5th June, 1950.

#### OVERCROWDING IN TRAM CARS

To THE EDITOR, -- CALCUTTA MUNICIPAL GAZETTE, Sir. - It cannot be denied that the overcrowding in the trains has become so alarming for sometime past that it should no longer be overlooked and every possible means should be adopted to ameliorate: the troubles of the travelling public, specially the office-going public who are compelled to make desperate attempts to board a train car,-even at the risk of their lives. The drivers and the conductors, on the other hand, are too reluctant to give the passengers time enough either to come in or go out of the car, as they are to reach the destination in due time. In view of the stoppages of the tram cars for a very short time, and in view of the overcrowding of the meagre passages provided therein, the passengers are compelled sometimes to jump in and out of the cars through the windows, which involves considerable effort and

Should the Calcutta Tramways Company take up the matter in right earnest and devise some means, it can be expected that some good results may come out of it to the immense relief of the suffering passengers,—consisting, among others, of old. infirm, ladies and children as well. The consciousness of the company's staff should be aroused to the effect that the passengers are their concern. They must have some consideration for their convenience. Such consciousness will bring forth good manners and efficient service from the workmen.—Yours faithfully,

The 28rd May, 1950.

A. BOY.

## Corporation of Calcutta. Preparation of Electoral Rolls

for the

First General Election of the Councillors under the Calcutta Municipal Act, 1923 (Bengal Act III of 1923), after the commencement of the Calcutta Municipal (Amendment) Act, 1950 (West Bengal Act XXVIII of 1950).

#### NOTICE.

(See Rule 6)

For the purpose of preparation of the electoral roll for the constituencies of the Corporation of Calcutta, applications are invited from persons who are qualified to be included in the electoral roll for any of the aforesaid constituencies by virtue of the provisions of clause (b) or clause (d) of sub-section (1) of Section 20 of the Calcutta Municipal Act, 1923.† Such application shall be made in the Form III so as to reach the undersigned not later than the 6th day of June, 1950, corresponding to the 23rd day of Jaistha, 1357 (B. S.)

#### A. D. KHAN,

ELECTION DEPARTMENT. CENTRAL MUNICIPAL OFFICE. May 5, 1950. Administrative Officer, Corporation of Calcutta, (Registering Authority). N. B.-Copies of the Form will be supplied free by the Registering Authority on application.

#### †The relevant provisions of Section 20 are as follows:-

- "(1) Subject to the provisions of the Bengal (Aliens) Disqualification Act, 1918, every person who owns, occupies or resides in any premises or exercises any profession, trade or calling within a constituency specified in Schedule III, shall be qualified as an elector of that constituency if such person—
- (b) being or having been the occupier of any premises valued for assessment purposes under this Act or of any portion of such premises has at any time during the year last preceding the year in which the election is held, paid rent for such occupancy for at least six months during the said year at a rate not less than rupees four per month in the case of the premises being a hut in a bustee or at a rate not less than eight rupees per month in the case of the premises not being a hut in a bustee; or
- (d) has passed the Matriculation Examination of any University in India constituted by an Act of a Legislature or an examination; which the State Government may prescribe by rules as at least equivalent to such examination and has ordinarily and actually resided in Calcutta during the greater part of the year last preceding the year is which the election is held."

List of examinations to be considered as at least equivalent to the Matriculation Examination of a University in India constituted by an Act of a Legislature, may be inspected at the office of the Registering Authority, Election Department, Central Municipal Office.

THE THE PROPERTY OF THE PROPER

OIL IN THE MODERN WORLD by Raj Narain Gupta; with a Foreword by the Hon'ble Shri N. V. Gadgil, Minister for Works, Mines and Power, Government of India; with an Introduction by Sir S. S. Bhatnayar, Director of Scientific and Industrial Research; Published by Kitab Mahal, Allahabad; Price Rs. 8/-, 15 S. or 2 dollars.

Oil is an important war potential, it may also serve the country in peace time for its prosperity. The author is of opinion that the oil agreement between America and Britain will not be able to safeguard the peace of the world. The agreement, however, very cautiously worded, brings to the fore "the desire of the oil powers, and specially the U.S.A., to perpetuate their exploitation of backward oil-producing countries". The author approaches the problem in a constructive way. He suggests that the "exploitation of oil resources in a country should be carried on only by its own Government or by its nationals and that the necessary financial and technical aid for the exploitation should be provided by the International Bank of Reconstruction and Development under the aegis of the United Nations".

Opening the book with discussion on the topic of "Importance of Oil in Modern Life", he next describes its origin and production, refinement and geological  $\mathbf{and}$ statistical transportation. His accounts of oil fields in both the Americas, Europe. Iran (Persia), Iraq (Mesopotamia), Arabia, Africa, Persian Gulf States, Burma, Pacific area and India, are very much informative. Oil resources of India worked out till today are principally in two areas in Assam and the Punjab. There are other probable oil-producing areas in the country that need detailed investigation. The exploitation of oil in India is "mostly controlled by non-Indian Capitalists". The total output of oil in the country amounts to less than one-fourth of a gallon per head.

In conclusion the author discusses the various national and international problems attending oil as a source of power. Oil has dominated the arena of power politics in the world since the end of the 19th century.

THE POLITICAL AND SOCIOLOGICAL PUBLICATIONS AND LECTURES OF BENOY SARKER (1928-49)—Compiled by Dilip Malakar; Published by Calcutta Oriental Book Agency, 9, Panchanon Ghose Lane, Calcutta—9; Price Rupse One.

Prof. Benoy Sarkar was a unique personality with his cultural, educational and patriotic activities since the glorious days of the Revolution in Bengal (1905-14). His loss is incalculable. However he has left behind a group of ardent Bengali research workers, of whom the author of the compilation is one and has also left a very rich legacy of books, brochures, notes and reports on topics of rations interest.

and the second of the second o

Frof. Sarkar's publication and other activities in the fields of economies and commerce since his association with the University of Calcutta in 1926 have been described by Shri Satis Chandra Ghosh, Registrar Calcutta University, in a book, entitled the Economic and Commercial Publications of the Post Graduate Teachers of Calcutta University (1948).

These publications may not be of enough interest to ordinary readers but their value to the research scholars is inestimable.

INDIAN ENGINEERING INDUSTRIES: Year Book for 1947-49; Published by Engineering Association of India (affiliated to the Indian Chamber of Commerce) 28/B, Netaji Subhas Road, Calcutta; Price Rs. 16.

This is the third edition of the Year Book. lts main teatures are: an alphabetical list of all the members of the Engineering Association of India; a section on Patents and Trade Mark Regulations; an alphabetical list of Trade Marks and brands of the manufacturing firms in the Association; a buyers' guide; a section on the Tariff Policy of the Government of India; import figures for all important engineering industries from 1985-86 to 1946-47 a section giving names and addresses of forein manufacturers of plants and tools needed by India; and other sections containing valuable information for all interested in engineering industries. There is also a 'who's who' section which gives a brief life-sketch of eminent personalities in the engineering industry.

DEEP SEA FISHING AS A COTTAGE INDUSTRY by U. Shanker Rao: Published by the B.P.M. Syndicate, 87, Monoharpukur Road, Calcutta— 29: Price Rs. 3.

This book is the first in a series of three dealing with various problems of fishing in India on a commercial scale. Writing from his personal survey Shri Rao states that in Bay of Bengal fishing can be developed and operated on the lines of a cottage industry.

For the development of deep sea fishing in India the Rao Plan gives the following suggestions:

(a) fishery survey of India coastal waters, both long and short term, i.e. general survey and survey of certain selected areas; (b) construction of 100 trawler type motor vessels of a standard size; (c) allowing the fishermen the use of motor fishing vessels on easy hire rates; (d) technical assistance to fishermen for construction of rafts; (e) cheap repair facilities and (f) inauguration of rescue service. Demobbed mayal and merchant service personnel may be called upon to assist local fishermen for fishing in the coastal waters.

Success in deep sea fishing is sure to bring down the present day fish price, and since the Rao Plan does not offer any big difficulty to the State in its introduction, it may immediately be given a chance.

(a "MADRAS", (b) "MYSORE CITY"—Municipal Year Books for 1950. "Madras" is an official handbook issued by the Corporation of Madras; "Mysore City" is published by the Tourist Bureau, Lansdowne Buildings, Mysore.

No price is mentioned in case of the official year book of the city of Madras. The Mysore City Municipal Year Book is priced at Annas Eight. The official handbook issued by the Corpora.

The official handbook issued by the Corporation of Madras is edited by the Secretary to Council. The Worshipful Mayor of Madras has "foreworded" it and the "introduction" is written by the Municipal Commissioner. Besides giving "a factual and descriptive accounts of the efforts made by the Corporation to tackle a multiplicity of problems in the administration of the city." also gives a fair picture of the cultural, sanitary and other advances made by the city. The publication is illustrated.

The Mysore City Municipal Year Book is edited by G. L. Swamy, Editor, Mysore Municipal Journal. It gives useful information about the city of Mysore and its municipal administration, and also includes a diary for the year.

## VITAL Statistics

For the City of Calcutta for the week ending 27th May, 1950

CITY OF CALCUTTA (TOWN & SUBURBS)

The total number of deaths registered during the week was 1203 against 1337 and 1414 in the two preceding weeks and higher than the corresponding week of the last year by 495. The general death-rate of the week was 20.91 per mille.

#### Town (Wards 1-27)

The number of deaths registered during the week ending 27th May. 1950 was 1001 against 1100 and 1173 in the two preceding weeks. There were 146 death from cholera, against 201 and 229 in the two preceding weeks. There were 108 deaths from small-pox during the week against 150 in the previous week. There were 7 deaths from influenza against 4 in the previous week. The mortality from fevers and bowel-complaints amounted to 62 and 114 respectively against 68 and 128 in the preceding week. The general death-rate of the week was 19.88 per mille per annum.

There were 63 imported deaths. Excluding these, the death-rate of the Town was 18.63.

There were 150 deaths from respiratory diseases against 150 in the previous week.

There were 45 deaths from tuberculosis against 150 in the previous week.

#### Suburbs (Wards 28-32)

There were nil imported deaths. Excluding these, the death-rate was 28.24.

There were 13 deaths from tuberculosis against 9 in the previous week.

#### CALCUTTA NEWS & VIEWS

THE COMMISSION OF INQUIRY appointed under the Indo-Pakistani agreement on minorities, held its first public sitting at Writers Buildings, Calentia, on the 3rd June last, when the President made a statement explaining the scope of the inquiry and the procedure to be followed by the Commission. Five people were examined.

The Commission consists of Justice Shri P. B. Mukherji (President) and Shri Abany C. Panerjee and Shri M. A. Haque, (members).

Dr. B. C. Roy, Chief Minister, West Bengal, Shri P. C. Sen, Food Minister; Shri S. N. Ray, Chief Secretary; Shri R. Gupta, Home Secretary and Shri S. N. Chatterji, Commissioner of Police, Calcutta; were present during a part of the proceedings.

Opening the session, Justice Mukherji said that the purpose of the Commission was to inquire into and report on the causes and extent of the recent disturbances and to make recommendations with a view to preventing recrudescence of similar trouble in future.

The procedure that the Commission would follow had to be such as would ensure speed, fairness and justice and best serve its aim and object.

SIX MASKED RAIDERS committed a daring robbery in a jewellery shop at Rashbehari Avenue—Fern Road crossing at 11-15 a.m. on Monday, the 5th June. They came in a private car and carried the raid with throwing crackers and firing sten guns and revolvers indiscriminately. Two persons were wounded.

The car that they had used was found the next day lying abandoned in Russel Street. The Police found somjewellery articles in the car. Several places have been searched and four persons have been taken into custody on suspicion.

THE THE PARTY OF T

MATERIAL PROFESSION OF THE PRO

Provided that the Corporation may from time to time revise the aforesaid fees and prescribe in lieu thereof fees at such rates as they

may think proper.

Any person having any objection to the proposed amendment should send the same to the Secretary, Corporation of Calcutta, on or before the 10th of July, 1950, after which date the proposed amendment of the byelaws will be proceeded with further.

R. S. TRIVEDI,

CENTRAL MUNICIPAL OFFICE, The 3rd June, 1950. Chief Executive Officer, Corporation of Calcutta.

#### NOTICE

It is hereby notified for general information, in compliance with the provisions of Section 481 of the Calcutta Municipal Act, 1923, that the Corporation of Calcutta propose to make the amendment noted below in the bye-laws framed under Section 478(33) of the Calcutta Municipal

Act. 1923.

Anyone wishing to inspect the proposed amendment may do so, free of charge, during office hours, on any working day at the office of the Keeper of Records, Central Municipal Office, where a printed copy of the draft amendment will be kept for a month from the date of publication hereof. Copies of the draft amendment may also be purchased from the Keeper of Records, Central Municipal Office, at As. 2 (annas two) per copy.

Draft of the proposed amendment to the bye-laws framed under Section 478(33) of the Calcutta Municipal Act, 1923:

I. That the clauses and sub-clauses 12(b)(i), (ii) and (iii) of the existing bye-laws under Section 478(33) of the Calcutta Municipal Act, 1923, regarding the straying of an animal, keeping, feeding and destruction of an animal and disposal of the carcass and the fees payable for such removal be amended and the following be substituted in place thereof, with effect from 1st July, 1948.

**12**.

- (ii) of clause (a), the fee payable to the Corporation for the removal of the carcass by the owner of the animal or if the owner is not known, by the owner or occupier of the land or premises in or upon which the carcass is found or by the person in whose charge the animal died, shall be fixed as follows:—
  - Rs. As. P.

2 mds. ... 5 0 0 each.

(ii) For medium sized animals weighing between 1 and 2 mds. ... 4 0 0 "

(iii) For animals weighing less than 1 md. 1 8 0

Provided that the Corporation may from time to time revise the aforesaid fees and prescribe in lieu thereof fees at such rates as they may think fit.

Any person having any objection to the proposed amendment of the bye-laws should send the same to the Secretary, Corporation of Calcutta, on or before the 10th of July, 1950, after which date the proposed amendment will be proceeded with further.

CENTRAL MUNICIPAL OFFICE: The 3rd June, 1950.

K. C. LAHIRI,
Acting Superintendent.

Lake Road Market, The 6th June, 1960.

#### CALCUTTA NEWS VIEWS-Contd.

MARINE SERVICES OF THE CALCUTTA POST COMMISSIONERS is being gradually Indianized, according to the Chairman of the Port Commissioners.

In August 1947, when partition took place, 100 per cent of the subordinates in the marine services of the Port Commissioners were Pakistani nationals.

As a result of the ban on recruitment of non-Indian nationals, the posts left vacant in the subordinate marine services by the retirement, resignation or dismissal of Pakis

tani nationals have been filled by Indian matterials and 67 per cent of the deck crows of the river survey, dredger, despatch and light vessels of the Port Commissioners are Indians.

Of the dock (marine) staff 45 p.c. are Indian nationals, and 62 p. c. of the crew of the pilot vessels and 25 p.c. of those in the mooring masters' establishments are also Indian.

Till December 1949, however engine room crew were still 100 p.c. Pakistani; since then 14 p.c. have been replaced by Indians.

#### JUNE 16

TODAY, June 16, 1950, we have traversed a quarter of a century from the most melancholy and mournful date on which the whole of India was shocked to hear about the death of a prince among men, a friend of the poor and the destitute, a leader of cultural an political thoughts, and a hero of his age.

That was an age of heroes and hero-worship. So, when the death news of Deshabandhu reached the city of his glorious activities, the people whom he loved so much at first felt a spell of utter stupefaction. The morning of the second day following witnessed how stupefaction burst forth into a spontaneous homage of love and affection. Those, who saw the scene, have described that the bier floated over a sea of human heads,—"a scene to be recorded in pages of history and the memories of generation."

After 25 years, today where is that age of hero-worship,—that strong feeling of love and admiration for the leader? We face ugly realities of a life surrounded by miseries and destitution. What a great fall!

When the people of this city, dear to their ever-cheerful friend, philosopher and guide, have allowed so much disgrace and disability to be associated with the fair name of their civic Corporation, Time-spirit has worked out a thorough change in its constitution. The change is due, because the change is real.

Deshabandhu, your age is gone, for a process of change is at work. But we fail to understand if the age and the people, when you were, were better and nobler.

# Chronicles Comment

FOOD DRIVES

The Corporation authorities with their Food Inspectors, aided by the Government police force, have very successfully been carrying on drives against exposed, adulterated and unfit-for-human-consumption foodstuffs in the different parts of the city. Out of such drives every day quite a considerable amount of foodstuff, supposed to create injury, even irreparable, to the health of the citizens, is being destroyed.

Apparently, the continuance of such drives will be very much appreciated by all right-thinking citizens, but a little consideration would have led them to suggest ways in which the destruction of so much foodstuff could be avoided. Not that such unhealthy and injurious foodstuff be allowed to be sold but that the vendors and hawkers dare not make foodstuff unwholesome and unhealthy.

If the drives would be associated with on-the-spot trials of the offenders, the Corporation would have gained some income out of fines realized, even deducting all extra costs incurred for the introduction of the system, the public would have gained an experience from the open-air trials and the offenders would have no occasion to complain against the Food Inspectors and the police using their powers injudiciously.

Also, when the suspected foodstuffs are being destroyed in the course of drives, there should be a public information campaign seeking co-operation of the public in making the drives successful. If the public may be kept away from buying, as far as possible, the exposed and injurious foodstuff, this will prove to be the most effective measure taken against the vendors and hawkers. Till there is abundant sale of their commodity the salesmen will remain undaunted about their way of business.

There is still one thing about the present drives that we shall bring under scrutiny. At present, the drives are being undertaken at certain particular hours of the day between 9 a.m. and 12 noon. This standard period should be changed into a variable one. Otherwise, the mischiefmakers will be cautious only for those three specified hours and be merry throughout the rest of the day. We do not think there has been any arrangement for night inspection of foodstuffs, particularly dalmut and sweetmeats which are prepared throughout the night.

#### CONTROL OF BUILDING MATERIALS

Comments have appeared in newspaper editorials and correspondence columns, from time to time, urging Government to decontrol iron, steel and cement. To counteract such comments the Government have informed the public through Press Note that production of iron, steel and cement is still far short of the minimum requirements of the people. Under these circumstances control of these commodities has been found to be necessary and therefore, allowed to be continued in public interest. The moment production equals

the requirements of these commodities, the Press Note states, control would become unnecessary and would automatically end.

In the matter of control on iron, steel and cement, the situation in West Bengal should be considered from the point of view of the requirements for the immediate relief and rehabilitation of lakhs of immigrants and the normal requirements of the other consumers. It is not correct to say that control on iron, steel and cement is being retained in spite of there not being any actual demand for these commodities in the country. The position is just the contrary. It is true that West Bengal is not a deficit zone in respect of iron and steel, but the entire production of iron and steel of this State is to be consumed by the whole of India. The total production of the country as such is to be divided between the various States. Just as West Bengal depends on supplies of various other commodities from other surplus areas, similarly her production of iron and steel is distributed to other parts of the country under a scheme of distribution controlled by the Centre. West Bengal receives periodical quotas fixed by the Centre, which is on the basis of her population and normal requirements.

It is not correct to say that no new houses could be constructed in West Bengal during the past five years due to control over iron and steel and cement recently stated in an Indian language Calcutta daily. It may be mentioned that 75 per cent of the total quota of iron and steel for this State is being distributed for house-building purposes. In the year ended March 81, 1950, 11,888 tons of iron and steel was issued for building purposes in Calcutta and 6,200 tons in the districts. As regards cement for repairing old and constructing new houses in the city of Calcutta, 5,902 perunits were issued for 44,208 tons from May to December, 1948; 18,724 permits for 78,264 tons from January to December, 1949, already 1,845 permits have been issued for 9,841 tons 12 cwt. from January to March, 1950. For the consumers in districts a monthly allotment of 6,000 tons is being issued besides ad hoc allotments made from time to time. In March alone this year 20,000 tons of cement was allotted to West Bengal districts in addition to their normal quota. It is true that the total quota of these commodities for West Bengal falls short of the demand and, therefore, a number of applications have to be kept pending. It will also be appreciated that as preliminary enquiries have to be made before a permit for iron and steel and cement can be issued to an applicant, some amount of delay is almost inevitable. But it will be appreciated that the position will not improve by withdrawal of control until the supply position equally improves.

With regard to cement, it may be stated that the position is fairly easy and permits up to 10 tons are being issued for applicants for repair, even without inspection, so that small consumers have not to wait for these permits very long. Besides, the distribution of imported cement has been made free without reservation of any quantity and this cement is available in the open market without permit. Control over the distribution of indigenous cement is, however, being retained considering the limited supplies available to the State.

Government are doing the Press Note adds, everything possible to see that no unnecessary delay is caused in issuing permits to genuine applicants.

There is no denying the fact that inspite of the good intention of the Government and the continuance of control there is the black market thriving on the apparent disabilities of the public and the urgency of constructional work as at present. Does this condition follow from the existence of control? Or does this condition make control necessary? We are confused to fully comprehend the fallacy. If control is necessary, black market

#### CONTROL OF DRUG SALE

An Act has been framed by the West Bengal Legislature for the control of the sale, supply and distribution of drugs.

Under the Act no dealer or producer shall sell any drug for a price exceeding the maximum fixed by the Government, shall have in possession at one time a quantity of any drug exceeding the maximum fixed by the Government, or shall sell to any person in any one transaction a quantity of any article exceeding the maximum fixed by the Government. Any person having in possession a quantity of any drug exceeding that permitted by the State shall forthwith report the matter to the

Government. No dealer or producer shall without sufficient cause refuse to sell to any person any drug within the limits as to quantity. Every dealer or producer when selling any drug for cash shall, if the amount of the purchase is five rupees or more, in all cases, and, if the amount of purchase is less than five rupees, when so requested by the purchaser, give to the purchaser a Cash Memo containing particulars of the transaction.

The Act also lays down other rules and different penalties for offences of various nature.

#### SAHEED DINESH MAJUMDAR

A MARBIE BUST ERECTED AT BASHIRHAT TOWN

A marble bust of Saheed Dinesh Majumdar was unveiled by Shir Bhupati Majumdar, Minister (Home Defence), West Bengal at Basichat, the martyr's home town, nearly 37 miles from Calcutta, in the afternoon of the 9th June last.

The bust has been placed in the compound of the Basirhar lown liall situated on the Calcutta-Basirhat road.

Duesh Majumdar, who was born in Basirbat in 1908, joined the revolutionary movement in his early boyhood. In 1930, he was arrested for attempting on the life of the then Police Commissioner, Sir Charles Tegart, and was sentenced a transportation for life. In 1932, he escaped from Midnapore Central Jail where he was lodged and again set himself to work with different revolutionary groups. Ultimately the police traced him at a house in Cornwallie Street where after an exchange of bullets with the police he was arrested. He was sentenced to death. Dinesh was executed 16 years age.

Corporation of Calcutta

Preparation of Electoral Rolls.

NOTICE

The attention of the public is hereby drawn to Rule 7 of the rules for the preparation and publication of the electoral roll for the purposes of the First General Election of the Councillors under the Calcutta Municipal Act, 1923, (Bengal Act III of 1923), after the commencement of the Calcutta Municipal (Amendment) Act, 1950 (West Bengal Act XXVIII of 1950), which requires that the lather, mother or husband's name of each elector, as may be appropriate in each case, should be registered in the electoral roll along with the name of the elector.

For this purpose Inspectors will soon be deputed by the Corporation to make a house-to-house enquiry for gathering this information from the electors, and their task would be made easier if the public extended their co-operation.

The preparation of the electoral roll, however, would be greatly facilitated in without waiting for the Inspectors to call on them, persons qualified as electors immediately intimated to the undersigned their father, mother or husband's name, as may be appropriate in each case, for the purpose of inclusion in the electoral roll.

It may be pointed out that by failing to furnish such information an elector renders himself liable to be omitted from the electoral roll.

A. D. KHAN,

Administrative Officer,

Corporation of Calcutta (Registering Authority).

and the second second

INCHARACION CONTRACTOR DE CONT

## Personalia

SHRI A. P. JAIN, Rehabilitation Minister, Government of India, arrived in Calcutta by air from Delhi on Monday, the 12th June, on his first visit to the city since his appointment as Minister.

In the afternoon, he met officials of the Branch Secretariat of his Ministry in Calcutta and had discussion with them about the refugee problem in West Bengal.

Shri Jain visited the Habra refugee colony, about 80 miles from Calcutta, and a women's refugee centre at Titagarh in the morning of Tuesday, the 18th June.

He also met officials and non-officials engaged in refugee relief and rehabilitation work.

He left for Assam on Wednesday morning.

PROF. NIRMAL KUMAR SEN, D.Sc., who is the Head of the Department of Chemistry, Presidency College, Calcutta, and is now in England on deputation by the West Bengal Government, to visit industrial laboratories there and to study the modern scientific crime-detection methods in the laboratories of Wakefield, has been elected a fellow of the Royal Institute of Chemistry of Great Britain and Ireland.

SHRI SHANKER RAO DEO, General Secretary, All-India National Congress, returned to Calcutta on the 10th June last after touring in the company of Dr. P. C. Ghosh, Member, Congress Working Committee seven East Bengal districts, namely, Tipperah, Sylhet, Noakhali, Barisal, Dacca, Chittagong and Khulna.

At a Press Conference in Calcutta on Sunday, the 11th June, Shri Deo, describing his experiences during his tour, said that in East Bengal the Delhi Pact had set in motion certain forces giving opportunity to the two communities to come together and work for certain common objectives. It had provided a chance to the good elements of both communities to combine and try to put down the evil forces.

Everybody he met agreed that the alternative to the Agreement was too horrible to contemplate and that that way lay the ruin of both countries.

One thing he noticed in particular was that every member of the minority community was convinced that the Agreement helped them on all sides. It helped those who wished to go back or those who had always thought of staying there if they could live with honour and in safety.

People, therefore, thought well of those who, whether in India or in Pakistan, were helping to implement the Pact.

SHRI M. C. DAVAR, President, All-India Refugee Convention, arrived at Calcutta on Monday, the 12th June. He met Dr. Shyama Prosad Mookherjee along with Dr. Chaitram Gidwani and Lala Achyuram, M.P.

During his stay in the city he met leaders and visited different refugee camps.

SHRI C. C. BISWAS, Minister for Minority Affairs, Government of India, returned to Calcutta on the 10th June last after a twelve days joint tour of East Bengal with his Pakistan counterpart, Dr. A. M. Malek.

In the course of a statement issued to the Press Shri Biswas said:—

"Nothing would affect confidence among the minorities more than ill-treatment of a returning migrant or keeping him out of his hearth and home:

"Some isolated incidents have taken place even after the Agreement. There has not been any upsurge of violence or rioting in any of the districts which we visited. A most firm and patient handling is still necessary if normalcy and confidence are to be restored."

DR. SHYAMA PRASAD MOOKERJEE, inaugurating the Convention of the workers of the Eastern Zone Students' Welfare League at the Mahabodhi Society Hall on Monday evening, the 12th June, made an earnest appeal to the students and youths of the country to seriously take up the great humanitarian cause of serving the refugees who had come over to West Bengal.

Dr. Mookerjee presided over the East Bengal Refugees' Rehabilitation Convention held in the Calcutta University Institute hall on Sunday, the 11th June

Resolutions demanding resettlement and rehabilitation of East Bengal refugees on a planned basis and their assimilation into the Indian Union were adopted at the Convention.

#### LABOUR APPELLATE TRIBUNAL

To Hran Appeals Out Of Industrial Tribunal Cases

The Government of India will soon constitute a Labour Appellate Tribunal to deal with appeals from the decisions of Industrial Tribunals and other Government adjudication machinery, it is reported in the *Hindusthan Standard*.

The Tribunal comes into being under the Industrial Disputes (Appellate Tribunal) Act, 1950, which received the assent of the President on May 20.

The Appellate Tribunal will consist of persons of the status of High Court Judges and will sit in two or more benches at different centres. Appeals will lie to the Appellate Tribunal from the awards and decisions of Industrial Tribunals, Courts, Wage Boards and other statutory bodies set up under Central and State enactments for the adjudication of industrial disputes.

Appeals will be preferable on questions of law, irrespective of the subject matter of the dispute, but on matters of fact only from awards and decisions relating to wages, bonus, travelling allowance, employer's contribution to provident or pension fund, amounts payable for defraying specialexpenses, gratuity, classification of workmen by grades and retrenchment.

The Act also makes certain incident at changes in the existing law. Central as well as State, relating to industrial disputes, pending the enactment of the Labour Relations Bill 1950.

# CHITTARANJAN'S POLITICAL IDEAL

By S. C. RAY

[This article was written by the late Shri S. C. Ray, formerly Deputy Executive Officer, Calcutta Corporation, in July, 1925, and the same was published in the "Calcutta Review". Here we publish some excerpts from that illuminating article.—Editor.

PROVIDENCE called Chittaranjan at a moment when he was about to be thrown into a political eddy of tremendous force and magnitude which was threatening to form in the immediate future. There was none to pilot the nation to the haven of freedom courageously and patriotically.

Although Chittaranjan is no longer among us, abundant memorials of his finished and unfinished work remain to guide and inspire us in our efforts towards national advancement. But the days are critical and we need a Leader who, with truly patriotic devotion and a clear vision of the future, can guide the nation through tempestuous times yet to come.

#### HIS LOVE FOR FREEDOM

Imagine the strength of the man who could lightly exchange his princely station for a life of stern and penniless patriot. Imagine the lofty morality of the man who repaid his paternal debt after he had been adjudged a discharged insolvent. Imagine the sincerity and truthfulness of the man who said that he could not do two incompatible things at the same time, viz., national work and work for personal gain. He believed that national work could not be faithfully done unless he was freed from all thoughts of self, for money making would so engross his attention that he would be tempted to worship money in preference to his country. Such was his ideal, such was his religion. The object of his worship was not God, but his country—the humanity of his mother land; and his means was renunciation and self-sacrifice.

But perhaps the most conspicuous—the almost unique-place which he occupied in the country and in the sanctuaries of the hearts of the people was due to his love of Freedom. He realised the true psychological significance and implications of Freedom such as no one did in India. Chittaranjan believed as an article of faith that national character cannot be built up without truth, without courage,

without sincerity and without will and determination to do what is right. And, on analysis, he found that the ultimate source of all these great moral virtues was Freedom. Meanness, fear to do right, and to speak the truth, trickery, deceit, cupidity and slavishness are the greatest vices which deblitate and deteriorate national character. Love of material goods makes us bow before persons who enjoy the power to bestow them. Chittaranjan's ideal was that there should be no person or persons in a privileged position able to distribute favours. because those who have it in their power to do so ultimately become our masters and we become their slaves. From our suppliant and dependent position arise those mean and despicable vices which lower men below the level of moral beings. Without courage we fear to speak out the truth, without truthfullness we loose our moral worth, and without moral worth, what remains is bestial; what are we then but irrational and immoral creatures fit to be the instruments of those who possess the moral virtues of character without which a nation is doomed to decay or stagnation. Chittaranjan analysed by reasoning like these that Freedom is the foundation of national regeneration, and it was for this reason that he fought and died for Freedom. So far as the ideal and goal are concerned, vis., that national salvation can be achieved by Freedom alone, there is no fundamental difference between Chitteranjan and Sir Asutosh Mookerjee, methods contemplated by these two great men were, however, divergent. Sir Asutosh believed that the idea of Freedom can be realised by Education, and he accordingly put his heart and soul into the problem of educational reconstruction and development. Chittaranjan, on the other hand. believed that this method was very dilatory and would postpone natural realisation to a very distant date. Preferring, therefore, immediate certainty to a remote possibility he attempted by direct action to strike at the root of bureaucratic influence and power. His attack on the present political system was the only effective form of protest against the bureacracy, which is a negation of liberalism. In the hurly-burly of politics his physical and mental vigour sustained a strain which he was unequal to

bear. He held the bridle very tight but was unable to restrain the power of the multitude. Although his countrymen appreciated his honest, self-sacrificing deal and efforts, they did not support him through the thick of the fight as they ought to have done. There was mental appreciation but no practical co-operation and support. The moral poverty of the people only showed in bright and splendid relief the moral exaltation of Chitterenjan.

#### SOME FEATURES OF HIS CHARACTER

Coming to the debatable features of Chittaranjan's character, I have heard it said that he was a despot—an autocrat, that he insisted on his own views to prevail and flouted the opinions of others. I ask, in this connection.—Is there any leader who is not more or less a despot? By despot I do not mean one who tramples upon the feelings, sentiments and aspirations of others, but one who can focus in his personality those things which belong to others. A leader understands better the wants of the people among whom he works, can formulate their grievances more definitely and clearly, and therefore realise them more vividly than the actual persons concerned. The feelings and aspirations of the masses are vague and inchoate, their grievances undefined, their source untraceable. The leader concentrates in himself the thoughts, feelings and forces of countless people. He can analyse and trace the ultimate sources of their vague murmurings; and when he thinks. speaks, feels and works, he thinks, speaks, feels and works with the will of thousands of men. A leader is not a single but a multiple personality. combining in himself all the persons for whom he wills and acts. He is a stupendous personality speaking the speeches of many people through one mouth, thinking the thoughts of thousands through one mind and working singly with the energies of the multitude. Thus arises the necessity of unity among the people, in spite of a leader, for a leader cannot lead unless he has a united following and enjoys their confidence. A leader can neither speak with the authority of those whom he leads unless the latter, in perfect unison or harmony, choose to merge their identities in the leader, with the proviso that while the leader acts by expressing the inarticulate wishes of the people, the latter see that their wills are not disregarded by the Leader. The personality of a Leader, with a wide vision and consciousness can materialise the feelings and aspirations of the people, focus opinion, and express them in a way which the masses cannot. It has been said that the masses can feel but can not express what they feel. It is the mission of the Leader to give expression to the feelings of the masses, and bring himself in touch with a wider and wider society. A leader is, therefore, an autoerat or despot in the sense that he focuses the minds of human beings in his own mind, and then tries with the strength of the whole people to impress his ideas on a hostile people and against adverse influences. Chittaranjan was a despot because he brought the whole force of his personality upon the bureaucracy in order to convince it of the necessity and value of Freedom and to bring about its realisation.

#### BACKGROUND OF HIS POLITICS

Chittaranjan's politics had a spiritiual background. This is evident from his idea of freedom, which, according to him, is not a material good which can be transferred like notes or coin. The rulers felt that to grant freedom to a people carried with it the surrender of power; and no body, would willingly part with power if he could help it. Chittaranjan's conception of freedom was a spiritual conception. He brought into politics a stern morality—nay, the fervour of religion. He dreaded the manner in which the materialism of western civilisation had a grip on our life and controlled it. He said that in order to loosen this grip and control. Indians wanted freedom—and freedom granted to Indians did not imply a diminution of the freedom enjoyed by Englishmen. Certain things are diminished if they are shared between two parties-such as material goods. If a certain quantity of wealth is shared between two persons each person's share is, of course, less than the original quantity. But Chittaranjan's view was that Freedom was not a material but a spiritual possession. There can be no question of gain or loss in the distribution of freedom. It cannot be reduced by sharing. Like love, or charity or benevolence, it grew by sharing. If you love yourself or your children, it is a narrow love, confined to yourself or to your family. But expand this love, i.e., love your neighbours, love your countrymen, or love the whole of humanity, and the quantity of love in your heart is not reduced but increased. Chittaranjan's political faith was that the freedom of the Englishmen would not be diminished by giving freedom to the Indians, but the total quantity would, on the contrary, be increased. This, our rulers refused to believe, and this was the cause of conflict between them and him. He threw the whole weight of his personality on the side of the party which adopted Freedom as their religion. He held fast to this new religion with a desperate fervour akin to fanaticism—and the heat and scorching light of that fervour consumed him. He fought hard to kill the present political system of India, but the political turmoil and excitement that was generated in the fierceness of the fight killed him.

Chittaranjan's disposition was essentially of a spiritual nature. His whole life is a testimony to this aspect of his character, and he could not rid himself of it, even in the course of his mundane activities. Whether it was politics, or education, or civics or economics, he always stressed the spiritual side; there was always a religious element in his activities, and he endowed every work he did with a fervour akin to religion. His ideal represented the spiritual or deeper side of the nation and always ignored the external, which was the superficial or materialistic side. It was his constant endeavour to infuse temper into the Indian character by his example of self-sacrifice and by his constant and stern warnings and admonitions; and he set in motion certain spiritual forces which have helped to strengthen the national character debased by materialism, superficiality and slavishness to power and influence.

# THE TRIBUNAL'S AWARD

THE dispute between the Calcutte Corporation and its employees was referred, under the orders of the Government of West Bengal in the Department of Labour, towards the middle of October, 1949, to a Tribunal, constituted by Shri S. N. Modak, I.C.S., (Retd.) as Chairman and Shri P. K. Sirkar and Shri P. R. Mukherjee, District Judges, as members.

The Corporation was represented by Shri K. P. Basu, Counsel, Shri T. C. Mitter, Chief Law Officer, Shri B. Basu, First Assistant Law Officer, Shri D. N. Ganguli, Chief Engineer, and Shri Paritosh Mitra, Deputy Chief Accountant. The different trade unions of the Corporation employees, that appeared before the Tribunal, were

- (1) Calcutta Corporation Employees' Association.
- (2) Calcutta Corporation Workers' Federation.
- (3) Calcutta Corporation Jamadars, Peons and Workers' Union,
- (4) Calcutta Corporation Scavengers' and Labour Union, and
- (5) Calcuta Corporation Clerks Union.

It may be recalled that the dispute between the Corporation and its employees had started in 1948. At that time it was referred for adjudication to an industrial tribunal consist at of Shri S. K. Sen, I.C.S., as Chairman and Shri P. R. Mukherjee and Shri P. K. Sirkar as members. That Tribunal was constituted in February and gave their award in July.

After the expiry of the period of operation of the first award, dispute began to arise again and eventually the employees of the Corporation of Calcutta went on strike on and from the 22nd October, 1949. During the strike negotiations for a settlement were held and ultimately the authoritities of the Corporation having agreed to grant 'ad-interim' increase of Rs. 4 per month to all employees drawing pay up to Rs. 300 per month for a period of 12 months with effect from 1st October, 1949, the strike was called off after a period of 4 days.

In the Calcutta Gazette, (Extraordinary) dated, Wednesday, the 31st May, 1950 was published the awart of the Tribunal, binding the Corporation of Calcutta and the workmen to abide by it for a period of one year with effect from the date of its publication.

#### THE TRIBUNAL AT WORK

On the basis of the written statements submitted by the Corporation and the different trade unions of its employees and in the light of the discussions that took place, the following issues were framed by the Tribunal:—

- (1) Minmum basic pay and grades and scales of pay for the different categories of workers from unskilled labour to the clerical and other staff drawing at present pay up to Rs. 850.
- (2) Pay or allowance for apprentices in Entally Workshop.
- (3) Fitting existing employees into the revised scales of pay.
- (4) Dearness allowance.
- (5) Special allowances or benefits.
- (6) Supply of cheap ration.
- (7) Leave and holidays.
- (8) Retiring benefits.
- (9) Staff Benefit Fund for clerks.
- (10) Medical facilities.

- (11) Education facilities.
- (12) Provision for rest and recreation.
- (18) Working hours.
- (14) Conditions of service.
- (45) Dates of payment of salaries and wages.

The Tribunal have recorded their considered views on every one of those fifteen issues. Herein below we give a summary report of the Award as a whole.

#### PAY REVISION

The Tribunal have decided in favour of revision of the pay of certain categories of employees. For the cherical staff the maximum of the lower grade has been raised from Rs. 150 to Rs. 190; for Divisional or Sectional Head Clerks and other clerks promoted after the last award (subordinate higher grade and for Head Clerks and Head Assistants, etc., the minimum and the maximum of the scale recommended are Rs. 180—10—220 and Rs. 220—10—260 respectively. With respect to the last flat

ad-interim increase of Rs. 4 for all employees the Tribunal's decision has been in favour of its consolidation with the basic pay according to a set rules prescribed by the Tribunal.

To avoid certain anomalies resulting out of giving effect to the award in respect of annual increments, the Tribunal have opined that the existing due dates of annual increments should not be further disturbed. So that the junior and the comparatively senior employees are not placed in the same stage of grade, the Tribunal have given their caution as follows:—

"Some complaints about such things having taken place after the last award were made before us. Although we cannot remedy at this stage what happened in the past, we would ask the Corporation to see to it that the principle of seniority in service does not suffer and senior employees are not placed in any permanently disadvantageous position in comparison with employees junior to them."

As regards unskilled labour, the maximum of the standard grade and both the minimum and maximum of the upper grade have been revised, the standard grade being raised from Rs. 25—30 to Rs. 25—34, and the upper grade from Rs. 27—32 to Rs. 30—36. The minimum and the maximum pay of skilled labour in grades starting with Rs. 35. Rs. 40 and Rs. 45 has been increased by Rs. 5 in each case.

The scales of pay of the menial staff have been similarly revised from Rs. 25—80 to Rs. 25—84, Rs. 80—85 to Rs. 84—40; Rs. 85—40 to Rs. 40—45 and Rs. 40—45 to Rs. 45—50.

The Tribunal has given the direction that the scale of allowance as fixed in the Administrative Officer's order with effect from 1st July, 1948, for the apprentices in the Entally Workshop be continued. The position will be evident from the following table:—

|          |       | As pe | r last     | As per<br>Administrative |
|----------|-------|-------|------------|--------------------------|
| **       |       | •     | ard.       | Officer's order.         |
| 1st year | •••   | Rs.   | 20         | Rs. 25                   |
| 2nd year |       | , .   | 25         | ., 80                    |
| 3rd year | • • • | ••    | 80         | ,, 85                    |
| 4th year |       | ,.    | <b>3</b> 5 | ,. 40                    |
| 5th year |       | ••    | 40         | 45                       |
| 6th year | •••   | ,,    | 50         | ,, 50                    |

DEARNESS ALLOWANCE

The capacity of the Corporation of Calcutta to pay dearness allowance does not appear to be much better than what it was during the previous adjudication proceedings, the Tribunal have remarked. There is an understanding between the Government of West Bengal and the Corporation of Calcutta to the effect that the Government will bear a substantial part, viz., 80 per cent of the expenditure on account of dearness allowance, if the Corporation pays dearness allowance on the same scale as the Government of West Bengal pay to their employees. The Corporation has expressed that it cannot increase the scale of dearness allowance above the Government scale, while accepting help from the Government scale, while accepting help from the Government

ment to meet the cost thereof. Under the circumstances the Tribunal have been of opinion that the scale of dearness allowance laid down in the last award should continue.

#### OTHER ALLOWANCES

The Conveyance allowance of certain group of employees has been increased. Demands of employees for free quarters or house rent allowance, city or compensatory allowance, and tiffin allowance have been rejected. However in this connection, the Tribunal have observed that overtime allowance for work beyond normal hours of duty should not be granted unless the period of detention exceeds 2 hours after the ordinary duty hours. Clerks, who have to be detained for more than 2 hours, will be paid allowance at the rates of Re. 1-8-0 for the first two hours or part thereof, Rs. 2 for the third and fourth hours or part thereof, Rs. 8 for the fifth hour or part thereof, and Rs. 4 for the sixth hour and any subsequent period. For work on Sundays and holidays, instead of the existing system of tiffin allowance which seems to be inadequate, overtime allowance should be paid at 11 times the normal

The Tribunal's Award has been accepted in toto with effect from 31st May, 1950. The departments have been asked by the Administrative Officer to give effect to the proposals regarding pay, etc., and to bring up without delay any anomalies that may arise in giving effect to the proposals.

rate of pay inclusive of dearness allowance calculated per hour of such work.

The Tribunal have recommended modification of the existing rule for acting allowance reducing the period from one month to one week, so that employees working in such vacancies for more than a week will be entitled to acting allowance.

#### VACANCIES, PROMOTION, RETIREMENT

The Tribunal have directed maintenance of a list of temporary hands, and absorption of such hands in permanent vacancies as and when required.

On a fair agreement between the Corporation and its employees in respect of promotion to higher posts, the Tribunal have recommended that promotion should depend both on seniority and efficiency, and the Corporation may take into consideration the factor of higher qualifications than the prescribed minimum qualifications in respect of a particular candidate in the course of examining the question of efficiency.

The Tribunal have as previously expressed opinion in favour of reservation of the 25 per cent of all vacancies for the children and dependencies of the employees.

The Corporation having agreed, the last date of payment of salaries has been fixed to be the 20th of each month.

The Tribunal have not recommended any change regarding working hours.

In the matter of food concessions granted to the skilled and unskilled labour staff and to the menial staff the Tribunal's decision confers such concession upon only those of the unskilled labour staff who receive a pay not exceeding Rs. 35 per month. The skilled labour staff and the menial staff will not receive any food concession.

The retiring age for an employee other than menials, which is 55, may be extended for three more years if the Corporation finds to its entire satisfaction that the employee is physically fit. Such extension should be made for one year at time.

In consideration of the existing rule for punishment of the employees the Tribunal consider that insertion of necessary safeguard, as demanded by the employees, should be made. They have directed that the same rules with necessary changes as regards the wording, consistent with the provisions of the present Calcutta Municipal Act, be observed, and definite provisions be made ensuring that an employee would be entitled to receive a charge-sheet as regards the offence alleged to have been committed by him and he would be given proper opportunity to defend his case.

#### FINANCES OF THE CORPORATION

Referring to the financial condition of the Corporation, the Tribunal have remarked that while the cost of establishment was Rs. 91,00,000 in 1939-40, it has gone up to Rs. 2.75,00,000 at present or 55 per cent, of the total revenue. For payment of dearness allowance, the Corporation is given 80 per cent. of the cost by the Government whose share in 1949-50 amounted to Rs. 75,00,000.

The Tribunal have further remarked:-

"We cannot say that the Corporation will be in such a financial position during 1950-51 as to be able to bear any heavy burden of extra expenditure. It has not sufficient funds to spend to improve the civic services and providing better amenities to the citizens.

"The Corporation has been unable to maintain even a reasonably fair civic service. While it used to spend Rs. 12 per capita in 1989.40 on the basis of a population of 2 millions. in 1949-50, the expenditure was Rs. 10 on the basis of a population of 4 millions. We do not think it is possible for the Corporation to provide at present more funds for its employees unless other sources of revenue are placed at its disposal."

The Tribunal have supported the recommendation of the previous Tribunal that shares of certain taxes, such as amusement tax. electricity duty, sales tax, etc., and a higher share of the Motor Vehicles Tax, should be given to the Corporation. Other additional sources of revenue should also be made available to it.

#### A MINUTE OF DIMENT

In his minute of dissent. Shri P. R. Mukherjee

A little over the average per capital income of the villager is the average income of

the rate-payer of Calcutta. Our national income is low, but this is no reason why we should retain more expensive campitages atogive us civic amerities.

"More than 55 per cent. of the revenues of the Corporation, inclusive of doese send specific, is spent on wages. "If more is given there will remain no money to purchase materials in the sak work. We should confine ourselves to the task at adjusting the anomalies in the last award and do nothing else for the present."

While recognizing the financial difficulties of the Corporation, the Tribunal say that the employees must be placed in a better condition to meet hare necessities of life. The Tribunal, however, find themselves unable to advance much on the previous award although they are conscious of the fact that in some cases, from the point of view of the need of the employees, a greater advance may be called for. They have, any way, decided to introduce "moderate elements of advance in some cases".

#### LEGAL INTELLIGENCE

#### DISPUTES BETWEEN A MUNICIPALITY AND ITS EMPLOYEES

COMES UNDER INDUSTRIAL DISPUTES ACT

Has the Industrial Disputes Act any application to a dispute between a Municipality and its employees?

This interesting question came up for consideration before the Chief Justice and Justice Banerjee of the Calcutta High Court in disposing of the two Rules obtained by the petitemers, the Municipal Commissioners of the Budge Budge Municipality, on two applications made under Articles 226 and 227 of the Constitution, calling upon the respondents P. R. Mukherjee, the Tribunal constituted under the Industrial Disputes Act, the State of West Bengal and the Workers' Union of the Budge Budge Municipality, to show cause interalia why the award made by the Tribunal should not be quashed or in the alternative why he should not be estrained from giving effect to his award or from taking any step in pursuance thereof.

It appeared that a dispute arose between the employees of the Municipality and the Commissioners, and following a demand for increase of pay, certain increments were sametioned by the Municipality with effect from the month of August, 1948. It also appeared that two employees of the Municipality were suspended in July, 1949, and later dismined by the Municipality. On the application of the Trade Union representing the workmen the above Tribunal was consituated to enquire into the dispute. In his award the Tribunal directed the Municipality to reinstate the two dismissed employees and the Government also made an order declaration award to be binding on the parties. The positioners then had obtained the two Rules.

Their lordships held that the Industrial Disputes Act did apply to disputes between Municipalities and their employees. It was also held that the employees of a dismicipality were workened any dispute, arising between a Municipality and its employees was an industrial dispute as defined in the Act,

The applications were dismissed with easts.

#### INDIA'S HEALTH PROBLEMS

PROGRESS IN TACKLING THEM

OVER 60 lakh people die in India every year from various diseases. Half of them are victims of malaria and tuberculosis—malaria accounting for 24,00,000 deaths and tuberculosis for 5,00,000.

The Government of India have now 'declared an all-out war on diseases' to check this enormous loss of human lives. In this, they have the active co-operation of the World Health Organization and the United Nations International Children's Emergency Fund—the former providing technical personnel and advice and the latter, equipment.

To start with, six teams consisting of foreign experts are busy in the Uttar Pradesh, Madras, Mysore, Orissa, and Punjab.

#### MALARIAL CONTROL

The Government have begun their programme of malaria control in Uttar Pradesh, Madras, Mysore and Orissa; plague control in Satara and Sholapur districts of Bombay and cholera control in the Tanjore District of Madras.

There is a venereal disease centre in Simla and a child welfare and maternity centre in Delhi.

Over the past four decades deaths due to cholera and plague, according to official statistics, have steadily declined. This is attributed to initiation of largescale preventive measures in the country.

Deaths from cholera which were **448,890** during 1892-96 were reduced to 147,428 during 1987-41 and similarly deaths from plague from 548,427 during 1898-1908 to 42,288 during 1928-88.

#### Tuberculosis

Tuberculosis, which is the second deadliest man-killer, taking a toll of 5 lakhs human lives every year and inflicting another 25 lakhs, continues to impose devastating consequences on the country's economy.

The incapacitation due to tuberculosis, of nearly 30 lakhs of the working population, it is estimated, will adversely affect India's industrial production to the extent of about Rs. 1.240 crores, proceeding from the premise that an average Indian working family of five earns Rs. 825 per annum, which constitutes nearly one-fifth of the total industrial output.

To provide hospital beds and clinical and sanatoria treatment for the inflicted, it will require its, 440 crores non-recurring Rs, 100 crores recurring expenses per annum. The national budget being only Rs, 340 crores, it is nearly impossible to spend this large sum on tuberculosis alone. That is why, the Government have been now taking only preventive measures against tuberculosis.

#### CLEARANCE OF SLUMS

The clearance of slums as one of the measures in the prevention of epidemic disease and particularly tuberculosis has been suggested by some. The cost of that tremendous task on a short term basis is rather prohibitive. The clearance of slums in Madras city alone with a population of 770,000 is estimated to cost about Rs. 100 erores. There are 47 other cities in India and slum clearance in all those cities will cost about Rs. 3.000 crores. This expenditure being beyond the means of the local bodies, it will not be possible to take it up at present.

Rajkumari Amrit Kaur, Health Minister, Government of India and President, Tuberculosis Association of India, addressing the annual general meeting of the Association sometime ago in Delhi, emphasized the need for a "great increase" in the number of clinics and hospital beds as also of doctors and ancillary personnel to successfully fight the incidence of tuberculosis in India. It would, however, take a number of years and would involve crores of rupees to come up to the required standard.

The Government of India and the Central and State Tuberculosis Associations have been concerned over the fact that facilities for diagnosis and treatment of tuberculosis are inadequate in the country and private philanthrophists and non-official organizations should be encouraged to undertake the establishment of institutions by giving financial grants.

#### INSTITUTIONAL TREATMENT

The pressing need of finding beds for those who suffer is at present demanding all the resources available for institutional treatment. Of the many problems facing the tuberculosis patient, the main one is that of finding work suitable to his physical capacity after he had been discharged from a sanatorium or hospital.

There is a great deal of prejudice against the employment of ex-tuberculosis patients by employers of industry, commercial firms and even by the Government. Sound propaganda is necessary to counteract this social stigms which unfortunately attended tuberculosis.

Tuberculosis is a medico-social problem which has to be fought not only by doctors but also by social workers. The Government of India have suggested to all State Governments to train social workers in anti-tuberculosis work at Government expense.

Commence of the property of the second section of the section of the

ale total

Financial stringency is very much hindering the undertaking of large-scale anti-tuberculosis work.

In the face of all discouraging factors the three recent developments promise a fair beginning in the anti-T. B. programme—B. C. G. campaign, establishment of tuberculosis centres throughout the country for training medical staff for anti-tuberculosis work and active colaboration between India and the specialized agencies of the United Nations.

A method for technical production of paraamino salicyclic acid better known as P.A.S.), a specific for tuberculosis, is claimed to have been devised by a former research scholar of the University College of Science, Calcutta.

Dr. N. C. Ganguly, p. sc., who claims to have devised the method, says that benzene is now largely available in India. He has converted benzene into a near derivative of what has in turn, been transformed with the help of ammonia and ammonium carbonate to P.A.S.

The drug, it is stated, is now being widely experimented with in T. B. sanatoria and hospitals in India.

#### LEPROSY RELIEF

The immediate establishment of an all-India body to conduct leprosy relief and control work by scientific methods in India has been recommended by the Leprosy Sub-Committee of the Gandhi National Memorial Trust.

The body—to be named as 'Mahatma Gandhi Kushta Nivaran Samity' (Anti-Leprosy Council)—will conduct relief and control work on the largest possible scale. It will be a central organization co-ordinating all leprosy work carried out in the country by official and non-official agencies.

The Leprosy Council will aim at setting up institutions running along lines of self-sufficiency and rehabilitation of patients giving support to existing institutions and help in their further development and promoting the advancement of leprosy research.

#### SUBSTITUTE FOR BLOOD

The Central Government National Chemical Laboratory claims to have found a near substitute for whole blood or blood plasma.

It has been possible to prepare specially processed pure gelatine which, it is stated, can be used on patients requiring extra strength to overcome shock due to loss of blood.

Experiments on animals are reported to have shown that a solution of this gelatine is capable of creating additional strength to resist shock due to unusually heavy bleeding, without giving rise to any undesirable complications.

Further research is expected to lead to the production of the exact substitute for whole blood or blood plasma, doing away with the difficulties in blood typing and maintenance of blood banks.

WEATHER CONDITIONS IN CALCUTTA slightly improved in the afternoon of Monday, the 12th June after rain and wind-sweeps that prevailed for three days since the day break of the 10th June last. On Monday night there were occasional drizzles. The monsoon thus appeared they year in the city.

Squalls and heavy showers for three days in succession blew away many shop signs, corrugated iron sheds, caused many a mud wall in bustres to collapse, brought down many branches of trees and wrecked many buildings and overhead relephone and electric wires.

SIX TAXI ROBBERY CASES were reported to have encoured in the city between May 22 and June 8. In each of those cases some men engaged taxi cabs in the city and most them driven into the suburbs, where they robbed the drivers and even took possession of the cabs by throwing out the drivers. On Monday morning, the 12th June, a taxi robbery took place in Calcutta.

The race of the city and the suburbs, having been very much autious, recently arrested two of the alleged culprits after a 12 nale chase upto Khardah. One is a Bengali young man and the other a Sikh.

SIX MORE CONSTELLATION FLIGHTS THROUGH CAUCUTTA on the England Australia route have been granted to B.O.A.C. by the Government of India.

The flights will be made at fortnightly intervals and will be in addition to the twice-weekly Constellation service which B.O.A.C. operate between London and Sydney, parallel to the Qantas Empire Airways' services.

The permit has been issued subject to the proviso that BOA.C. will not duplicate their Calcutta-London Argonaut service during the period covered by the six special flights. BOA.C. have given the necessary undertaking.

THE UNIVERSITY OF CALCUTTA have approached West Bengal Government for lending the services of a financial expert under their employ to the University for a period of at least six months to examine the financial position of the University and advise them in the matter, it is learnt.

No decision has yet been taken by the Government in regard to this request,

PETROL RATIONING IN CALCUTTA may be discontinued from July 1. The Government of India have recently decided that in the four port cities—Bombay, Madras, Calcutta and Cochin percal rationing will cause.

The restrictions will be withdrawn gradually in other parts of the country Additional monthly consumption in the lone places after derationing is estimated at 700,000 tons for Calcutta. 200,000 tons for Bombay, 10,000 tons for Madicis and 3,000 tons for Cochin.

PUBLIC HEALTH INSTITUTE at Calcutta will declope into an international centre for maternity and child welfare, according to a declaration by Dr. A. L. Mudaliar, Charmen of the Executive Board of the World Health Organization on his return to Madras recently by air efter attending the third session of W.H.O. at Geneva. He has also added that \$1m. has been made available for the development of the Calcutta institute into an international health centre. He expects the Government of India also to make a proportionate contribution to the centre.

#### HEALTH REQUIREMENTS FOR PERSONS VISITING OR LEAVING INDIA

Month sequirements for gureens widting or desving India by sir or sea are given in a Press Note of Government of India.

As regards entry sinto while, the Government of India have not placed any health restrictions except in regard to Yellow Fever. Health documents are therefore not demanded of any infectious diseases other than Yellow Fever from persons who are in transit (irrespective of the nature and charation of transit) or who seek entry into India. All persons are showever advised to be protected against small-pox and cholera according to international requirements and to possess volid certificates of vaccination and inoculation.

Persons who are infected or suspected to be infected with yellow fever, plague, cholera, typhus (louse\_borne) small-pox, chicken pox, carebrospinal memingitis, diphtheria, relapsing fever, influenzal pneumonia or who have been in contact with any such disease are liable to undergo such sanitary measures as may be applicable to them on strival.

All persons leaving India for a place beyond India by sea or air will be medically examined by the Port Health Officer or the Airport Health Officer concerned. Persons in whom such medical examination discloses symptoms of any of the infectious diseases mentioned in the first paragraph above will be prohibited from embarking in any vessel or aircraft. Further, persons in such relation with a person displaying the symptoms of one of the diseases referred to above as to render them liable to transmit the infection in question will be prohibited by the Health Officer from embarking. These provisions do not, however, apply to a person who is suffering from an infectious disease and who

There are special provisions (relating to small-pox and cholers) applicable to persons leaving India by see or are for Iraq, East Africa, South Africa and Saudi Assbia. In addition to the medical examination referred to above, all persons proceeding to these countries are required to be in possession of valid certificates of vaccination against small-pox and modulation against cholers signed or countersigned by a medical officer in Government or Municipal

It may further be noted that small-pox vaccination certificate becomes valid 14 days after vaccination and its validity lasts for a period of 3 years; cholera inoculation lasts for a period of 6 months. Cholera inoculation should, however, be taken in two doses with an interval of 7 to 10 days between the two doses and the certificate becomes valid 7 days after the administration of the second dose.

The certificate should preferably be obtained from a Government or Municipal institution on the prescribed international form daily aggreed by a medical officer in Government or Municipal employ indicating his designation and bearing the stamp of the office of the issue. Certificates issued by private doctors are also acceptable provided they are countersigned by a medical officer in a Government or Municipal institution as indicated above.

No health restrictions are, however, applicable to persons travelling by sea or air, exclusively between India and Pakistan, since India is maintaining status quo with Pakistan since partition in regard to quarantine restrictions.

#### HOUSE DRAINAGE-NEW CONNECTIONS

The following House Drainage Plans showing new sewer connections have been sanctioned:--

#### WATER TRANSPORT CREWS

#### TRAINING CENTRE OPENED IN CALCUTTA

Arrangement has been made by the Government of West Bengal for the training of Indian nationals in various categories of Inland Water Transport crews. A training centre has accordingly been opened at Bridge Home, 3, Garden Reach Road, Calcutta, under the administrative control of the Director General of Transportation, Government of West Bengal and under the executive charge of the Principal Officer, Mercantile Marine.

The aim of the scheme is to train up as many persons as can be absorbed in various crafts belonging to Government and Port Commissioners. Batches of 100 trainees are being trained at a time. Free fooding and lodging are provided to the trainees while under training. Besides, a stipend of Rs. 10 is also paid to each trainee. The normal period of training for the lower categories of Deck and Engine room staff in vessels is four months, after which period the trainees will be absorbed in respective categories in river craft, where, while working and gaining practical experience, they can gradually qualify for higher categories of staff in Inland, Water Transport. Advanced courses for theoretical study for such courses will also be provided in due course at the centre.

Candidates who are willing to avail themselves of the opportunity of the training facilities, should apply to the Principal Officer, Mercantile Marine through the Regional Director of Resettlement and Employment, 28, Theatre Read, Calcutta or the Regional Employment Exchange, 5, Council House Street, Calcutta (Press Note).

#### Disposal of All Clothings of the Dead

NOTICE

In compliance with the provisions of Section 481 of the Calcutta Municipal Act, 1925, it is hereby notified for general information that the Administrative Officer of the Corporation of Calcutta proposes The 15th June, 1950

to make the following bye-laws under Section 478 of the said Act for regulat-ing the disposal of all clothings, bed-dings, etc., brought at the Burning Ghats or Burial Grounds or other places for the disposal of the dead along with dead

1. Every person bringing a corpse of a deceased person for burial or cremation or for disposal otherwise to a burial or therming ground or other place for disposal of the dead, and particularly the person signing the Register of Deaths as an informant, shall cause all clots, bedding and other articles, which are brought to such ground and which have come in contact with the dead body or the bier, to be destroyed to the satisfaction of the Sub-Registrar of the said burial or burning ground or other place for the disposal of the dead.

2. Any such person desirous of making

ing ground or other place for the disposal of the dead.

2. Any such person desirous of making a gift of new or unused clothing, bedding or other articles to priests, barbers, domes or such other persons shall bring the same in such manner as not to be in contact with the dead body or the bier and may give away the same with the permission of the Sub-Registrar of the said Bural or Burning Ground or otoher place for the disposal of the dead. The decision of the Sub-Registrar that the clothing, hedding or articles proposed to be gifted is or is not new or unused and has or has not come in contact with the dead body or the bier shall be final.

3. Every person found guilty of a breach of any of the foregoing bye-laws shall be punished with fine which may extend to Ropecs One Hundred.

A printed copy of the bye-laws is open to public inspection free of charge, It fee of annus two from the Kasper of Records, Central Municipal Office, on any working day between the hours of 12 noon and 3 p.m.

Any person having any objection to the

Any person having any objection to the proposed bye-laws should submit the same on or before the 18th July, 1950 after which date, the proposed bye-laws will be further proceeded with.

R. S. TRIVEDI, Chief Executive Officer

#### "DISGRACE ABOUNDING"

CALCUTTA today stands disgraced and humiliated. Who threw the first stone at it, it is difficult and almost impossible, today to discover. The 'Bustees' and 'Khatals' of the city have long received indignation of the citizens and the City-fathers. But "Calcutta Stinks" slogan was in the air during the time when the City became the base of war in the Far East. No body considered the reasons why the Civic Corporation failed to work properly but blames were showered on it in a chorus composed of voices of the foreigners on visit and of the permanent residents in the City. The then Governor of the Province, Mr. R. G. Casey, having taken some interest in the matter, the 'Statesman' kept the fire burning for a considerable period. Besides writing editorials, giving illustrated news-stories on the subject, publishing letters from the readers, it in the end published a compilation of all published matters and called it "Filthy Calcutta".

The hall thus set rolling gradually gained enough momentum to strike against the Corporation with a great force. This impact virtually brought down the whole structure to dust. And lay exposed many

"little" practices that had remained in shade.

The thorough examination by the Corporation Investigation Commission into the corrupt practices that had formed cesspools in the dying stream of our civic life, were brought to light. We agree that the stream should be excavated and new water should be allowed to flow in. But what has pained us most is the lurid joy that some of our contemporaries have found in the bare exposition of certain features of mal-administration in a great institution whose association with our social and political life was till the other day very close and intimate.

Another great institution of this City representative as the Corporation of Calcutta of our cultural life, has suffered in the same manner. It is the University of Calcutta.

It is unfortunate how both great institutions of the city have been disgraced and humiliated. We do not say that there was no cause for such a drastic step. But it would have been better if the maladies were treated privately, and our contemporaries abstained from playing up the defects of two very outstanding institutions in the City.

Blame is due to us no doubt but for chastising us in the public the City has lost, who knows for how long, two of her best treasures. Loss of public respect and admiration for the Corporation and the University of Calcutta will mean the loss of our total prestige, nationally, socially,

culturally and what not.

Now, may we request our contemporaries to suggest how lost honour has to be regained. They are surely not going to lose the institutions for all. And what have they done to restore them to a new life?

### CHRONICLES & COMMENTS

## CORPORATION FINANCES AND EMOLUMENTS OF EMPLOYEES

NDUSTRIAL disputes and Tribunal awards have been a very common feature of our presentday economic life. Recently, the High Court of Calcutta has given a judgment to the effect that all disputes between the employees and the municipal (Local Government) bodies should also come under the purview of the Industrial Tribunals. Now that the different Tribunals are differently constituted, although with members of judicial experience, their awards have been widely divergent. Such a conflicting state of affairs has led to further complicated situations and instead of satisfactory agreement between the employers and the employees there have been occasions of greater disagreement. By a recent Act of Parliament the Government of India have proposed to introduce a uniform principle in the adjudication and award by an Industrial Tribunal. There will emerge out Appellate Industrial Tribunals under the control and guidance of the Central Government to introduce a uniformity of decisions.

This Act of the Central Government records a progress in the system of Government arbitration of disputes between the employers and the employees but it also reveals an inherent defect of the system.

It is not always possible for a Tribunal, sitting over a certain length of time and hearing the views of different interests, and also considering the various aspects of the dispute, to thrash out a solution that will permanently abide. Even then there have been occasions when the judges of the tribunals have differed among themselves. All these factors often go to weaken the decision of Industrial Tribunals to a great extent.

A dispute arose between the Corporation and its employees in 1948. When all attempts to close up the dispute were in vain the matter was referred to an Industrial Tribunal that after deliberations for about 6 months gave its award.

This award did not please the employees equally and soon after the expiry of the one-year period of the award they started grumbling and ultimately a strike resulted in October, 1942.

Again the renewed dispute was referred to another Tribunal composed of the same members, except the Chairman. The Tribunal considered fifteen main issues of demand for over 7 months and has given its award. The Corporation authorities have accepted the award in toto and have given an immediate effect to it.

Demands and their fulfilment in economic as well as in every other sphere of human existence are in an eternal see-saw. Let the employees of the Corporation find their solace in the Award, such as it is, and settle down to a period of solid united effort to improve the civic administration and hope for better days when the finances of the Corporation will be augmented. Just at present whatever the pressure of demand the finances of the Corporation simply cannot bear it.

Through a dark alley of despair the the Tribunal worked out its way to hope and encouragement. The Tribunal observes that whatever difficulties may stand before the Corporation it has to see that the employees are able to meet bare necessities of life. None will gainsay it.

And, working within its own inherent limitations and the limitations provided by the precarious state of finances of the Corporation the Tribunal has been able to introduce some "moderate elements of advance in some cases" only.

While taking note of the very sympathetic attitude of the Tribunal towards the employees of the Corporation one cannot miss the note of dissent of one of the three constituting the Tribunal. And this note ends with an emphatic expression as this:

tion of Calcutta to serve the rate-payers and to give them better amenities for the enhanced taxes. If the wage and pay structure be increased year after year, I am afraid, there will be little left out of the funds to provide for civic amenities to the citizens of Calcutta. Any further increase in the pay structure may prove to be the last straw in the camel's back and it is likely to break down the financial structure of the municipal administration of the premier metropolis in India."

We do not believe that increase in pay of the employees will go in vain; they will surely find more encouragement in their respective roles of civic service. But, we cannot be assured of a general satisfaction among the employees and the Tribunal has itself admitted it.

The award of the Tribunal is more or less an award of compassion, and we do not blame it for having been drawn to clamours that rose high. Now, it would be the sympathetic consideration of the authorities to standardize grades of pay of the employees of different categories following the way in which the Tribunal moved in "some" cases, as it admits. There are cases in which the maximum pay of some employees in the clerical staff equals the starting salary of certain heads of departments. There are grades that reach the maximum in 4 to 5 years and the employees in such grades are virtually stuck up for years and years.

The Tribunal was not however invited to set up a reasonable, just and equitable pay-structure for the employees of the Corporation, they were called upon, so to say, to consider the grievances of employees drawing pay up to Rs. 300.

But have not prices of food-stuff and all other articles gone up four times in the case of those employees also whose pay happens to exceed Rs. 350? Their grades have in many cases remained unaltered during the last 25 years though two World Wars have come and gone in the meantime. Why shall they not also receive some small consideration or commiseration from the authorities?

Since the Corporation has no adequate funds proper and equitable emoluments may not be given to its employees. This is an attitude of defeatism. We must find sources of income that will give us enough money to pay the employees well and also to give better service to the ratepayers of Calcutta.

The Corporation may at best tax a resident of Calcutta in two ways—for rates and license fees the Motor Vehicles Tax being not considered). But one pays taxes to the Government in several ways and nobody grudges such paying. Whereas a rise in rates raises hundreds of voices in protest.

If the Government make over shares of taxes on amusement, electricity and sales to the Corporation, if octroi duty may be brought into vogue, if municipal trading is arranged for and if every person enjoying civic amenities in the city is made to pay something to the Corporation we can say that the institution shall recover from the present pecuniary jaundice, and shall have a long, healthy life.

MIDDLES

### CALCUTTA PAYS HOMAGE TO THEM

### **DESHABANDHU DAS**

MEMORY of Deshabandhu Chittaranjan Das was respectfully recalled at different functions held in Calcutta on the occasion of his 25th death anniversary on the 16th June last.

A meeting was held in the morning at Keoratala burning ghat in front of Deshabandhu Memorial Temple. Speakers at the meeting exhorted the youths of Bengal to draw inspiration from the life of Deshabandhu and courageously face the crisis confronting the Bengali race.

The Mausoleum was decorated with flowers and foliage on the occasion with a garlanded marble bust and a portrait of Deshabandhu placed inside. A large gathering of men and women was present on the occasion. Wreaths were placed at the base of the Mausoleum by different institutions, organizations and individuals.

Presiding at the third anniversary meeting of the Bangiya Palli Sangathan Samity held at the Samity's premises at Beltala Road. Bhawanipore in the evening of the 16th June Shri Sures Chandra Majumdar, M.P., referred to the activities of Deshabandhu C. R. Das. He said that Deshabandhu estood in the forefront of the great men who were born in Bengal, nay, the whole of India during the last 150 years. The speaker regretted that sufficient attention had not been paid to propagate Deshabandhu's life-story among the people.

Deshabandhu was a true Bengalee. Though he was trained and educated in European traditions and led his life according to European ways in the first part of his life, later he gave up a life of luxury and opulence and began to lead the life of a simple Bengalee. He found the true picture of Bengal and wrote many articles on that.

### **ACHARYYA RAY**

O'N the occasion of the sixth death anniversary of Acharyya Prafulla Chandra Ray, a meeting was held in the Senate Hall, Calcutta, on the 16th June last. Presiding over the meeting Dr. Syama Prasad Mookerjee observed that it was meaningless for the people to hold anniversary meetings in memory of great men unless they were imbued with their examples.

If every Bengali, said Dr. Mookerjee, could imbibe even a fraction of the qualities which Prafulla Chandra possessed, and which made him loved and adored by the people, they would be able to dispel the darkness which had now encompassed them and would be able to rise again and hold their own.

Prafulla Chandra was great not only as a scientist, but also as a humanist and as a social reformer. An enemy of social injustice, he could always face danger bravely.

He practised in his life what he preached. He always exhorted his pupils to be self-reliant, and self-reliance was one of the secrets of his success. He was sometimes criticized by a section of people as being provincial because of his love for the people of Bengal. All his activities, including his scientific researches, were directed to the welfare of the whole country. What he wanted was that Bengal should be prosperous and strong in every sphere.

Shri Hemendra Prasad Ghosh, Dr. B. C. Guha and Shri Chapala Kanta Bhattacharya also addressed the meeting.

## **Personalia**

### DR. A. M. MALIK

Dr. A. M. Malik, Pakistan Minister for Minority Affairs, arrived in Calcutta from Dacca by train on the 16th June last and was met at Sealdah Station by Shri C. C. Biswas, Minister for Minority Affairs, Government of India.

In the afternoon, Dr. Malik and Shri Biswas together saw Dr. B. C. Roy, West Bengal Premier, at Writers' Buildings and had over two hours' talk with him.

Dr. Malik, in a broadcast talk in the evening, assured his listeners both in India and Pakistan that the "disease" they were dealing with was curable and "we believe that the crisis is over and the situation is definitely under control."

Dr. Malik and Shri Biswas left for Gauhati by air on Sunday, the 18th June.

### SIR J. C. GHOSH

Sir Juan Chandra Ghosh, Director of the Indian Institute of Higher Technology, Government of India, has been invited by UNESCO to attend an educational experts' conference to be held in Paris on June 26. He left Calcutta on the 17th June last.

The Indian Institute of Higher Technology of which Dr. Ghosh is the Director, is to be located in Hijli in West Bengal.

### SHRI A. P. JAIN

Shri Ajit Prasad Jain, Minister of State for Rehabilitation, Government of India returned to Calcutta in the evening of Sunday, the 18th June, by air after four days' tour of Assam.

The following day he paid a visit to a refugee settlement at Majherchar near Kancharapara.

The Indo-Pakistan agreement assumed that normal conditions between the two countries would be restored and migrants on either side would have sufficient confidence to go back to their original homes, said Shri Jain at a Press Conference in Calcutta on Tuesday, the 20th June.

"But that does not mean," Mr. Jain added, "that we are going to withhold rehabilitation programmes. We are going ahead with our plans for those refugees who want to stay in India."

He pointed out that before January this year there were over 1.100,000 refugees in West Bengal, 25,000 in Assam and 85,000 in Tripura.

### DR. S. K. GANGOPADHYAYA

Dr. Sudhangsu Kumar Gangopadhyaya, (Gold Medalist) has stood first with distinction in T.D.D. Examination at Cardiff University, Wales. He is the first Indian to achieve this honour. After

graduating from the Calcutta Medical College, he entered Government services and during the last war he was called to Military Services and was promoted to the rank of Major and worked as a Tuberculosis Specialist in the Military Hospital in Kirkee for more than three years.

With the opening of the Kanchrapara T. B. Hospital he became Superintendent of that Hospital till September, 1949, when he left for England for further study in Tuberculosis with a Government stipend.

### EX-EMPEROR BAO DAI

Ex-Emperor Bao Dai, accompanied by M Tran Van Huu, Premier of Viet Nam, passed through Calcutta on Tuesday, the 20th June, in a special Constellation on his way to Paris to attend the Inter-State Conference which begins there on the 27th June.

In the party were also M Nguende, the ex-Emperor's Chief of Staff, Mme Tran Van Huu and her children, two Viet Nam Cabinet Ministers and several advisers.

Bao Dai was met on his arrival at Dum Dum by M. Detrie, the French Consul-General in Calcutta, and Mme Detrie, and M. Phamchu of the Viet Nam Buddhist delegation to India.

No representative of the Governor or of the West Bengal Government was present at the airport to meet the party, since India had not recognized the Viet Nam Government. Elaborate security measures were however taken to protect the Ex-Emperor and other members of the delegation.

### PLAGUE DEATHS

With somewhat relief being afforded by the cholera and small-pox cases being brought under control occurrence of Plague cases in the city since the middle of May last, though their number has not at all been alarming, has brought in a new apprehension. The first plague case was reported from the Burra Bazar area; two other cases after that were reported within a fortnight from the Mechuabazar and Daihatta Street areas. There was no plague case reported during the week ended the 17th June last.

Anti-plague measures are being taken by the Plague Control Office of the West Bengal Health Services in areas from which plague cases were removed. These include rat collection, fumigation, cyno-gassing and mass inoculation against plague.

The Government of West Bengal have sametioned the continuance of the plague control schemefor the current financial year also, it is learnt.

The Director of State Health Services is reported to be of opinion that though the present anti-plague scheme has been a small one there is necessity of retaining such an organization throughout the year as plague appears to be new endomicin Calcutta.

### CALCUITA : OLD & NEW

## Michael Dutt Street

[By B. V. Roy]

in the Kidderpore locality (Ward 26) where the great poet and dramatist of Bengal, Michael Madhasudan Dutt, once lived. Michael is known and honoured principally as the writer of the epic poem "Meghnad-badh" in which he introduced metrical blank verse for the first time in Bengali literature. (In a later period, this type of verse was used by the great actor and dramatist Giris Chandra Ghosh with admirable effect in many of his dramas).

### LIFE & CAREER

Buckland, in his "Dictionary of Indian Biography" gives the following account of Michael's life and career:—

"Son of Rajnarain Dutt, a pleader in the Sudder Court, born on 25th January, 1824, Educated in Hindu College under Derozio. When his father wished him to marry, he ran away to the Missionaries and on 9th February. 1848 was baptised as a Christian. Remained at Bishop's College 1843-47, then went to Madras where he lived in great poverty. Returning to Calcutta in 1850 he became an Interpreter in the Police Court. Went to England in 1862 and was called to the Bar. Practised at Calcutta Bar from 1867 but without any marked success. His improvidence and failings ruined a promising career, and he died in a charitable hospital in Calcutta on 29th June. 1878. In literary circles his memory is treasured: he helped to promote a national drama and theatre, produced some meritorious dramas, farces and poems. Enjoyed considerable reputation as a writer of Bengali blank verse, which he created and introduced into the language. He was well acquainted with several European and Oriental languages besides Greek and Latin."

As a condensed sketch of Madhusudan's life this is admirable—so far as it goes. There are necessarily many gaps in it and I will try to fill in some of the details.

Considering the state of Hindu Society at the time (early 19th century) it is no wonder that his father Rajnarain disavowed Madhusudan when he embraced Christianity, though his mother Jahnavi Debi continued to help him, surreptitiously with money as long as she lived. In Madras. Michael worked as usher in an orphanage for European children named the Madras Male Asylum, for a mere pittance. Here he married (in 1848) Rebecca, the daughter of a Scot indigo-planter, against the wishes of her parents. Rebecca bore two sons and two daughters, of whom one each survived her. Of the daughters very little is known, but the surviving son named McTavish Dutt is known to have practised for some time as a pleader in the Madras Small Causes Court. Michael's life with Rebecca was not a happy one, and disagreement led to divorce proceedings in 1865.

in the following year (1856) Michael for the second time married a lady of French extraction known to biagraphers as "Henrietta," who bore the Christian names Emilia Henrietta Sophia, but whose family name is not definitely known. At about the time Michael married her, there were two teachers in the Madras Presidency College who here French names, viz., A Dique and L. Dique. has been presumed that one of them was the father of Henrietta. The lady was of an admirable character, sharing willingly her husband's sorrows, and his staunch associate in all his penury and distress, thus closely approaching the ideals of Hindu wifehood. She was also a talented lady. and adept at the piano, and she learned the Bengali language so well as to be able to read her husband's greatest work "Meghnad-badh" in the original. Michael's class-mate and life long friend Gourdas Basak once wrote: "He (the poet) was as happy in her company as is possible in this world, and she was as faithful as Sabitri herself.

### GOES TO ENGLAND

The poet went to England in 1862, his wife following him soon after. From there they went to Paris where they got into deep financial difficulties, so much so that they would have starved to death but for the generous help extended to them by Pandit Iswar Chandra Bidyasagar. They went back to England in 1865 where Michael met W. C. Bonnerjee who had also gone there to study for the Bar. Michael returned to India in 1869, and his subsequent history is a story of hardships and privations which finally undermined his health so much and reduced him to such penury that he died in a charitable hospital in Calcutta on 29th June, 1878. His devoted wife Henrietta predeceased him by three days, as she died on 26th June, aged only 27 years.

Of the three children borne by Henrietta during her brief span of married life —

- (1) the eldest was a daughter named Henrietta Elizabeth Sarmistha, born in 1859. She was twice married, first to W. W. Floyd, and then to W. B. Nyss. By the latter she had one son. William Brightman Nyss. She died aged only 20 years, in 1879;
- (2) son named Frederic Michael, born 18th July, 1861, showed great promise as an artist from early childhood, but died at the age of 18 only.
- (8) son named Alber: Napoleon, educated at St. Xavier's College, joined Government service, rose to the Assistant Sub-Deputy opium agent at Lucknow, died aged 40 on 22nd August, 1909. A few of his children survived him.

### DEBT TO MADRUSUDAN

Bengali literature and the Bengali Theatre both owe a deep debt of gratitude to Madhusudan, first for his introduction of blank verse, and second for his giving the Bengali drama a new construction and a new shape, discarding the age-old canons of the Sanskrit drama as laid down by Krishnadas Kabiraj, and adopting the English or Shakespearean model. In the mid-nineteenth century there was great activity in the production of plays in amateur theatres, for which the wealthy and cultured people of Calcutta spent both money and energy on a lavish scale. Unfortunately, however, they had to fall back on translations of old Sanskrit dramas for their productions, and hardly any original dramas were written in Bengali until the appearance of Michael Madhusudan on the scene. The Belgachia Theatre was established in 1858 at the garden-house of Maharaja Jotindra Mohan Tagore, through the joint efforts of the Maharaja and Raja Iswar Chandra Sinha of Paikpara. A Bengali translation of Sriharsa's "Ratnavali" by Pandit Ramnarain Tarkalankar was the first play produced at this Theatre, for which neither money nor efforts were spared. The dramatic director was Keshab Ganguli, a friend of Michael, who later became Superintendent in the Controller-General's office. (Keshab also acted in the role of Vasantaka in the play). The

performance was attended by Michael and his friend Gourdas Basak, and Michael deplored the fact that so much money and energy was spent on such a trashy drama. He was put on his mettle and challenged to produce "something better". This he did, writing his drama "Sarmistha" in two weeks' time, which was produced at the Belgachia Theatre on 3rd September, 1859 in the presence of a representative gathering of Indians and Europeans.\* Michael followed this up by writing several more dramas and farces, notably a drama named "Krishna Kumari" which was produced in 1861. It may be mentioned that in this play the role of Bhim Sinha was acted by Beharilal Chatterjee who later, on the establishment of the "Bengal Theatre" in 1878, joined it as actor-manager-play wright and continued there up to his death in 1901. The first play put on the stage of the Bengal Theatre was Michael's "Sarmistha".

The views of Madhusudan, deploring the vitiated taste of the times, and making a passionate plea for a newer and better standard of the drama, were expressed by him in the opening song of "Sarmistha" composed by himself.

### HEALTH & HYGIENE

### Public Health Facilities In Soviet Russia

[By ALEXANDER SHABANOV, Deputy Minister of Public Health of the U. S. S. R.]

Soviet Russia has displayed profound solicitude for the health of the working people. The recent years have seen the growth in the U.S.S.R. of a wide network of hospitals, clinics, dispensaries and other medical institutions. As compared with the pre-revolutionary days the number of hospital cots in the country has increased seven-fold, and the number of polyclinics and dispensaries 16-fold.

Especially striking are the advances of public health protection in the national republics, which prior to the revolution were backward outskirts of Czarist Russia. Georgia, for example, which in 1918 had only eleven dispensaries and polyclinics all told, today boasts about 400 such institutions. On the vast territory of modern Kazakhstan there were 1,800 hospital cots in 1918, as against over 25,500 in the Kazakh republic to-day.

### NETWORK OF MEDICAL INSTITUTIONS

Hospitals, polyclinics and maternity homes have appeared in remote districts of the country, where they were entirely unknown before. For example, the population of the Koryak national area on Kamchatka now has at its service tens of hospitals and dispensaries, 81 medical stations and six children's creches. Prior to the revolution there were six small, poorly-equipped hospitals in Buryat-Mongolia; today this republic has 78 hospitals, 20 maternity homes in the collective farms, 129 dispensaries, 201 stations serviced by midwives, 42 women's and children's consultations, and 80 children's creches.

The difference between the medical aid available in the big cities and in the rural districts is gradually being effaced in the U.S.S.R. The planned development of the network of medical institutions, the even distribution of medical personnel

and the centralized leadership of the entire work of public health protection make possible a wide and universal application of the latest findings of medical science.

The system of Soviet public health service is built along the lines of Administrative units and industrial enterprises. Each district of the U. S. S. R. has its district hospital staffed with surgeons, therapeutists, pediatrists and other specialists. In addition, there are rural hospitals catering to smaller areas.

Plants and mines have their own hospitals, clinics, medical stations and other medical institutions. Medico-sanitary department existing in large industrial enterprises give medical and prophylactic treatment to the workers, check up on their state of health, take part in putting through summer health measures and in sending workers to resorts and rest homes.

### PROPHYLACTIC TREATMENT

The basic principles of Soviet public health service is prophylactic treatment. Wide-scale prophylactic measures are carried out by the state sanitation organisations and district physicians. The organisation of public health work by districts gives the physician the opportunity of systematically following the course of his patient's disease through all its stages and of taking the necessary measures. Early diagnosis and correct treatment make possible the timely recognition of a disease and its rapid cure.

Soviet public health organizations make wide use of aviation to keep up constant connections between clinical institutions and remote rural hospitals. The R. S. F. S. R. (Russian Federation) alone has 82 medical aviation stations ready

at a coment's notice to answer the call of rural Flights are made both to accord first aid, and to give medical consultations to physicians on the woot.

The number of scientific-research and educational institutions in medicine in the U.S.S.B. is rapidly growing, and giving the country tens of thousands of additional specialists every year. By the and of 1949 the number of doctors in the Soviet Union had increased 12-fold, as compared with prerevolutionary times.

Soviet medical science has achieved considerable successes in recent years. There are to-day about 850 medical research institutions, headed by the U. S. S. R. Academy of Medical Sciences. The numerous army of Soviet physicians includes over 10,000 Doctors and candidates of Science.

Physicians in the Soviet Union are given all opportunities for continually raising their qualifications. For this purpose they can attend the regular gatherings held at urban and regional hospitals, as

well as special Institute for raising Physicians' qualifications, institutions whose like is not known in any other country.

The vast increase in the network of medical institutions, the improvement of their equipment, and the growth of the number of skilled doctors leads to the constant improvement of medical treatment in the U.S.S.R. As a result, sickness is on the decline in the country, and the physical condition of the youth is improving with each passing year. Many serious diseases, such as small-pox, plague, and cholers, which were such a terrible stourge for the population of Czarist Russia have completely disappeared from the Land of Socialism.

All expenses connected with the organization and upkeep of medical institutions in the U.S.S.B. are borne entirely by the State. The government appropriations for public health amounted to 21,600 million roubles in 1949 alone. All forms of medical aid are at the service of the Soviet population entirely free of charge.

### ENGINEERING & ARCHITECTURE

### Calcutta Traffic

### Some Suggestions For Improvement

[By BIJOY RATNA MAJUMDAR]

THE Calcutta public are becoming increasingly concerned at the chaotic state of traffic in Calcutta and at the mounting number of the injured. maimed and killed. This is undoubtedly a good sign, but surely this is not enough. Every one reading this article (and it is hoped that there will be many) will pause while reading in his newspaper of a road accident where someone has been injured or killed, and should feel that the victim might have been himself, or his wife, or child. It is too late to become critical of our traffic control when a loved one is lost. It is necessary now for the citizens of Calcutta, whether they be pedestrians or bus-or-tram riders or owners of private cars, to look to the safety of their own and their families and to insist upon bringing in the very near future the traffic control system of our city into line with that in other great cities.

### THREE CAUSES

As I see it, there are three causes of the bad traffic conditions in Calcutta:

(1) Lack of public interest,

(2) Lack of interest by the Government and

(3) Inefficiency and under-staffing of the police.

The most important of these causes is the first. For when public opinion is enough strong, Government and other institutions have to take notice, and also to take action.

Today, our main platform of ventilating grievances, the Calcutta Corporation, is temporarily out of action but there is no reason why, by letters to our national newspapers, or to the Legislators in the West Bengal Government and by public meetings should we not make our demands known.

But that is not enough. We must also show by our actions the intensity of our concern in the matter. This may be done by our giving support to the Safety First and similar other associations.

### Public Help

The volunteer organizations in the city as well as the civic servants can do a lot by visiting schools and demonstrating to the children the principles of Road Safety for pedestrians. Also, help may be volunteered to the Police at the road crossings and other busy places to keep away the joy-walkers.

Occasional attempts have been made to educate the public in the proper ways of road crossing but such attempts have been undertaken in a halfhearted manner.

First of all, education of the pedestrians in road sense must be organized; secondly, the footpaths of the streets must be cleared of hawkers, beggars and other obstructions and be used only for the purpose for which they have been constructed and thirdly, there must be enforcement of road laws for pedestrians even with threat of punishment.

And now, about the vehicular traffic all over the world it is a menace, but there is no reason why vehicular traffic will not be properly controlled.

### "RULES OF THE ROAD"

Here are a few of the "Rules of the Road" as given in the Indian Highway Code, which the vehicle drivers must strictly observe out of their own accord:

- 1. Keep to the left unless about to turn right or overtake.
- 2. Slow down or stop at corners and cross roads. Give way to major traffic or to pedestrians crossing the road from or into which you are turning.
- 8. Don't overtake at cross-roads, pedestrians crossing or blind corners.
- 4. Don't overtake when by doing so you must force either the other vehicle or the on-

are prepared to meet the cost. Damaged streets and roads should be repaired and the dramage system should be overhauled.

Rangoon Corporation was well-known in the east in the past for its efficiency but today it faces several handicaps and difficulties in the shape of lower revenues and greater responsibility.

### CITY OF MANDALAY

Mandalay, a former capital of Burma, and the second largest city in Burma, is now a city only in name. It was ravaged during the war and has been laid waste by a succession of insurgents. Today the people of Mandalay are struggling to restore their homes and their city to former greatness.

It was King Mindo, who created Mandalay almost out of a desert. He built the irrigation works which brought water into the moat surrounding his Palace from Sedaw through two canals, but he had planned for a population of 15,000 only. As the town expanded and the work of the reclamation of the river progressed, the two canals were silted up, resulting in water scarcity for the people of the town.

Mandalay town has been so badly destroyed that the layout and designs of the buildings and other civic amenities can now be made on a braind new scale. The installation of hydro-electric system at Sedaw could result in provision of ample water supplies for the entire city.

Government grants out of rehabilitation funds and private enterprise must come in to restore Mandalay to her former greatness.

### IMPROVEMENT OF DELHI

A committee of six, appointed by the Government of India, has reviewed the working of the Delhi Improvement Trust in order to suggest changes in its constitution for making it a fully representative body.

The capital's population has increased more than three times in the recent years. Delhi's total population today is estimated at over 1,700,000 The Government of India have a plan for removing some offices to the less crowded cities in the country. This plan is to be given effect to within this year.

Delhi has quite a considerable population of refugees to be housed. A firm of engineers, it is understood, has installed a factory for prefabricating houses at Delhi on a 14-year contract. Plans for two townships are in the process of completion.

### WARD I RATE-PAYERS' ASSOCIATION

The 19th Annual General Meeting of the Ward I Ratepayers' Association, Calcutta was held on Sunday last (18th June) at Sisir Kumar Institute (Baghbasar Street) under the presidency of Sree Anil Chandra Dutt, Solicitor, B.L.

The following gentlemen were elected as Office-Bearers for the year 1950-51:---

President: Kumar Dwijendra Krisna Deb; Vice-Presidents: Kaviraj Kissori Minhan Sastri, Dr. Agit Kumar Dutt, M.B., Shri Jitendranath Mukherjee, B.L.; Huny. Secretary: Shri Ranajit Coomar Mitter, B.A.; Assistant Secretaries: Shri Netic Roy, B.L. Advocate, Shri Sushil Ghoga B.A.; Transurer: Shri Kumari Datt; Hony. Auditors: Mesers. S. N. Basu Mallick & Co.

The Government of India have prepared a scheme for building an enclave for diplomatic missions, the W.H.O. and United Information Centres in the proposed extension of the south-western part of New Delhi.

### GREATER BOMBAY

The Bombay Government have drawn up a ten-year plan for slum clearance in the city. The Corporation of Bombay on account of difficulties like finance and legal rights over the areas could not do anything. Also the slum clearance business was associated with the extension of the city limits.

The Greater Bombay Scheme was inaugurated sometime ago.

The limits of Greater Bombay have been extended upto Jogeshwari and Ghatkopar. It has a population of four millions covering an area of 88 square miles as against the city's present population of about three millions with an area of 26 square miles.

It covers five municipal areas of Bombay, Parle-Andheri, Ghatkopar-Kirol, Kurla and Juhu, 28 villages of Bombay suburban districts and 14 villages of Thana district.

The suburbs have been given 18 seats in the Bombay Municipal Corporation which today has a strength of 117.

The area of Greater Bombay will provide a total income of Rs. 4,956,615 and will require an expenditure of Rs. 5,067,428. The general rate of tax in Bombay Municipal area is 14½ per cent and the rate varies from 6½ per cent to 14 per cent in the areas of Greater Bombay. There are variations in scavenger tax and water tax. Medical relief is very poor in the suburbs. The question that will be most difficult to tackle is taxation. The people in the suburbs would feel enhancement of taxes as a heavy burden.

The Government of Bombay have decided to grant Rs. 1 crore to the Bombay Municipal Corporation to implement their drainage and development schemes in the suburban areas recently brought under the jurisdiction of the Corporation.

Out of this grant, Rs. 10 lakhs will be used for construction of school buildings.

The Corporation has submitted to the Government a Rs. 5 crore development scheme for the suburbs. A sum of Rs 2,70,00,000 is required by the Corporation immediately for certain drainage schemes.

The Government are reported to have also decided to grant Rs. 5,50,000 yearly to the Corporation exclusively for development of education in the new suburban areas.

### NEW MAYOR OF LAHORE

Malik Shaukat Ali, a nominee of the Corporation Muslim League Party has been elected Mayor of Lahore.

### TOWN PLANNING IN U. P.

In the interest of better health and economic planning the Government of Uttar Prodesh are taking steps to prevent as far as possible, the hap-hazard growth of buildings in big cities, it is learnt.

With this end in view, the U. P. Town and Wilege Planning Office, which would, henceforth, start functioning as an independent Department, is proposing master plans or other town planning schemes.

sizeable buildings, such as courts, hospitals, sewage disposal plants, transport office and workshops at Lucknow, Banaras, Agra, Allahabad and Kanpur and in towns where the Town and Village Planning Office is preparing master plans or other schemes, should first be co-ordinated with the Town Planning Office and the construction be made after taking approval of the Town and Village Planning Department.

### ENGLISH MUNICIPAL BOROUGHS

Final results of Municipal Council election for control of 878 Municipal Boroughs in England and Wales have been as follows:

Conservatives—279 gains; 69 losses. Labour—128 gains; 207 losses. Liberal—15 gains; 37 losses. Independents—58 gains; 167 losses. Communists—No gains or losses.

### CITY OF MOHENJO-DARO

A great granary, which played the role of a State bank has been discovered at Mohenjo-Daro, the famous pre-historic city in Sind.

This granary is stated to be one of the great public buildings of the citadel and its discovery has added a new and imposing feature of interest to the excavated remains of this spectacular site. It was architecturally a very notable structure, originally over 150 feet long and twice enlarged, and still stands to a height of 20 feet above its foundations. It is, in fact, the best preserved of all the known buildings of the Indus Valley Civilization, which Mohenjo-Daro represents.

The granary consisted of a high, massively built brick substructure with a loading-platform at one end, where the grain was brought in by bullockwagon from the countryside and was hauled up to the storehouse within a brick-paved alcove prepared for the purpose. Above this loading-platform rose the granary itself, with its floor ventilated by a complex system of airducts. The superstructure had been largely of timber and has therefore vanished, but is partially represented by postpockets in the underlying brick work. The whole building belongs to Mohenjo-Daro in its prime, perhaps about 2300 B.C.

. Elsewhere along the margin of the citadel was excavated a group of defensive towers or bastions,

## HON'BLE SHRI A. P. JAIN VISITS MARWARI RELIEF SOCIETY

The Hon'ble Shri A. P. Jain. Minister for Rehabilitation, Government of India, accompanied by Shri B. G. Rao, Joint Secretary, Central Rehabilitation Branch Secretariat, paid a visit to the Marwari Relief Society on Tuesday, the 20th June.

Welcoming the guest Shri Tulsiram Saraogi, Hony. General Secretary of the Society referred to the East Bengal refugee rehabilitation programme taken up by the Society and described the various types of relief given by the Society to about 11 to 12 lakks of refugees in their different camps at Dhubulia, Ranaghat, Bongson, etc.

still standing upwards of ten feet high and constituting an impressive feature of a kind not previously recognized at Mohenjo-Duro. Much material was found during the exceptions, and when the long process of preparing its publication is completed, a special exhibition of it will be held in the national museum at Karachi.

### KANPUR MUNICIPAL BOARD

Acting on the basis of the Indian Health Ministry's advice, Kanpur Municipal Board at a recent meeting decided, as a first step towards the total removal of the riksha-system of conveyance, is prohibit the utilization of this conveyance between 11 a.m. and 3 p.m. during summer. The board appointed a sub-committee of three members to make proposals for discouraging riksha system in municipal limits of Kanpur.

Another resolution passed by the board urges the U.P. State Government to implement its off-repeated assurance for elevating the status of Kanpur Municipality into that of a full-fledged Corporation.

#### DARJEELING DISASTER

Many well known localities in Durgeling town are reported to have been affected in the recent land slide such as Chownastha, Jalapuhar. North Peint, Daroga Bazar and Chandmari, as also points near the Bloomfield Police Lines, Victoria Hospital and the Railway Station. Casualties so far reported have been more than 100.

Occupants of houses in zones considered dangerous have been evacuated to safer places such as schools and other astitutions. The Deputy Commissioner and the Superintendent of Police have left their bungalows.

About 500 homeless people in Darjeeting have been accommodated in Army barracks. Prisoners in Darjeeting Jail have been brought to town and kept under guard by the pail staff, assisted by the police.

Oakdene, where the Government Works and Buildings Department is housed, is reported to be in danger. Covernment House is unaffected.

Besides the electric power supply, the water supply systems of Darpeling and Kalimpong has, been disrupted. The Army is assisting the civil authorities to clear the debris, restore the water and electricity supply systems and reopen the Darpeling Lebong Road.

The dislocation of road and rail communications has given rise to a serious situation regarding food supply in the district. The Government are considering the possibility of supplying Darjeeling. Kalimpong and other places by air. For this purpos, they are arranging a reconnaissance flight with a local sir company.

The police are pairoling the affected areas to prevent looting and theft.

H. E. Dr. Karju, the Governor, is reported to be going and the affected areas daily, inspecting rescue and relief we be being done by the police and the military.

Telegraph and telephone communications between Calcutta and the affected towns continue disrupted, and even the wireless link maintained by the Posts and Telegraphs Department with Darjeeling has not been functioning since June 12. The only communication possible now is by police wireless.

FOOTBALL FANS, who had failed to enter the ground where the match between East Bengal and Mohun Bagan was played on the 17th June last attacked the police on guard with stones, and over a dozen officers and men vere injured.

The police made repeated lathi charges and fired two tear gas shells to control the crowd, some of whom were injured.

Thirty-five arrests were made in that connection.

A 46-MAN JAPANESE DELEGATION to the World Assembly for Moral Re-Armament passed through Dum Dum early last week on their way to Caux, near Genevalin Switzerland.

The delegation—the largest and most representative civilian group ever organized from post-war Japan—included several members of the Diet Governors of six leading prefactures, four Mayors, bankers, insurance magnates and some leading representatives of industrial and labour unions. There were also two women members,

BAHADUR SINGH ACADEMY OF INDIAN ARCHITECTURE AT SINGHEE PARK, Ballygunge, was in augurated last week by Dr. Syama Prasad Mookerjee.

In this connection an exhibition on rural and urban development planning was also opened by Dr. Mookerjee.

The Academy, which is named after the well-known Calcutts millionaire late Bahadur Singh Singhee, aims at fostering an all-round development of Indian architectural arts and crafts and at imparting practical training to student apprentices in the study and practice of Indian architectural composition and construction. If required, the Academy will also give advice and guidance in respect of designing and executing religious structures in genuine Indian styles properly developed to suit modern conditions of strength, economy, utility and sanitation. It would also try for a renaissance of Indian temple architecture.

The Academy at present is prepared to undertake the planning and designing of temples, viharas. Dharamsalas memorial and religious structures in orthodox styles and in compliance with 'shastric' injunctions. With the collaboration of the Archaeological Department it would plan judicious renovation of old temples and would train Indian youths in actual construction work like masons. The chief object of the Academy is to save and preserve the sanctity of Indian temples from the onslaughts of foreign motifs and ideals.'

The Academy at present is being run on the financial help given by the sons of late Bahadur Singh Singhee.

Going to inaugurate the Academy Dr. Mookerjee stressed the need for patronage of Indian Architecture by the Government.

### MANUFACTURERS' FEDERATION FORMED

With a view to bringing together all manufacturers' association of West Bengal into one unit the "Federation of Manufacturers' Associations" has recently been formed at a recent meeting held at 135, Canning Street, Calcutta. Shri R. N. Sharma presided. A Sub-Committee has also been set up to frame rules and regulations governing the new body.

### For the City of Calcutta for the week ending 10th June 1950

CITY OF CALCUTTA (TOWN & SUBURBS)

The total number of deaths registered during the weeks was 1026 against 1128 and 1203 in the two preceding weeks and higher than the corresponding week of the last year by 419. The general death\_rate of the week was 17.84 per mille.

### Town (Wards 1-27)

The number of deaths registered during the week ending 10th June, 1950 was 859 against 905 and 1001 in the two preceding weeks. There were 99 deaths from cholers, against 109 and 146 in the two preceding weeks. There were 80 deaths from small-pox during the week against 90 in the previous week. There were 2 deaths from influenza against 1 in the previous week. The mortality from fevers and bowel-complaints amounted to 42 and 119 respectively against 52 and 114 in the preceding week. The general death-rate of the week was 17.06 per mille per annum.

There were 41 imported deaths. Excluding these, the death-rate of the Town was 16.25.

There were 142 deaths from respiratory diseases against 156 in the previous week.

There were 57 deaths from tuberculosis against. 59 in the previous week.

### Suburbs (Wards 28-32)

The number of deaths registered was 167 against 22.7 and 202 in the two preceding weeks. Of these, 13 were from cholera, 28 from small-pox, nil from influenza, 10 from fevers, 26 from bowel-complaints and 27 from respiratory diseases. The death-rate of the suburbs (or added areas) was 23.35 per mille.

There were nil imported deaths. Excluding these, the death-rate was 23.35.

There were 4 deaths from tuberculosis against 7 in the previous week.

CALCUTTA ZOOLOGICAL GARDEN has lately acquired some new animals and expects to receive some more in near future.

A pair of giraffe from Mombasa (Africa) arrived at Alipore scological Garden last week end.

The pair started on their voyage on May 29 last.

Since 1945 the Alipore Zoo was without these popularanimals. The authorities have succeeded in getting this pair on exchange basis.

A giant Salamander—largest of all living amphibians in the world and a pair of Japanese bear are expected to reach here shortly by air. These will be a free gift of Japan to India.

A small consignment of snake consisting of Sand-Boss has reached the Zoo by air from Bombsy.

K. C. LAHIRI, Acting Superintendent.

Lake Road Market, The 22nd June, 1950

### Disposal of All Clothings of the Dead

NOTICE

In compliance with the provisions of Section 481 of the Calcutta Municipal Act, 1923, it is hereby notified for general information that the Administrative Officer of the Corporation of Calcutta proposes to make the following bye-laws under Section 478 of the said Act for regulating the disposal of all clothings, beddings, etc., brought at the Burning Ghats or Burini Grounds or other places for the disposal of the dead along with dead bodies:—

- 1. Every person bringing a corpse of a deceased person for burial or cremation or for disposal otherwise to a burial or burning ground or other place for disposal of the dead, and particularly the person signing the Register of Peaths as an informant, shall cause all cloth, bedding and other articles, which are brought to such ground and which have come in contact with the dead body or the bier, to be destroyed to the satisfaction of the Sub-Registrar of the said burial or burning ground or other place for the disposal of the dead.
- 2. Any such person desirous of making a gift of new or unused clothing, bedding or other articles to priests, barbers, dones or such other persons shall bring the same in such manner as not to be in contact with the dead body or the bier and may give away the same with the permission of the Sub-Registrar of the said Burial or Burning Ground or other place for the disposal of the dead. The decision of the Sub-Registrar that the clothing bedding or articles proposed to be gifted is or is not new or unused and has or has not come in contact with the dead body or the bier shall be final.

  3. Every person found guilty of a breach of any of the foregoing bye-laws shall be punished with fine which may extend to Rupees One Hundred.

A printed copy of the bye-laws is open to public inspection free of charge. It may also be purchased on payment of a fee of annas two from the Keeper of Records, Central Municipal Office, on any working day between the hours of 12 neon and 3 p.m.

Any person having any objection to the proposed bye-laws should submit the same on or before the 18th July, 1960 after which date, the proposed bye-laws will be further proceeded with.

R. S. TRIVEDI. Chief Executive Officer

Central Municipal Office, The 15th June, 1950

### CLUE TO QUARE-PROOF CONSTRUCTION

Delicate recording and measuring instruments are being buried in the foundations and structural supports of a new building in the United States. They are expected to help give engineers the know-how to build earthquate-proof buildings for the future. The new building is the engineering laboratory now under construction on the campus of the University of California, in the city of Los Angeles.

The instruments will provide engineers with a continuing record of how various parts of the building withstand ordinary stress and strain, and such extraordinary strains as earth tremors occurring in the vicinity.

The interactions include theory to minsure the trees on concrete) steel gages to test the etrains on attractural steel, pressure gages to register the ability of the foundation to bear tremendous weights; and a seismograph (the instituuake recording instrument):

Information from the various devices will be recorded automatically by an oscillograph, to which they are connected. According to the American weekly, Science News Letter, thus is the first time that "an entire building can be used as a research tool in a major study of the effects of earthquakes and everyday strain upon atructural design."—USIS.

BENGAL CHEMICAL & PHARMACEUTICAL WORKS LD **CALCUTTA** BOMBAY KANPUR 11

### MARKET NOTICES

1. It is recommended that coolies should be paid at the following rates:—15 Minutes—Two annas. # Hour—four annas. 1 Hour—sight annas. Every succeeding hour or part of an hour—four annas.

2. Coolies for carrying bazar purchases are obtainable at all the principal entrances and care should be taken that only coolies bearing number badges are engaged. For the current half-year "A" class coolies have been allowed a Navy blue arm badge with red numbers from Nos. 1 to 400. occurrence.

3. Any complaints about coolies should be made at the Superintendent's Office giving the number of the cooly.

4. All complaints relating to the conduct of vendors should be made to the Superintendent. No action can be taken where the articles in dispute have been removed from the shop premises or in regard to transactions which are not brought to the notice of the Superintendent at the time of 5. To avoid conflicts of statements both as regards the goods purchased and the nature of the sales, customers are requested to insist on getting a voucher, as far as practicable.

6. If goods are taken "on approval" customers are recommended to obtain a voucher to that effect stating the

6. If goods are taken 'on approval' customers are commended to obtain a voucher to that effect stating the

price paid. 7. Any articles lost or found in the market should be reported at the Superintendent's Office. 8. No dogs, bioycles, tricycles, or perambulators are allowed inside the market.

of the market.

9. For the convenience of the public a stand is provided at the south-west corner where the visitors can keep their bicycles in charge of the lessee thereof on payment of a fee of 0-1-6 for a Bicycle and 0-3-0 for a Motor Cycle, hatween 6 a.m. to 7 p.m.; between 7 p.m. to 12 a.m. Bicycle 0-30, Motor Cycle 0-6-0 and after midnight Bicycle 0-12-0; Motor Cycle Re. 1-8-0. The Corporation does not take any liability in this connection. this connection.

this connection.

10. Customers are requested that if they suspect any weight used by any vendor of the market to be short, they will bring the matter immediately to the notice of the Superintendent when the weight will be duly tested in the Office and the vendor punished if it is found short.

11. The public and the shop-keepers of the market are requested to assist in the mitigation of the beggs-nuisance by refraining from giving alms of any description within the market.

market.

12. Commers are requested to examine the coins, distained in the course of transaction, before they leave the shop. Ordinarily no action can be taken against the shop-keeper if any spurious coin is alleged to have been detected. after they leave the shop.
